Operating Instruction and Cook Book
Microwave Oven
Household Use Only

Model No. NN-ST64JW

Please read these instructions carefully before using this product, and save this manual for future use.
We are glad you have chosen to purchase a PANASONIC microwave oven. Before operating this oven, please read these instructions carefully and completely, and keep them for further reference.

If you have only used a microwave oven for reheating and defrosting, with Panasonic's Inverter Technology you can be reassured of excellent results when cooking a variety of foods, as the 'soft' penetration of microwave energy to the centre of food helps prevent over cooking on edges and surfaces. Foods can now be gently simmered without the concern of boil over.

After reading the introductory chapter, we are sure you will be able to master the basic techniques and thereby develop a firm understanding of your new oven. This book includes recipes from starters to desserts. After trying our recipes be sure to adapt your favourite recipes to microwave methods.

Start experimenting now, and enjoy the first class results you will achieve by using your new microwave oven.

Precautions To Be Taken When Using Microwave Ovens For Heating Foodstuffs

INSPECTION FOR DAMAGE:
A microwave oven should only be used if an inspection confirms all of the following conditions:
1. The door fits squarely and securely and opens and closes smoothly.
2. The door hinges are in good condition.
3. The metal plates of a metal seal on the door are not buckled nor deformed.
4. The door seals are neither covered with food nor have large burn marks.

PRECAUTIONS:
Microwave radiation from microwave ovens can cause harmful effects if the following precautions are not taken:
1. Never tamper with or deactivate the interlocking devices on the door.
2. Never poke an object, particularly a metal object, through a grille or between the door and the oven while the oven is operating.
3. Never place saucepans, unopened cans or other heavy metal objects in the oven.
4. Do not let other metallic articles, e.g. fast food foil containers, touch the side of the oven.
5. Clean the oven cavity, the door and the seals with water and a mild detergent at regular intervals. Never use any form of abrasive cleaner that may scratch or scour surfaces around the door.
6. Always use the oven with the trays or cookware recommended by the manufacturer.
7. Never operate the oven without a load (i.e. an absorbing material such as food or water) in the oven cavity unless specified in the manufacturer’s literature.
8. For horizontally hinged doors, never rest heavy objects such as food containers on the door while it is open.
9. Do not place sealed containers in the microwave oven. Baby bottles fitted with a screw cap or a teat are considered to be sealed containers.
10. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
11. Children should be supervised to ensure that they do not play with the appliance.
12. It is hazardous for anyone other than a competent person to carry out any service or repair operation that involves the removal of a cover which gives protection against exposure to microwave energy.
13. The surfaces are liable to get hot during use.

Important Instructions

WARNING—To reduce the risk of burns, electric shock, fire, injury to persons or excessive microwave energy:
1. Read all instructions before using the microwave oven.
2. Some products such as whole eggs and sealed containers - (for example, closed glass jars and sealed baby bottles with teat) - may explode and should not be heated in the microwave oven.
3. Use this microwave oven only for its intended use as described in this manual.
4. As with any appliance, close supervision is necessary when used by children.
5. Do not operate this microwave oven, if it is not working properly, or if it has been damaged or dropped.
6. Do not store or use this appliance outdoors.
7. Do not immerse cord or plug in water.
8. Keep cord away from heated surfaces.
9. Do not let cord hang over edge of table or counter.
10. To reduce the risk of fire in the oven cavity:
   (a) Do not overcook food. Carefully attend microwave oven if paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
   (b) Heating therapeutic wheat bags is not recommended. If heating, do not leave unattended and follow manufacturers’ instructions carefully.
   (c) Remove wire twist-ties from bags before placing bag in oven.
   (d) If materials inside the oven should ignite, keep oven door closed, turn oven off at the wall switch, or shut off power at the fuse or circuit breaker panel.
   (e) Never leave microwave unattended while cooking or reheating.
11. Do not remove outer panel from oven.
12. Appliances are not intended to be operated by means of an external timer or separate remote-control system.
13. Failure to maintain the oven in a clean condition could lead to deterioration of the surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.

Circuits

Your microwave oven should be operated on a separate 10 A circuit from other appliances. Failure to do this may cause the power board fuse to blow, and/ or food to cook slower. Do not insert higher value fuse in the power board.
Important Safety Instructions (continued)

Earthing Instructions
This microwave oven must be earthed. In the event of an electrical short circuit, earthing reduces the risk of electric shock by providing an escape wire for the electric current. This microwave oven is equipped with a cord having an earthing wire with an earthing plug. The plug must be plugged into an outlet that is properly installed and earthed.

WARNING—Improper use of the earthing plug can result in a risk of electric shock.

Installation and General Instructions

General Use
1. In order to maintain high quality, do not operate the oven when empty. The microwave energy will reflect continuously throughout the oven if no food or water is present to absorb energy. This can lead to damage to the microwave oven including arcing within the oven cavity.
2. If smoke is observed, press the Stop/Reset pad and leave door closed in order to stifle any flames. Disconnect the power cord, and/or shut off power at the fuse or circuit breaker panel.
3. Do not dry clothes, newspapers or other materials in oven. They may catch on fire.
4. Do not use recycled paper products, unless the paper product is labelled as safe for microwave oven use. Recycled paper products may contain impurities which may cause sparks and/or fires when used.
5. Do not use newspapers or paper bags for cooking.
6. Do not hit or strike the Control Panel. Damage to controls may occur.
7. POT HOLDERS may be needed as heat from food is transferred to the cooking container and from the container to the Glass Tray. The Glass Tray can be very hot after removing the cooking container from the oven.
8. Do not store flammable materials next to, on top of, or in the oven. It could be a fire hazard.
9. Do not cook food directly on Glass Tray unless indicated in recipes. (Food should be placed in a suitable cooking utensil.)
10. DO NOT use this oven to heat chemicals or other non-food products. DO NOT clean this oven with any product that is labelled as containing corrosive chemicals. The heating of corrosive chemicals in this oven may cause microwave radiation leaks.
11. If Glass Tray is hot, allow it to cool before cleaning or placing in water.
12. During cooking, some steam will condense inside and/or on the oven door. This is normal and safe. Steam will disappear after the oven cools down.
13. Do not leave the microwave unattended while reheating or cooking food in disposable containers made of plastic, paper or other combustible materials, as these types of containers can ignite if overheated.

14. The microwave oven is intended for heating food and beverages. Drying of food or clothing and heating of warming pads, slippers, sponges, damp cloth and similar may lead to risk of injury, ignition or fire.

15. Metallic containers for food and beverages are not allowed during microwave cooking.

16. Only use utensils that are suitable for use in microwave ovens.

Placement of Oven

1. The oven must be placed on a flat, stable surface. For correct operation, the oven must have sufficient air flow. **Allow more than 15 cm of space on the top of the oven, 10 cm at the back, and 5 cm on both sides.** If one side of the oven is placed flush to wall, the other side or top must not be blocked. Do not remove feet.
   (a) Do not block air vents. If they are blocked during operation, the oven may be overheated and damaged. When using any cloth over the oven, the air intake and exhaust should not be blocked. Also allow sufficient space on back and both sides of the oven.
   (b) Do not place oven near a hot or damp surface such as a gas stove, electric range or sink etc.
   (c) Do not operate oven when room humidity is too high.

2. This oven was manufactured for household use only.

Building-in your oven

1. This oven is intended for counter-top and built-in use only. It is not intended for use inside a cupboard. This oven may be built into a wall cabinet by using the proper trim kit (NN-TK612G5QP/NN-TK611S5QP) which may be purchased from your local Panasonic dealer.

2. In case of fitting into an oven housing, please use Panasonic’s Trim Kit, NN-TK612G5QP/NN-TK611S5QP.

3. Microwave ovens should not be built into a unit directly above a top front venting conventional cooker. This may be a safety hazard and could result in damage to your oven. This will invalidate your one year guarantee.

4. A microwave which is built in must be more than 850 mm above floor level. Read Trim-Kit instructions carefully before installation. It is recommended that the microwave oven is placed below a conventional oven to avoid heat damage to the facia of the microwave.

Food

1. Do not use your oven for home canning or the heating of any closed jar. Pressure will build up and the jar may explode. In addition, the microwave oven cannot maintain the food at the correct canning temperature. Improperly canned food may spoil and be dangerous to consume.

2. Do not attempt to deep fat fry in your microwave oven.

3. Eggs in their shell and whole hard-boiled eggs should not be heated in microwave ovens since they may explode, even after microwave heating has ended.

4. Potatoes, apples, egg yolks, chicken wings, whole squash and sausages are examples of foods with nonporous skins. This type of food must be pierced before cooking, to prevent bursting.

5. When heating liquids, e.g. soup, sauces and beverages, in your microwave oven, overheating the liquid beyond boiling point can occur without evidence of bubbling. This could result in a sudden boil over of hot liquid. To prevent this possibility the following steps should be taken:
   (a) Avoid using straight-sided containers with narrow necks.
   (b) Do not overheat.
   (c) Stir the liquid before placing the container in the oven and halfway through cooking time.
   (d) After heating, allow to stand in the oven for a short time, stirring again before carefully removing the container.
   (e) Microwave heating of beverages can result in delayed eruptive boiling, therefore care should be taken when handling the container.

6. **DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN.** To check the degree of cooking of roasts and poultry use a MICROWAVE THERMOMETER. Alternatively, a conventional meat thermometer may be used after the food is removed from the oven. If undercooked, return meat or poultry to the oven and cook for a few more minutes at the recommended power level. It is important to ensure that meat and poultry are thoroughly cooked.

7. **COOKING TIMES** given in the Cooking Guide section are APPROXIMATE. Factors that may affect cooking time are preferred degree of moisture content, starting temperature, altitude, volume, size, shape of food and utensils used. As you become familiar with the oven, you will be able to adjust for these factors.

8. **It is better to UNDERCOOK RATHER THAN OVERCOOK foods.** If food is undercooked, it can always be returned to the oven for further cooking. If food is overcooked, nothing can be done. Always start with minimum cooking times recommended.

9. Extreme care should be taken when cooking popcorn in a microwave oven. Cook for minimum time as recommended by manufacturer. Use the directions suitable for the wattage of your microwave oven. NEVER leave oven unattended when popping popcorn.

