Care of Your Oven	86
Technical Specifications	87

Installation and Connection

Examine your microwave oven

Unpack the oven, remove all packing material, and examine the oven for any damage such as dents, broken door latches or cracks in the door. If you find any damage, notify your dealer immediately. Do not install a damaged microwave oven.

Earthing instructions

IMPORTANT: THIS UNIT HAS TO BE PROPERLY EARTHED FOR PERSONAL SAFETY.

If your AC outlet is not grounded, it is the personal responsibility of the customer to have it replaced with a properly grounded wall socket.

Operation voltage

The voltage has to be the same as specified on the label on the oven. If a higher voltage than specified is used, it may cause a fire or other damages.

Placement of the Oven

1. This oven is intended for Household counter top use only. It is not intended for built-in use or for use inside a cupboard. Place the oven on a flat and stable surface more than 85 cm above the floor.
2. When this oven is installed, it should be easy to isolate the appliance from the electricity supply by pulling out the plug or operating a circuit breaker.
3. For proper operation, ensure a sufficient air circulation for the oven.

Counter-top use:

- a. Allow 15 cm of space on the top of the oven, 10 cm at the back, 5 cm on one side, and the other side must be opened.
- b. If one side of the oven is placed flush to a wall, the other side or top must not be blocked.

4. Do not place this oven near an electric or gas cooker range.
5. The feet should not be removed.
6. This oven is only for household usage. Do not use outdoors.
7. Avoid using the microwave oven in high humidity.
8. The power cord should not touch the outside of the oven. Keep the cord away from hot surfaces. Do not let the cord hang over the edge of a table or work top. Do not immerse the cord, plug or oven in water.
9. Do not block the air vents on the left side and back of the oven. If these openings are blocked during operation the oven may overheat. In this case the oven is protected by a thermal safety device and resumes operation only after cooling down.
10. This appliance is not intended to be operated by means of an external timer or separate remote control system.

Warning

Important Safety Instructions

1. The door seals and seal areas should be cleaned with a damp cloth.
The appliance should be inspected for damage to the door seals and door seal areas and if these areas are damaged the appliance should not be operated until it has been repaired by a service technician trained by the manufacturer.
2. Do not attempt to tamper with or make any adjustments or repairs to the door, control panel housing, safety interlock switches or any other part of the oven. Do not remove the outer panel from the oven which gives protection against exposure to microwave energy.
Repairs should only be done by a qualified service person.
3. Do not operate this appliance if it has a damaged CORD OR PLUG, if it is not working properly, or if it has been damaged or dropped. It is dangerous for anyone other than a service technician trained by the manufacturer to perform repair service.
4. If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
5. Only allow children to use the oven without supervision when adequate instructions have been given so that the child is able to use the oven in a safe way and understands the hazards of improper use.
6. Liquids and other foods must not be heated in sealed containers since they are liable to explode.
7. This appliance is not intended for use by persons (including children) with reduced physical, sensory or capabilities, or lack of experience and knowledge unless they have been given responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.
8. DO NOT attempt to touch heating device on top and back of inside cavity while cavity is hot.
Heating device may be still hot.
9. The surfaces are liable to get hot during use.
10. This appliance is intended to be used in household and similar applications such as:
 - stuff kitchen areas in shops, offices and other working environments;
 - farm houses;
 - by clients in hotels, motels and other residential type environments;
 - bed and breakfast type environments.

Safety Instructions

Use of your oven

1. Do not use the oven for any reason other than the preparation of food. This oven is specifically designed to heat or cook food. Do not use this oven to heat chemicals or other non-food products.
2. Before use, check that utensils/containers are suitable for use in microwave ovens.
3. Do not attempt to use this microwave oven to dry newspaper, clothing or any other materials. They may catch on fire.
4. When the oven is not being used, do not store any objects other than oven accessories inside the oven in case it is accidentally turned on.
5. The appliance shall not be operated by MICROWAVE, GRILLING, CONVECTION or COMBINATION WITHOUT FOOD IN THE OVEN.
Operation in this manner may damage the appliance.
6. If smoke or a fire occurs in the oven, press the STOP/RESET Pad and leave door closed. Disconnect the power cord, or shut off power at fuse or circuit breaker panel.

