Hair and Scalp Treatment   Cool   3 Airflow Settings   Quick Dry Nozzle   Foldable Handle

## Benefits of nanoe™

### nanoe™ for healthy and shiny hair

Panasonic's innovative nanoe™ technology retains the moisture balance inside of the hair to keep it smooth and shiny. Moisture-rich nanoe™ particles penetrate cuticles to keep hair hydrated and more manageable

### nanoe™ moistens scalp to keep it clean and healthy

Moisture-rich nanoe™ hydrates your scalp to keep it healthy, preventing the dryness that causes damage to hair while helping deliver sebum care for a fresh scalp.

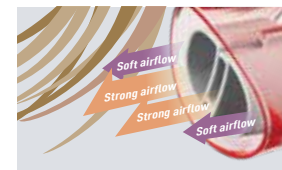

### Static electricity suppression effect

Hair naturally tends to have a positive electrical charge that makes it stand on end. nanoe™ neutralizes the charge, reducing static electricity to settle your hair and make it smoother.

### Quick-dry nozzle

The quick-dry nozzle separates the airflow to make strong and weak pressure that spreads hair evenly, improving drying speed.

### Compact, foldable and lightweight

This hair dryer at just 375 g\*<sup>1</sup> and a width of 15.7 cm\*<sup>2</sup> generates a powerful airflow. The body is designed to be light and compact to easily carry and store.

\*<sup>1</sup>Without cord/nozzle.  
\*<sup>2</sup>Excluding the nozzle.