10. When heating food in plastic or paper containers, keep an eye on the oven due to the possibility of ignition.

11. The contents of feeding bottles and baby food jars shall be stirred or shaken and the temperature checked before consumption, in order to avoid burns.
Microwaves and How They Work

Microwaves are a form of high frequency radio waves similar to those used by a radio, including AM, FM and CB. They are similar to a television where the radio waves are converted to a picture on the screen. However, microwaves are much shorter than radio waves; approximately twelve centimetres wave length. Electricity is converted into microwave energy by the magnetron tube (which is the heart of the microwave oven). From the magnetron tube, microwave energy is transmitted to the oven cavity through a small plastic covered piece. The microwaves are converted to heat in the food. The microwaves enter from the outside of the food and travel through the food losing half of their power every two to three centimetres. Continued cooking to the centre occurs by conduction.

Although pacemakers used to be affected by microwaves (as well as by other radio waves), they are now shielded and are not bothered by these interferences. This allows people with pacemakers to sit calmly by their radio or television and cook with microwave ovens.

When microwaves come in contact with a substance, any one or combination of three things may occur. They can be:
1. REFLECTED
2. TRANSMITTED
3. ABSORBED

Reflection:
Metal substances REFLECT microwave energy and because there is no absorption, there is no heating. This is why the oven interior is either stainless steel or epoxy-coated steel. This ensures that the microwaves are kept inside the cavity and evenly distributed throughout the food with the help of the Glass Tray.

Transmission:
Such substances as paper, glass and plastic TRANSMIT microwave energy and do not become hot except from food. Because these substances do not reflect or absorb microwave energy, they are ideal materials for microwave cooking containers.

Absorption:
Food contains moisture and will ABSORB microwave energy, which causes the moisture molecules within the food to vibrate at an incredible rate (2,450,000,000 times per second). Friction, created by the vibration, produces heat energy which is conducted throughout the food.

Cookware and Utensils Guide

It is important to use the correct container when cooking in a microwave oven. The following will help you make the right selection. Metallic containers for food and beverages are not allowed during microwave cooking.

How to Test a Container for Safe Microwave Oven Use

TO TEST A CONTAINER FOR SAFE MICROWAVE OVEN USE: Fill a 1-cup glass measure with cool water and place it in the microwave oven alongside the empty container to be tested; heat one (1) minute at 1100 W. If the container is microwave ovensafe (transparent to microwave energy), the container should remain comfortably cool, the water in glass measure should be hot. If the container is hot, it has absorbed some microwave energy and should NOT be used. This test cannot be used for plastic containers.

Paper Products and Freezer Wrap

Waxed paper, paper plates, cups and napkins should not be used for heating or cooking food. Freezer wrap should not be used as it is not heat resistant and may melt. Paper towel, greaseproof paper and bake paper may be safely used for short periods of time for covering or lining.

Glass, Ceramic and China

Heat-Resistant glass cookware is invaluable in microwave cooking. Many of these items are readily available in most homes: glass jugs, mixing bowls, loaf dishes, covered casseroles, oblong baking dishes, pie plates and round or square cake dishes. Examples of this type of cookware are Pyrex® and Corningware®.

Dinnerware can be used for microwave heating. Many brands of dinnerware are microwave safe. Check the care information for reference to microwave use for dinnerware and serving pieces. If dinnerware is marked ovenproof, it frequently is safe to use in the microwave oven. However, to be sure, check by conducting microwave dish test previously mentioned.

Several types of glassware and dinnerware are not recommended for use in the microwave oven. Do not use dishes with metallic trim or containers with metal parts. Do not use cups or mugs with glued on handles, as they may fall off with continued heating. Do not use delicate glassware. Although the glassware may be transparent to microwave energy the heat from the food may cause the glassware to crack.
Plastics

Plastic dishes, cups and some freezer containers should be used with care in a microwave oven. Choose plastic containers carefully, as some plastic containers may become soft, melt and may scorch. The majority of plastic dishes, even those designed for use in the microwave oven, are not suitable for cooking foods with high fat or sugar content, or for lengthy cooking times. Most microwave plastic dishes should not be used for longer than 3 to 5 minutes on 1100 W. These dishes, although not suitable for extended cooking, may be used successfully for defrosting or for use on lower power levels.

Cooking Bags designed to withstand boiling, freezing, or conventional heating are microwave safe. Prepare bags according to manufacturer’s directions. When cooking by microwave, DO NOT use wire twist-ties to close bag. They can act as an antenna and cause arcing (sparks).

DO NOT COOK IN PLASTIC FOOD STORAGE BAGS.

Plastic Wrap such as GLAD WRAP® can be used to cover dishes in most recipes. Over an extended heating time, some disfigurement of the wrap may occur. When removing plastic wrap “covers”, as well as any glass lid, be careful to remove it away from you to avoid steam burns. Loosen plastic but let dish stand, covered.

Jars and Bottles

Jars and bottles can be used to warm food to serving temperature, if the lid is removed first. Cooking should not be done in these containers since most are not heat resistant and during extended heating times, heat from food would cause cracking or breaking.

Metal

Metal cookware or utensils, or those with metallic trim, should NOT be used in the microwave. Since microwave energy is reflected by metal, foods in metal containers will not cook evenly. There is also a possibility of “arching”.

Although metal utensils should be avoided in microwave cooking, some metal can be helpful when used correctly. Aluminum foil can be used safely, if certain guidelines are followed, to prevent overcooking. Small pieces of foil are used to shield areas such as chicken wings, tips of roasts, or other thin parts that cook before the rest of the recipe is finished. Make sure foil is attached securely and doesn’t touch sides of oven, otherwise arcing may occur. Foil lined containers, either cardboard or plastic, should NOT be used in the microwave oven as arcing could occur.

Metal twist-ties, either paper or plastic coated, should NOT be used in the microwave oven. Frozen dinner trays can be used in the microwave, if the container is no deeper than 2 cm and is filled with food. Metal skewers can not be used in microwave ovens as arcing may occur. Wooden skewers are readily available and give the same result.

Shells: Scalloped baking shells are best used during reheating and for short periods of cooking time only.

Thermometers are available for use in microwave ovens. DO NOT USE CONVENTIONAL MERCURY TYPE CANDY OR MEAT THERMOMETERS in food while cooking in the microwave oven.

Straw, Wicker and Wood

Straw and wicker baskets may be used in the microwave oven for short periods of time to warm rolls or bread. Large wooden utensils, such as bowls or cutting boards should NOT be used for prolonged heating as the microwave energy may cause the wood to become dry and brittle.

a. DO NOT operate the oven without the Roller Ring and Glass Tray in place.
b. Only use the Glass Tray specifically designed for this oven. Do not substitute any other Glass Tray.
c. If the Glass Tray is hot, allow to cool before cleaning or placing in water.
d. DO NOT cook directly on the Glass Tray. Always place food on a microwave-safe dish, or on a rack set in a microwave-safe dish.
e. Always place the container on the center of glass tray when cooking.
f. If food or utensil on the Glass Tray touches oven walls, causing the tray to stop moving, the tray will automatically rotate in the opposite direction. This is normal.
g. Glass Tray can rotate in either direction.

Note
1. The above illustration is for reference only.
2. The Glass Tray is the only accessory with this oven. All other cooking utensils mentioned in this manual must be purchased separately.
Control Panel

**Note**

If an operation is set and **Start** Pad is not pressed, after 6 minutes, the oven will automatically cancel the operation. The display will revert back to clock or colon mode.

**Beep Sound**

When a pad is pressed correctly, a beep sound will be heard. If a pad is pressed and no beep is heard, the unit does not or cannot accept the instruction. The oven will beep twice between programmed stages. At the end of any complete programme, the oven will beep five times.
Let’s Start To Use Your Oven!

1 Plug in.
Plug into a properly earthed electrical outlet. “” appears in the display window, then you can start to operate.

2 Open Door.
Open the door and place container with food in a dish on Glass Tray in the oven. Then close the door.

3 Select Power Level.
e.g. 440 W
Press Micro Power pad 4 times (see page 15 for Micro Power chart).

4 Set Time.
e.g. 12 minute 20 seconds
Press Time pads.

5 Press Start.
Cooking will start. The time in the display window will count down.

Display Window

8 Start Display
To Set Clock

You can use the oven without setting the clock.

1 Press \( \text{Timer/Clock} \) Twice.

Colon will blink in the display window.

2 Enter Time of Day.

e.g. 12:35

Enter time of day using Time Pads.

Time appears in the display window, colon is blinking.
Verify time of day in the display window.

3 Press \( \text{Timer/Clock} \).

Colon stops blinking; time of day is entered and locked in the display window.

Note

1. To reset time of day, repeat steps 1-3.
2. The clock will keep the time of day as long as oven is plugged in and electricity is supplied.
3. Clock is a 12-hour display.
4. Oven will not operate while colon is blinking.

To Use Child Safety Lock

This feature allows you to prevent operation of the oven by a young child; however, the door will open.

This feature can be set when colon or time of day is displayed.

To set:

Press Start 3 times.
Colon or time of day will disappear.
Actual time will not be lost.
" " appears in the display window.

To cancel:

Press Stop/Reset 3 times.
Colon or time of day will reappear in the display window.

To set or cancel child safety lock, Start pad or Stop/Reset pad must be pressed 3 times within 10 seconds.
To Cook on Micro Power by Time Setting

1 Press \( \text{Micro Power} \) to Select Micro Power Level.

Press Micro Power pad until your desired power level appears in the display window. (see chart below)

2 Set Cooking Time.

e.g. 15 minutes

Enter cooking time by using Time pads.
1100 W: up to 30 minutes, Other Powers: up to 99 minutes 50 seconds.

3 Press Start.

Cooking will start.
The time in the display window will count down.

Note

1. It is possible to programme no more than 3 stages cooking as one cooking set. For 2 or 3 stages cooking, repeat steps 1 and 2 above before pressing Start pad. When operating, two beeps will be heard between each stage. (Please refer to page 24 for details).
2. You can increase the cooking time during cooking if required. Time can be increased in 1 minute increments, up to 10 minutes. Press Add Time pad once, then press 1 min pad to a maximum of 10 minutes. After selecting add time function, time should be added within a 5 second period. Cooking time can not be decreased during cooking.
3. Do not use metal containers on microwave mode.
4. Standing time can be programmed after Micro Power and time setting. Refer to using the timer page 25.
To Defrost Using Turbo Defrost

This feature allows you to defrost meat, poultry and seafood automatically by just setting the weight. The serving/weight is 0.1 kg to 3.0 kg.

1 Press Turbo Defrost.

Press once to select Turbo Defrost feature.

2 Select Desired Weight.

Pressing Turbo Defrost pad or Weight pads until your desired weight appears in the display window.

3 Press Start.

Press Start. Defrosting time appears in the display window and begins to count down.

