Beyond LEGACY

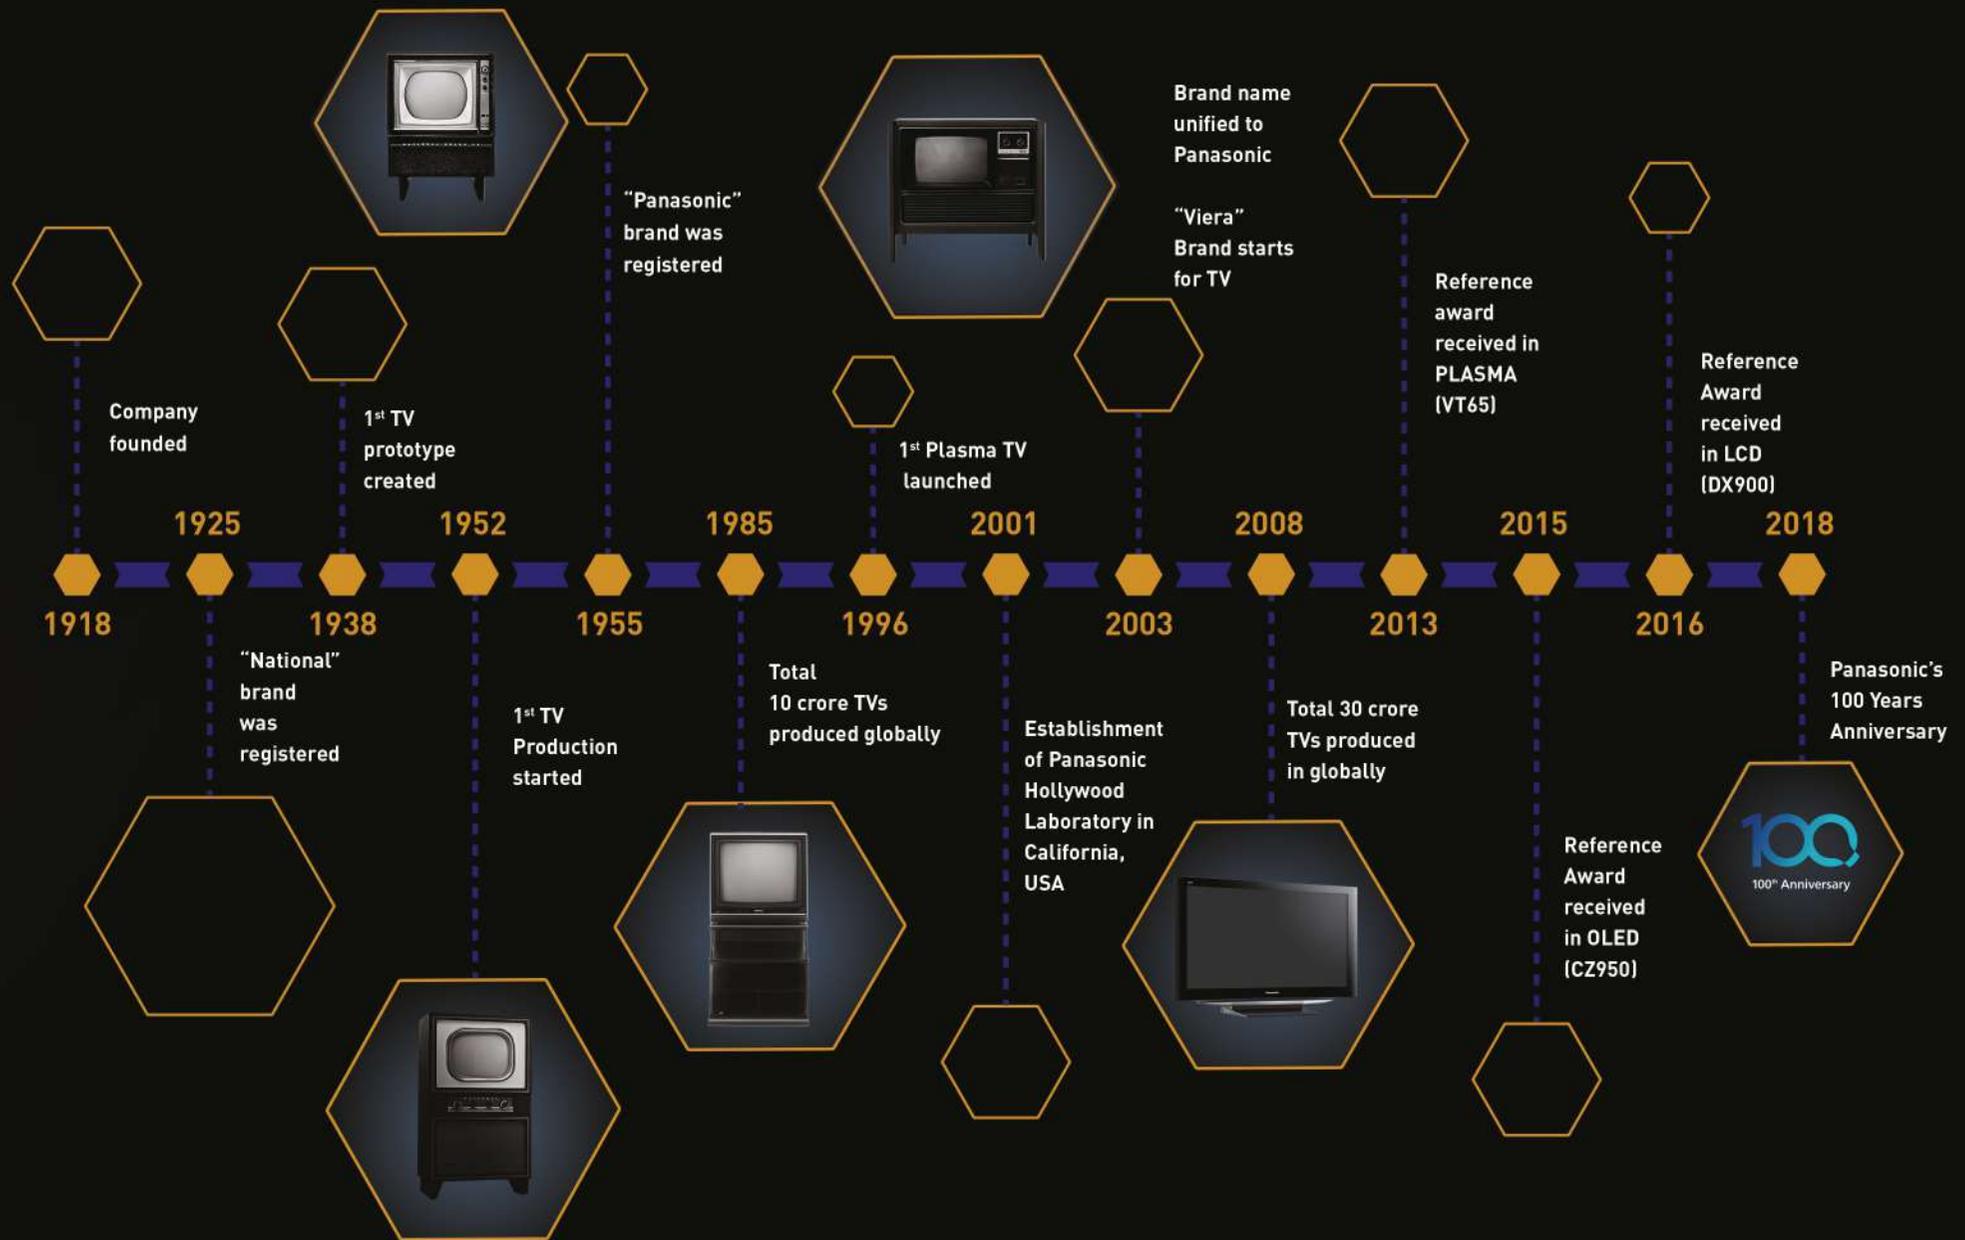

It's not just a name, it's a belief.

Japanese technology is undoubtedly the best in the world. Since its foundation in 1918, Panasonic (former "National") has been loved and trusted by customers for the last 100 years, and its history continues to count.

Panasonic's TV now hitting its 68th anniversary, with 30 Crore+ happy customers in over 150 countries and regions. From durability to performance, innovation to convenience, Panasonic and our technology have been providing its customers with an outstanding experience that's beyond technology.

Beyond Visuals

Don't just watch,
experience the action.

HCX PRO INTELLIGENT PROCESSOR

Working together with Hollywood colourists, Panasonic's passion for films combined with advanced technology has produced the Hollywood Cinema Experience (HCX) PRO Intelligent Processor.

