Create a healthy environment for babies

Guangzhou Maternal & Infant Care Centre is committed to providing high-end comprehensive postpartum care services. Considering that mothers, babies and their family members are free to move around in the lobby, the centre attaches great importance to inhibiting bacteria and viruses in real-time and providing a clean and comfortable environment for adults and children. When ziaino™ was introduced, a baby was sick, but after using ziaino™ in the centre, the spread of the virus was immediately controlled. The staff and the family members have experienced the efficient and practical functions of ziaino™, and it has been greatly appreciated. They are very assured of the clean and hygienic environment created by ziaino™.
