Panasonic has a long history in Hong Kong. This was the first overseas market where Panasonic founder Konosuke Matsushita sold his company's products, in partnership with the Shun Hing Group. Today, Panasonic carries this legacy forward by providing Hong Kong businesses with energy- and space-efficient air conditioning solutions. This 31-storey office building on King Yip Road is located on a total site area of around 930 m², with each floor providing around 450 m² of usable area. The installed Panasonic FSM VRF air conditioning systems achieve an average cooling capacity of about 70 kW per floor.
