Remarkably Detailed and Truly Natural Full-HD Images
All the Beauty of Full HD. Ideal for Lectures and Presentations Requiring Detailed Images.

In addition to its Full-HD LCD panel, the PT-LZ370 generously employs unique Panasonic technologies in its optical and signal-processing systems to produce captivating images. It is the ideal projector for presentations with highly detailed images, and projecting Blu-Ray disc and increasingly popular HD contents. Offering a variety of functions, such as 2x zoom and a wide lens shift, for permanent installation use, the PT-LZ370 is ready for a host of applications, starting with classrooms and meeting rooms, and extending to uses that demand high color fidelity and fine detail reproduction, such as engineering, R&D, art history, and film classes/meetings.

Outstanding Images with Stunning Full-HD Quality

High-Contrast, High-Quality Images from a Full-HD LCD Panel and Dynamic Iris Pro
The Full-HD (1920 x 1080-pixel) LCD panel of the PT-LZ370 produces the meticulous detail of Full-HD images. With its “normally black” system, the liquid crystal molecules are vertically aligned when no power is applied, to dramatically reduce unwanted light. The Dynamic Iris Pro also adjusts the brightness of the light source to match the image. The brightness of each scene is analyzed and the lamp power, gamma curve, and iris are adjusted accordingly frame by frame. This achieves a high contrast ratio of 10,000:1, providing a wide dynamic range for added beauty in both dark and bright scenes.

Daylight View Premium for Better Color Perception
This function corrects the image quality to project sharp, clear images even in brightly lit rooms. A luminance sensor measures the ambient brightness, and a real-time adjustment function optimizes sharpness and brightness according to the surroundings. This adjustment function also works together with the Detail Clarity Processor 3 to enhance the realism and vividness of projected images. This makes images easier to view and offers high contrast.

3,000-lm Brightness
The PT-LZ370 features a high-power 280 W UHM lamp. Optimal utilization of this light source achieves a full 3,000 lumens of brightness, for sharp, crisp images.

Detail Clarity Processor 3 Gives Natural Clarity to Even the Finest Details
After a two dimensional analysis of the video signal’s frequency in each scene and extracting information on the distribution of the super-high-, high-, medium-, and low-frequency image components, the new circuit optimizes the sharpness of each image portion based on the extracted information. The resulting images have a more natural, lifelike expression than those of previous image-processing methods.

Full HD
3,000 lm
**Waveform Monitor for Precise Calibration**

When the output level of the source device fluctuates due to the performance of the device or its cable connections, the original black and white levels of the image content cannot be reproduced. With the PT-LZ370, you can view the waveforms on the screen and adjust the settings either automatically or manually as you prefer.

**DICOM Simulation Mode**

This imaging mode is similar to DICOM Part 14, which is a medical imaging standard. It reproduces X-ray images with remarkable clarity. It also allows information to be shared by many viewers on a large screen, such as during medical conferences or training courses.

**Full 12-bit Digital Signal Processing Achieves Smooth, Natural Gradation**

The PT-LZ370 handles full 12-bit digital image processing. It faithfully reproduces even subtle hues and brightness variations. The resulting smooth gradation renders natural images with finely detailed nuances.

**Installation and Operation Flexibility**

**2x Zoom Lens and Wide Horizontal/Vertical Lens Shift**

The 2x zoom lens and horizontal/vertical lens shift let you accommodate a wide range of room sizes and shapes. When lights or ventilation holes are located in the ceiling mounting site, you can simply relocate the projector to avoid them. And when replacing existing projectors, this can reduce costs by permitting the use of existing mounting positions and cabling.

**Abundant Connection Terminals, Including HDMI**

Interfaces include two sets of HDMI input. The serial terminal (RS-232C) has an Emulate function that lets you continue using existing control systems when replacing previous Panasonic models. It is also possible to output audio during Standby mode. This is convenient when connecting an external audio system through the projector.

