

Building sustainability beyond ventilation.

WhisperGreen vent fans contribute to Panasonic's worldwide green mission.

- 300 – 500% more energy efficient than ENERGY STAR® standards as of June 13, 2008
- Enhanced DC motors expend less energy and are among the highest CFM/Watt in the industry
- Designed to meet ASHRAE 62.2 standards

eco ideas

Panasonic's worldwide commitment to the environment and our future.

“eco ideas” for products:

“We will produce energy-efficient products.” We are committed to developing industry-leading energy conserving products and will eliminate our least energy efficient models by 2009.

“eco ideas” for manufacturing:

“We will reduce CO2 emissions across all our manufacturing sites.” Our aggressive plan to reduce CO2 emissions by 300,000 tons will be achieved by 2010 while still increasing production.

“eco ideas” for everyone:

“It is our responsibility to help encourage the spread of environmental activities throughout the world.” Around the country and worldwide, Panasonic employee volunteers are pitching in to clean up the local environment, save energy and create a more sustainable future.

Panasonic ideas for life
