A Better Life, A Better World

OUR TECHNOLOGY IS OUR LEGACY.

At Panasonic, we have always worked towards enhancing our technology and offering the best quality products to our customers. We have spent over 70 years in perfecting our research and technology, by virtue of which we have already crossed the 100-million-unit mark in 2013. Our washing machines are sold across the globe and their trustworthiness speaks for themselves.

Our first Washing Machine was launched in 1951.

First Microprocessor Control Washer was introduced in 1971.

First CPU-equipped washing machine became our product in 1983.

World's first ever Centrifugal Washer by Panasonic in 1998.

Our first Tilted Front-Loading Washer was made public in 2003.

In 2006, the world's first Heat-Pump Washer Dryer was added to our range.

In 2012, we introduced India's first local production model.

The Back Panel with New Active Foam Technology Washing Machine was unveiled in 2017.

In 2019, we developed the Built-in-Heater with StainMaster+ along with Water Re-Use technology.

SAFE & SANITIZED CLOTHES

StainMaster+ with BUILT-IN HEATER

Fights stains with built-in heater.

Panasonic's Hot Wash technology brings a new approach to washing clothes. An attached built-in heater, under the tub, heats the water which stimulates the detergent enzymes, making it more effective to clean dirt and stains.

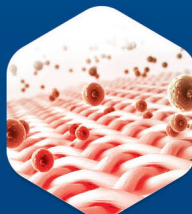

ELIMINATES **99.99%*** OF BACTERIA.

60°C

1

60°C- bacteria and microorganisms are eliminated.

60°C Wash for Germ Clean Course.

40°C

2

40°C - sebum softens and dissolves.

50°C Wash for Curry Course.

37°C

3

37°C - sebum and oily stains start to dissolve.

50°C Wash for Collar / Sleeve Course.

*Results based on lab tests conducted by Japan Food Research Laboratories report number 19033410001-0101 dated April 11 2019, April 12 2019. Test organisms: Escherichia coli (NBRC 3972) and Staphylococcus aureus subsp (NBRC 12372). All results are based on specific testing conditions and may differ based on environmental factors. All tests are not demonstrated under actual usage situations. Images used are for illustrative purpose only.

MORE FOAM. NO STAINS.

Get better washing performance with ActiveFoam System that creates high density foam which cleans deeper and better.

ActiveFoam
SYSTEM

Soak- Clothes get soaked along with the detergent. The dirt / stains get cleaned from the fabric.

Dissolve- Foam sticks to the stains and soaks the dirt particles.