Tips for Turbo defrost

Meat, which is with bones. For example, if the meat with bones has the same weight as the pure meat, the meat in the former one is lighter than the latter one. So, subtract 0.5 kg for 2 kg meat with bones is better for defrosting and 0.25 kg for meat with bones which is less than 2 kg.

Two buzz beeps

Turn over the meat, chicken, fish and shellfish. Separate the stewed meat, chicken pieces and meat loaf. Apart the meat loaf from the hamburger. Shield the edge of chicken wings, roast, fat or bones.

Key to defrosting

For evenly defrosting, turn over the foods or move the position of the foods in the containers during the progress of defrosting.

To Cook Using the Quick 30 Feature

This feature allows you to quickly set cooking time in 30 second increments.

1 Press \[\text{Quick 30}\].

Press Quick 30 to set the desired cooking time (up to 5 minutes). Each press is 30 seconds. Time appears in the display. Power level is pre-set at 1100 W.

2 Press \[\text{Start}\].

The cooking will start and the time in the display will count down. At the end of cooking, five beeps will sound.

**Note**

1. This feature is only available for Micro Power mode. Select desired micro power level before pressing Quick 30.
2. After setting the time by Quick 30, you cannot use Time pads.

---

Using the Add Time Feature

1 Press \[\text{Add Time}\].

After cooking, press Add Time pad once to select the Add Time feature.

2 Enter Cooking Time.

**e.g. 5 minutes**

Enter cooking time by using Time pads.

1100 W: up to 30 minutes, Other powers: up to 99 minutes and 50 seconds.

3 Press \[\text{Start}\].

Time will be added. The time in the display window will count down.

**Note**

1. This feature is not available for Turbo Defrost, Beverage, Auto Reheat and Auto Cook Menus.
2. The Add Time feature will not operate after 1 minute cooking.
3. The Add Time feature can be used after the 3-stage cooking.
4. The power level is the same as the last stage.
To Use Auto Reheat Feature

This feature allows you to cook foods without selecting times and power levels. Only set desired Weight, the oven will cook your food automatically.

1 Press **Auto Reheat**.

2 Select Desired Weight.

Pressing **Auto Reheat** pad or **Weight** pads until your desired weight appears in the display window (see chart below).

<table>

<td>4</td>
<td>850 g</td>
<td>800 - 900 g</td>
</tr>
</tbody>
</table>

3 Press **Start**.

Reheating time will appear in the display window and begin to count down.

**Note**

1. Auto Reheat is suitable for pre-cooked foods from refrigerated or room temperature. It is suitable for casseroles, plated meals, soup, stews, pasta dishes (except lasagne) and canned foods. Food being reheated should weigh between 125 g and 1.0 kg. For foods weighing less than 125 g and more than 1.0 kg, use a manual micro power setting.
2. Do not reheat bread or pastry products (raw or uncooked), or beverages.
3. Do not use if oven cavity is warm (from previously cooked foods).
4. Cover foods securely with plastic wrap. (Do not use any snap closing lids.)
5. The door should not be opened before the time appears in the display window.
6. During the heating time, the oven will 'beep' and prompt you to stir/rearrange the food. There is no need to recover if not required.
7. All foods should have a covered standing time of at least 3 to 5 minutes.
To Use Beverage Feature

1 Press 🍵Beverage

</tr>
</tbody>
</table>

2 Select the Serving/weight.

Select the Serving/Weight by using the Weight pads.

3 Press 🚀Start

Reheat will start. The time in the display window will count down.

Note

1. Use a microwave safe cup. Heated coffee/milk can erupt if not mixed with air. Do not heat coffee/milk in your microwave oven without stirring before and halfway through heating.
2. Care must be exercised not to overheat coffee/milk when using the Beverage feature. It is programmed to give proper result when heating 1 cup or 2 cups of coffee/milk, starting from room temperature for coffee and refrigerator temperature for milk. Overheating will cause an increased risk of scalding, or water eruption.
3. 1 cup of milk is 200 ml to 250 ml and 1 cup of coffee is 150 ml to 200 ml.
To Use Auto Cook Menus

This feature allows you to cook foods without selecting times and Power Level. Only set desired menu number and Serving/Weight, the oven will cook your food automatically.

Note: If food needs more time cooking or weight exceeds range, cook using 300 W for melting or softening.

For best results on Melt & Soften, follow these recommendations:

- **Chocolate:**
  Remove wrapper and place chocolate into a microwave safe dish. Cook without cover. After heating, stir until completely melted.
  Note: Chocolate holds its shape even when softened.

- **Butter:**
  Remove wrapper, cut butter into 2 tablespoons cube, and place into a microwave safe dish. Melt with lid or plastic wrap. Stir after cooking.

- **Cream Cheese:**
  Remove wrapper and place in a microwave safe bowl/dish. Soften with lid or plastic wrap.

- **Ice Cream:**
  Soften slightly without lid.

3. Vegetables

It is suitable for cooking all types of leaf, green and soft varieties of vegetables, including broccoli, squash, cauliflower, cabbage, asparagus, beans, celery, zucchini, spinach, capsicum or a mixture of these. All vegetables should be trimmed or prepared and cut into evenly sized pieces. Clean the vegetables and place them in a microwave safe container, add 1 tablespoon to ¼ cup of water to vegetables if dehydrated or a softer cooked texture is desired. Butter, herbs, etc., may be added before heating, but do not salt vegetables until serving. Cover dishes securely with lid or plastic wrap and place container at the center of the glass tray. Select the program and weight then press Start. Open the door to STIR WHEN TWO BEEPS HEARD during cooking, press Start Pad to continue. At the end of cooking, stir larger quantities of vegetables. Let stand, covered, for 2 to 3 minutes.

4. Root vegetables

Suitable for cooking root vegetables such as potatoes, sweet potatoes, pumpkin, onions, swede, carrots, turnip and beetroot. All vegetables should be trimmed or prepared and cut into even sized pieces. Add 1 tablespoon to ¼ cup of water to vegetables if dehydrated or a softer cooked texture is desired. Place into an appropriate size dish and cover securely with lid or plastic wrap. If desired, butter, herbs etc. may be added but do not add salt until after cooking. Select the program and weight then press Start. Open the door to STIR WHEN TWO BEEPS HEARD during cooking, press Start Pad to continue. At the completion of cooking, stir larger quantities of vegetables. Let stand, covered, for 2 to 3 minutes.

5. Frozen Vegetables

It is suitable for all types of frozen vegetables. Put them in a microwave safe container. Do not use plastic dishes. Best results are achieved if large quantities are placed in a single layer. Add 1 tablespoon to ¼ cup water to vegetables, if desired. Butter, herbs etc. may be added before heating, but do not add salt until serving. Cover dishes securely with lid or plastic wrap and place container at the center of the glass tray. Select the program then press Start. Open the door to STIR WHEN TWO BEEPS HEARD during cooking, press Start Pad to continue. At the end of the cooking, stir vegetables and let stand, covered, for 2 to 3 minutes.

6. Fish

It is suitable for cooking whole fish and fish fillets (thickness of fish should not be more than 3 cm). Select fish suitable for microwave cooking and place in a single layer in a shallow microwave safe dish, with skin side down. Add butter, spices, herbs, or lemon juice to flavour. Overlap thin edges of fillets to prevent overcooking. Shield the eye and tail area of whole fish with small amounts of aluminum foil to prevent overcooking. Cover dishes securely with plastic wrap and place container at the center of the glass tray. Select the program and weight then press Start. Allow large amounts of fish to stand for 3 to 5 minutes after cooking before serving.

7. Chicken Pieces

It is suitable for cooking chicken pieces, such as wings, thighs, legs, breast fillets. Chicken pieces should be completely thawed before cooking. Pierce the chicken pieces. Marinate chicken pieces before cooking for added flavour and colour. Put the prepared chicken pieces onto a microwave safe dish. Cover securely with lid or plastic wrap and place container at the center of the glass tray. Select the program and weight then press Start. Open the door to STIR WHEN TWO BEEPS HEARD during cooking, press Start Pad to continue. Let stand 5 to 10 minutes at the end of cooking.

8. Dried Pasta

It is suitable for cooking a variety of pastas such as spaghetti, fettuccine, tagliatelle, macaroni, penne, spiral and various pasta shapes. Place pasta in an appropriate size microwave safe dish with boiling water. Use the above chart as a guide:

<table>
<thead>
<tr>

It may be necessary to adjust the water to your personal preference. Soak in water for 10 - 15 minutes. Always allow at least ⅓ depth of volume for evaporation to prevent boiling over. Do not cook rice in plastic dishes as incorrect cooking times may result. Cover partially with lid and place container at the center of the glass tray. Select the program and weight then press Start. Open the door to STIR WHEN TWO BEEPS HEARD during cooking, press Start Pad to continue. At the end of the cooking, let stand 5 to 10 minutes, covered.

15. Risotto*

It is suitable for cooking many basic risotto recipes and variations. Onions and garlic should be pre-cooked with 1 tablespoon of oil before adding rice and stock. The quantities of rice and amounts of stock, please follow the chart below. Always use arborio rice or short grain rice. Chicken, vegetable, beef or fish stock may be used. Stock should be boiling when added to rice otherwise cooking times may be incorrect. Cover dish securely with lid at stage 1. Select the program and weight then press Start. Open the door to STIR WHEN TWO BEEPS HEARD during cooking. Remove the lid completely from dish. Add remaining stock. There is no need to re-cover for stage 2. At the end of stage 2 add grated parmesan cheese, stir through and cook for 2 to 4 minutes on High. Standing time may be required at the end to allow risotto to finish cooking.

16. Quinoa

It is suitable for cooking quinoa. Place quinoa in a microwave safe casserole dish. Use the above chart as a guide:

## To Use Timer

This feature allows you to program standing after cooking is completed and to program the oven as a minute or a second timer or program delay start.

### To Use as a Kitchen Timer

1. Press once.
2. Set desired amount of time. (up to 99 minutes and 50 seconds)
3. Press Start.

   Time will count down without oven operating.

### To Set Standing Time

1. Set the desired cooking programme, up to 2 stages. (see Page 24)
2. Press once.
3. Set desired amount of standing time. (up to 99 minutes and 50 seconds)
4. Press Start.

   Cooking will start. After cooking, standing time will count down without oven operating.

### To Set Delay Start

1. Press once.
2. Set desired amount of delay time. (up to 99 minutes and 50 seconds)
3. Set the desired cooking programme, up to 2 stages. (see Page 24)
4. Press Start.

   Delayed time will count down without oven operating. Then cooking will start.