This startlingly powerful chip produces unrivalled cinematic quality and brings Hollywood to life in your homes.

Creating high-quality pictures in collaboration with hollywood pro-colourists.

TOP COLOURIST STEFAN SONNENFELD

PANASONIC HOLLYWOOD LABORATORY

A bridge to cinema professionals: creating cutting-edge display technologies.

In 2001, the Panasonic Hollywood Lab was established within the Universal Studio Lot in Hollywood. It was around 2006 when studios in Hollywood started picking up our Plasmas for consumer-reference and client monitors.

PANASONIC OLEDs ARE ON THE JOB IN HOLLYWOOD STUDIOS.

It's not just Panasonic that believes its latest televisions are uniquely designed to show pictures in the way they were created to be seen. Some of the film and TV industry's biggest names now use Panasonic televisions as an essential part of their work processes. Our TVs are 'the Choice of Hollywood', meaning, that you can own THE VERY TVs which are also being used to create the movies and TV shows you love.

UNMATCHED COLOUR

Bring every scene to life with dynamic colours & tones.

HEXA CHROMA DRIVE

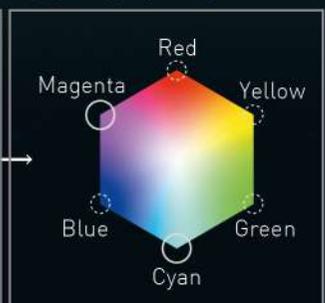

Stunning beauty with accurate 6-colour reproduction.

Experience stunning picture quality like never before. Thanks to the 6-Colour Reproduction, our TV has achieved remarkably high picture quality with Panasonic cinema quality. This amazing quality offers you a memorable viewing experience and delivers outstanding colour clarity.

Conventional

Hexa Chroma Drive

6-colour reproduction

Delivers outstanding colour clarity

HEXA CHROMA DRIVE PRO

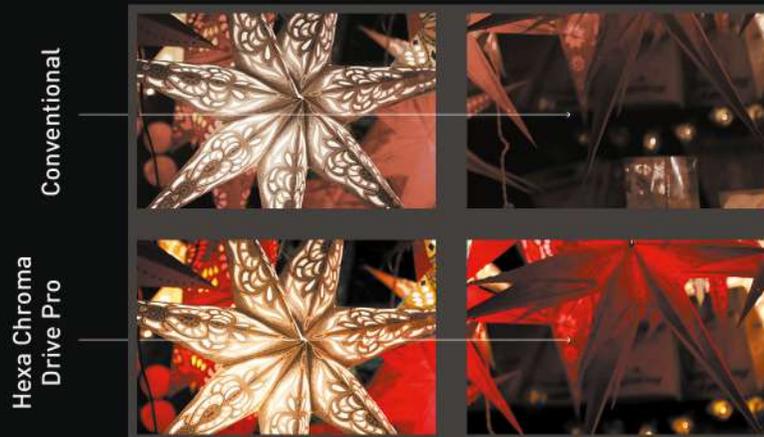

One billion colours are accurately reproduced and difficult dark shades are also faithfully rendered.

Hexa Chroma Drive Pro is Panasonic's original revolutionary colour processing technology that delivers life-like images. A colour-correcting system, called a 3D Look Up Table, that is used for master monitors, provides more precise colour reproduction. Above all, it shows the colours of the entire picture clearly, even the shadows and bright areas.

High Brightness Area

Low Brightness Area

Colour and gradation are precisely reproduced.

VIVID DIGITAL PRO

Natural skin tones and colours with bright, sharp images.

A form of image rendering designed specially for digital signals corrects colour, brightness and sharpness. It achieves natural skin tones and colours, enhances brightness and sharpens images with an original noise reduction method. This unique technology allows you to experience truly superb images.

HEXA BOOST

Watch your favourite TV programmes in vivid colours.

Simply press the HEXA Boost Button on the remote control to enjoy vivid colours in content such as sports, drama, and animation. For example, the pitch looks more vivid with real-life shades of green and uniforms look as if you were viewing them in their natural colours in an actual, live game.

Enjoy stunning picture with a variety of content.

UNMATCHED CONTRAST

Brighter picture that will
take your breath away.

4K LOCAL DIMMING

High contrast images created with backlight control and signal processing.

Backlight control and signal processing combine to control the brightness in thousands of areas for outstanding contrast expression. They also render fine hues and produce images with exceptional depth.