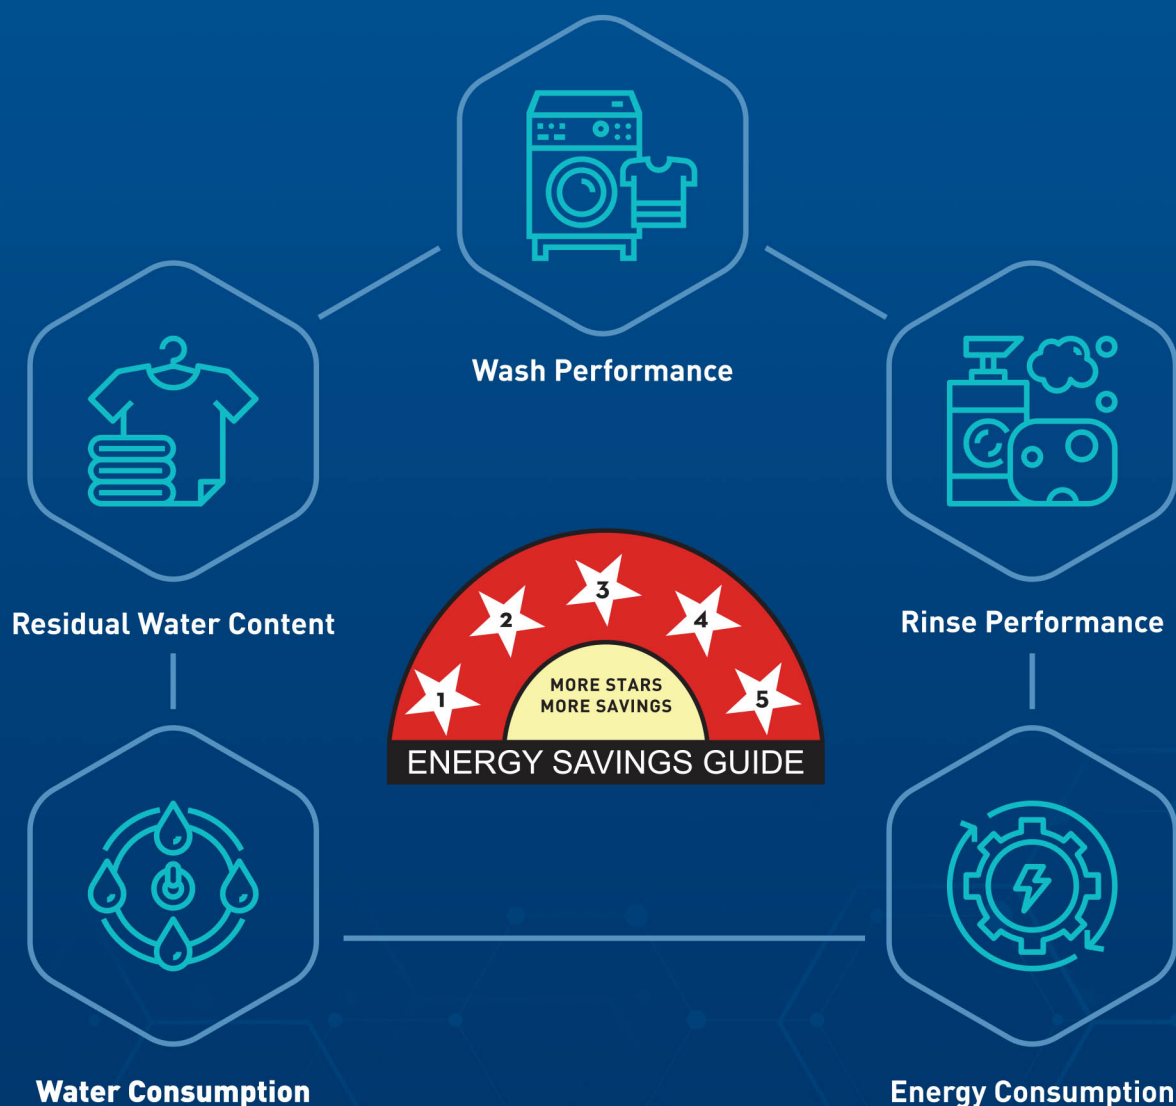

Wash- Dirt is pulled out of the fine fibers and is washed away with the powerful flow of the water.

BEE REGULATION

Panasonic Washing Machines are rated 5 Star* by BEE

- Rating is based on per Wash Cycle Energy Consumption per kg (KWh / cycle/kg).
- With 1 Star the energy consumption is between 0.0171 to 0.0185 KWh /Cycle / Kg and with 5 Stars*, the per Wash Cycle Energy consumption is less than 0.0132 kWh/cycle/ kg.
- 5 Star* is the highest Star Rating provided by BEE to any appliance.
- 5 Stars* are only provided when the product meets or exceeds on the following parameters:

*Applicable on select models only

**SAVE WATER.
SAVE ENERGY.**

The Panasonic Washing Machine saves upto 33%* energy, upto 28%* water, with 23%* water savings from water reuse.

INTELLIGENT ECO SENSORS

ECONAVI

With the combination of load & water temperature sensors, the time and water consumption is adjusted to ensure effective utilization. This helps save upto 20%* of water and energy.

Aqua spin rinse

Along with the regular water flow, two additional showers placed at different locations inside the drum efficiently remove detergent from the clothes by using a minimum amount of water. Thus saving upto 28%* of water.

*33% energy savings: based on internal test results done on specific course. *28% water savings: Tested by Panasonic using the NA-F80S8 model. A comparison of the amount of water used in the whole wash sequence. *23% water savings: based on internal test report; Calculated value does not include water absorbed by clothes. All tests are based on specific test conditions and individual test results may vary.*20% Econavi savings: Tested by Panasonic using S Series model equipped with ECONAVI

CONSUMER CHALLENGES & PANASONIC SOLUTIONS

Consumer Challenges

**Cannot Remove
Dirt**

Panasonic Solutions

ActiveFoam
SYSTEM

Creates fine, high-density foam which lifts, separates and removes dirt particles from deep within the fibers.

**The whiteness of
the clothes is
dulled**

White course feature

To ensure "Whites remains White", a combination of Hot & Cold Wash.

**Stubborn stains
remain**

StainMaster+ / StainMaster
WITH **BUILT-IN** HEATER

Built-In Heater with Stain Master+ hot water treats stubborn stains and ensure the effective removal of these stains.

Consumer Challenges

**Detergent
spot remains**

Panasonic Solutions

Aqua spin rinse

Along with the regular water flow, two additional showers at different locations inside the drum efficiently remove detergent from the clothes by using minimum amount of water.

**Extra water
is consumed**

INTELLIGENT ECO SENSORS

ECONAVI

With the combination of Load & Water Temperature Sensors, time & water consumption is adjusted to ensure effective utilization.