### Note

1. If oven door is opened during the Standing Time, Delay Start or Kitchen Timer, the time in the display window will continue to count down.
2. Delay Start and Standing Time cannot be programmed together with Turbo Defrost, Beverage, Auto Reheat and Auto Cook Menus. This is to prevent the standing temperature of the food from rising before defrosting or cooking begins. A change in the starting temperature could cause inaccurate results.
3. When using Standing time or Delay time, it’s up to 2 Power stages.
# Defrosting Chart

The times given below are a guideline only. Always check the progress of the food by opening the oven door and then re-starting. For larger quantities adjust times accordingly. Food should not be covered during defrosting.

Always check that food is piping hot after reheating in the microwave. If unsure, return to oven. Foods will still require a stand time, especially if they cannot be stirred. The denser the food the longer the stand time.

PROBLEM       POSSIBLE CAUSE                        REMEDY

Oven will not turn on.  
- The oven is not plugged in securely.  
  Remove plug from outlet, wait 10 seconds and re-insert.
- Circuit breaker or fuse is tripped or blown.  
  Reset circuit breaker or replace fuse.
- There is a problem with the outlet.  
  Plug another appliance into the outlet to check if the outlet is working.

Oven will not start cooking.  
- Start Pad was not pressed after programming  
  Press Start Pad.
- Another program has already been entered into the oven.  
  Press Stop/Reset Pad to cancel the previous program and program again.
- The program has not been entered correctly.  
  Program again according to the Operating Instructions.
- Stop/Reset Pad has been pressed accidentally.  
  Program oven again.

When the oven is turning on, there is noise coming from Glass Tray.  
- The roller ring and oven bottom are dirty.  
  Clean these parts according to care of your oven (See next page).

"∞" appears in the display window.  
- The Child Lock was activated by pressing Start Pad 3 times.  
  Deactivate Lock by pressing Stop/Reset Pad 3 times.

"H97", "H98" or "H00" appears in the Display Window.  
- The display indicates a problem with microwave generation system.  
  Contact the specified service centre.

If it seems there is a problem with the oven, contact an authorized Service Centre.
Care of your Microwave Oven

Turn the oven off and remove the power plug from the wall socket before cleaning.

Keep the inside of the oven clean. When food splatters or spilled liquids adhere to oven walls, wipe with a damp cloth. Mild detergent may be used if the oven gets very dirty. The use of harsh detergent or abrasives is not recommended.

It is occasionally necessary to remove the Glass Tray for cleaning. Wash the tray in warm sudsy water or in a dishwasher.

The outside oven surfaces should be cleaned with a damp cloth. To prevent damage to the operating parts inside the oven, water should not be allowed to seep into the ventilation openings.

Do not allow the Control Panel to become wet. Clean with a soft, damp cloth. Do not use detergents, abrasives or spray-on cleaners on the Control Panel. When cleaning the Control Panel, leave oven door open to prevent oven from accidentally turning on. After cleaning press Stop/Reset button to clear display window.

If steam accumulates inside or around the outside of the oven door, wipe with a soft cloth. This may occur when the microwave oven is operated under high humidity conditions and in no way indicates malfunction of the unit.

The roller ring and oven cavity floor should be cleaned regularly to avoid excessive noise. Simply wipe the bottom surface of the oven with mild detergent, water or window cleaner and dry. The roller ring may be washed in mild sudsy water or dish washer. Cooking vapors collect during repeated use but in no way affect the bottom surface or roller ring wheels. When removing the roller ring from cavity floor for cleaning, be sure to replace in the proper position.

Note
1. When it becomes necessary to replace the oven light, please consult a dealer to have it replaced.
2. The oven should be cleaned regularly and any food deposits removed.
3. Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass, since they can scratch the surface, which may result in shattering of the glass.
4. A steam cleaner is not to be used for cleaning.

Panasonic Warranty (For Australia)

Home Appliance 12 Month Warranty from Date of Purchase

1. Subject to the conditions of this warranty Panasonic or its Authorised Service Centre will perform necessary service on the product without charge for parts or labour, if in the opinion of Panasonic, the product is found to be faulty within the warranty period. For Communications products (i.e. Cordless Phones, etc) the genuine battery(ies) has a 3 month warranty:

2. This warranty only applies to Panasonic products purchased in Australia and sold by Panasonic Australia or its Authorised Distributors or Dealers and only where the products are used and serviced within Australia or it's territories. Warranty cover only applies to service carried out by a Panasonic Authorised Service Centre and only if valid proof of purchase is presented when warranty service is requested.

3. This warranty only applies if the product has been installed and used in accordance with the manufacturer’s recommendations (as noted in the operating instructions) under normal use and reasonable care (in the opinion of Panasonic). The warranty covers normal domestic use only (also Clip & Trim Professional use) and does not cover damage, malfunction or failure resulting from use of incorrect voltages, incorrect installation, accident, misuse, neglect, build-up of dirt or dust, abuse, maladjustment of customer controls, mains supply problems, thunderstorm activity, infestation by insects or vermin, tampering or repair by unauthorised persons (including unauthorised alterations), exposure to abnormally corrosive conditions or any foreign object or matter having entered the product.

4. This warranty does not cover the following items unless the fault or defect existed at the time of purchase:

(a) Cabinet Parts
(b) Microwave Oven Plates.
(c) User replaceable Batteries
(d) Kneader Mounting Shaft, Shaver Heads, Cutters, Foils, Blades
(e) Accessories
(f) Noise or vibration that is considered normal

5. To claim warranty service, when required, you should:
   • Contact Panasonic’s Customer Care Centre on 132600
   • Send or take the product to a Panasonic Authorised Service Centre together with your purchase receipt as a proof of purchase date. Please note that freight and insurance to and / or from your nearest Authorised Service Centre must be arranged by you.

6. The warranties hereby conferred do not extend to, and exclude, any costs associated with the installation, de-installation or re-installation of a product, including costs related to the mounting, de-mounting or remounting of any screen, (and any other ancillary activities), delivery, handling, freighting, transportation or insurance of the product or any part thereof or replacement of and do not extend to, and exclude, any damage or loss occurring by reason of, during, associated with, or related to such installation, de-installation, re-installation or transit.

Panasonic Authorised Service Centres are located in major metropolitan areas and most regional centres of Australia, however, coverage will vary dependant on product. For advice on exact Authorised Service Centre locations for your product, please telephone our Customer Care Centre on 132600.

In addition to your rights under this warranty, Panasonic products come with consumer guarantees that cannot be excluded under the Australian Consumer Law. If there is a major failure with the product, you can reject the product and elect to have a refund or to have the product replaced or if you wish you may elect to keep the goods and be compensated for the drop in value of the goods. You are also entitled to have the product repaired or replaced if the product fails to be of acceptable quality and the failure does not amount to a major failure.

If there is a major failure in regard to the repair which cannot be remedied then you must notify us within a reasonable period by contacting the Panasonic Customer Care Centre. If the failure in the product is not a major failure then Panasonic may choose to repair or replace the product and will do so in a reasonable period of time from receiving notice from you.

THIS WARRANTY CARD AND THE PURCHASE DOCKET (OR SIMILAR PROOF OF PURCHASE) SHOULD BE RETAINED BY THE CUSTOMER AT ALL TIMES

If you require assistance regarding warranty conditions or any other enquiries, please visit the Panasonic Australia website www.panasonic.com.au or contact by phone on 132 600

If phoning in, please ensure you have your operating instructions available.

Microwaves penetrate the surface of the food to a depth of about two to three centimetres and then the heat is gradually conducted in a random pattern. Some parts of food matter cook faster than others. Special microwave techniques are used to promote fast and even cooking. Some of these techniques are similar to those used in conventional cooking, but because microwaves produce heat very quickly the following techniques are extremely important. It’s a must for you to be familiar with the following tips.

### Food Characteristics

<table>
<thead>
<tr>
<th>Size and Quantity</th>
<th>Techniques for Preparation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Small portions cook faster than large portions.</td>
<td>Timing</td>
</tr>
<tr>
<td>As you increase the quantity of food you put into the microwave oven, you must also increase your cooking time. The microwave oven has the same power regardless of quantity; thus the power is divided between more items and so it takes longer to cook. As a general guide, if you double the quantity of food suggested in the recipe, add half the time suggested again.</td>
<td>A range of cooking times is given in each recipe for two reasons. First, to allow for the uncontrollable differences in food shapes, starting temperatures and personal preferences. Secondly, these allow for the differences in electrical voltage input which changes during peak load periods. Always remember that it is easier to add time to undercooked food. Once the food is overcooked, nothing can be done. For each recipe, an approximate cooking time is given.</td>
</tr>
<tr>
<td>Low moisture foods take a shorter time to cook than foods with a lot of moisture.</td>
<td>Stirring</td>
</tr>
<tr>
<td>Uniform sizes cook more evenly. To compensate for irregular shapes, place thin pieces towards the centre of the dish and thicker pieces towards the outer edge of the dish.</td>
<td>Stirring is often necessary during microwave cooking. We have noted when stirring is helpful in the recipes. Always bring the outside edges towards the centre and the centre portions to the outside.</td>
</tr>
<tr>
<td>Bones conduct heat and cause the meat next to them to be heated more quickly. Large amounts of fat absorb microwave energy and the meat next to these areas may overcook.</td>
<td>Rearranging or Turning</td>
</tr>
<tr>
<td>Food which has been sitting at room temperature takes less time to cook than refrigerated or frozen food.</td>
<td>Some foods should be turned in the container during cooking. For example, because of the different thicknesses in the breast and back sections of poultry, it is a good idea to turn poultry over once to ensure more even cooking. Rearranging or turning over uneven shaped food in the dish should be done as suggested to ensure a satisfactory result. Rearrange small items such as chicken pieces, prawns, hamburger patties, nuts or potatoes. Rearrange pieces from the centre to the edge of the dish.</td>
</tr>
<tr>
<td>Porous, airy foods (cakes and breads) take less time to cook than heavy compacted foods (meat and vegetables). Recipes high in fat and sugar content cook more quickly.</td>
<td>Cooking in Layers</td>
</tr>
<tr>
<td>Cured meats may overcook in some areas due to the high concentration of salts used in the curing process. So take care when cooking different brands of bacon as cooking times may vary slightly.</td>
<td></td>
</tr>
</tbody>
</table>

### Piercing of Foods

Pierce the skin or membrane of foods such as eggs, tomatoes and jacket potatoes when cooked whole in the microwave oven. This allows steam to escape. If the skin has not been pierced, food may burst.