COMPATIBLE WITH MULTIPLE HDR FORMATS

Our new TVs support playback of both next-generation 'Dynamic Metadata' HDR Standards: HDR10+ and Dolby Vision. They also support conventional HDR10 and Hybrid Log-Gamma too, so users can enjoy a variety of HDR content. HDR 10+ provides unprecedented picture quality on all displays with brightness, colour and contrast automatically. In previous iterations, static tone mapping applied a fixed enhancement across an entire piece of content. With HDR10+ dynamic tone mapping every scene is individually enhanced to bring to life vibrant visuals and achieve unprecedented picture quality.

Middle

Bright

DYNAMIC HDR EFFECT

Even non-HDR10+ content reproduces real, life-like images.

Panasonic's unique processing technology creates metadata and adds it to normal HDR10 signals.

Conventional

Dynamic HDR effect

Tone mapping is adapted to each scene by Panasonic TV's self analysis.

IPS SUPER BRIGHT PANEL PLUS.

Make pictures look crisper and more dynamic with a wide viewing angle.

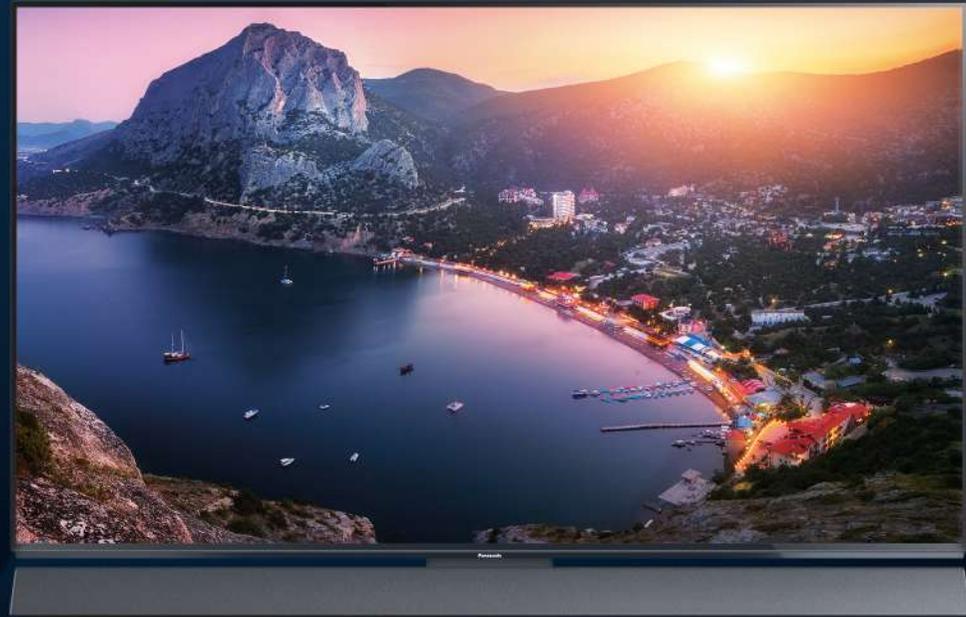

The IPS panel provides high light transmittance and a wide viewing angle, with an LED backlight that efficiently increases brightness. This IPS LED technology helps to achieve a high level of picture quality.

UNMATCHED CLARITY

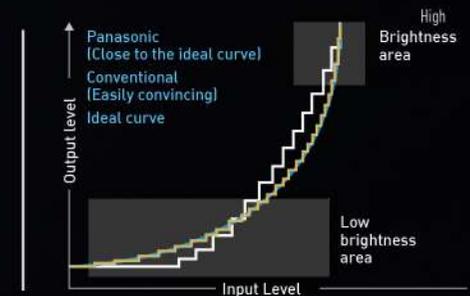

Amazingly clear and crisp movement.

ULTRA FINE TUNING

Experience every detail, from the brightest to the darkest, with smooth gradation.