**Extra energy is
wasted**

5 Star energy rated machines for ensuring effective utilization of resources along with effective washing performance.

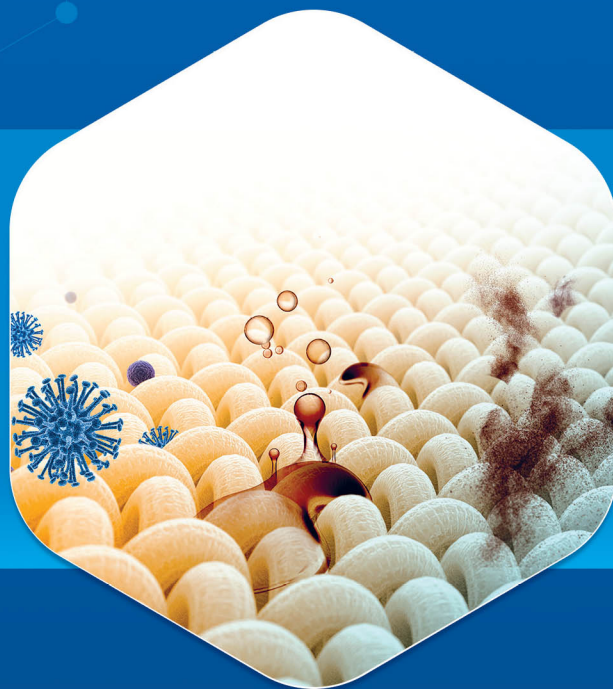

TOPLOAD WASHING MACHINE

**CHOOSE
HOT OR COLD**

StainMaster+

Depending on the type of clothes or stain you can now choose the temperature of the water for a more effective wash.

Hot Wash Course

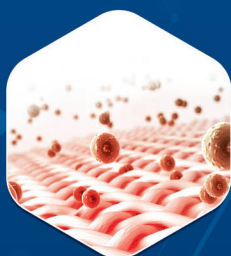

1- Curry

Curry and food stained clothes should be soaked in detergent and warm water (50°) for long time and scrubbed for better results.

2- Collar/Cuff

Tough stains on the collar and cuff are washed away after soaking them with warm water (50°) and dissolved detergent.

3- Germ Clean

With the Built-In heater's feature, the water used for washing the clothes remains hot throughout the wash cycle eliminating 99.99%* of germs from the tough stains on the fabrics.

Cold Water Wash

1. Sweat

After being washed in cold water, the germs and bacteria from sweat are eliminated, giving your clothes a hygienic wash with the Cold Water Course of Stain Master.

2. Sauces

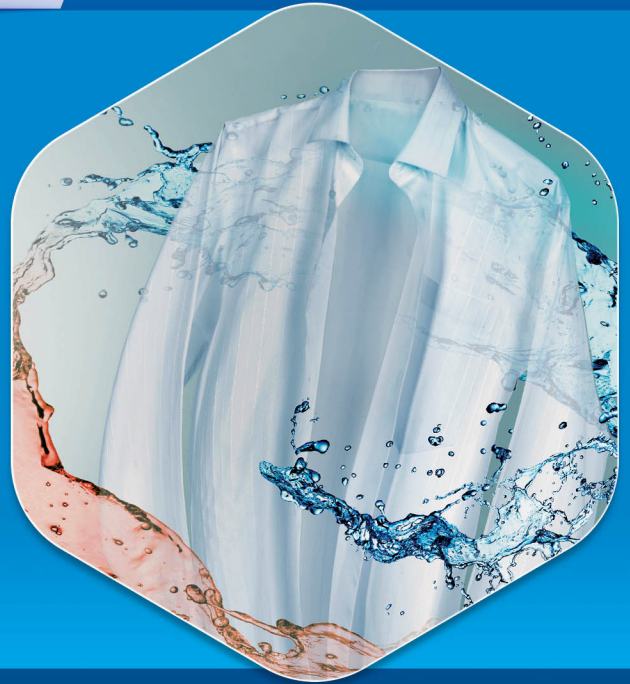

The Cold Water Course of Stain Master also removes sauce stains, which are tough to clean and gives the clothes the best wash.

*Results based on lab tests conducted by Japan Food Research Laboratories report number 190334 10001-0101 dated April 11 2019, Test organisms: Escherichia coli (NBRC 3972) and Staphylococcus aureus subsp (NBRC 12372). All results are based on specific testing conditions and may differ based on environmental factors. All tests are not demonstrated under actual usage situations. Images used are for illustrative purpose only.

EXTRA WHITE. EXTRA CLEAN. EXTRA SAFE.

Extra white results with 2-step cold & hot wash

The White Course feature is specially designed for washing white clothes with a 2-step wash, with hot and cold water, which thoroughly removes dirt and sebum.

White Course: Special Intensive Washing Program

1

White Water Course

1st Wash

Cold water washes away dirt and drains the dirty water.

2nd Wash

Hot water cleans tough stains and sebum.

2

Strong Water Flow

The strong flow of water removes dirt particles and stops it from clinging back to the clothes.

