Cleaning

Vacuum Cleaner 2024

Refreshingly Clean

Cleaning for Enlightenment

Cleaning is also an important training in Zen temples in Japan. Cleaning does not only remove dirt from the house and garden, but also leads to polishing the mind beautifully. Cleaning everything – the space, the body and mind – is essential for training.

In temples, the cleaning tools are also used with care. They use every part of the rag so that it wears down evenly, and uses the broom at various angles so that it lasts longer. When the rag gets dirty, it is used as a duster, and is not simply thrown away as garbage.

Entry Model

Product Overview

MC-SBM20H647

Lightweight

1.6kg

Large Capacity

0.6L

Max runtime

40 min*1

Light and Easy to Handle

- Light 1.6kg / 1.0kg weight (with or without stick)
- Ergonomic grip

Clean Air Exhaust

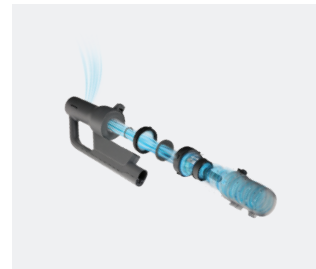

- 6-layer filtration system to efficiently filter dust from air
- EPA11 filter

Powerful Cleaning

- 70W of suction power
- Power Nozzle and Y-shaped brush to clean dust from all types of floor and every corner

Easy-to-clean Dust Box & Filters

- Fully-washable dust box and filters
- No dust sticks to the rounded bottom in the dust box

Attachments

Crevice Nozzle

Dusting Brush

Motorized Nozzle

Powerful cleaning in every corner

The nozzle reaches right up to walls to catch dust in every corner via 70 W of suction power for a thorough cleaning.

Front Cover

The front cover of the nozzle is so thin that the brush gets closer to the wall to fully capture dust.

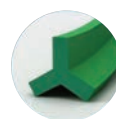

Two types of bristles tips to thoroughly remove dust from any flooring

Uses a dense brush with a mixture of Y-shaped and hard bristles to thoroughly clean dust from all kinds of floor surfaces, including wood flooring, carpet, and tile.

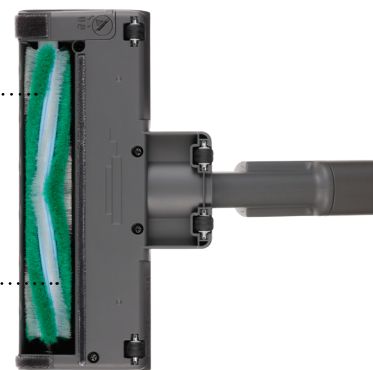

Y-shaped bristle tips

A large area of contact with the floor makes it easy to capture dust

Hard bristles

Scoops out dust from deep in carpet

A motor in the nozzle enables smooth movement with a light touch

The high torque motor in the nozzle head allows the brush itself to rotate and powerfully move forward.

It thoroughly scoops up dust from carpets and grooves without pushing the vacuum cleaner.

One Nozzle for All Types of Floors

Tiles carpets and hardwood floors, regardless of the floor material, all you need is this one nozzle to complete your cleaning

Top its Lightweight class with 1.6KG

Optimizing single-hand handheld versatility of usage even to reach high places

Clean Air Exhaust

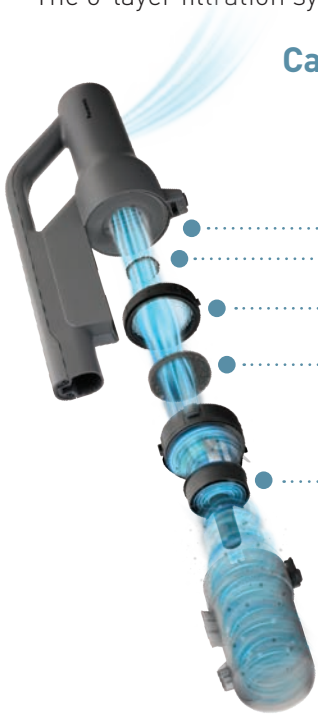

The multiple filtration system provides clean exhaust. Capture invisible dust, mites, pollens and micro particles.

6-layer filtration system with EPA for clean air

The 6-layer filtration system with EPA captures and filters out even the finest dust to exhaust only clean air.

Capture microscopic dust via the 6-layer filtration system

6-layer Filtration System*

- Step 5 Outlet filter** Prevent dust particle from dispersing into the environment from stick cleaner.
- Step 4 Filter** Prevent large dust particle from entering and causing damage to the motor compartment.
- Step 3 2-layer EPA11 filter** Filter sub-micron dust particles.
- Step 2 Sponge filter** Prevent dust from clogging the washable filter.
- Step 1 Upper filter** Filter large dust particles and hair in dust compartment.

Captures **95%*** of house dust as small as 1µm

*Before based on internal testing using cement as dust material.

