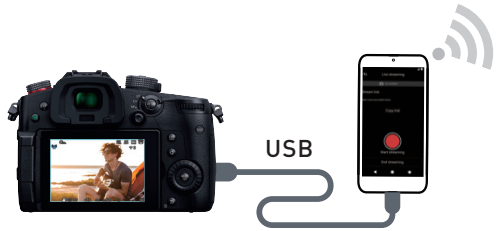
YouTube LIVE YouTube 5 ~ 6

Facebook LIVE LIVE 7 ~ 8

Use USB Tethering with a Smartphone 9



RTMP/RTMPS 10 ~ 11

YouTube LIVE YouTube 12 ~ 13

Facebook LIVE LIVE 14 ~ 15

Set up in advance

Live Streaming Settings Using a PC and SD Card

Advance Preparation | Set up Streaming on PC and Load into the Camera 16 ~ 17

Use the Wireless IP Streaming 18 ~ 19

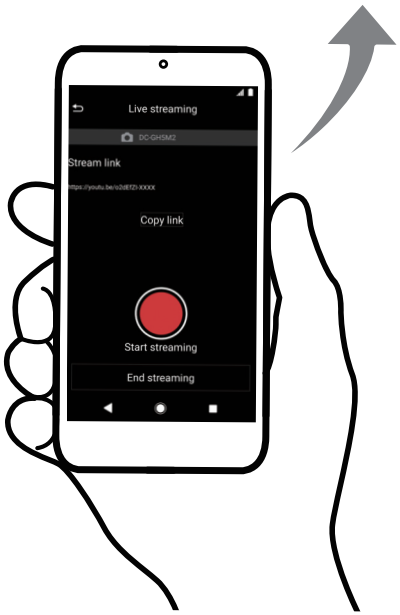
Use USB Tethering with a Smartphone 20 ~ 21

•YouTube" and the "YouTube logo" are registered trademarks of Google Inc. •Facebook" is a registered trademark of Facebook, Inc.

THREE WAYS to Live Stream Using the “LUMIX Sync” Smartphone App

Panasonic

LUMIX Sync



Streaming with RTMP/RTMPS

Setting method for live streaming using stream URL and stream key.
In addition to YouTube and Facebook, it is possible to configure settings with various social streaming platforms that are compatible with RTMP/RTMPS.

*When you wish to schedule a post or if you have less than 1,000 subscribers on YouTube, connect with RTMP/RTMPS.

Check
Wi-Fi 3 ~ 4
USB 10 ~ 11

Streaming with YouTube LIVE

YouTube

This is a setting method to easily conduct live streaming by logging into your YouTube account so that you can omit inputs such as stream key.

Caution Due to YouTube's Terms of Service, this setting is only possible if you have over 1,000 subscribers.

Check
Wi-Fi 5 ~ 6
USB 12 ~ 13

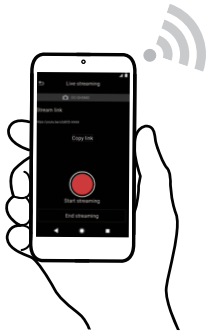
Streaming with Facebook LIVE

LIVE

This is a setting method to easily conduct live streaming by logging into your Facebook account so that you can omit inputs such as stream key.

Check
Wi-Fi 7 ~ 8
USB 14 ~ 15

•Live streaming to the platforms that comply with RTMP/RTMPS is basically possible (Compatibility with all the platforms is not guaranteed.) There may be the cases where the live streaming is not possible when the service of the platform changes. For more information, please refer to the terms and conditions of the platform.
•Since the transmission speed of live streaming varies depending on the Internet environment, smartphone performance, etc., we recommend that you conduct a transmission test in advance.
•YouTube" and the "YouTube logo" are registered trademarks of Google Inc. •Facebook" is a registered trademark of Facebook, Inc.



