

## Easy to Connect Cloud Service

This is a cloud service that uses dedicated Panasonic servers. It provides smart visual communication without having to use ordinary leased lines, and without the complicated router settings that leased lines require. It's the easy way to start videoconferencing.

- **No complicated router settings needed with our easy to connect service.**
- **Access a 7-digit terminal ID number with the same ease as dialing a phone number.**
- **Connect securely with encrypted communication, using the Internet.**

\* NAT (Network Address Translation) is a technology that allows multiple computers to share a single global IP address. Problems can sometimes occur in the network connections of multiple hosts using NAT, but the NAT Traversal Service makes the connection smooth and easy.

**For those who want to try out the NAT Traversal Service.**

# Use it for a 3-month trial!

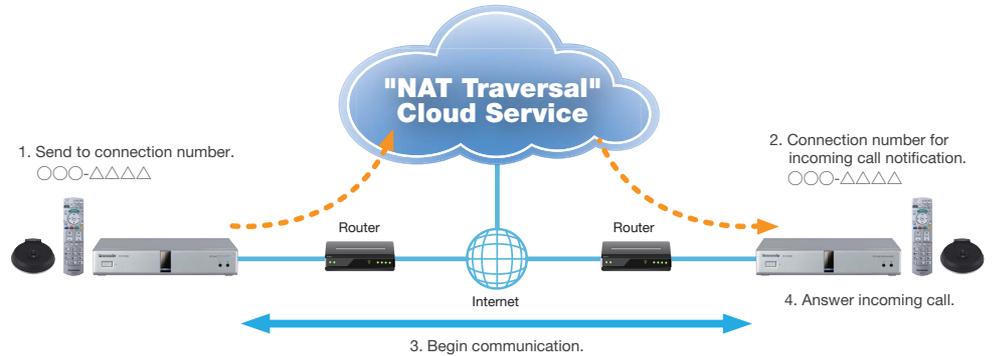

A free trial activation key sheet is included with the system. By using this sheet to register, you can use the service for three months.

# NAT Traversal Service

## Service Overview

The NAT Traversal Service lets you easily construct a communication environment without any complicated router settings. The service offers economical operation by using an Internet connection. Plus, a 7-digit terminal ID can be selected. In contrast to IP addresses, this terminal ID number (connection number) can be accessed with the same ease as dialing a phone number. Encrypted communication ensures safe Internet use.

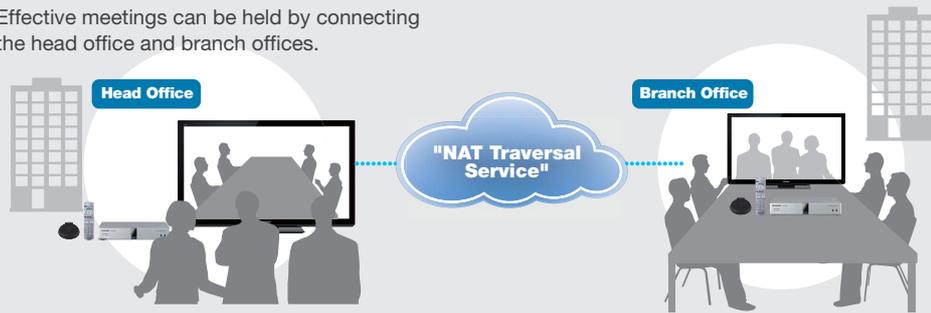

\* Contracts for an Internet line (an optical line is recommended) and an Internet service provider are also required.

## Usage Example

### Case 1 Connecting company offices.

Effective meetings can be held by connecting the head office and branch offices.

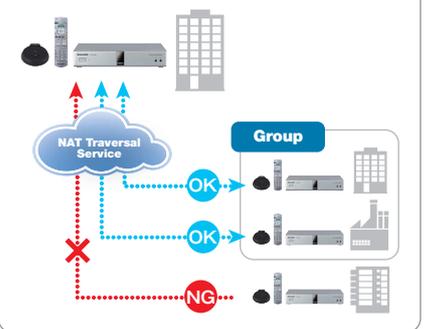

### Case 2 Connecting with clients outside the company.

HD Visual Communication helps businesses run smoother when meeting with clients or partner companies.

### Encryption Key Prevents Connection Errors

Mistaken or unauthorised transmission is prevented by setting an encryption key. This also prevents the leaking of information during conversations. In addition to one common key, up to five separate encryption keys can be set for groups, i.e., one for each group. By using a different encryption key from the one for in-company communication, this makes it possible to prevent erroneous connections between non-company and company parties.

## Service Specification

NAT Traversal Service	
Applicable Models	KX-VC600, KX-VC300, KX-VC500* * The KX-VC500 can be used by updating it to software version 2.3.

How to Use the Service	<ul style="list-style-type: none"> <li>The service connection function must be activated in order to use the NAT Traversal Service. A free trial activation key sheet is included with the system. By using this sheet to register, you can use the service for three months.</li> <li>In order to continue using the NAT Traversal Service after the trial period ends, you must purchase a paid activation key card to extend the connection function expiration date. For details, please consult your nearest dealer.</li> </ul>
Tested or Approved Routers	(US) Cisco Linksys E1000, E4200 / NETGEAR N300, N750 (Europe) Cisco Linksys E1000, E4200 / NETGEAR N300, N750 / LANCOM 1711VPN (Japan) YAMAHA RTX1200, RTX1100, NVR500 / BUFFALO WHR-G301N, WZR-HP-G302H, WHR-HP-G300N / NEC Access Technica PA-WR8170N-ST, PA-WR8700N-HP * You may not be able to connect depending on your router settings. Please check with your nearest dealer. For other routers, please check the NAT Traversal Service website. <a href="http://panasonic.net/psn/products/hdvc/nat_traversal/index.html">http://panasonic.net/psn/products/hdvc/nat_traversal/index.html</a>

- Usage restrictions on the communication data amount and the bandwidth may apply depending on the service provider.
- Please do not connect multiple HD Visual Communications Systems to a single router.
- The paid activation key card cannot be returned for a refund once it has been used.
- Legal regulations prevent the supply of this service to China.
- For the latest information on applicable countries, please check the NAT Traversal Service website.

### NAT Traversal Service Q & A

- Q1** Is the service available with other brand models or when connected to an MCU?
- A1** No, it isn't. Connection is limited to Panasonic HD Visual Communications Systems.
- Q2** How many locations can be connected at once?
- A2** The same number of locations as the maximum simultaneous connection number for the model that you are using.
- Q3** Is the connection secure?
- A3** The HD Visual Communications System features safe, secure, encrypted communication. To use encrypted communication, activate the encryption function in the main unit.