Heater Operation

1. Exterior oven surfaces, including air vents on the cabinet and the oven door will get hot during GRILLING, CONVECTION and COMBINATION, take care when opening or closing the door and when inserting or removing food and accessories.
2. The oven has two heaters situated in the top of the oven. After using the GRILL, CONVECTION and COMBINATION function, these surfaces will be very hot. Care should be taken to avoid touching the heating elements inside the oven.
N.B.: After cooking by these modes, the oven accessories will be very hot.
3. The accessible parts may become hot when the grill is in use. Children should be kept away.
4. When the appliance is operated in the combination mode, children should only use the oven under adult supervision due to the temperatures generated.

Oven Light

When it becomes necessary to replace the oven light, please consult your dealer.

Accessories

The oven comes equipped with a variety of accessories. Always follow the directions given for use of the accessories.

Ceramic Tray

1. Do not operate the oven without the roller and the ceramic tray in place.
2. Never use another type of ceramic tray than the one specially designed for this oven.
3. If the ceramic tray is hot, let it cool before cleaning or placing in water.
4. The ceramic glass tray can turn in either direction.
5. If the food or cooking vessel on the ceramic tray touches the oven walls and stops the tray rotating, the tray will automatically rotate in the opposite direction. This is normal.
6. Do not cook foods directly on the ceramic tray.

Roller Ring

1. The roller ring and the oven floor should be cleaned frequently to prevent noise and build-up of remaining food.
2. The roller ring must always be used for cooking together with the ceramic tray.

Wire Rack

1. The Wire Rack is used to facilitate browning of small dishes and help with the good circulation of the heat.
2. Do not use any metal container directly on the Wire Rack and Rotisserie in COMBINATION with MICROWAVE.
3. Do not use the Wire Rack in MICROWAVE mode only.

Important Information

1) Cooking Times

The cooking time depends on the condition, temperature, amount of food and on the type of cookware.

Begin with the minimum cooking time to help prevent overcooking. If the food is not sufficiently cooked you can always cook it for a little longer.

N.B.: If the recommended cooking times are exceeded the food will be spoiled and in extreme circumstances could catch fire and possibly damage the interior of the oven.

2) Small Quantities of Foods

Small quantities of food or foods with low moisture content can burn, dry out or catch on fire if cooked too long. If materials inside the oven should ignite, keep the oven door closed, turn the oven off and remove the plug from the socket.

3) Eggs

Do not cook eggs in their shells and whole hard-boiled eggs by MICROWAVE.

Pressure may build up and the eggs may explode, even after the microwave heating has ended.

4) Piercing Skin

Food with non porous skins, such as potatoes, egg yolks and sausages must be pierced before cooking by MICROWAVE to prevent bursting.

5) Meat Thermometer

Use a meat thermometer to check the degree of cooking of roasts and poultry only when the meat has been removed from the oven. Do not use a conventional meat thermometer in the microwave oven because it may cause sparking.

6) Liquids

When heating liquids, e.g. soup, sauces and beverages in your microwave oven, overheating the liquid beyond boiling point can occur without evidence of bubbling. This could result in a sudden boil over of the hot liquid.

To prevent this possibility the following steps should be taken:

- a) Avoid using straight-sided containers with narrow necks.
- b) Do not overheat.
- c) Stir the liquid before placing the container in the oven and again halfway through the cooking time.
- d) After heating, allow it to stand in the oven for a short time, stir again before carefully removing the container.

7) Paper/Plastic

When heating food in plastic or paper containers, check the oven frequently as these types of containers ignite if overheated.

Do not use recycled paper products (e.g. Kitchen Roll) unless the paper product is labelled as safe for microwave oven use.

Recycled paper products may contain impurities which may cause sparks and/or fires during use.

Remove wire twist-ties from roasting bags before placing the bags in the oven.

8) Utensils/Foil

Do not heat any closed cans or bottles because they might explode.

Metal containers or dishes with metallic trim should not be used during microwave cooking. Sparking will occur.

If you use any aluminium foil, meat spikes or metalware the distance between them and the oven walls and door should be at least 2 cm to prevent sparking.

9) Feeding Bottles/Baby Food Jars

The top and teat or lid must be removed from feeding bottles or baby food jars before placing in the oven.

The contents of feeding bottles and baby food jars are to be stirred or shaken.

