Operating Instruction and Cook Book Steam/Convection/Grill/Microwave Oven Household Use Only

INVERTER

Model No. NN-CS89LB

Please read these instructions carefully before using this product,
and save this manual for future use.

We are glad you have chosen to purchase a PANASONIC microwave oven. Before operating this oven, please read these instructions carefully and completely, and keep them for further reference.

If you have only used a microwave oven for reheating and defrosting, with Panasonic's Inverter Technology you can be reassured of excellent results when cooking a variety of foods, as the 'soft' penetration of microwave energy to the centre of food helps prevent over cooking on edges and surfaces. Foods can now be gently simmered without the concern of boil over.

After reading the introductory chapter, we are sure you will be able to master the basic techniques and thereby develop a firm understanding of your new oven. This book includes recipes from starters to desserts. After trying our recipes be sure to adapt your favourite recipes to microwave methods.

Start experimenting now, and enjoy the first class results you will achieve by using your new microwave oven.

Important Safety Instructions

READ CAREFULLY AND KEEP FOR FUTURE REFERENCE

Precautions to be taken when using Microwave Ovens for Heating Foodstuffs INSPECTION FOR DAMAGE:

A microwave oven should only be used if an inspection confirms all of the following conditions:

1. The door fits squarely, securely and opens and closes smoothly.
2. The door hinges are in good condition.
3. The metal plates of a metal seal on the door are neither buckled nor deformed.
4. The door seals are neither covered with food nor have large burn marks.

PRECAUTIONS:

Microwave radiation from microwave ovens can cause harmful effects if the following precautions are not taken:

1. Never tamper with or deactivate the interlocking devices on the door.
2. Never poke an object, particularly a metal object, between the door and the oven while the oven is operating.
3. Never place saucepans, unopened cans or other heavy metal objects in the oven.
4. Do not let other metallic articles, e.g. fast food foil containers, touch the side of the oven.
5. Clean the oven cavity, the door and the seals with water and a mild detergent at regular intervals. Never use any form of abrasive cleaner that may scratch or scour surfaces around the door.
6. Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass, since they can scratch the surface, which may result in shattering of the glass.
7. Always use the oven with the cookware recommended by the manufacturer.
8. Never operate the oven without a load (i.e., an absorbing material such as food or water) in the oven cavity unless specifically allowed in the manufacturer's literature.
9. For horizontally hinged doors, never rest heavy objects such as food containers on the door while it is open.

10. Do not place sealed containers in the microwave oven. Baby bottles fitted with a screw cap or a teat are considered to be sealed containers.
11. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
12. Children should be supervised to ensure that they do not play with the appliance.
13. It is hazardous for anyone other than a competent person to carry out any service or repair operation that involves the removal of a cover which gives protection against exposure to microwave energy.
14. The surfaces are liable to get hot during use.
15. The appliance must not be installed behind a decorative door in order to avoid overheating.

Practical Hints:

1. For initial use of STEAM, GRILL, CONVECTION and COMBINATION, if you see white smoke arise, it is not a malfunction.
2. Exterior oven surfaces, including air vents on the cabinet and the oven door will get hot during STEAM, GRILL, CONVECTION and COMBINATION. Use care when opening or closing door and when inserting or removing food and accessories.

Caution! Hot surfaces

3. The oven has heating elements situated in the top of the oven a steamer boiler situated in the left side of the oven and a convection heater situated in the back of the oven. After using the GRILL, CONVECTION and COMBINATION functions, the ceiling will be very hot.
4. During use the appliance becomes hot. Care should be taken to avoid touching heating elements inside the oven.
5. The accessible parts may become hot when STEAM, GRILL, CONVECTION and COMBINATION is in use. Children should be kept away.
6. Before using GRILL, CONVECTION and COMBINATION functions for the first time, operate the oven without food and accessories on CONVECTION 230 °C for 10 minutes. This will allow the oil that is used for rust protection to be burned off. This is the only time that the oven is operated completely empty.

