- 1) The energy efficiency class of a household washing machine shall be determined on the basis of its Energy Efficiency Index (EEI).
- 2) Based on 220 standard washing cycles for Cotton + Eco option programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used.
- 3) Based on 220 standard washing cycles for Cotton + Eco option programmes at 60 °C and 40 °C at full and partial load, and the consumption of the low-power modes. Actual water consumption will depend on how the appliance is used.
- 4) In minutes and rounded to the nearest minute
- 5) Expressed in dB (A) re 1 pW and rounded to the nearest integer during the washing and spinning phases for the standard 60 °C Cotton Eco programme at full load.