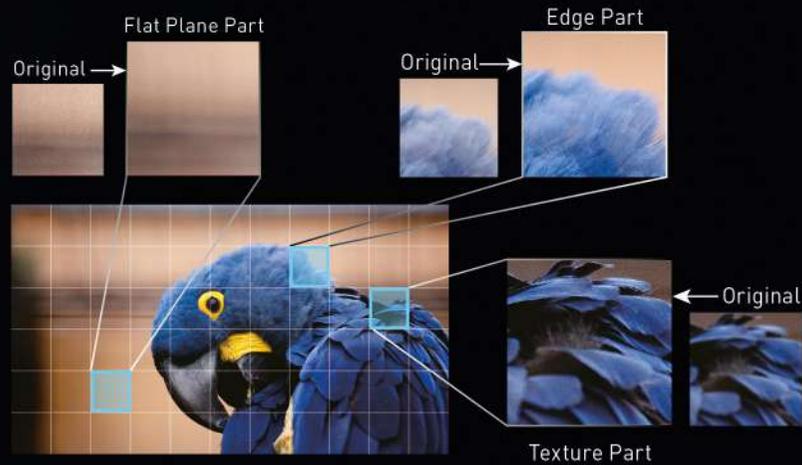

Ultra-fine tuning is an advanced technology designed to reveal unimaginable nuances in tone. It expresses the finest life-like details, from the lightest to the darkest shades.

4K FINE REMASTER

Clear, detailed image picture quality in 4K.

The image is analysed and sorted into three parts — Flat Plane Part, Edge Part and Texture Part. Each part is then optimally compensated.

4K HDR GAME MODE

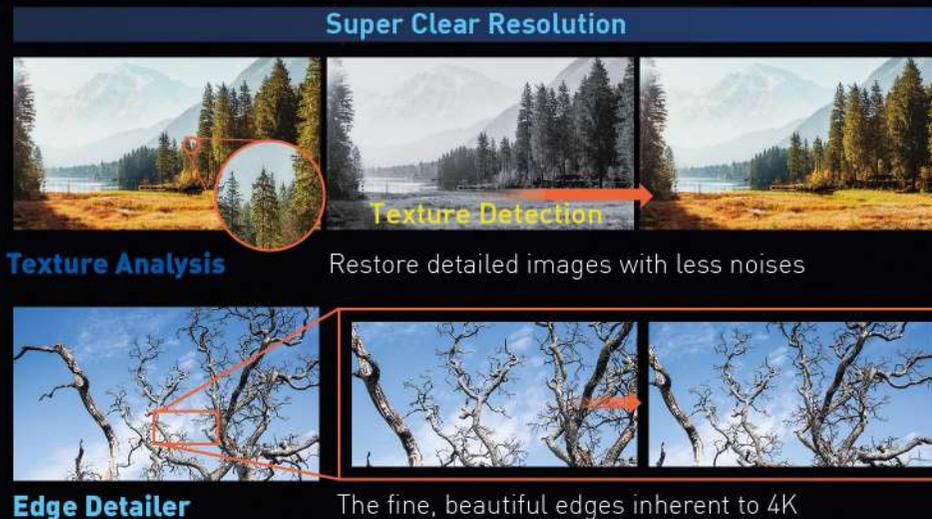

In Game mode, quicker image response provides a more direct playing sensation and boosts your gaming fun.

4K UPSCALING

Full-HD content is upscaled to 4K-equivalent resolution.*

Panasonic's original high-performance image processing engine immaculately renders highly intricate and detailed 4K images.

Texture Analysis

Restore detailed images with less noises

Edge Detailer

The fine, beautiful edges inherent to 4K

Realize Fine, Clear Edge Line like 4K Picture Quality.

NOISE REDUCTION

Reduce picture noise to make images look crisper and clearer.

*The upscaled resolution depends on the original content.

Beyond Sound

Don't just hear,
immerse yourself in it.

DYNAMIC BLADE SPEAKER

Sophisticated sound with perfect harmony tuned by specialists

As the key to low frequency bass, the woofer is essential for a rich audio experience. Tremendous technological advances have made it possible to reach unparalleled sound.

Evolution of the woofer

DOLBY ATMOS

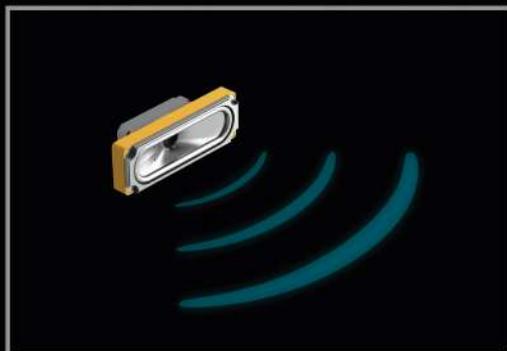

Be drawn into the visuals with sound that literally surrounds you.