### Cured Meats

Cured meats may overcook in some areas due to the high concentration of salts used in the curing process. So take care when cooking different brands of bacon as cooking times may vary slightly.
### Techniques for Preparation

#### Covering

Covering food minimizes the microwave cooking time. Because microwave cooking is done with time and not direct heat, the rate of evaporation cannot be easily controlled. However, this can be corrected by using different materials to cover dishes. Plastic wrap is the best substitute for a lid as it creates a tighter seal and so it retains more heat and steam. Wax paper and paper towels hold the heat in but not the steam. These materials also prevent splattering. Use a paper towel, wax paper or no cover when steam is not needed for tenderising.

#### Browning

Meats and poultry, when cooked longer than 10 to 15 minutes, will brown from their own fat. Foods cooked for shorter periods of time can be aided with the help of a browning sauce, Worcestershire sauce or soy sauce. Simply brush one of these sauces over meat or poultry before cooking. Baked goods do not need long cooking time and therefore, do not brown. When cakes or cupcakes are iced, no one will notice the visual difference. For cakes or cupcakes, brown sugar can be used in the recipe in place of caster sugar or the surface can be sprinkled with dark spices before baking.

#### Standing Time

The moisture molecules continue to vibrate in the food when the microwave oven has turned itself off. After all, the molecules were vibrating at 2,450,000,000 times per second during cooking. So cooking continues even after the food is no longer being exposed to the microwaves whether in or outside your microwave oven. Standing time refers to the time it takes (after the microwave time is completed) to allow the interior of the food to finish cooking.

The amount of standing time varies with the size and density of the food. In meat cookery, the internal temperature will rise between 5°C and 10°C if allowed to stand covered for ten to fifteen minutes. Rice and vegetables need shorter standing time, but this time is necessary to allow foods to complete cooking in the centre without overcooking on the edges.

The power level used in microwave cooking also determines the standing time. For example, when using a lower power level the standing time is shorter because of a lower concentration of heat in the food. Foods should always be kept covered while standing in order to retain the heat. If a longer standing time is required (while you cook another food to serve with the first, for instance), cover with aluminum foil.

### Converting Your Favourite Conventional Recipes for Microwave Cooking

When adapting conventional recipes for microwave cooking, time are reduced considerably. For example, a chicken which takes 1 hour to cook in a moderate oven will take 15 to 20 minutes on 600 W in your microwave oven.

Use similar microwave recipes to help you adapt conventional recipes. Remember, it is always best to undercook a recipe and then add an extra minute or two to finish it off.

Here are some other tips that may help:

- Reduce liquids in a conventional recipe by one half to two thirds, e.g. 1 cup (250 ml) should be reduced to ½ cup (125 ml).
- Add more thickening such as flour or cornflour to sauces and gravies if you do not reduce the liquid.
- Reduce seasonings slightly in a recipe where ingredients do not have time to simmer by microwave.
- Do not salt meats, poultry or vegetables before cooking; otherwise, they will toughen and dry out.
- If one ingredient takes longer to cook than the others, pre-cook it in the microwave oven first.
- Onion, celery and potato are examples.
- When cooking meat or vegetables, omit any oil or fat that would have been used in a conventional recipe for browning.
- Reduce leavening agents for cakes by one quarter and increase liquids by one quarter.
- Biscuits require a stiff dough. Increase flour by about 20 percent. Substitute brown sugar for white sugar and use biscuit recipes that have dark spices or require icing. Because of the short cooking time, biscuits don’t have time to brown. Chill dough for half an hour before baking. This produces a crisper biscuit.
- Bake biscuits on a glass tray lined with greaseproof paper.
- Items with a lot of water, such as rice and pasta, cook in about the same time as they would on a conventional stove. (Refer to Rice and Pasta chapter.)

Select recipes that convert easily to microwave cooking such as casseroles, stews, baked chicken, fish and vegetable dishes. The results from foods such as grilled meats, cooked soufflés or two-crust pies could be less than satisfactory. Never attempt to deep fry in your microwave oven.
Menu Planning for Microwave Cooking

How to Keep Everything Hot at The Same Time
Plan your meals so that the food will not all need last minute cooking or attention at the same time. The special features of microwave cookery make it easy to serve meals with everything piping hot. Cooking of some foods may be interrupted while you start others, without harming the nutritional value or flavour of either.

A recipe which requires standing time can be microwaved first and another food cooked while it stands. Dishes prepared in advance can be reheated briefly before serving. It does take some experience and time to cook with confidence. Microwaves are fast so you will have to do some experimenting. You might find you will use your conventional range in conjunction with your microwave oven. For example, while cooking the roast in the microwave oven, you can be cooking the vegetables and gravy on the range top. This can also be done the other way around. Prepare your meals as follows.

1. Firstly, cook the most dense item (roast or casserole). Drain and retain meat juice from joints then cover with foil.
2. Cook the potatoes, rice or pasta.
3. Cover with foil for standing.
4. Cook greens and other vegetables.
5. Cover with foil for standing.
6. Cook the gravy with the retained meat juices, stock and thickening.
7. Carve the roast and serve the vegetables and gravy.

While you are learning to plan meals, you may get a bit behind time. Don’t worry. Dinner servings may be suitably reheated on 600 W, for 1 to 2 minutes per serving.

If you prefer not to use foil, cover food with saucepan lids. A metal lid will retain the heat for at least 15 minutes.

Meanwhile, how can you cook all the vegetables at the same time? Simply place potatoes and pumpkin in one dish and less dense vegetables such as broccoli, cabbage, cauliflower, beans and peas in another. Sprinkle greens with water. Cover with a lid or plastic wrap. Cook on 1100 W for cooking times refer to vegetable cooking chart on page 52-53. Fresh and frozen vegetables can be mixed on a vegetable platter, but remember frozen vegetables are not as dense as fresh vegetables, as they have been blanched before freezing.

If vegetables are cut to a similar size, they can be cooked in separate ramekins or small dishes at the same time.

Increasing & Decreasing Recipes

Increasing
• To increase a recipe from 4 to 6 servings, increase each ingredient listed by half.
• To increase a recipe from 4 to 8 servings, double each ingredient listed.
• For larger quantities of a recipe, a large dish should be used. Make sure that the dish is deep enough to prevent the recipe from boiling over during cooking.
• Make sure to cover, stir or rearrange food as directed in the recipe and always check the food during cooking.
• Increase standing times by 5 minutes per 500 g.
• Use the same Power Level recommended in the original recipe.
• Increase the cooking times by: ¼ of original cooking time for 6 servings; and an extra ½ of original cooking time for 8 servings.

Decreasing
• To decrease a recipe from 4 to 2 servings, decrease each ingredient listed by half.
• For small quantities, a small dish should be used. Make sure that the dish is large enough to prevent the recipe from boiling over during cooking.
• Use the same Power Level recommended in the original recipe.
• Decrease the cooking times by 1½ to 2½ of the original cooking time.

Cooking for One
• To decrease a recipe from 4 to 1 serving, quarter each ingredient listed.
• A smaller dish should be used, making sure that the dish is still large enough to prevent the recipe from boiling over.
• Use the same Power Level recommended in the original recipe.
• Quarter the original cooking times, then add extra time, if needed.
• Make sure to cover, stir or rearrange food as directed in original recipe and always check the food during cooking.

Converting Recipes from Other Sources

When the recipe is written with a wattage different than your oven, adjust the cooking time by approximately 10% per 100 watts, e.g. 6 minutes would be adjusted by 36 seconds. Alternately, adjust the power level by one level. If your wattage is higher than the recipe: (1) Adjust time downward or (2) Adjust power level downward. If your wattage is lower than the recipe: (1) adjust time upward or (2) adjust power level upward (when possible).
Converting Recipes from Other Sources

One of the most common uses for a microwave oven is to reheat food. Your Panasonic microwave allows you to either reheat by placing food into the oven and you choose the micro power level and length of heating time or you may reheat automatically by using the AUTO REHEAT Pad on your microwave. Following are some directions for reheating pre-cooked foods from refrigerated or room temperature.

General rules for reheating foods by Micro Power

- Many convenience foods contain heating instructions on the packaging. It is best to follow these instructions, being sure to check the wattage of the oven they used and adjust the cooking time if necessary (decrease cooking time by 10% for every 100 watts more powerful your oven is).
- If package directions are not available, follow the recommendations in the charts on the following pages.
- All foods must be pre-cooked; raw foods will not cook through during reheating times and if consumed may cause illness.
- Do not reheat in foil containers, cans or plastic containers as incorrect heating times will result. Place foods into microwave safe bowls or onto dinner-plates before heating.
- Most foods can be heated on 1100 W but consider if the food is delicate in structure like baked custard or you have a large quantity, a lower power level for slightly longer may be gentler.
- Cover foods with plastic wrap if you require a steamed effect or leave uncovered for a drier surface, e.g. Crumbed foods.

Note: when cooking by Auto Cook all food must be covered.

- Stir or re-arrange foods during heating as this will help food heat evenly. Stir after heating and let stand for 2 to 3 minutes. Check temperatures before adding extra heating time and ensure food is hot. If food is not heated enough, consumption may cause illness.

Caution:
Pastry items which have a filling that is high in fat sugar or moisture will become hotter in the centre and the pastry may only feel warm. Ensure you allow it to stand for several minutes before eating.

Reheating by Auto Cook

- Minimum weight 250 g / Maximum weight 850 g
- Foods weighting less than 250 g and more than 850 g should be heated by manual micro power and time.
- All foods must be pre-cooked from refrigerated or room temperature.
- Suitable foods include casseroles, plated dinners, soups, stews, pasta dishes. (except lasagne) and canned foods.
- Do not reheat bread or pastry items, raw or uncooked foods or beverages.
- Cover foods loosely with plastic wrap or a lid, which does not snap seal.
- During the cooking time, the oven will 'beep' and prompt you to rearrange or stir. At the end of cooking time, stir the food, check it is hot and allow standing 2 to 3 minutes.

To Operate: Press Auto Reheat
Pressing ▲ Weight ▼ to select weight, then
Press Start.

IMPORTANT POINTS TO CONSIDER WHEN REHEATING COLD FOODS

STARTING TEMPERATURE —
Foods taken from the refrigerator will take longer to reheat than foods from room temperature.

Quantity —
One serving heats faster than several servings. When heating large quantities, stir food to ensure even heating. It is quicker to heat individual plates of food than large quantities in a casserole dish.

Plated Dinners —
Arrange foods with the most dense items towards the outside of the plate. Cover meats with sauces/gravies if desired, spread out mashed potatoes or rice so it heats more evenly. When assembling plates of leftover foods, use foods which have a similar starting temperature.

Covering Foods —
Most foods need to be covered with one sheet of absorbent paper towel to hold in the heat and prevent splattering without steaming. When more moisture is desired, cover with plastic wrap.