3

Double Cleanse

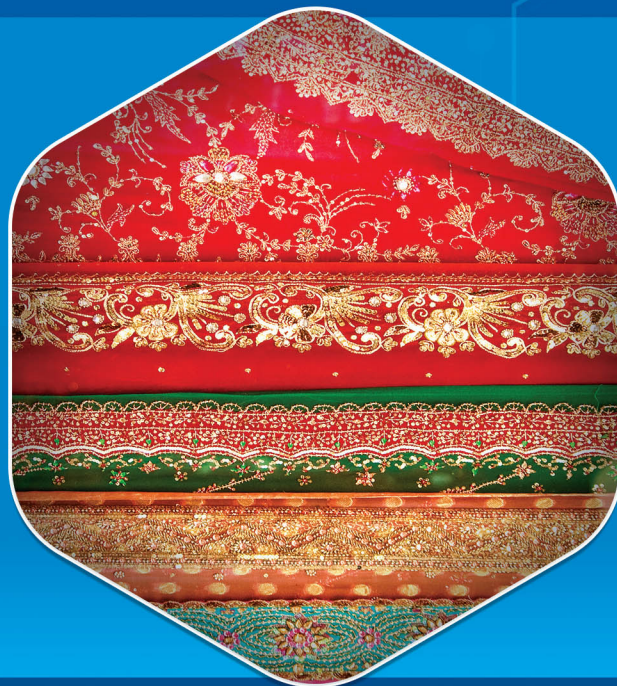

The amount of detergent makes sure that the clothes are thoroughly cleaned and thorough rinsing ensures none of it is left undissolved.

AS SMOOTH AS WASHING WITH HANDS

Better than Hand Wash!

The Gentle Handwash option washes your delicate clothes with care. Foam and water meticulously clean them with easy pressure and slow rotation, which gives a gentle push to remove dirt easily and softly.

*For more details on the feature,
please refer to the manual.

ECONAVI

INTELLIGENT ECO SENSORS

ECONAVI

The ECONAVI feature, by automatically sensing water temperature and laundry weight, adjusts the machine's operations regarding water usage and the duration of the water cycle, saving energy and water while effectively removing waste and dirt.

Without Eco Navi

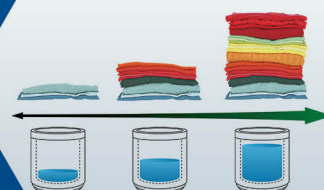

With Eco Navi

Water Load Sensor

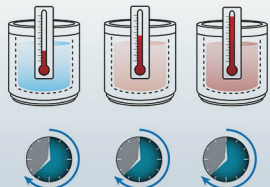

The amount of water used is the same, irrespective of the amount of clothes. This unnecessarily wastes a lot of water when the load is small.

The ideal amount of water is used in every wash to avoid waste. When the load is less, the water level is reduced to save water.

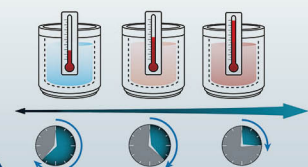

Water Temperature Sensor

Generally, when the water temperature is high, the wash course duration remains the same. This wastes time and energy both.

When the temperature of the water is high, the wash course duration is reduced and vice versa, saving time and energy at the same time.

SAVES ELECTRICITY UP TO **20%***

SAVES WATER UP TO **20%***

*20% Econavi savings: Tested by Panasonic using S Series model equipped with ECONAVI

DESIGN

Glass Look

Designed in a way to give a glassy and mirror appearance.

Soft Closure

Closure designed for easy use and better safety.

3 Key Benefits of EASY WIDE OPENING Design

1

Easy to load/unload

Wider Tub Opening

Wide opening makes it easier to load/unload large items.

2

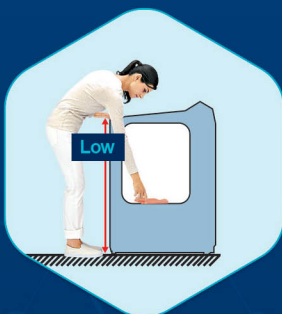

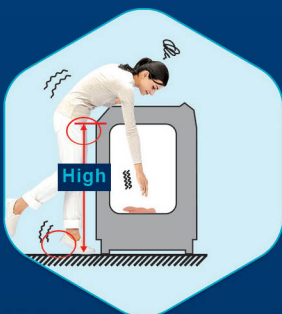

Easy to read & operate

Back Control Panel

Control panel is at the back so buttons are easy to read and operate without looking down.

3

Easy to reach

Lower Front Height

The lower height of the panel does not strain the back while loading/unloading laundry and makes it easy to reach the bottom.

Reach the bottom without strain

There are no operation buttons at the front, so loading/unloading is smooth.

It's easy to reach the bottom of the tub and take out washed items with minimum strain on arms or back.

POWERFUL WASH FOR POWERFUL CLEANING

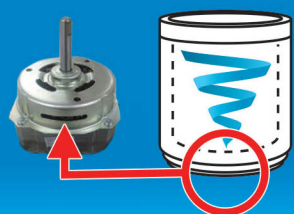

This feature uses different levels of water force to clean stubborn stains.

**ECO
AQUA BEAT**

Combination of 3 types of water flow creates:

Powerful Motor 400W Output*
Output may vary depending on model.

1. BEAT SCREW

Dirt particles in the fibers are cleaned with the powerful splash action.

2. BEAT FLASH

Strong water-jets fall on the dirty clothes from the nozzles.