The temperature has to be checked before consumption to avoid burns.

Outline Diagram

[1] Door Opening Handle

Pull to open the door. When you open the oven door during cooking, the cooking is stopped temporarily without clearing earlier made settings. Cooking resumes as soon as the door is closed and Start is pressed.

- (1) Display Window
- (2) Microwave Power Levels
- (3) Grill Button
- (4) Convection
- (5) Auto Defrost Button
- (6) Timer/Clock Button
- (7) Combination Button
- (8) Reheat Programs
- (9) Auto Programs (Main/Side Dish)
- (10) Auto Programs (Soup/Snack)
- (11) Auto Programs (Tandoori/Grill)
- (12) Auto Programs (Japanese)
- (13) Auto Programs (Cake/Dessert)
- (14) Auto Menu/Time/Weight Dial
- (15) Stop/Reset Button:

Before Cooking:

One press clears your instructions.

During Cooking:

One press temporarily stops the cooking program. Another press cancels all your instructions and the time of day will appear in the display.

- (16) Start Button

Setting the Clock

When the oven is first plugged in "88.88" appears in display window.

- **Keep pressing Timer/Clock button until 24hr appears. Continue press this button again to select 12hr.**
- **Enter the hour figures by turning Auto Menu/Time/Weight Dial. Then press Clock button, the minute figures will flash.**
- **Enter the minute figures by turning Auto Menu/Time/Weight Dial. Then press Clock Button.**
Time of day is now locked into the display.

N.B.

1. To reset time of day, repeat step 1 through to step 3.
2. The Clock will keep the time of day as long as the oven is plugged in and electricity is supplied.

Child Safety Lock

Using this system will make the oven controls inoperable; however, the door can be opened. Child Lock can be set when the display shows a colon or the time.

- **Press Start button three times in 10 seconds.**
'' is indicated in the display.
- **Press Stop/Reset button three times in 10 seconds.**
'' disappears in the display.

Microwave Cooking and Defrosting

The ceramic must always be in position when using the oven.

		Level	Wattage
1 Press	<i>Max</i>	P100	900 Watts
2 Presses	<i>Medium</i>	P80	715 Watts
3 Presses	<i>Low</i>	P50	440 Watts
4 Presses	<i>Defrost</i> **	P30	250 Watts
5 Presses	<i>Warm</i>	P10	100 Watts

- **Press the microwave power button.** Select desired power level - The microwave indicator lights and the level (P100, P80, P50, P30 or P10) appears in the display.

- **Set the cooking time using the Auto Menu/Time/Weight Dial.** Your oven can be programmed for 90 minutes in Medium, Low, Warm and Defrost power. Max power can be programmed for 30 minutes.

- **Press Start.** The cooking program will start and the time in the display will count down.

CAUTION: The oven will automatically work on MAX microwave power if a cooking time is entered without the power level previously being selected.

Multi-Stage Cooking

The oven has 3 stage cooking, so you can program up to 2 different instructions and the oven will switch automatically from power to power (Repeat steps 1 and 2 above but only press Start after both stages have been entered).

N.B.

Auto Menu or Auto Defrost cannot be programmed.

Timer

This feature operates as a minute timer. During operation there is no microwave energy.

- **Press the Timer/Clock button once.** Nothing appears in the display window.

- **Set desired time.** Maximum time is 90 minutes.

- **Press Start.** The time in the display will count down.

Defrosting Guidelines

Tips for Defrosting

Check the defrosting several times, even if you use the auto programs. Observe the standing times.

STANDING TIMES

Individual portions of food may be cooked almost immediately after defrosting. It is normal for large portions of food to be frozen in the centre. Before cooking, allow to stand for a **minimum of one hour**. During this standing time, the temperature becomes evenly distributed and the food is defrosted by conduction. **N.B.** If the food is not going to be cooked immediately, store it in the refrigerator. Never refreeze defrosted food without first cooking it.

CHICKEN PIECES

Chops and chicken pieces must be separated as soon as possible so that they defrost evenly throughout. Fatty parts and the ends defrost more quickly. Place them near the centre of the turntable or protect them.

WHOLE CHICKEN

It is preferable to place the joints on an upturned plate or plastic rack so that they are not resting in the juices. It is essential to protect delicate or projecting parts of this food with small pieces of foil to prevent these parts from cooking. It is not dangerous to use small pieces of foil in your oven, provided **they do not come into contact with the oven walls**.

