

SUBJECT: Change of 0201 Multi-layer Thermistor (ERT-JZxxxxxxx) Packaging Specification

BULLETIN #: ECN.PG33.02.01.08-1

Date: February 1, 2006

Page 1 of 1

EFFECTIVE DATE: May 1, 2008

* Please note that it will be a running change from Feb 1st ~ April 30th.

ENGINEERING CHANGE DETAILS: Punch Carrier tape to Press Carrier tape

REASON FOR CHANGE: To improve the 'picking' of 0201 parts from their taped reels and its mounting performance

OTHER DETAILS:

2 main improvements:

- Reduces the occurrences of 'standing' or 'non pick-up' components due to the components sticking to the bottom tape
- The shape of the component 'pocket' is more consistent with regard to its dimensions and component clearances

IF re-qualification is required, samples, technical data, and quality / reliability data of this new pressed carrier type taping is available upon request.