**Easy Remote Monitoring and Control over a LAN**

A web browser on a computer connected through a wired LAN system lets you remotely operate projectors and check their status. An e-mail messaging function can also notify you when a lamp needs replacement, and indicate the overall projector status. In addition, Multi Projector Monitoring and Control Software is available for monitoring and controlling multiple Panasonic projectors from a single PC. The wired LAN terminal is compatible with PJLink™ (class 1), an open protocol that is used by many manufacturers, to enable integrated control of systems that contain different brands of projectors.

**Crestron RoomView™**

The LAN terminal allows a computer connected to the network to use Crestron RoomView™ application software to manage and control system devices.

**Superb Basic Performance**

**Eco Management Functions**

A number of functions are provided to reduce power consumption. They adjust the brightness according to ambient light conditions, and reduce the lamp power when there is no signal input or the projector is in AV Mute mode. You can easily set the Eco Management functions according to operating conditions by using the ECO button on the remote control.

**Up to 3,000-Hour Lamp/Filter Replacement Cycle**

The lamp and air filter both have replacement cycles of up to 3,000 hours. This reduces the amount of bothersome maintenance necessary over a long period of time, cuts maintenance costs, and helps to lower the environmental impact. For easy maintenance, you can replace the filter from the side and the lamp from the top of the projector. The filter and lamp are easily replaced even after the PT-LZ370 is installed on the ceiling.

**Ecology-conscious Design**

Panasonic works from every angle to minimize environmental impact in the product design, production and delivery processes, and in the performance of the product during its life cycle. The PT-LZ370 projector reflects the following ecological considerations:

- No halogenated flame retardants are used in the cabinet.
- Non-coated cabinet for easy recycling.
- Lead-free solder is used to mount components to the printed circuit boards.
- Lamp power switching further reduces power consumption.
- Standby power consumption of only 0.08 W.

**Additional Features**

- "ECO" button on the remote control.
- An Auto Off Timer switches the projector to Standby mode when no input signal is received for a preset time.
- The usage environment affects the duration of the filter.
- The usage environment affects the lamp replacement cycle.

---

*1 This product is not a medical instrument. Do not use it for actual medical diagnosis.
*2 Requires menu selection.
*3 Audio monitoring requires external speakers and an audio amplifier
*4 The usage environment affects the lamp replacement cycle.
*5 The usage environment affects the duration of the filter.
*6 When the standby mode is set to ECO, network functions such as power on over the LAN will not operate. Also, only certain commands can be received for external control using the serial terminal.
Other Valuable Features
- Scheduling function
- Direct power off
- 15 m (49 ft) long-range wireless remote control
- Quiet, 29 dB*7 operation
- Security features: user password, text superimposing and startup logo*8 (default or original)
- Whiteboard and blackboard modes
- AV mute for image/sound muting
- Selectable 17-language onscreen menu
- Built-in closed caption decoder

Specifications
- Power supply: 100–240 V AC, 50/60 Hz
- Power consumption: 350 W (0.08 W with STANDBY mode set to Eco) / 7 W with STANDBY mode set to Normal, 16 W when STANDBY mode set to Normal and AUDIO MUTE is ON.

- LCD panel
  - Panel size: 18.7 mm (0.74 in) diagonal (16:9 aspect ratio)
  - Display method: Transparent LCD panel (x, 3, RGB)
  - Drive method: Active matrix
  - Pixels: 2,073,600 (1,920 × 1,080) × 3, total of 6,220,800 pixels

- Lamp
  - Luminous output: 280 W UHM lamp
  - Lens:
    - Manual zoom range: 1.2×
    - Manual focus range: F 2.0–3.4, 121.5–43.0 mm
  - Projection distance: 1.02–7.22 m (40–300 in)
  - Throw distance: 1.11–11.45 m (4 ft 6 in to 38 ft 3 in)

- Colors:
  - Full color: 1.073 (R2G4/B2)

