Solving a renowned university issues

Tsinghua University is one of the most notable universities in China and throughout the world. Due to its large number of students and faculty from all over the world, the risk of spreading various viruses is high. At the same time, the university has a long history, and its old buildings are not sufficiently ventilated, so the problem of odours in its rooms is noticeable. The school attaches great importance to the safety of the air, so it chose ziaino™ to deal with these two major issues. ziaino™ has solved the hygiene and odour problems and improved the air quality in the classrooms, which guarantees the health and safety of students and teachers.
