Air Conditioning System: Inverter multi-split room air conditioner

Indoor Units:

Wall mounted S series (with ECONAVI)

Control System:

Panasonic HEMS

The Singapore government has designated sections of the city’s Punggol urban development as test areas for eco-friendly home energy solutions. Panasonic recently supplied a number of households there with new air conditioners and sophisticated Home Energy Management Systems (HEMS) that help families monitor their energy use, reduce their carbon footprint, and cut their utility bills. Families that used the Panasonic system were full of praise for its convenience and operability by smartphone. They reported that the system increased their awareness of energy consumption and helped them to make positive changes to their lifestyles.

List of Products

- Panasonic Inverter multi-split room air conditioner
- Panasonic Wall mounted S