Dolby Atmos offers completely immersive cinematic sound thanks to multiple speakers. This maximises the effect of Dolby Atmos and literally puts you 'at the centre of the action.'

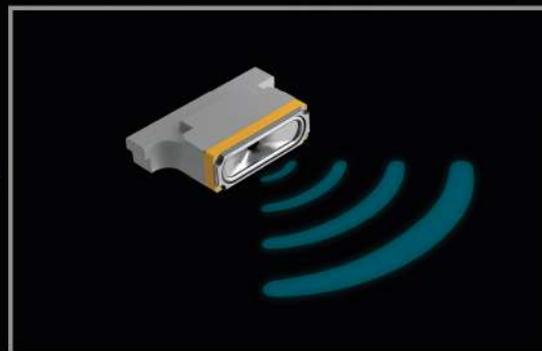

HOME THEATRE BUILT-IN

Many flat panel TVs do not have a high enough level of sound because of the small space for speakers. To release a high level of sound, we adopted special speaker units for Built-in Home Theatre. It improves the sound pressure and delivers robust bass. The box-type structure produces resonance and high sound pressure. This provides high-quality sound.

Normal Speakers

Built-in Home Theatre

*Simulated images.

V-AUDIO

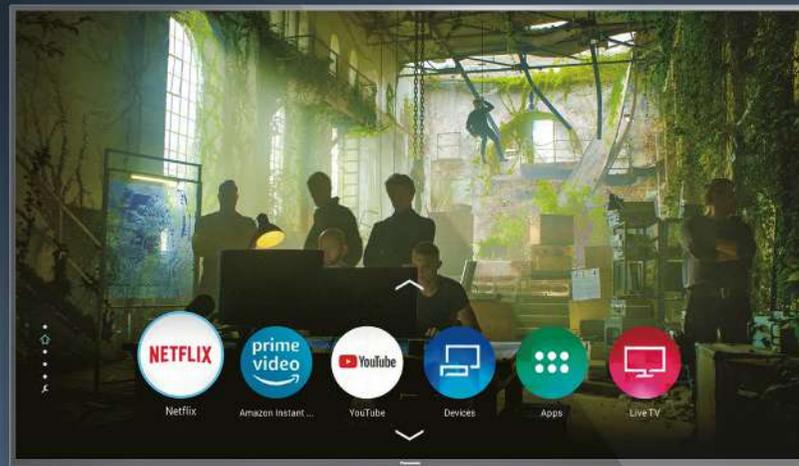

V-Audio delivers surrounding sound effect and depth-sound-image that are generated by digital signal processing.

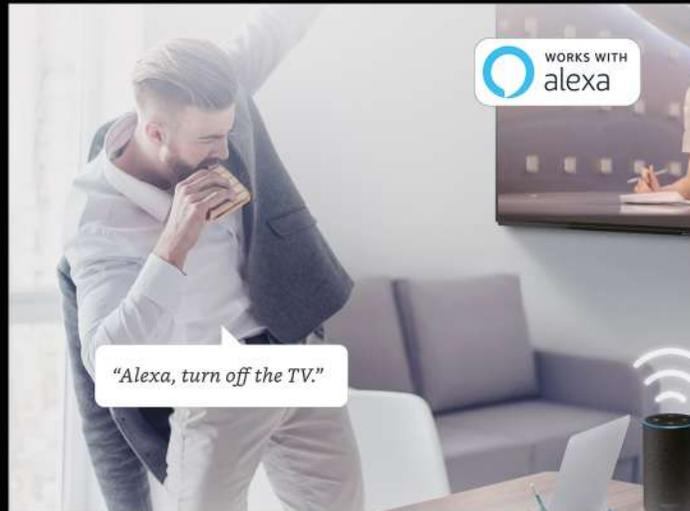

Our TVs comply with major industry standards for audio performance.

Beyond Smart

Don't be just smart,
be innovative.

EASY TV OPERATION WITHOUT A REMOTE CONTROL

Panasonic TVs give you hands-free operation from an Amazon Alexa or Google Assistant enabled device. A variety of operations, such as turning the power on or off and changing the channel or sound volume, can be carried out by voice without having to use the remote control. It's easy to operate the TV with voice commands when you're busy cooking or getting ready to leave the house.

*The Google Assistant is not available in certain languages and countries. Requires Internet connection. Availability of services varies by country and language. Subscriptions for services may be required. Google is a trademark of Google LLC | *Amazon, Alexa and all related logos are trademarks of Amazon.com, Inc. or its affiliates.