FISH, MUTTON AND VEGETABLES

Since the outside of these foods quickly defrosts, it is necessary to separate them, break the blocks into pieces frequently while defrosting and remove them when they have defrosted.

Grilling

- **Press Grill button to select level.**
1 press grill 1 (high)
2 presses grill 2 (low)

- **Select Cooking time.**
Time can be set up to 90 minutes.

- **Press Start** - The time counts down in the display.

The grill indicator lights and grill level (G-1 or G-2) appears in the display.

Press	Level	Grill
1 press	G-1	1400 W
2 presses	G-2	970 W

N.B.

1. Place food on wire rack on turntable. Place a heatproof plate (Pyrex®) underneath to catch fat and drips.
2. Never cover foods when grilling.
3. DO NOT attempt to preheat the grill.
4. The grill will only operate with the oven door closed. It is not possible to use the grill function with the door open.
5. There is no microwave power on the GRILL only program.
6. Most foods require turning halfway during cooking. When turning food, open oven door and CAREFULLY remove wire rack using oven gloves.
7. After turning, return food to the oven and close door. After closing oven door, press START. The oven display will continue to count down the remaining grilling time. It is quite safe to open the oven door at any time to check the progress of the food as it is grilling.
8. The grill will glow on and off during cooking - this is normal. Always clean the oven after using the Grill and before using the microwave or combination.
9. DO NOT attempt to touch heating device on top and back of inside cavity while cavity is hot. Heating device may be still hot.

CAUTION: The wire rack must always be used with the ceramic tray in position. Remove wire rack from oven by holding the rack and heatproof dish firmly. Use oven gloves when removing accessories. Never touch the outside window or inside metal parts of the door or oven when taking food in or out due to the high temperatures involved.

Combination Cooking

- **Press combination button to select the suitable level in below chart.**

The microwave and grill indicator lights and combination level (C-1, C-2, C-3, C-4, C-5 or C-6) appears in the display.

- **Select Cooking time.**
Time can be set up to 90 minutes.

- **Press Start.**

Press	Display	Level	MW	Grill	Convection
1 press	C-1	Combi 1	450 W	700 W	-
2 presses	C-2	Combi 2	250 W	1000 W	720 W
3 presses	C-3	Combi 3	250 W	480 W	720 W
4 presses	C-4	Combi 4	450 W	700 W	500 W
5 presses	C-5	Combi 5	250 W	1000 W	-
6 presses	C-6	Combi 6	-	1000 W	1400 W

When cooking by combination, the microwave power cooks food quickly whilst the grill or **convection** gives traditional browning and crisping.

N.B.

1. The wire rack is designed to be used for and Grilling, **Convection** and **Combination**. Never attempt to use any other metal accessory except the one provided with the oven. Place a heatproof dish underneath to catch any fat or drips.
2. Use the wire rack only as described. DO NOT use if operating the oven with less than 0.2 kg of food on a manual program. For small quantities do not cook by **combination**, cook by GRILL, CONVECTION or MICROWAVE ONLY for best results.
3. Never cover foods when cooking on **combination**.
4. DO NOT preheat the grill on **combination**.
5. Arcing may occur if the incorrect weight of food is used, the wire rack has been damaged, or a metal container has been used accidentally. Arcing is flashes of blue light seen in the microwave. If this occurs, stop the oven immediately.
6. Some foods should be cooked on **combination** without using the wire rack i.e. roasts, gratins, pies and puddings. The food should be placed in a heatproof non-metallic dish and placed directly onto the turntable.
7. DO NOT use plastic MICROWAVE containers on combination programs (unless suitable for combination cooking.) Dishes must be able to withstand the heat of the top grill - heatproof glass e.g. Pyrex® or ceramic are ideal.
8. DO NOT use your own metal dishes or tins, as the microwaves will not penetrate the food evenly.

CAUTION: The wire rack must always be used with the ceramic tray in position. Remove wire rack from oven by holding the rack and heatproof dish firmly. Use oven gloves when removing accessories. Never touch the outside window or inside metal parts of the door or oven when taking food in or out due to the high temperatures involved.