Heating —
Reheating is usually done on 1100 W, however, if food has a more delicate texture, like a baked custard, a lower power setting should be used. Medium for a little longer will be gentler on the food. An average plate of food would generally take 1 to 3 minutes to heat depending on the density of the food. Place it in for the minimum time and add extra heating time if required.

Ensure food is hot by feeling the bottom of the plate in the centre. If the plate is cool, food may be warm but will lose heat quickly as the plate will absorb the heat and taste cold when served.

If food is not heated enough, consumption may cause illness.

Elevation —
Elevate pastries and breads on a small plastic rack with paper towel under the food to prevent it from becoming soggy.

Caution:
Pastry items which have a filling that is high in fat, sugar or moisture will become hotter in the centre and the pastry may only feel warm. Ensure you allow it to stand for several minutes before eating.

IMPORTANT POINTS TO CONSIDER WHEN REHEATING FOODS FROM THE FREEZER

VOLUME —
The greater the volume and the more dense the item, the longer it takes to reheat. E.g. frozen cake will take less time than frozen casserole.

LARGE VOLUME —
Large, dense, frozen precooked foods are best thawed on 300 W until icy in the centre then heated on 800 W. This prevents overcooking of the edges. Stirring is often needed to distribute heat evenly.

Commercial frozen foods —
These foods should be removed from their foil containers if possible and placed into suitable microwave safe containers. If a foil container is used in the microwave oven it shouldn’t be more than 4 cm high and must not touch the interior of the microwave oven. Remove the cover from the tray and replace with paper towel or plastic wrap to prevent splattering.

Foods to be served at room temperature —
For best results, 300 W for a short time and allow to stand to complete thawing, e.g. frozen cake.

Vacuum sealed pouches —
Pierce pouches, bags before heating to allow steam to escape. This prevents bursting.

Containers —
Use dishes about the same volume of the food or slightly larger to allow for stirring. Remove or release snap seal lids other wise they will pop during heating and may disfigure.

Pies and pastries —
Pies and pastries that contain raw pastry and filling cannot be cooked in the microwave oven. Precooked products can be thawed and heated. Place them on a sheet of paper towel and elevate on plastic rack for best results. For added crispness place under the grill or in a hot oven for few minutes. Pastry items can become tough and rubbery if overheated, remember to allow 5 minutes standing then test before adding extra heating time.
Soups and Snacks

PUMPKIN SOUP
Serves: 4
Ingredients:
1 kg diced pumpkin
1 onion, diced
2 cups chicken stock
1 teaspoon curry powder
Method:
Place pumpkin, onion and curry powder in a 2-litre casserole dish. Cover and cook on 1100 W for 12 minutes. Add chicken stock and pepper. Cook on 1100 W for 10 minutes. Cool slightly. Purée pumpkin and liquid in blender or food processor. Pour into individual serving dishes and garnish with chives.

To cook by Auto Cook:
Prepare pumpkin as above cover with plastic wrap. Refer to Root Vegetables directions on page 22. Select Root Vegetables, press Weight pads to select 900 g, then press Start.

SHORT AND LONG SOUP
Serves: 4
Ingredients:
200 g fresh singapore noodles
12 (200 g) frozen mini dim sims
4 green onions, sliced
1-litre chicken stock
1 teaspoon crushed garlic
1/2 teaspoon chopped fresh ginger
2 tablespoons soy sauce
1 chicken breast, cooked and sliced
4 baby bok choy, quartered
1 cup bean sprouts
2 tablespoons dried onion (optional)
Method:
Place all ingredients except bok choy and bean sprouts in a 4-litre casserole dish and cook on 1100 W for 10 minutes. Add bok choy and cook on 1100 W for 2 minutes. Serve in individual bowls topped with bean sprouts and onion.

HINT:
To cook 1 double chicken breast. Place onto a dinner plate. Cover and cook on 800 W for 8 to 10 minutes.

PEA AND HAM SOUP
Serves: 6
Ingredients:
2 1/2 cups green split peas
850 g smoked ham hock
1 medium onion, chopped
1 tablespoon fresh thyme leaves
1 bay leaf
6 cups chicken stock
1/2 cup frozen peas
Method:
Wash split peas and place in a 2-litre capacity bowl with 1-litre of water. Cover and allow soaking for 8 hours or overnight. Remove rind from ham hock and discard. Cut meat away from the bone and roughly chop. Reserve bone. Drain peas and place into a 5-litre capacity microwave safe dish. Add ham bone, chopped ham, onion, thyme, bay leaf and chicken stock. Cook uncovered on 1100 W for 15 minutes. Reduce power to 600 W and cook for 15 minutes. Skim top of soup and cook on 600 W for a further 30 minutes. Remove ham bone and bay leaf and stir in frozen peas. Cook on 600 W for 10 minutes. Blend half the soup and return to the bowl, stirring through the remaining soup. Serve hot with crusty bread.

Tip:
Substitute 500 g bacon bones and 250 g of diced bacon rashers for the ham hock.
Do not add salt when cooking lentils or pulses, as they will toughen. Add salt after cooking if desired.

POTATO AND LEEK SOUP
Serves: 4 to 6
Ingredients:
1 kg potatoes, peeled and diced
2 medium thinly sliced leeks
2 teaspoons fresh thyme
pepper
3 cups chicken stock
150 ml cream
Method:
Place potatoes, leeks, thyme and pepper in 4-litre casserole dish. Cover and cook on 1100 W for 8 minutes. Stir in chicken stock. Cover and cook on 1100 W for 14 to 16 minutes. Purée soup mixture. Stir in cream and serve hot or cold in individual bowls.

To cook by Auto Cook:
Place potatoes, leeks, thyme and pepper in a 4-litre dish. Cover with plastic wrap. Refer to Root Vegetables directions on page 22. Select Root Vegetables, press Weight pads to select 900 g, then press Start.
CHICKEN AND PRAWN LAKSA

Serves: 4

Ingredients:
Soup:
- 2 tablespoons laksa paste
- 400 ml coconut milk
- 1-litre chicken stock
- 1 tablespoon soy sauce
- fresh ground black pepper

Laksa:
- 250 g rice noodles
- 8 cups boiling water
- 1 bunch coriander, leaves chopped
- 4 small red chillies, seeds removed and finely chopped
- ½ cup bean sprouts
- 4 lime wedges
- 1 tablespoon peanut oil
- 400 g cooked chicken tenderloins, sliced
- 12 green king prawns, peeled

Method:
Soup:
Place the laksa paste, coconut milk, stock, soy sauce and pepper into a 3-litre dish and cook covered on 1100 W for 8 to 10 minutes.

Laksa:
Place the noodles and water in a 4-litre dish. Cover and cook on 1100 W for 2 to 3 minutes, stirring halfway through. Drain well and divide between 4 deep bowls. Place the coriander, chillies, bean sprouts and lime on top. Place the peanut oil and prawns in a 1-litre dish and cook on 800 W for 3 to 5 minutes, stirring halfway through. Add the chicken and prawns to each individual bowl and set aside.

To serve:
Heat soup on 1100 W for 2 minutes. Pour the hot soup over the ingredients in the 4 bowls and serve.

NACHOS SUPREME

Serves: 4 to 6

Ingredients:
- 500 g topside mince
- 35 g packet taco seasoning mix
- ½ cup tomato paste
- 1 teaspoon Mexican chilli powder
- 310 g red kidney beans, mashed in liquid
- 180 g packet corn chips
- 1 avocado
- ½ cup sour cream
- ½ cup grated cheese
- paprika

Method:
Place meat in a 2-litre dish. Cook on 800 W for 6 minutes, stirring halfway through. Mix with fork, breaking up any large pieces of meat. Add taco mix, tomato paste, chilli powder and kidney beans. Cook on 800 W for further 10 minutes, stirring halfway through cooking. Place corn chips in a 3-litre microwave suitable serving dish. Place meat sauce in the centre. In a small bowl, mash avocado and mix in sour cream. Spoon this mixture over meat sauce and top with grated cheese. Sprinkle with paprika. Heat on 800 W for 3 to 4 minutes.

ZUCCHINI SLICE

Serves: 4 to 6

Ingredients:
- 4 rashers bacon, diced
- 1 onion, diced
- 2 cups grated zucchini
- 2 cups grated carrot
- 1 cup grated tasty cheese
- 1 cup self raising flour
- 5 eggs, lightly beaten
- 125 ml vegetable oil
- 1 tablespoon fresh chopped parsley
- salt and pepper

Method:
Lightly grease a 25 cm square microwave safe dish. Place bacon and onion in a 2-litre casserole dish and cook on 1100 W for 2 to 3 minutes. Stir to cool slightly. Stir in zucchini, carrot and cheese and flour. In a 1-litre bowl whisk together eggs, oil and parsley. Add to bacon mixture season with salt and pepper and stir until combined. Pour into prepared dish. Cook on 800 W for 22 to 24 minutes.

NUTS AND BOLTS

Serves: 6 to 8

Ingredients:
- 80 g butter
- 2 teaspoons curry powder
- 2 tablespoons worcestershire sauce
- ½ teaspoon salt
- ¼ teaspoon garlic powder
- 100 g packet mixed rice crackers
- 100 g fried noodles
- 200 g salted peanuts
- 125 g packet pretzel sticks
- ½ cup Nutri-Grain

Method:
Place butter, curry, worcestershire sauce, salt and garlic powder in a 3-litre casserole dish. Cook on 1100 W for 1 to 2 minutes. Add remaining ingredients, mix well and cook on 1100 W for 4 to 5 minutes. Stir twice through cooking. Allow to cool. Place in a bowl and serve with drinks. Store in an airtight container once cool.
Directions for Cooking Fish and Shellfish by Micro Power

Clean fish before starting the recipe. Arrange fish in a single layer, overlap thin fillet ends to prevent overcooking. Prawns and scallops should be placed in a single layer.

Cover dish with plastic wrap. Cook on the power level and for the minimum time recommended in the chart below. Halfway through cooking rearrange or stir prawns, fish fillets or scallops.

### Directions for Cooking Fish by Auto Cook

- Minimum weight 100 g / Maximum weight 400 g
- Suitable for cooking whole fish and fish fillets.
- Select fish suitable for microwave cooking and place in a single layer in a shallow dish, with skin-side down.
- Add butter, spices, herbs, or lemon juice to flavour.
- Overlap thin edges of fillets to prevent overcooking.
- Shield the eye and tail area of whole fish with small amounts of aluminium foil to prevent overcooking.
- During the cooking time, the oven will ‘beep’ and prompt you to turn over/rearrange.
- Allow large amounts of fish to stand for 3 to 5 minutes after cooking before serving.

