

## Fully Automatic Coffee – at the Tip of Your Finger

### Precision Personalisation

Choose your favourite coffee and customise it to your own personal taste. Simply select your preferred coffee strength, coffee/milk balance, temperature, grinding degree and froth amount.

### Compact Elegance

The smart design in a compact body perfectly complements any modern kitchen, with space-saving front access to the water tank, waste container and brewing unit for easy brewing and cleaning.

### Modern Touch-Screen Design

Making the perfect espresso just got easier with the intuitive colour touch screen.

### Everything Important Up Front

The Panasonic ZA1 is operated entirely from the front panel for your convenience. Whether you're topping up the water tank, emptying the waste container, refilling the beans, or cleaning the machine, everything important is up front.

## Your Taste – Your Coffee

A good friend will always know how you like your coffee – and so will your next coffee machine. The innovative Panasonic ZA1 makes every coffee exactly according to your personal taste. Just programme your personal settings and your espresso, coffee, cappuccino or latte will taste just the way you love it – with the perfect amount of water and coffee, just the right temperature and more. [More details at: www.panasonic.com](http://www.panasonic.com)

### NC-ZA1

COLOUR

### Fully Automatic Espresso Maker

- Precision personalisation
- Modern touch-screen design
- Compact elegance
- NC-ZM1: Cooled milk container

**MJ-L500**

FEATURES

COLOUR

**Versatile Slow-Speed Juicer**

- Slow speed juice press technology for maximum vitamin preservation and juice extraction rate
- Frozen attachment for 100% natural sorbet from frozen fruit etc.
- Compact design and quiet operation for great social experience
- Quality stainless steel press screw tip for durability

Frozen attachment

**Make it Fresh or Frozen**

The innovative Panasonic slow-speed juicer is a joy to use – compact, quiet and easy to handle and to clean. Reward yourself and your family with healthy juices and frozen desserts! [More details at: www.panasonic.com](http://www.panasonic.com)

Condition of juices after squeezing

**Long-lasting Freshness**

Slow squeezing suppresses the entry of air, preventing oxidation and changes in colour and taste. The juice does not separate as time passes, and the flavours and nutrients are preserved longer.

**Delicious Frozen Desserts**

Use frozen fruit to create delicious frozen desserts or half-frozen drinks in an instant – your family will love this! Add other ingredients like yoghurt to make healthy, refreshing treats full of natural taste and nutrients.

**Slow Juicing Preserves Nutrients and Enzymes**

The stainless steel tipped 'press' minimises heating of the food, meaning the nutritional content and quality of the food are maintained. As a result, nutrients, flavours and enzymes will be preserved much better.

Peaches, apricots, etc.

Ginger, parsley, etc.

Soybeans and other beans

**Juice a Wide Variety of Food**

Some types of food are not perfectly suitable to high-speed juicing – these include fruit with little moisture and lots of pulp, vegetables with a high amount of dietary fibre or small items like beans. The millstone-like action of the slow juicer handles almost all kinds of food with ease.

## Healthy and Delicious

Homemade juice from fresh fruit and vegetables is not only delicious, but a perfect source for energy and health every day. Thanks to the new Panasonic juicers, preparing your daily supply of fresh juice becomes a real pleasure!

### 120°-rotating Spout

With the full metal spinner producing more juice from your ingredients, there's naturally more to go around. The 120°-rotating spout allows you to line up the glasses to be filled one after the other while rotating the spout easily – no more juggling glasses – or to just get going with a single drink without having to move the product.

### Drip Stop

Sometimes the little details can make life so much easier – and a lot less messy. By simply pushing the spout up, you can stop juice drips, leaving no mess and no unnecessary cleaning.

## Powerful, Reliable Juicers

- Full plastic spinner with Japanese blade engineering
- Whole apple feed tube
- 1-speed switch
- 120-degree swivel spout with anti-drip

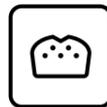

## Must-have Features for Your Bread-baking Needs

### Sourdough Bread

Sourdough bread requires a long natural fermentation of the dough using lactobacilli and minimal yeast. It has a mildly sour taste and can easily be baked with a special programme.

### Soda Bread

Soda bread is usually made of wheat, barley or oatmeal with the addition of baking powder. It can be lightly sweetened and glazed.

### Artisan Bread

A special programme allows you to bake fantastic looking and tasting artisan bread with the addition of vegetables, cheese or other ingredients.

### Diamond-Flouro-Coated Bread Pan

No more sticky pans – the surface of the bread pan and blade is covered with diamond particles which are twice as tough and scratchproof when compared to conventional pans.

## Healthy Homemade Fresh Bread, Every Day

Choose your favourite wholesome ingredients, the Panasonic breadmaker does the rest! The latest models have many additional modes to help you make healthy bread using a variety of cereals and flours. Surprise your family with homemade jam and compote too – all made by your breadmaker. [More details at: www.panasonic.com](http://www.panasonic.com)

### SD-ZB2512

#### COLOURS

### Breadmaker with Rustic Menues

- Comprehensive bake programmes (including three new rustic menus: Rustic Sourdough Bread, Rustic Soda Bread and Rustic Artisan Bread)
- Yeast and raisin/nut dispensers
- Temperature control sensor
- <sup>1,2</sup>SD-2511: Same features, with a white or black finish and without yeast dispenser
- <sup>1</sup>SD-2500: Same features, with a white finish and without yeast dispenser, raisin/nut dispenser and rye bread programme

## Dispensers for Perfect, Delicious Bread

### Raisin/Nut Dispenser

Using the automatic raisin/nut dispenser, you can easily add additional ingredients to your recipe.

Only ZB2512 and SD2511

### Yeast Dispenser

Unique to Panasonic, the yeast dispenser minimises the risk of failures in baking. It drops the yeast automatically and at the optimum time.

Only ZB2512