Aqua Tide Pulsator*

Feature may vary depending on model

3. BEAT TIDE

Vertical water flow gives an up and down tidal treatment.

POWERFUL WASH FOR POWERFUL CLEANING

Water Flow **X** Water Temperature

Powerful scrub wash effect with Aqua Tide Pulsator

The Aqua Tide Pulsator has 6 wings that create a powerful vertical water flow in the tub. This intense wave of water repeatedly moves clothes up and down for a scrub wash effect that removes stubborn stains. Along with the hot water, the effect of strong water flow multiplies, thus resulting in the effective removal of stains.

Sazanami Drum

Panasonic's newly developed drum, the Sazanami Drum, is ideally designed with dimple-shaped jets which effectively remove dirt and dust particles from dirty clothes, and still is gentle on them.

This specific design means better high spin and dry cleaning & also avoids the clothes being caught and damaged in the drum.

WASHING EXPERIENCE

With the exclusive functions and modes of Panasonic Washing Machines, you can now wash many types of stubborn stains from various kinds of fabrics.

1. Normal

This standard feature is available in every Panasonic washing machine just to help you wash everyday clothes with superior cleaning.

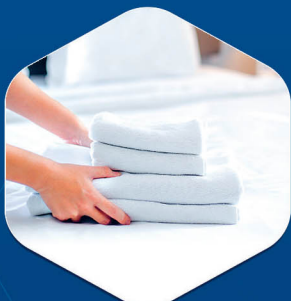

2. Gentle Handwash

Delicate clothes like designer clothes, clothes with embroidery and work can be cleaned gently with slow spin speed and gentle water flow in the Gentle Handwash Net.

Up to 1.2 kg of delicate laundry can be cleaned with this program in a wash.

*S8 & V9 Series only

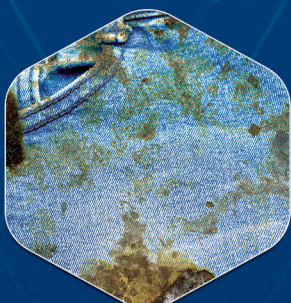

3. Bed Sheets

With the Bed Sheet Program, you can wash heavy laundry like sheets, covers etc. Just follow the instructions on the bedsheet's tag and wash up to 4.2 kg of laundry in one wash cycle.

4. White

While washing white clothes that easily show dirty stains and spots, the White course under the Stain Master+ washes them in two steps with cold and hot water for better results.

5. Jeans

Thick fabric clothes like jeans, jackets soiled with stains etc can be easily cleaned with the force of swirling water and detergent with the Stain Master.

SEMI AUTOMATIC WASHING MACHINE

DESIGN

Panasonic's Semi Automatic Washing Machines are designed for the best and easy use, with each feature made to benefit the user in every wash course.

Aqua Water Filter

It stops the impurities in the water from entering the tub to ensure a clean wash every time.

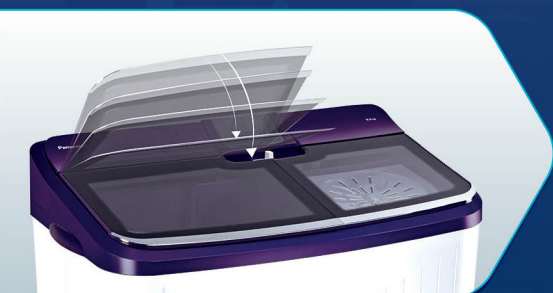

Foam Generator

High density foam is generated which lifts the dirt away.

Covered panel

Introducing new covered panel facia for elegant looks & convenience.

Soft Closure

The lid gradually and quietly closes on its own for easier and safer usage.

Glass lid

The lid, designed with durable glass, gives it a mirror appearance and can bear heavy load as well.

MORE FOAM. NO STAINS.

When foam is active and stains are inactive

The Active Foam System creates fine, high-density foam before the washing cycle starts. The foam lifts, separates and removes dirt particles from deep within the fibers.

Soak- Detergent is soaked in the water and turns into foam

Dissolve- Foam sticks to the stains and soaks the dirt particles

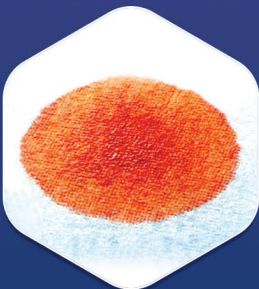

Wash- Dirt is pulled out of the fine fibers and is washed away with the powerful flow of the water

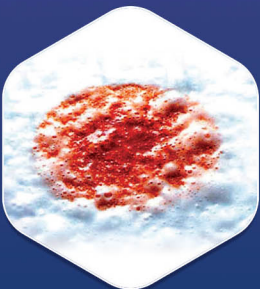

Fine Foam Maximizes Wash Performance

Power of Foam

Highly concentrated foam completely surrounds the clothes and attaches to the dirt, which is then lifted away with the powerful water flow.

