# Panasonic

Proprietary Telephone

KX-T7101

The KX-T7101 offers 3 One-Touch Dialling Numbers, 10 Speed Dialling Numbers, and a host of features that enhance efficiency, including a large Incoming Call/Message Lamp, One-Touch Redial, and Data port. Designed to meet the communication needs of today's busy office, the KX-T7101 also features sophisticated styling that gives your office an impressive professional look.

KX-T7101

Large Incoming Call/Message Lamp

An orange light illuminates to notify you that someone has left a message. It also announces incoming calls, so you'll always know whose telephone is ringing – even from a distance.

Data Port for PC Connection

A second jack on the back of the phone lets you connect a computer, modem, fax machine, answering machine, or other single-line device.

13-Station One-Touch/Speed Dialling

Three one-touch dialling buttons are ideal for storing the numbers you call most often, or emergency numbers. You can also store ten additional numbers for 2-step speed dialling. With a total of 13 speed-dial stations, the KX-T7101 saves you time and effort.

One-Touch Redial

If the line you just dialled is busy, wait a minute and press the one-touch redial button. It's the fast, easy way to call again.

Flash

Sends a signal to the host PBX to access its system features.

Insertable Pause

This function lets you insert a dialling pause anywhere you want in a phone number, to meet the dialling requirements of your PBX. It's also handy when redialling.

One-Touch Tone Switching

Just press a button to switch from pulse dialling to tone dialling.

Wall Mountable

If there's no suitable desk space for your KX-T7101, simply mount it on the wall.

3-Step Ringer Selector

You can adjust the ringer volume in 3 steps (off/low/high).