Convection Cooking

A. Convection Cooking without preheating

- **Press convection button to select convection temperature.**

The convection indicator lights and the temperature (180, 190, ..., 240, 100 °C, ...) appears in the display.

- **Select Cooking time.**
Time can be set up to 90 minutes.

- **Press Start.**

B. Convection Cooking with preheating

- **Press convection button to select convection temperature.**

The convection indicator lights and the temperature (180, 190, ..., 240, 100 °C, ...) appears in the display.

- **Press Start to start preheating.**

- **Select Cooking time.**
Time can be set up to 90 minutes.

- **Press Start.**

N.B.

1. During the convection preheating state, if the preheating temperature reaches, the buzzer will sound 3 times to remind you to put the food into the oven. And the preheated temperature is displayed and flash. Then open the oven door, and put the food into the oven and close the door.
2. Cooking time cannot be input until the preheating temperature reaches. If the temperature arrives, door must be opened to input the cooking time.
3. If the time not input in 10 minutes, the oven will stop preheating. The buzzer sounds five times and turn back to waiting states.

Auto Defrost

With this feature you can defrost frozen food according to the weight.

- **Select the desired Auto Defrost Program**
1 Press 1 Chicken pieces
2 Presses 2 Whole chicken
3 Presses 3 Fish
4 Presses 4 Mutton
5 Presses 5 Vegetables
- **Select the food weight. And the “kg” indicator lights.**
- **Press Start.**

Auto Program number appears in the display. The auto and defrost indicators light.

Display	Program	Min./Max. Weight
d-1	1 Chicken Pieces	0.2-1.5 kg
d-2	2 Whole chicken	1-1.5 kg
d-3	3 Fish	0.2-1.5 kg
d-4	4 Mutton	0.2-1.5 kg
d-5	5 Vegetables	0.1-1 kg

Pointers to successful use of Auto Menus

Pointers to successful use of Auto Menus

These menus are developed to make the best use of your MWO for Indian cooking. The recipes are simplified to suit the modern life style. They are easy to follow and can be attempted even by the beginners, by carefully following the instructions. Please read these pointers to get the best results.

All ingredients should be at room temperature.

Standard measuring cups and spoons must be used.

1 cup = 250 ml

1 Tbsp = 15 ml

1 tsp = 5 ml

While it is necessary to measure the main ingredients accurately, varying the seasoning as per taste will not affect the performance of the auto menus.

Use good quality ingredients and tender vegetables.

Use the recommended size of containers.

Read the recipe carefully and measure and prepare all the ingredients according to the instructions, before starting to cook.

Many recipes have two stages of cooking and a beep between them.

The beep time is mentioned in the instructions. Be ready to open the door of the MWO immediately after the beep. If you miss the beep, the ingredients in the first stage will continue to cook and if you add the 2nd stage ingredients later than beep stage, they may not cook well. Protect your hands with oven mittens or cotton towel while handling the hot dishes.

Once you have opened the MWO door after the beep, you have 6 minutes to add the 2nd stage ingredients as in the instructions, until start key is pressed. Therefore there is no need to rush with the next step. Carefully take out the dish, add the next set of ingredients. (which should be kept ready before starting the cooking) Mix well and continue with the cooking. This can be done at a comfortable pace.

However, avoid needless delay.

Recipes marked (H) indicate that they are healthy and low calorie.

Some of auto menus are recommended to use a flat aluminum/stainless steel plate by customer for better performance. Please prepare it prior to cooking.

Auto Menu

[1] Reheat Menu

- **Select desired category.**
The auto indicator lights and the program number 1-1 appears in the display.
- **Turn the dial to select the suitable number in below chart.**
- **Press Start.**

Program 1 Reheat Soup/Coffee

Program	No. of Serves	Recipe
1-1	1 cup	1 serve = 150 ml at room temperature Expected total cooking time/50 sec.
1-2	2 cups	1 serve = 150 ml at room temperature Expected total cooking time/1 min. 30 sec.
1-3	3 cups	1 serve = 150 ml at room temperature Expected total cooking time/2 min.

Program 2 Reheat Meal

Recipe
This menu can be used to serve a standard meal for 1 on plate (example rice, curry, sabji; pulao, biriyani/kichidi/pongal/noodles/fried rice and side dish; idly, sambar etc which are at room temperature.) Expected total cooking time/1 min. 30 sec.