Foam adheres to dirt

Penetrates fibers to remove dirt

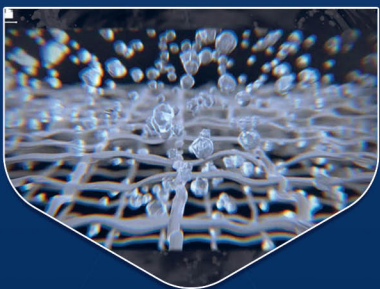

Separates & washes it away!

Benefits of Washing With Foam

Clean Result

Rich, dense foam cleans clothes powerfully, removing dirt.

Quick Penetration

Detergent, in the form of foam, penetrates the stains to clean them thoroughly.

Completely Dissolved Detergent

Detergent dissolves in the water, turning into foam which results in less detergent stains.

POWERFUL WASH FOR POWERFUL CLEANING

Foam Generator

Water is jet sprayed through the narrow chamber on to the turbo mixer. Detergent powder in the chamber gets mixed with the water through turbo mixer.

Foam generated in the detergent box is cascaded into the wash tub through the chambers behind the detergent box.

Powerful Motor

The powerful motors are used in Panasonic Semi-Automatic washing machines. The power of these powerful motors make it easy to wash heavy laundry like curtains, linens etc. as well as everyday clothes.

Aqua Tide Pulsator

Detergent, dissolved successfully in water, forms foam, which then penetrates into the cloth fibers to wash away the tough and dirty stains.

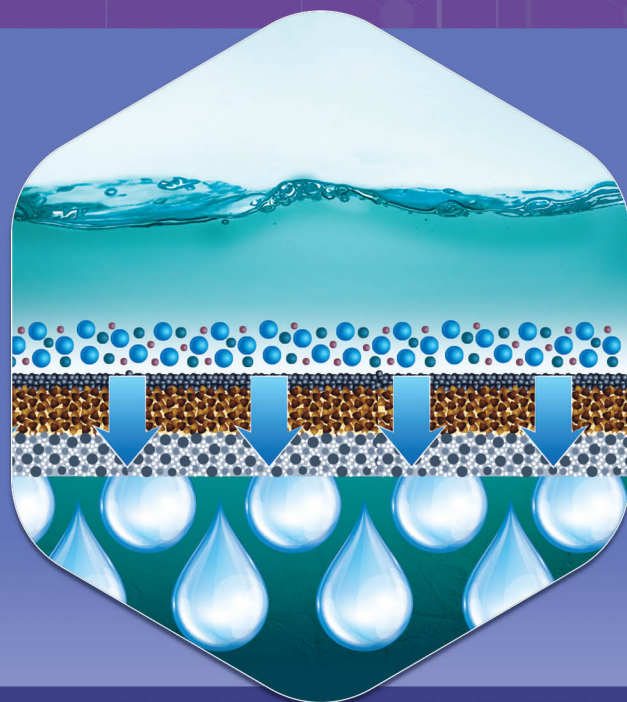

The 4 wings of the Aqua Tide Pulsator create a powerful vertical flow of water in the tub. With this intense wave of water, clothes repeatedly move up and down for a scrub wash effect, that lifts stubborn stains.

CLEAN AND FRESH WASH GUARANTEED

Aqua Water Filter

Get a clean wash every time with Aqua Water Filter. It stops the impurities and dirt present in the water from entering the tub to ensure a clean and fresh wash every time.

Auto Restart Functions

Auto re-start starts the machine automatically after a power cut. Once the power comes back, the machine goes back to the two minutes of its wash course before the power cut happened, instead of starting the course all over again. This feature helps you to save your time as well as the washing machine's energy.

Auto Restart

Panasonic Advanced System

Conventional System

THOROUGH WASH WITH AQUA SHOWER RINSE

Aqua Shower Rinse

This feature sprays a strong shower of water on the dirty laundry to thoroughly wash away any extra detergent or foam, cleaning the clothes in a better way.

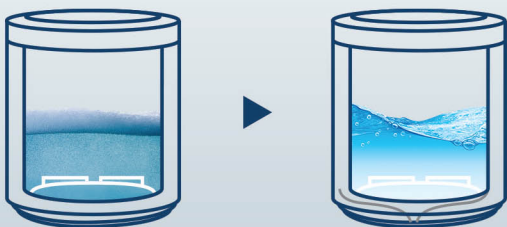

Any risk of skin allergies is also avoided as the excess detergent is removed and drained.

In this manner, the clothes retain their quality and shine for a longer period of time.

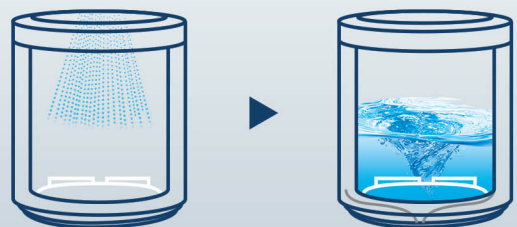

With Aqua Shower Rinse, sufficient rinsing performance with less water.