### Lemon Pepper Fish

Serves: 2

**Ingredients:**
- 400 g fish fillets
- ¼ cup lemon juice
- 1 teaspoon cracked black pepper

**Method:**
Place fish, lemon juice and cracked black pepper in 1-litre casserole dish. Cook on 600 W for 7 to 8 minutes. Let stand for 3 minutes before serving.

### Garlic & Chilli Prawns

Serves: 4

**Ingredients:**
- 1 kg medium uncooked king prawns
- 1 small red onion, thinly sliced
- 40 g butter
- 3 garlic cloves, crushed
- 2 fresh bird’s eye chillies, deseeded & finely chopped
- ½ small red capsicum, finely sliced
- 100 g snow peas, trimmed
- 1 tablespoon lemon juice
- 80 ml thickened cream
- ¼ cup coriander leaves, chopped

**Cooked jasmine rice, to serve**

**Method:**
Peel and de-vein prawns leaving tails in tact, set aside. Place onion, butter, garlic and chilli into a 3-litre microwave safe dish. Cook on 1100 W for 4 minutes, stir halfway through cooking. Add prawns and mix to combine. Cook on 800 W for 4 minutes. Stir in capsicum and snow peas, cover and cook on 800 W for a further 4 minutes. Stir through lemon juice, cream and coriander, season and cook on 1100 W for 2 minutes. Serve immediately with cooked rice.

### To Operate:
Select Fish, press Weight pads to select weight required, then press Start.

### To cook by Auto Cook:
Prepare as above. Cover with plastic wrap. Select Fish, press to Weight pads select 400 g, then Start.
**SPICED WHOLE BREAM**

Serves: 2

**Ingredients:**
- 2 x 400 g whole bream
- 1 clove garlic
- 3 stalks coriander
- 1 red birds eye chilli
- 1 tablespoon freshly chopped ginger
- 1 tablespoon lime juice
- 2 teaspoons fish sauce
- 2 teaspoons brown sugar
- 2 green onions, sliced

**Method:**
Clean and scale fish, set aside. Process remaining ingredients in a food processor to form a paste. Rub the spice paste into the fish and place them in a microwave safe dish. Cook on 440 W for 12 to 15 minutes.

3. Serve immediately.
Cooking Whole Poultry by Micro Power

Season as desired, but salt after cooking. Browning sauce mixed with equal parts of butter will enhance the appearance.
Poultry must be unstuffed. Tie legs together with cotton string. Place on a microwave rack set in a rectangular dish. Place poultry breast-side down: turn over halfway through cooking. Cover with wax paper to prevent splattering.
If the poultry is not cooked enough, return it to the oven and cook a few more minutes at the recommended power level.
DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN.
Let stand, covered with foil, 10 to 15 minutes after cooking. Standing time allows the temperature to equalize throughout the food and finishes the cooking process.
If a large amount of juice accumulates in the bottom of the baking dish, occasionally drain it. If desired, reserve juices for making gravy.
Less-tender birds should be cooked in liquid such as soup or broth. Use ¼ cup per 500 g of poultry.
Use an oven cooking bag or a covered casserole. Select a covered casserole deep enough so that bird does not touch the lid.
If an oven cooking bag is used, prepare according to package directions. Do not use wire twist-ties to close bag. Use only nylon tie, a piece of cotton string, or a strip cut from the open end of the bag. Make six 2 cm slits on top of bag.

Cooking Poultry Pieces by Micro Power

Cover with wax paper or paper towel. Use the chart below to determine recommended minimum cooking times.
Arrange pieces skin-side down and evenly spread in a shallow dish.
Turn or rearrange halfway through cooking. Shield wing tips, drumstick ends etc., if required.

Multiply the weight of the poultry by the minimum recommended minutes per 500 g. See chart below.
Programme Micro Power and Time.
After cooking, check the internal temperature of the bird with a microwave or conventional meat thermometer inserted into the muscle. Check temperature in both muscles. The thermometer should not touch bone. If it does, the reading could be inaccurate. A thermometer cannot be accurately inserted into a small bird. To check desired cooking of a small bird, juices should be clear and the drumsticks should readily move up and down after standing time.
During cooking, it may be necessary to shield legs, wings and the breast bone with foil to prevent overcooking. Wooden toothpicks can be used to hold foil in place.

COOKING CHICKEN PIECES BY AUTO COOK

- Minimum weight 200 g / Maximum weight 500 g
- Suitable for cooking chicken pieces such as wings, drumsticks, thighs, half breasts etc.
- Chicken pieces should be thawed completely before cooking.
- Marinate chicken pieces prior to cooking, for added flavour and colour.
- Arrange chicken pieces in a single layer in a dish with the thickest portions at the edge of the dish.
- Halfway through the cooking time, the oven will ‘beep’ and prompt you to turn over and rearrange the chicken pieces.
- At the end of cooking, stand covered, for 5 to 10 minutes before serving.

To Operate:
Select Chicken Pcs., press Weight pads to select weight required, then press Start.

COOKING EGGS BY MICRO POWER

Boiled Eggs: Do not boil eggs in your microwave. Raw eggs boiled in their shells can explode and cause serious injury.

Poached Eggs: The membrane on egg yolks must be pierced before cooking, otherwise steam will build up and cause yolk to pop.

Scrambled Eggs: Slightly undercook scrambled eggs as they will finish cooking during standing.

SCRAMBLED EGGS
Serves: 2

Ingredients:
- 2 x 60 g eggs
- 2 tablespoons milk
- Pinch of salt

Method:
In a 1-litre casserole dish, beat eggs lightly with whisk. Add milk and salt. Whisk until well combined. Cover dish with plastic wrap and cook on 600 W for 2 minutes. Stir eggs and cook for further 1 to 1½ minutes. Stand, covered, for 1 minute before serving.

POACHED EGGS
Serves: 2

Ingredients:
- 2 x 60 g eggs
- ½ cup hot tap water
- Dash of vinegar
- Pinch of salt

Method:
Place one quarter of cup of water, dash of vinegar and pinch of salt into 2 ramekin dishes or small glass bowls. Heat water on 1100 W for 30 - 60 seconds. Break egg into the water and with toothpick pierce the egg yolk twice and egg white several times. Cover dishes with plastic wrap and cook on 600 W for 1 to 1½ minutes. Stand, covered, for 1 minute before serving.

Note: The size of the eggs will alter cooking time.

CHICKEN AND VEGETABLE KORMA
Serves: 4

Ingredients:
- 200 g sweet potato
- 200 g potato
- 1 tablespoon oil
- 1 onion, diced
- 2 cloves garlic, crushed
- 1 teaspoon ground coriander
- 1 teaspoon ground cardamom
- 1 teaspoon turmeric
- 1 teaspoon ground cumin
- ½ teaspoon ground cinnamon
- ¼ cup tomato paste
- 1 kg chicken thigh fillets
- ½ cup natural yogurt
- Fresh coriander, Mango chutney and Pappadums to serve

Method:
Peel potatoes and cut into 2 cm dice. Place potatoes, oil, onion and garlic into a 3-litre microwave safe dish. Cover and cook on 1100 W for 3 minutes. Add spices to dish and cook on 1100 W for 1 minute. Stir in tomato paste and cook for a further 1-minute on 1100 W. Trim excess fat from chicken and cut fillets into thirds. Stir into vegetable mixture and cook covered on 800 W for 10 minutes, stirring halfway through cooking. Add eggplant and cook for a further 5 minutes on 1100 W, stirring halfway through cooking. Stir through yogurt and serve with coriander, mango chutney and pappadums.
GREEN PEPPERCORN CHICKEN
Serves: 4

Ingredients:
500 g sliced chicken breast fillets
2 tablespoons green peppercorns
1 tablespoon seeded mustard
1 teaspoon chicken stock powder
2 tablespoons lemon juice
½ cup cream

Method:
Place chicken in a 3-litre casserole dish. Cook on 800 W for 8 to 10 minutes stirring halfway through cooking. Mix together peppercorns, mustard, stock powder, lemon juice and cream. Pour over chicken, stir. Cook on 1100 W for 2 to 3 minutes.

BACON AND EGG IN A CUP
Serves: 1

Ingredients:
2 slices bacon
1 x 60 g egg
1 tablespoon grated cheddar cheese

Method:
Place bacon on a dinner plate between 2 sheets of paper towel cook on 1100 W for 1 to 2 minutes. Wrap bacon around the inside of a 1-cup remekin dish. Crack egg into centre of dish and pierce with toothpick. Cover and cook on 600 W for 50 to 70 seconds. Sprinkle with grated cheese.

CHICKEN CACCIA TORRE
Serves: 4

Ingredients:
400 g can diced tomatoes
½ cup tomato paste
1 teaspoon minced garlic
1 onion, diced
2 teaspoons dried oregano
1 kg chicken drumsticks
½ red capsicum, sliced

Method:
Place all ingredients in a 2-litre casserole dish. Stir until combined. Cover and cook on 800 W for 10 to 12 minutes. Turn chicken and stir. Cook on 800 W for 10 to 11 minutes.

ROAST CHICKEN
Serves: 4 to 6

Ingredients:
1.5 kg chicken
2 tablespoons melted butter
seasonings of your choice
lemon, pepper, seasoned salt, etc.

Method:
Clean and pat dry chicken with paper towel. Brush chicken with melted butter and sprinkle with seasonings. Place chicken, breast-side down, on rack in 4-litre dish. Cook on 800 W for 30 to 33 minutes. Turn halfway through cooking.

HINT:
After cooking whole poultry, cover with foil to retain heat while finishing the remainder of the meal.

CHICKEN BURRITOS
Serves: 4

Ingredients:
1 clove garlic, crushed
2 large onions, chopped
1 teaspoon chilli powder (optional)
35 g taco seasoning mix
500 g chicken tenderloins, diced
425 g can red kidney beans, drained
½ cup tomato paste
½ cup water
1 cup grated cheese
12 tortillas

Method:
Place garlic, onion and chilli in a 3-litre casserole dish. Cook on 1100 W for 2 minutes. Stir in remaining ingredients except cheese and tortillas. Cover and cook on 800 W for 16 to 18 minutes, stirring twice during cooking. Serve in warmed tortillas topped with grated cheese.