Program 3 Reheat Fried Items

Recipe
This is useful to reheat Samosa, Vada, Dough nut, Puffs etc, which are at room temperature. Heat 1 or 2 pieces at a time. Expected total cooking time/2 min. 30 sec.

Auto Menu

[2] Main/Side Dish

- **Select desired category.**
The auto indicator lights and the program number 4 appears in the display.
- **Turn the dial to select the suitable number in below chart.**
- **Press Start.**

Program 4 Steamed Rice

Number of serves: 3 Servings

Recipe	Step 1
Rice 1 cup Water 2- 2 ½ cups, depending on quality of rice Expected total cooking time/17 min.	Wash the rice well and drain. Place it in a MW safe casserole. (Capacity not less than 1 ½ L) Add the measured water. Soak for 15 minutes. Cover the casserole partially with a lid, leaving a vent. Place in the MWO and press start. When done, stand covered for 5 min. Then gently fluff up the rice with a fork.

Program 5 Peas Pulao

Number of serves: 3 Servings

Recipe	Step 1	Beep	Step 2
Basmathi Rice 1 cup Water 2-2 ¼ cups Oil or Ghee 2 Tbsp Onion 1 cup, thinly sliced Cloves 4 Cardamom 3 Cinnamon 2 pieces Salt to taste Fresh/frozen green peas ½ cup (if using frozen peas, soak in water for 15 minutes and drain) Coriander leaves 2 Tbsp, chopped Expected total cooking time/33 min.	Wash the rice well and drain. Add the measured water and soak for 15 min. Add salt, green peas and coriander leaves and reserve. Pour oil/ghee in a MW safe casserole. (Capacity not less than 2 L) Add onion, cloves, cardamom and cinnamon. Mix well. Place the casserole in the MWO and press start.	Wait for beep (Beeping 8 min. after start)	After the beep, add the rice with the water and peas. Mix well and return to MWO. Cover partially, leaving a vent. Press start. When done, stand covered without disturbing for 5 min. Fluff up gently with a fork and serve hot.

Auto Menu

[2] Main/Side Dish

Program 6 Veg Biryani

Number of serves: 4 Servings

Accessory

Recipe	Step 1	Beep	Step 2
Basmati rice 1 cup Water 2 ¼ cups Salt to taste Mint leaves 2 Tbsp, chopped Coriander leaves 2 Tbsp, chopped Mixed vegetables 1 cup, cut into ½ cm cubes Chilli powder ½ tsp Turmeric powder ½ tsp Coriander powder ½ tsp Ghee/oil 2 Tbsp Onion 1 cup, thinly sliced Green chillies 2, minced Ginger 1 tsp, minced Garlic 2 tsp, minced Cloves 3 Cinnamon 2 pieces Cardamom 3 Star anise 1	Wash the rice and drain well. Add 2 ¼ cups of water and soak for 15 min. Add salt, mint and coriander leaves, mixed vegetables and all the powders. Pour the ghee or oil in a MW safe casserole (minimum capacity 2 L.) Add all the ingredients from onion to star anise. Keep in MWO and press start.	Wait for beep (Beeping 5 min. after start)	After the beep, add the rice mixture, along with soaking water. Mix gently. Cover partially with a lid and return to MWO. Press start. When done, cover fully and leave without disturbing for 10 min. Mix gently and serve hot.
Expected total cooking time/31 min.			

Auto Menu

[2] Main/Side Dish

Program 7

Fish Pulao

Number of serves: 3 Servings

Accessory

Recipe		Step 1	Beep	Step 2
King fish*	350 g, steamed	<p>Discard the skin and bones from fish and flake it. Mix with salt, green chilli and garam masala. Wash the rice and drain well. Add water, coconut milk and tomato puree. Add salt and chilli powder.</p> <p>Pour the oil in a MW safe casserole. (Capacity not less than 2 L) Add cloves, cinnamon, ajwain, (optional) bay leaf and pepper. Mix well and keep in MWO. Select the auto menu and press start.</p>	<p>Wait for beep (Beeping 3 min. after start)</p>	<p>After the beep, add the rice mixture along with the soaking liquid. Mix well. Cover partially with a lid, leaving a vent. Return to MWO and press start. When done, cover fully and leave without disturbing for 10 min. Gently mix in the fish. Serve after 5 min. garnished with fried onions. (optional)</p>
Green chilli	1-2, minced			
Salt to taste				
Garam masala	½ tsp			
Basmati Rice	1 cup			
Water	1 ½ cups			
Tomato puree	¼ cup			
Coconut milk	¾ cup			
Salt to taste				
Chilli powder	½ tsp or to taste			
Oil	2 Tbsp			
Cloves	3			
Cinnamon	2 pieces			
Ajwain	¼ tsp, optional			
Bay leaf	1			
Pepper corns	½ tsp, crushed			
Fried onions to garnish, optional				
* Auto menu - Steam Fish; any other white flaky fish may be used				
Expected total cooking time/28 min.				

