

CAPTURE ONE X LUMIX

COPENHAGEN, FEBRUARY 2025

Capture One is excited to announce a strategic partnership with Panasonic, a global innovator in imaging technology. This collaboration marks a significant step forward in professional photography, integrating our industry-leading software with Panasonic's renowned LUMIX cameras to enhance studio workflows and empower photographers worldwide.

For the first time – the LUMIX S1R II will support tethering via Capture One, providing seamless connectivity and streamlining the creative process for professional photographers. This integration allows instant image review, improved color management, and efficient editing—key tools for those who demand precision and efficiency in their studio work.

"Studio photography represents an exciting frontier for Panasonic's LUMIX brand," said Toshiyuki Tsumura, Executive Vice President, at Panasonic Entertainment & Communication Co., Ltd. "By teaming up with Capture One, we reinforce our commitment to professional photographers, ensuring they have access to best-in-class tools for an optimized studio experience."

This partnership will provide LUMIX users with a robust, integrated solution that enhances every creative process stage. Future LUMIX cameras will be compatible with Capture One upon release.

"With this partnership, we are happy to bring professional tethering workflows to LUMIX customers," said Mathieu Bourlion, Director of Product Management at Capture One. "We've worked closely with Panasonic to build support for the S1R II and to bring flawless tethering support for their flagship camera."

The update released today, 16.5.7 will include tethering support for LUMIX S1R II.