- Brightness: 3,000 lm
- Center-to-center uniformity**: 85%

- Contrast ratio**:
  - 10,000:1 (all white, dynamic iris on pro mode)

- Scanning frequency
  - H: 25–162.0 kHz, displayable resolution: VGA (640 × 480): 15.7 kHz, full HD: 60.5 Hz
  - RGB: 480: 15.7 kHz, 525: 56.25 kHz, 625: 50 kHz, 720: 50 kHz, 1080: 50 kHz, 1125: 420 kHz, 1250: 25 kHz, 1350: 20 kHz

- Resolution: 1920 × 1080 / 256 colors
- Contrast enhancement: 256 levels

- Optical axis shift**
  - Vertical: ±50 %, horizontal: ±25 %

- Keystone correction range
  - Vertical: ±30%

- Installation
  - Ceiling, front, rear, menu selection

- Menu language
  - English, French, German, Spanish, Italian, Chinese, Korean, Russian, Swedish, Dutch, Norwegian, Polish, Czech, Hungarian, Portuguese, Thai, Japanese

- Terminals
  - HDMI IN
    - HDMI 19-pin x 2, Deep Color, compatible with HDCP
    - COMPONENT IN
    - HDMI 19-pin x 1, Deep Color, compatible with HDCP
    - VIDEO IN
    - S-VIDEO IN
    - AUDIO IN
    - AUDIO OUT
    - SERIAL IN
    - LAN

- Power cord length: 2.0 m (6 ft 7 in)
- Cabinet materials: MDF (APC), ABS
- Dimensions (W × H × D): 470 mm × 155 mm × 400 mm (18-1/7 in × 6-1/3 in × 15-7/8 in)
- Weight**: Approx. 8.6 kg (19.0 lbs)

- Operation noise**: 35 dB (LAMP POWER: NORMAL), 29 dB (LAMP POWER: ECO)

- Operating temperature
  - 0–40 °C (32–104 °F)

- Operating humidity
  - 20–85 % (no condensation)

- Supplied accessories
  - Power cord (x 1 for PT-LZ370G1, Wireless remote control unit (x 1), Batteries for remote control (AA/R6 type x 2), Software CD-ROM (Logo Transfer Software, Multi Projector Monitoring and Control Software) (x 1)

- Not included
  - Remote control unit (AA/R6 type x 2)

Other Features
- Security functions: user password, text superimposing and startup logo (default or original)
- Whiteboard and blackboard modes
- AV mute for image/sound muting
- Selectable 17-language onscreen menu
- Built-in closed caption decoder

Optional accessories

- ET-PKA110H Ceiling mount bracket for high ceilings
- ET-PKA110S Ceiling mount bracket for low ceilings
- ET-LAA110 Replacement lamp unit

NOTES ON USE
1. Do not install the projector in locations that are subject to excessive water, humidity, steam, or oily smoke. Doing so may result in fire, malfunction, or electric shock.
2. The projector uses a high-voltage mercury lamp that contains high internal pressure. This lamp may break, emitting a large sound, or fail to illuminate, due to impact or extended use.
3. The projector uses a high-wattage lamp that becomes very hot during operation. Please observe the following precautions:
   - Never place objects on top of the projector while it is operating.
   - Make sure there is an unobstructed space of 100 mm (3-15/16 in) or more around the projector’s air intake openings.
   - Do not stack projector units directly on top of another for the purpose of multiple (stacked) projection. When stacking projector units, be sure to provide the amount of space indicated between them. These space requirements also apply to installations where only one projector unit is operating at one time and the other unit is used as a backup.
   - If the projector is installed in an enclosed space, ensure that the projector’s intake and exhaust openings are not sucked into the intake openings.
4. If the projector is to be operated continuously 12 hours or more, lamp replacement cycle duration becomes shorter.
5. The lamp replacement cycle duration becomes shorter if the projector is operated repeatedly for short periods (one hour or less).