Accessory

Program 8

Kichidi

Number of serves: 4 Servings

Recipe		Step 1	Beep	Step 2
Rice	¾ cup	<p>Wash the rice and dal and drain. Add water, carrot, beans and salt and keep aside.</p> <p>Pour the oil in a MW safe casserole. (Minimum capacity 2 L) add cloves, cinnamon, green chillies. Place in MWO. Select the auto menu and press start.</p>	<p>Wait for beep (Beeping 3 min. after start)</p>	<p>After the beep, add the rice mixture, stir well and return to MWO and press start. (do not cover) When done, mix well and keep covered at least for 5 min., before serving.</p>
Moong dal	⅓ cup			
Water	3 ½ cups			
Carrot	1 small, grated			
Beans	4-6, finely chopped			
Salt to taste				
Oil	2 Tbsp			
Cloves	3-4			
Cinnamon	2 pieces			
Green chillies	2, slit			
Onion	½ cup, chopped finely			
Expected total cooking time/38 min.				

Auto Menu

[2] Main/Side Dish

Program 9 Pongal

Number of serves: 3 Servings

Accessory

Recipe		Step 1	Beep	Step 2
Rice	¾ cup	Wash the rice and dal well. Drain and place in a MW safe casserole. (Capacity not less than 2 L) Add rest of the ingredients. Place inside the MWO (do not cover), select the auto menu and press start.	Wait for beep (Beeping 30 min. after start)	After the beep, stir well and press start. When done, mix well and serve hot.
Moong dal	⅓ cup			
Water	4 cups			
Ghee/oil	2 Tbsp			
Black pepper corns	½ tsp, crushed			
Cumin seeds	1 tsp, crushed			
Asafoetida	¼ tsp, optional			
Salt to taste				
Roasted cashew nuts	2 Tbsp, chopped			
Expected total cooking time/40 min.

Expected total cooking time/18 min.		

Program 131 Peanut Cookies

Number of pieces: Yield 24 pieces

Recipe		Step 1
Peanuts	½ cup	Chop the peanuts roughly. Melt the butter and cool. Mix all the ingredients together to form dough. Take ½ the dough and divide into 12 portions. Shape into smooth balls and press lightly. Place them on the greased crispy tray. Place the tray on low rack in MWO. Select the auto menu and press start. Repeat with the remaining dough. Cool the cookies completely and store in air tight container. (Note: Cookies will be crisp after cooling.)
Butter	½ cup	
Powdered sugar	½ cup	
Maida	1 cup	
Vanilla essence	½ tsp	
Expected total cooking time/15 min.		

Questions and Answers

- Q:** Why won't my oven turn on?
- A:** When the oven does not turn on, check the following:
1. Is the oven plugged in securely? Remove the plug from the outlet, wait 10 seconds and reinsert.
 2. Check the circuit breaker and the fuse. Reset the circuit breaker or replace the fuse if it is tripped or blown.
 3. If the circuit breaker or fuse is all right, plug another appliance into the outlet. If the other appliance works, there probably is a problem with the oven. If the other appliance does not work, there probably is a problem with the outlet.
If it seems that there is a problem with the oven, contact an authorized Service Center.
- Q:** My microwave oven causes interference with my TV. Is this normal?
- A:** Some radio and TV interference might occur when you cook with the microwave oven. This interference is similar to the interference caused by small appliances such as mixers, vacuums, blow dryers, etc. It does not indicate a problem with your oven.
- Q:** The oven won't accept my program. Why?
- A:** The oven is designed not to accept an incorrect program. For example, the oven will not accept a third stage.
- Q:** Why does my oven light dim?
- A:** When cooking with a power other than 900 W (MAX Power), the oven must cycle to obtain the lower power levels. The oven light dims and clicking noises can be heard when the oven cycles.
- Q:** Sometimes warm air comes from the oven vents. Why?
- A:** The heat given off from the cooking food warms the air in the oven cavity. This warmed air is carried out of the oven by the air flow pattern in the oven. There are no microwaves in the air. The oven vents should never be blocked during cooking.
- Q:** Can I use a conventional oven thermometer in the oven?
- A:** Only when you are using GRILL and CONVECTION cooking mode. The metal in some thermometers may cause arcing in your oven and should not be used on MICROWAVE and COMBINATION cooking modes.
- Q:** There are humming and clicking noises from my oven when I cook by COMBINATION. What is causing these noises?
- A:** The noises occur as the oven automatically switches from MICROWAVE power to GRILL or CONVECTION to create the combination setting. This is normal.

