Supplied Accessories

Check that all the accessories are supplied before using the product. Product numbers correct as of August 2023. These may be subject to change.

- Lens cap
- Lens rear cap
- External tripod mount
- Lens hood

Names and Functions of Components

1 Lens surface
2 Built-in slide lens hood3 Focus ring
4 Zoom lock ring

When carrying the lens, rotate this ring to lock the zoom ring to prevent the lens from extending under its own weight.
[LOCK]: Locks the zoom ring.
[UNLOCK]: Unlocks the zoom ring.

5 Zoom ring
Zooms to telephoto or wide-angle.

6 Tripod mount
Orientation locking knob

7 O.I.S. switch
The stabilizer function is set to activate if the O.I.S. switch is set to [ON].

8 AF/MF switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

9 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

10 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

11 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

12 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

When the camera is set to AF (Auto Focus) and MF (Manual Focus).

58 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

59 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

60 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

61 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

62 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

63 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

64 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

65 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

66 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

67 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

68 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

69 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

70 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

71 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

72 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

73 O.I.S. switch
When the camera is set to AF (Auto Focus) and MF (Manual Focus).

Using the Tripod Mount

When using a tripod, attach it to the tripod mount of the lens. (See illustration [1])

• We recommend that you avoid attaching the tripod to the tripod mount of the digital camera to prevent lens damage that may occur when carrying the lens.

• In the following cases, before attaching a tripod, attach the supplied external tripod mount to the lens.
– When the lens or digital camera comes in contact with the tripod.
– When the lens or digital camera is in contact with the tripod using the AF/MF switch.

Attaching the external tripod mount (supplied)

[See Illustration (2)]
1 Insert the external tripod mount attachment screw (●) into the tripod mount of the lens.
2 Rotate the external tripod mount attachment screw in the direction of the arrows to fasten it firmly.

• Do not rotate the screw by more than 90 degrees.
• Do not touch the lens or the tripod mount when attaching the tripod mount.

Changing the vertical/horizontal orientation

[See Illustration (3)]
You can loosen the orientation locking knob (●) to rotate the lens. This way, you can quickly switch between the vertical and horizontal orientation while the tripod is in use.

• After changing the orientation, tighten the orientation locking knob firmly and check that it is