1 Advance Preparation Pairing Your Camera and Smartphone

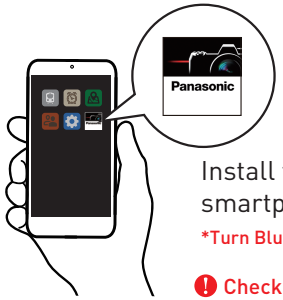
Preparation when using a smartphone

- Supported OS (as of April 2022) Android™: 7.0 or later (The Bluetooth® function requires your device to use Android 5.0 or later and Bluetooth 4.0 or later. Excluding some models that are not compatible with Bluetooth Low Energy.), iOS: 12 or later.
- Android is a trademark or registered trademark of Google Inc.
- App Store is a service mark of Apple Inc.

■ GH5Ⅱ

❗ Check the remaining battery level of your camera!

■ Smartphone



Install the “LUMIX Sync” smartphone app

*Turn Bluetooth ON.

❗ Check the remaining battery level and connection status of your smartphone!

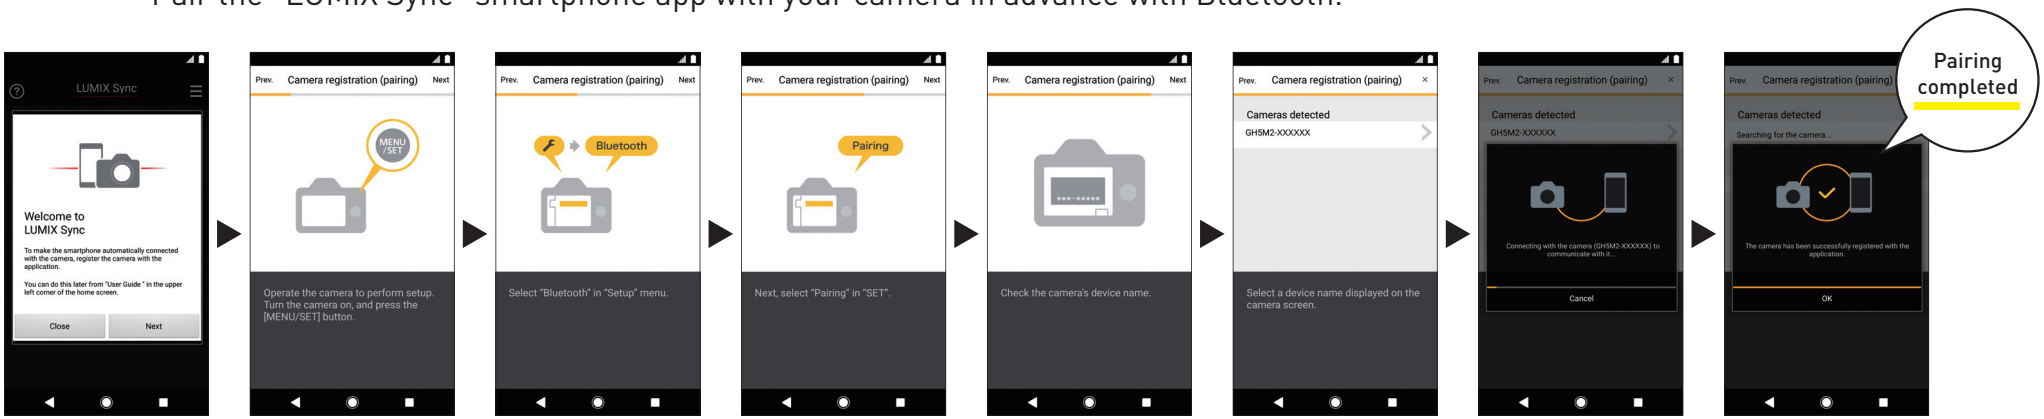
Check FAQs

Frequently asked questions from customers are introduced at the LUMIX Customer Support page.

https://panasonic.jp/support/global/cs/dsc/faq/dc_gh5m2/index.html

Connect your camera and smartphone

Pair the “LUMIX Sync” smartphone app with your camera in advance with Bluetooth.