Care of Your Oven

1. Turn the oven off before cleaning, and wait until inside oven cavity is cooled down to avoid burnt. Heating devices inside oven on top and back may be still hot.
2. Keep the inside of the oven, door seals and door seal areas clean. When food splatters spilled liquids adhere to the oven walls, or door seals and door seal areas wipe off with a damp cloth. Mild detergent may be used if they get very dirty. The use of harsh detergent or abrasive is not recommended.
DO NOT USE COMMERCIAL OVEN CLEANERS.
3. The outside oven surface should be cleaned with a damp cloth. To prevent damage to the operating parts inside the oven, water should not be allowed to seep into the ventilation openings.
4. If the Control Panel becomes dirty, clean it with a soft, dry cloth. Do not use harsh detergents or abrasives on the Control Panel. When cleaning the Control Panel leave the oven door open to prevent the oven from accidentally turning on. After cleaning touch **Stop/Reset** Pad to clear display window.
5. If steam accumulates inside or around the outside of the oven door, wipe with a soft cloth. This may occur when the microwave oven is operated under high humidity conditions and in no way indicates a malfunction of the unit.
6. It is occasionally necessary to remove the glass tray for cleaning. Wash the tray in warm soapy water or in a dishwasher.
7. The roller ring and oven cavity floor should be cleaned regularly to avoid excessive noise. Simply wipe the bottom surface of the oven with mild detergent and hot water then dry with a clean cloth. The roller ring may be washed in mild soapy water. Cooking vapours collect during repeated use but in no way affects the bottom surface or roller ring wheels. After removing the roller ring from the cavity floor for cleaning, be sure to replace it in the proper position.
8. When using the GRILL, CONVECTION or COMBINATION mode, some foods may inevitably splatter grease onto the oven walls. If the oven is not cleaned occasionally, it may start to "smoke" during use.
9. A steam cleaner is not to be used for cleaning.
10. This oven should only be serviced by qualified personnel. For maintenance and repair of the oven contact the nearest authorized dealer.
11. Keep air vents clear at all times. Check that no dust or other material is blocking any of the air vents on the top, bottom or rear of the oven. If air vents become blocked this could cause overheating which would affect the operation of the oven and possibly result in a hazardous situation.
12. Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass since they can scratch the surface, which may result in shattering of the glass.

Technical Specifications

Power Source:	240 V	50 Hz
Power Consumption:	Maximum;	1450 W
	Microwave;	1450 W
	Grill;	1400 W
	Convection;	2400 W
Output:	Microwave;	900 W (IEC-60705)
	Top Heater;	1400 W
	Back Heater;	1000 W
Outside Dimensions:	513 (W) x 471 (D) x 306 (H) mm	
Oven Cavity Dimensions:	330 (W) x 348 (D) x 239 (H) mm	
Uncrated Weight:	17.0 kg	

Information on Disposal for Users of Waste Electrical & Electronic Equipment (private households)

This symbol on the products and/or accompanying documents means that used electrical and electronic products should not be mixed with general household waste.

For proper treatment, recovery and recycling, please take these products to designated collection points, where they will be accepted on a free of charge basis.

Alternatively, in some countries you may be able to return your products to your local retailer upon the purchase of an equivalent new product.

Disposing of this product correctly will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling. Please contact your local authority for further details of your nearest designated collection point.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.