Easy Preparation & Easy Maintenance

Make your routine almost effortless by disposing of troublesome dust and dirt and easily

Preparation

Maintenance

Slim design to fit anywhere

Easy to detach

The nozzle brush is washable

Dispose of dust without dirtying hands

The entire dust bin is washable

Versatile Attachments

One vacuum to clean every single space and corner of the entire home

Handheld Style for higher place than floor

Dusting brush for small areas

Lightweight for single-hand

Easy to use anywhere

Team up for an easy cleaning routine

ADVANCED MEGACYCLONE

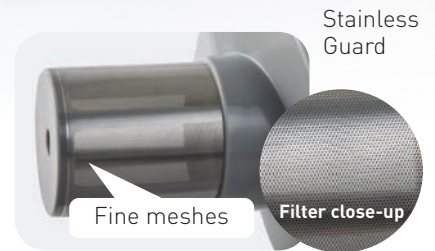

2.2L DUST CAPACITY

ADVANCED MEGACYCLONE

Effectively separates dust and air with Stainless Steel Guard

*Only valid for MC-CL609/607

The Secrets of Clean Air Exhaust

The Cyclone and 7-layer Filtration System with HEPA Capture Even the Finest Dust and Exhausts Only Clean Air.

Original Cyclone System - Stainless Guard

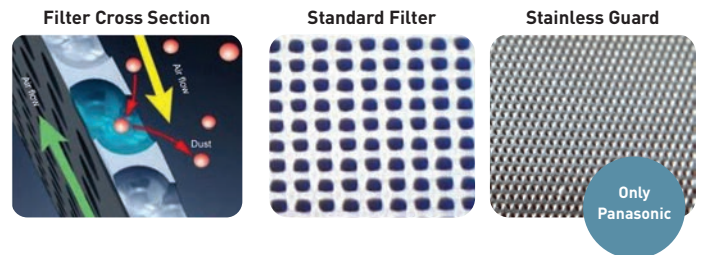

Clean Air Exhaust Through an Anti-clog Filter System

7-Layer Filtration System with HEPA*

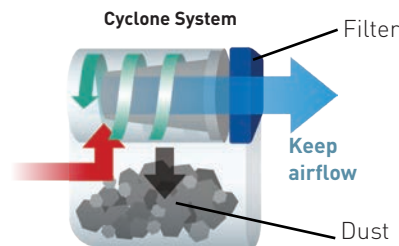

Only Panasonic

The 7-layer filtration system captures even the finest dust. The Stainless Steel Guard's oblique hole reverses the airflow and prevents dust from entering the unit.*

Only Panasonic

It is the structure that dust does not get the filter clogged.

Product Overview

Protect Family from Invisible Dust Mites

Mattress Nozzle to Keep Bedding Clean

Mattress Nozzle with anti-bacteria double roller taps and the brush picks up dust, mites, and allergies hidden in the mattress.

*The photo uses the MC-CL609 model.

Dust Sensor of Mattress Nozzle

The dust sensor (can detect as small as 70µm) brings you more efficient cleaning performance on the mattress. When the light is red, dirt is still being detected, when the light turns off, the bed is clean. It makes you feel relieved to know that even invisible dust has been properly cleaned.

Detect dust Clean-up

*Dust Sensor is only for CL609

Stress-free Fabric Cleaning with Curtain Nozzle

The Curtain Nozzle attachment helps remove dust and even pet hair without sucking in and snagging on fabric. No need to take down the curtains.

Curtain Nozzle

Vents let air escape for stress-free cleaning.

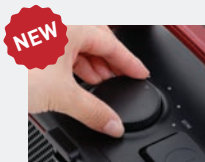

New Designs for Easy to Use

Fully Washable Dust Box

Keep clean easily with fully washable filters and dust box.

Power Control*

The power can be adjusted depending on the situation.

*Only CL609/CL607/CL605

Dual Handle

Dust Accumulates Where You Can't See

Long Lasting Suction Power

Powerful big dust capacity of 2.2L with cyclone that centrifuges dust and maintains high level of suction power to enable longer household cleaning.

2-Layer HEPA Filter

2-Layer HEPA System, consisting of main filter and exhaust filter, also removes fine particles to give out clean exhaust.

Easy to clean hard-to reach places gently

Flexi Dusting Brush makes it easier to clean high places that were hard to reach with a vacuum cleaner.

The brush gently clean, while sucking up dust without floating it in the air.

On a Shelf Ceiling

It can reach height of up to 2.5m, and the direction of the brush can be changed to clean the ceiling and the tops of shelves.

Tips For You

Operating Floor Nozzle

Wood Flooring

To avoid scratching the floor, nozzle over the flooring following the grain floor surface, lightly slide off the wood.

Carpet

First run the floor nozzle backwards and forward over the carpet in one direction, then repeat at an angle of 90 degrees.

Notes:

- When you vacuum new carpets, the dust bag will quickly fill up with loose fibers from the carpets.
- To prevent damaging the floor surface, do not vacuum by moving the floor nozzle side to side.

Maintenance

- Do not vacuum an area which contains moisture, water or inflammable items, needles, pins, razor, blades, etc...
- Change the vacuum cleaner bag when it is slightly more than half full.
- For bagless vacuum cleaner, clean the dust compartment and filter, using an old toothbrush or brush provided when necessary.
- Wipe with soft cloth that has been moistened with water.

Safety Device

When the safety device works

The safety device trips and motor stops in order to prevent overheating of the motor when the unit has been operated continuously with a full dust bag.

What to do...

Replace the dust bag or remove the obstruction in the floor nozzle or hose.

When to use again...

Wait about 5-25 minutes (depends on the surrounding temperature). The safety device will reset and you can use the unit again.