MY HOME SCREEN

Easier Content Access Via Customisable Home Screen

Enjoy content with "1-step access". My Home Screen can be customised to let you reach the content you frequently use. You can design your own home screen with frequently used devices, your favourite apps, web bookmarks, and Live TV.

AUDIO LINK

Play The Great Sounds Of Various Content Easily

The Panasonic Bluetooth Audio Link function connects easily to a wireless audio speaker via Bluetooth® to provide powerful sound without complicated settings. Great for listening to music at high volume with high picture quality. Music content from a smartphone or tablet device can also be played on the TV speakers.

SWIPE & SHARE

Share Smartphone And Tablet Content On Your TV Screen Easily

Swipe & Share lets you 'throw' content from your smart devices to the TV screen by swiping your fingers on your portable devices. Also, 'thrown' contents can be shared with other App users who are connected to the TV at same time.

INTERNET APPS

Use A Wide Variety Of Apps On Your Large TV Screen

Internet App-capable TVs can use the Internet to access a wide range of apps, video on demand services and games stored on the Cloud.

Beyond Design

It's not just a sleek design,
its art.

LESS IS PERFECTION

What is the essence of a TV?

Panasonic's sleek design is the answer to this question. It emphasizes on simplicity in shape in order to enhance picture and sound. It refines every aspect to create a memorable new experience.

360 DEGREE DESIGN

A big screen in a slim design. The 360-degree design and the elegantly minimalist appearance looks stunning in any room.

BEZEL-LESS DESIGN

The bezel-less edge design lets you enjoy the complete picture without any distraction.

SWITCH DESIGN

Wide or narrow? — With two distinct styles in one Flexible Pedestal design, you can now change the look of your TV to match your room's interior or the size of your TV stand.

SCREW-LESS DESIGN

The screw-less design helps to change the stand without using a screwdriver. This makes it convenient to change the position of the TV easily. It also makes it easy to clean as dust doesn't get accumulated because of the screw-less design.

URBAN AUDIO

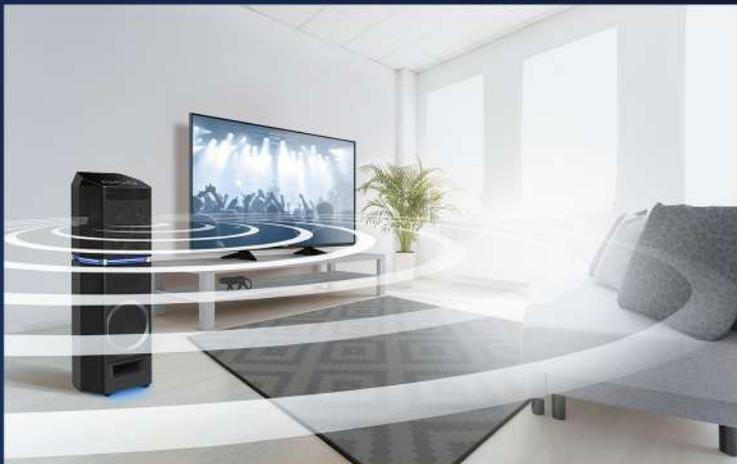

DYNAMIC SOUND FROM ALL-IN-ONE SPEAKER

Room-filling Expansive Sound

Wide directivity is obtained by positioning mid-range woofers and tweeters on three sides. Dynamic sound reaches every corner of the room. The UA90/UA7 has a total of 10 speaker units to attain sufficient sound pressure.

UA90 UA7 UA3

Overwhelming bass and resonance

Airquake Bass

Let the unique Bass Reflex System power your party. Innovative port technology pushes sound forward without losing the resonance of the woofer unit, to further amplify the bass.

UA90 UA7 

Total noise-reduction for clear sound

Hexa-Cylinder Cabinet

Hexa-Cylinder Cabinet reduces standing wave and reflection, and makes for a more rigid cabinet, which in turn reduces the resonance.

UA90 UA7

Clear vocals with minimal interference

Separate Box Configuration

Mid and treble are separated from the bass, preventing interference and delivering clear vocals.

UA90 UA7

Powerful bass sound without distortion

Back-to-back Speaker Placement

Back-to-back Speaker Placement reduces cabinet vibration by canceling opposed reaction movements.

UA90 UA7

Back-to-back Speaker Placement