Without Aqua Shower Rinse

With Aqua Shower Rinse

Draining while shower
spray allows better

HEXA DRUM

HEXA DRUM

Unique cube-shaped drum prevent fabrics from getting trapped and damaged. Smaller outlet water holes on the drum create tiny flows to penetrate the fabric for better cleaning.

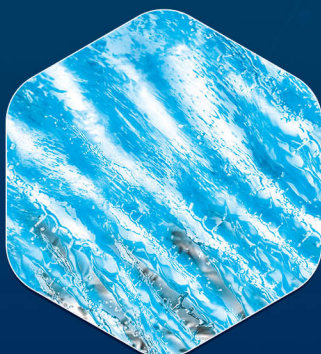

Drum Design

The Hexa Drum, carefully designed with its unique hexa cube pattern, washes the laundry with a firm massage-like treatment and remains incredibly gentle to the clothes so as not to damage the delicate fabrics.

Riser Wings

Along with the powerful Riser Wings, with almost 138 holes in each wing giving a strong water flow that make the clothes tumble up and down so even tough stains are cleaned easily, the Hexa Drum makes way for the perfect wash.

Powerful Wash

Jets of water spray from 2196 mini holes with a fine diameter of 0.24, which washes away the dirt and penetrates into the fabric to deliver a clean wash course.

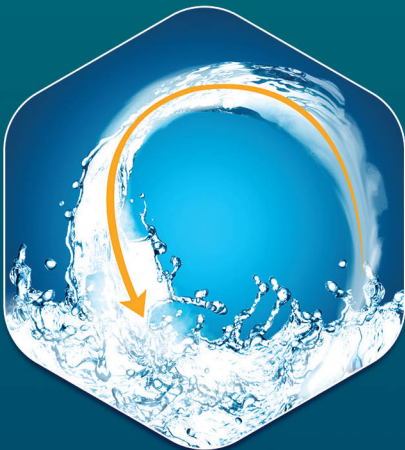

AQUA FRESH WASH

The Aqua fresh Wash is combined with three distinguishing water flows for washing the stained and dirty clothes in the best way. Every wash, with its unique style of flow, cleans the clothes thoroughly, which gives them a new and fresh feel every time.

Aqua fresh Wash

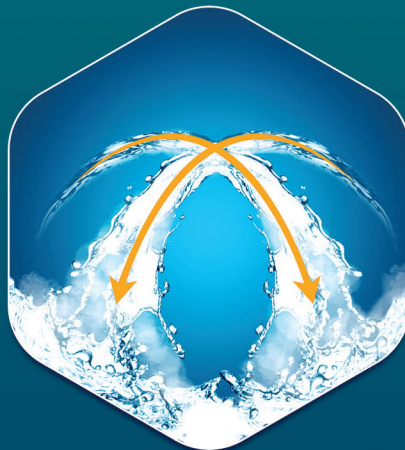

Beat Wash

Tumble wash of 30 sensor with powerful movement

Toss Wash

Massage like treatment to the laundry

Rain Wash

Water's centrifugal force and foam washes the clothes

3D Wash System

Detected by Sensors

Optimal tumbling control with 4 sensor

- Balance of Clothes
- Amount of Foam
- Water Temperature
- Water Level

FEATURES

Convenience & Aesthetics

Hygiene Pro

Hygiene Pro system will keep your laundry always in clean environment, saving time and easing your laundry.

Tub Clean

Enables cleaning of the machine itself with water at 90 °C, so as to sterilize the tub, ensuring that there are no residues, molds, thereby, maintaining hygiene.

Intensive Wash

The Intensive Wash Program gets rid of tough stains while keeping the quality of the fabric intact.

Hot Air Dry

Hot air is used to dry the washed clothes quickly. You can also set the dryness according to the cloth's fabric.

Pause & Add

You can add clothes which you may have forgotten or which only need a short wash, in the machine mid-wash cycle.

Brisk Wash - (Complete cycle in 15 mins - Wash + Rinse + Spin)

This course takes care of your everyday clothes and when you are running short of time, without hindering the wash quality.

25% Less Time

Speed Wash takes 25% less time to finish the laundry process by increasing the beat frequency and reducing the dwell time.

Big Display

A large interactive display enables better selection and communication of the desired feature or programmes.

Wide Door

A 480mm door gives a wide opening to load/unload laundry. It not only aids in operation but also creates an aesthetic appeal.

