Eluga:

Q1: My Panasonic Eluga T45 8GB Dual SIM 4G LTE shown only 4.56GB in total memory instead of 8GB?

A1: Panasonic Eluga T45 model is having 8 GB internal memory, but it will not show the exact 8 GB due to the built-in applications & additional installed apps from play store.

You can extend the memory using micro SD (Maximum 32GB) card and make it default for camera and applications to maximize the internal memory of the phone.