[Initial screen after installing the “LUMIX Sync” smartphone app]

[Set the connection of the camera and smartphone with Bluetooth]

[Select the camera]

[Pairing may take a few minutes]

3 Wireless IP Streaming

Streaming with RTMP/RTMPS

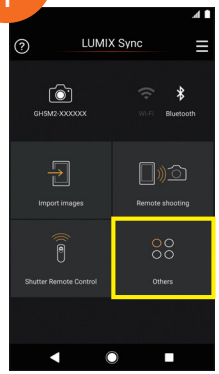
•YouTube" and the "YouTube logo" are registered trademarks of Google Inc. *Here we will be explaining using a streaming setting using YouTube Studio as an example. *When you wish to schedule a post or if you have less than 1,000 subscribers on YouTube, connect with RTMP/RTMPS. *Please be sure to confirm the terms of use of the platform before using the streaming service.

Panasonic

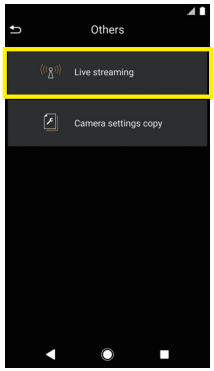
This is a setting method for live streaming using platforms compatible with RTMP/RTMPS such as YouTube.

STEP 1

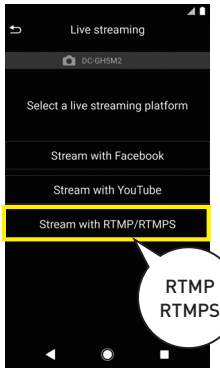
Launch LUMIX Sync and start settings



[Select "Others"]

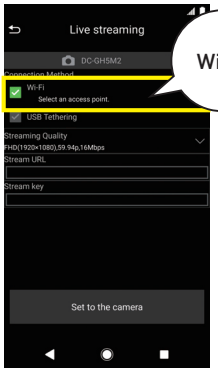


[Select "Live streaming"]



[Select "Stream with RTMP/RTMPS"]

Connection method

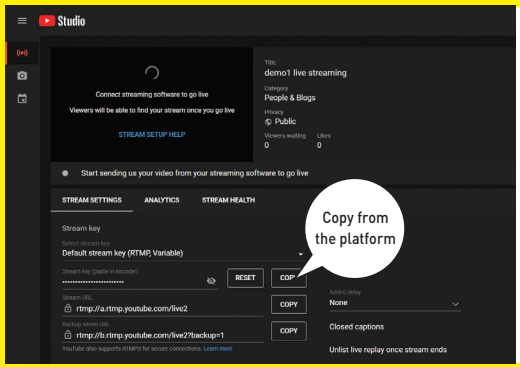


[Select "Wi-Fi"]

STEP 2

ADVANCE PREPARATION

Configure settings from the social streaming platform



① Set the privacy settings and date and time.
② Set other details.

③ Copy the stream URL.
④ Copy the stream key.

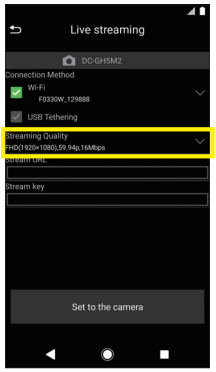
⑤ Copy to your email, etc. and share with an app.

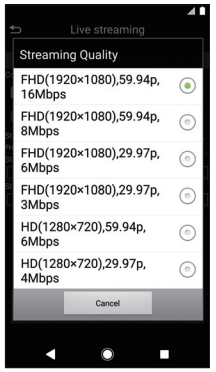
STEP 2

Wi-Fi settings

[Select a wireless access point]

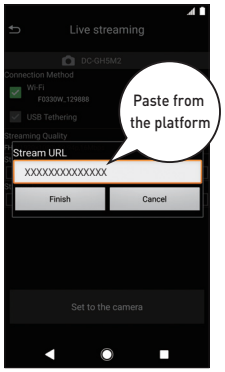
Image quality settings

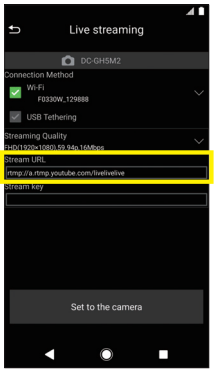




[Set the streaming quality]