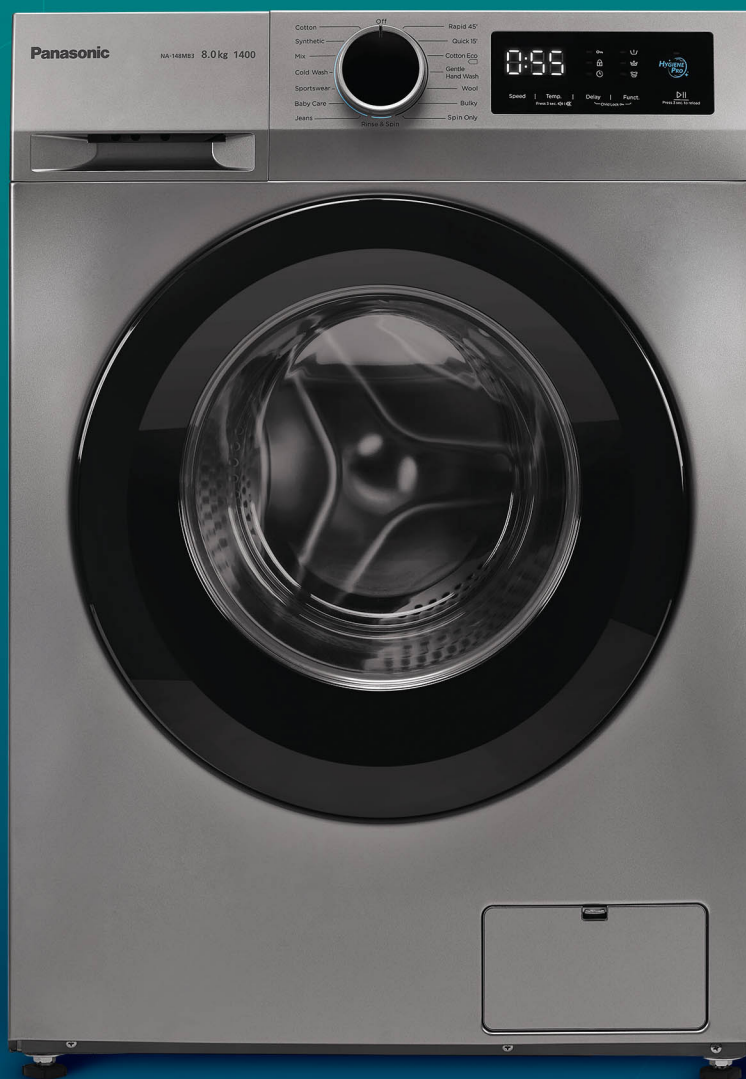

10 Year Warranty

The durability of the product is backed with its warranty.

PRODUCT RANGE

MB3 Series

NA-148MB3L01

Capacity: 8.0 kg

Dimension:

W 595 X D 565 X H 850 mm

RPM: 1400

Color: Dark Grey | 

NA-127MB3L01

Capacity: 7.0 kg

Dimension:

W 595 X D 495 X H 850 mm

RPM: 1200

Color: Dark Grey | 

NA-106MB3L01

Capacity: 6.0 kg

Dimension:

W 595 X D 470 X H 850 mm

RPM: 1000

Color: Dark Grey | 

Features

- Gentle Hand wash
- Crystal Drum
- 5 Star BEE Rating
- Temperature Settings (20-30-40-60-90 °C)
- Pause N Add
- Pre-Wash
- Extra rinse
- Extra wash (Heavy Wash)
- Fast wash (Rapid wash)
- 15 Programs
- Wool wash
- Hygiene Wash/Pro (upto 90 degree)
- Delay wash
- Auto Clean
- Child lock
- Tub Clean

MC2 Series

NA-106MC2L01

Capacity: 6.0 kg

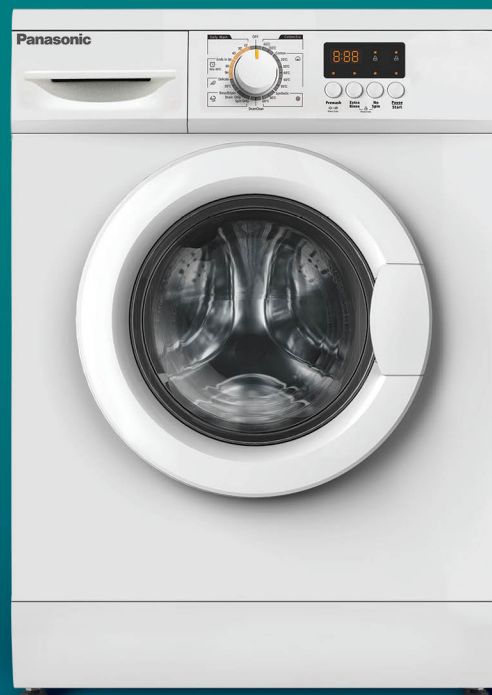

Dimension: W 595 X D 470 X H 850 mm

RPM: 1000

Color: Silver | 

Features

- SS Drum
- 23 Programs
- 5 Temperature Settings (20-30-40-60-90°C)
- Auto Restart
- 25% less time
- Tub Clean
- Mute Wash
- Child Lock

MF1 Series

NA-148MF1L01

Capacity: 8.0 kg

Dimension:

W 595 X D 565 X H 850 mm

RPM: 1400

Color: Silver | 

NA-147MF1L01

Capacity: 7.0 kg

Dimension:

W 595 X D 495 X H 850 mm

RPM: 1400

Color: Silver | 

Features

- Inverter
- IOT*
- ActiveFoam system
- Gentle Hand wash
- Hexa cube Drum
- Brisk Wash