THAI CHICKEN WINGS
Serves: 3 to 4

Ingredients:
1 kg chicken wings
2 tablespoons soy sauce
2 tablespoons fish sauce
2 tablespoons lime juice
1 teaspoon crushed garlic
1 teaspoon crushed ginger
1 teaspoon crushed chilli

Method:
Place wings into a shallow dish. Combine remaining ingredients and pour over wings. Marinate for at least 2 hours in the refrigerator. Cook on 800 W for 15 to 20 minutes, rearranging halfway through cooking.
THAI RED CHICKEN CURRY
Serves: 4

Ingredients:
- 1 onion, chopped
- 2 tablespoons red curry paste
- 500g chicken fillets, chopped
- 2 cups finely sliced vegetables
- 1 cup coconut milk

Method:
1. Place onion and curry paste in 3-litre casserole dish. Cook on 1100 W for 3 to 4 minutes.
2. Add chicken and combine. Cook on 600 W for 8 to 10 minutes, stirring once during cooking.

HONEY SESAME DRUMSTICKS
Serves: 4

Ingredients:
- 1kg chicken drumsticks
- 1 clove garlic, chopped
- 1/4 cup soy sauce
- 1/4 cup honey
- 2 tablespoons sesame seeds

Method:
Place all ingredients in 2-litre bowl, stir until combined. Marinate for at least 2 hours or overnight. Remove chicken from marinade and place in shallow dish with the meatiest ends to the outside. Cook on 800 W for 15 to 17 minutes, turning once during cooking.

CHICKEN AND ASPARAGUS RISOTTO
Serves: 4

Ingredients:
- 300g fresh asparagus, chopped
- 2 tablespoons olive oil
- 1 1/2 cups arborio rice

- 1/2 cup grated fresh parmesan cheese
- 1/2 cup cream
- 1 tablespoon chopped parsley
- Extra coarsely grated parmesan cheese

Method:
Place asparagus into 2-litre dish and cook on 1100 W for 1 minute. Set aside. Place oil, rice and garlic in a large microwave safe bowl. Cook on 1100 W for 1 minute. Add 2 cups of boiling chicken stock, cook on 1100 W for 5 minutes. Stir twice during cooking. Add remaining chicken stock and cook on 1100 W for another 5 minutes. Add remaining ingredients along with asparagus and stir into risotto. Cook covered on 1100 W for 2 minutes. Stand for 5 minutes. Serve topped with extra parmesan and black pepper.

CHICKEN ROLLS WITH HONEY MUSTARD
Serves: 4 to 6

Ingredients:
- 8 chicken thigh fillets
- 16 prunes, pitted
- 8 green onions, sliced
- 2 tablespoons flaked almonds
- 4 rashers rindless bacon, halved lengthwise

Honey Mustard Glaze
- 1 tablespoon brown sugar
- 1 tablespoon French Mustard
- 1 tablespoon honey
- 10g butter, melted
- Ground black pepper

Method:
Open out each thigh fillet and trim away fat. Place 2 prunes, some spring onion and a few flaked almonds on each fillet. Roll fillets up and wrap a piece of bacon around each one. Secure with toothpicks. Blend all glaze ingredients together in a small bowl. Place chicken into a 3-litre dish in a single layer and brush with glaze mixture. Cook on 800 W for 16 to 20 minutes, turning halfway through cooking.

CHICKEN WINGS IN LEMON SAUCE
Serves: 4 to 6

Ingredients:
- 1kg chicken wings
- 1/4 cup soy sauce
- 1 teaspoon ginger powder
- 2 cloves garlic, crushed
- 1/4 cup lemon juice

Add chicken and cook on 800 W for 5 to 6 minutes. Add remaining ingredients except lettuce and cook on 800 W for 5 to 6 minutes. Separate lettuce leaves. place tablespoons of mixture into each lettuce leaf. Serve immediately.
Cooking Tender Cuts of Meat using Micro Power

For best results, select roasts that are uniform in shape. Place meat on a microwave rack in a suitable dish. Beef rib roast should be placed cut-side down. Other bone-in roasts should be placed fat-side down. Boneless roasts should be placed fat-side up. Halfway through cooking, turn roasts. Half hams should be shielded by wrapping an 8 cm wide strip of foil around the large end of the ham. Secure to the body of the ham with wooden toothpicks. Fold 3 cm over cut surface. For shank ham halves, shield shank bone by cupping it with foil. One third of the way through cooking, remove ham from oven and cut off skin. Turn fat side up and reshield edges. If desired, glaze last 10 to 20 minutes of cooking. Loosely cover baking dish with wax paper or paper towel to prevent splatter. If a large amount of juice accumulates in the bottom of the dish, drain occasionally. If desired, reserve for making gravy. Multiply the weight of the roast by the minimum recommended times per 500 g. Programme Micro Power and Time. Meats can be shielded at the beginning of cooking or halfway through cooking. If you wish to shield at the beginning of cooking, remove foil halfway through the cooking time. Beef and pork rib roasts should be shielded around the bones. Foil should extend about 5 cm down from bones. The Shank and thin ends of boneless roasts should also be shielded. Make sure foil does not touch the sides of the oven, as arcing may occur. Canned hams should be shielded on the top cut-edge with a 3 cm strip of foil. Wrap strip of foil around ham and secure to body of ham with wooden toothpicks. Fold 2 cm over cut surface. After heating, check temperature using a meat thermometer. The thermometer should not touch bone or fat. If it does, the reading could be inaccurate. Lower temperatures are found in the centre of the roast and in the muscle close to a large bone, such as a pork loin centre rib roast. If the temperatures are low, return meat to the oven and cook a few more minutes at the recommended power level. DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN. Let stand, covered with foil, 10 to 15 minutes. During standing time the internal temperature equalises and the temperature rises 5°C to 10°C.

Cooking Less-Tender Cuts of Meat by Microwave

Less-tender cuts of meat such as pot roasts should be cooked in liquid. Use ⅔ to 2 cups of soup, broth, etc. per 500 g of meat. Use an oven cooking bag or covered casserole when cooking less-tender cuts of meat. Select a covered casserole deep enough so that the meat does not touch the lid. If an oven cooking bag is used, prepare the bag according to package directions. Do not use wire or metal twist-ties. Use the nylon tie provided, otherwise, use a piece of cotton string or a strip cut from the open end of the bag. Make six 2 cm slits in top of bag to allow steam to escape. Multiply the weight of the roast by the minimum recommended minutes per 500 g as suggested in the chart below. Programme Power and Time. Turn meat over halfway through cooking. Meat should be tender when cooked.

Sprinkle with sesame seeds and serve with noodles.

**HINT:**  
It is better to cook meat for a lesser time in a recipe and add extra time if needed. This will prevent over cooking.
Vegetables and Legumes

Vegetables that are to be cooked whole and unpeeled, need to be pierced to allow steam to escape. Place vegetables on a paper towel lined dinner plate. Allow to stand, covered, according to the time indicated in the charts.

Cooking Fresh Vegetables By Micro Power

Place vegetables in a casserole dish. Add 2 to 3 tablespoons of water per 500 g of vegetables. Add salt to water or add after cooking. Do not place salt directly on vegetables. Cover dish with glass lid or plastic wrap. Cook on 1100 W according to time recommended in charts. Halfway through cooking, stir, turn vegetables over or rearrange.

Vegetables should be covered and cooked on 1100 W for best results. Weights given are trimmed weights.

Cakes, Desserts and slices can successfully be cooked in the microwave oven if a few simple rules are followed see individual recipes for instructions.

COOKING CAKES BY MICRO POWER

- The texture of cakes cooked in the microwave oven is not the same as cakes cooked in a conventional oven, but it is a convenient way of cooking cakes.
- Do not use metal cake tins, plastic dishes and pyrex, give the best results when cooking cakes. Grease the dish and line with paper towel or baking paper to absorb excess moisture.
- Round or oval shaped dishes produce the most even cooking results. Square cakes may need the corners shielded with foil to prevent overcooking.
- Choose light coloured cakes that can be iced or substitute brown sugar for white sugar and sprinkle the top of cake with spices to give a darker appearance.
- Do not fill cake pans more than half full. Microwaved cakes rise substantially more than conventionally cooked cakes.
- Cakes need to be well mixed but do not over beat. Creaming with an electric mixer or food processor is not necessary. Use a fork to mix as the microwave aerates the mixture as it cooks.
- Do not cover cakes as the top will steam.
- Cakes should be removed from the oven just before they look cooked as the cooking process will finish during standing time.
- Chocolate cakes cook slightly faster than plain cakes.
- Cakes containing a large amount of whisked egg white will not cook successfully in the microwave oven.

PACKET CAKE

Ingredients: 1 packet cake mix (340 g)
Ingredients as recommended by manufacturer.
Method: Mix cake and other ingredients with a metal spoon. DO NOT OVERBEAT. Pour into 20 cm round dish that has been lightly greased and lined with paper. Cook on 1100 W for 5 to 7 minutes. Stand and allow to cool before removing.

Variations:
- 1 tablespoon jam added to batter before cooking.
- Add 1 cup sour cream to batter and halve water suggested by manufacturer.
- Half a cup chopped nuts, ¼ cup brown sugar and 1 teaspoon cinnamon. Mix and place on base of cake dish before cooking cake.
- Melt two tablespoons honey and 30 g butter in glass jug on 1100 W for 30 to 60 seconds. Pour over just baked buttercake. Sprinkle with cinnamon.
- Serve warm with cream or custard as a dessert or serve cold with cream as tea cake.
- A quarter cup of toasted muesli mixed with 1 tablespoon marmalade and placed in the base of the dish.

Tip: Packet cakes are best mixed by hand as the microwave will do the aerating.

QUICK MIX CHOCOLATE CAKE

Serves: 4 to 6

Ingredients:
- 1 cup self-raising flour
- 1 cup caster sugar
- 2 tablespoons cocoa
- 3 tablespoons butter, softened
- 2 eggs

**Preserving Precautions**

Do not use your oven for home canning or the heating of any closed jar. Pressure will build up and the jar may explode. In addition, the microwave oven cannot maintain the food at the correct canning temperature. Improperly canned food may spoil and be dangerous to consume.

**Jars and Bottles**

Jars and bottles can be used to warm food to serving temperature. If the lid is removed first. Cooking should not be done in these containers since most are not heat resistant and during extended heating times, heat from food would cause cracking or breaking.

**Thermometers**

Thermometers are available for use in microwave ovens. DO NOT USE CONVENTIONAL MERCURY TYPE CANDY OR MEAT THERMOMETERS in food while cooking in the microwave oven. Alternatively, a conventional meat thermometer may be used after the food is removed from the oven.

**Sterilizing Jars**

Jam jars can be sterilized by microwave ready for your jams. Half fill with water and heat them on 1100 W until water boils (approx. 3 mins, for 2 jars). Empty and drain upside down on kitchen paper. The jars should be warm when filled with jam.