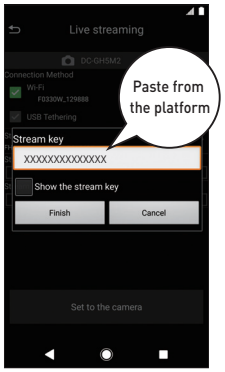
Stream URL settings

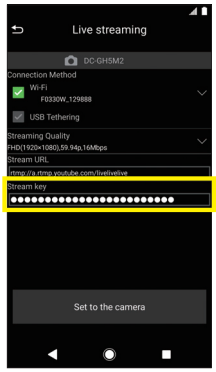




[Obtain a stream URL from the social streaming platform and configure settings]

Stream key settings





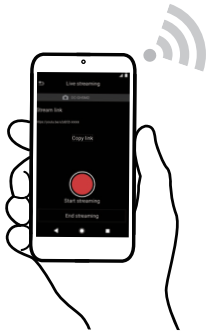
[Obtain a stream key from the social streaming platform and configure settings]

STEP 3
NEXT PAGE

! If a list of smartphones that you wish to connect is not displayed, turn the tethering function "OFF/ON" again.

! Confirm the upstream speed of the network that you are using before streaming and select the streaming quality.

*When streaming using a smartphone network, a tethering service contract for your carrier is required.



4 Wireless IP Streaming

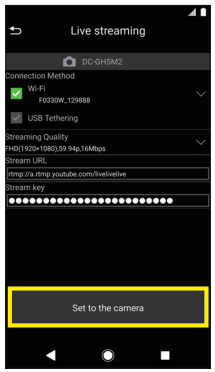
Streaming with RTMP/RTMPS

•YouTube" and the "YouTube logo" are registered trademarks of Google Inc. *Here we will be explaining using a streaming setting using YouTube Studio as an example. *When you wish to schedule a post or if you have less than 1,000 subscribers on YouTube, connect with RTMP/RTMPS. *Please be sure to confirm the terms of use of the platform before using the streaming service.

Panasonic

This is a setting method for live streaming using platforms compatible with RTMP/RTMPS such as YouTube.

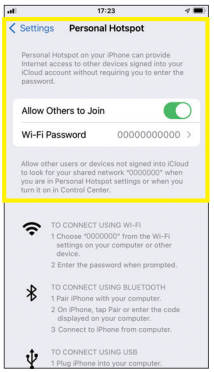
STEP 3 Set from LUMIX Sync to a camera



[Set to the camera]

[Turn the camera's streaming function ON]

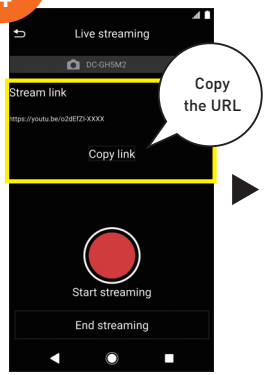
Enable "Tethering" on your smartphone



*Make sure the smartphone is tethering and then start streaming.

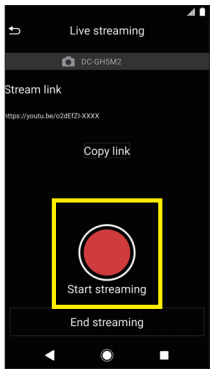
STEP 4

STEP 4 Spread the URL and start streaming



[Copy the stream URL]

Announce the URL with social media, email, etc.

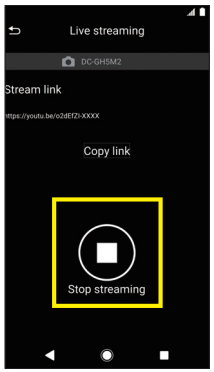


[Start live streaming]

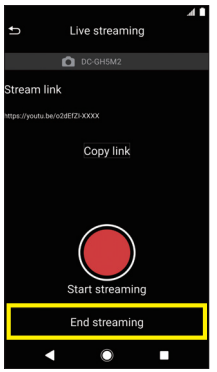
[Blue frame indicator during live streaming]

*The blue frame indicator can be switched ON/OFF.

Stopping and ending streaming



[Stop live streaming]



[End live streaming]