Important Instructions

WARNING—To reduce the risk of burns, electric shock, fire, injury to persons or excessive microwave energy:

1. Read all instructions before using the microwave oven.
2. Some products such as whole eggs and sealed containers - (for example, closed glass jars **and sealed baby bottles with teat**) - may explode and should not be heated in the microwave oven.
3. Use this microwave oven only for its intended use as described in this manual.
4. As with any appliance, close supervision is necessary when used by children.
5. Do not operate this microwave oven, if it is not working properly, or if it has been damaged or dropped.
6. Do not store or use this appliance outdoors.
7. Do not immerse cord or plug in water.
8. Keep cord away from heated surfaces.
9. Do not let cord hang over edge of table or counter.
10. To reduce the risk of fire in the oven cavity:
 - (a) Do not overcook food. Carefully attend microwave oven if paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
 - (b) Heating therapeutic wheat bags is not recommended. If heating, do not leave unattended and follow manufacturers' instructions carefully.
 - (c) Remove wire twist-ties from bags before placing bag in oven.
 - (d) If materials inside the oven should ignite, keep oven door closed, turn oven off at the wall switch, or shut off power at the fuse or circuit breaker panel.
 - (e) Never leave microwave unattended while cooking or reheating.
11. Do not remove outer panel from oven.
12. This appliance is not intended to be operated by means of an external timer or separate remotecontrol system.
13. Failure to maintain the oven in a clean condition could lead to deterioration of the surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.

Circuits

Your microwave ovens should be operated on a separate circuit from other appliances. The voltage used must be the same as specified on this microwave oven. Failure to do this may cause the power board fuse to blow, and/or food to cook slower. Do not insert higher value fuse in the power board.

Earthing Instructions

This microwave oven must be earthed. In the event of an electrical short circuit, earthing reduces the risk of electric shock by providing an escape wire for the electric current. This microwave oven is equipped with a cord having an earthing wire with an earthing plug. The plug must be plugged into an outlet that is properly installed and earthed.

WARNING—Improper use of the earthing plug can result in a risk of electric shock.

WE CERTIFY THAT THIS MICROWAVE OVEN HAS BEEN INSPECTED AND COMPLIES WITH THE REQUIREMENTS OF REGULATION 3, SUBCLAUSE(2), OF THE MICROWAVE OVENS REGULATIONS 1982.

(This statement applicable only to New Zealand.)

We certify that this microwave oven has been inspected and complies with the safety requirements of government notice 466 of March 1981, and complies with the Radio Regulation of government notice 587 of March 1986.

(This statement applicable only to South Africa)

Fan Motor Operation after Cooking

After using this oven, the fan may rotate to cool the electric components. This is perfectly normal, and you can take out the food from the oven while the fan operates.

WARNING

- a) The door seals and door seal areas should be cleaned with a damp cloth. The appliance should be inspected for damage to the door seals and door seal areas and if these areas are damaged the appliance should not be operated until it has been repaired by a qualified service technician trained by the manufacturer.
- b) If the door or door seals are damaged, the oven must not be operated until it has been repaired by a competent person.
- c) It is dangerous for anyone other than a service technician trained by the manufacturer to perform repair service.
- d) It is hazardous for anyone other than a competent person to carry out any service or repair operation that involves the removal of a cover which gives protection against exposure to microwave energy.
- e) If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- f) Before use, the user should check that whether the utensils are suitable for use in microwave ovens.
- g) Liquids or other foods must not be heated in sealed containers since they are liable to explode, at the same time it should avoid the boiling liquids splash.
- h) Only allow children to use the oven without supervision when adequate instructions have been given so that the child is able to use the oven in a safe way and understands the hazards of improper use.
- i) When the appliance is operated in the STEAM, GRILL, CONVECTION and COMBINATION modes, children should only use the oven under adult supervision due to the temperatures generated.

Installation and General Instructions

General Use

1. In order to maintain high quality, do not operate the oven when empty. The microwave energy will reflect continuously throughout the oven if no food or water is present to absorb energy. This can lead to damage to the microwave oven including arcing within the oven cavity.
2. If smoke is observed, touch Stop/Cancel and leave door closed in order to stifle any flames. Disconnect the power cord, and/or shut off power at the fuse or circuit breaker panel.
3. The microwave oven is intended for heating food and beverages. Drying of food or clothing and heating of warming keys, slippers, sponges, damp cloth and similar may lead to risk of injury, ignition or fire.
4. Do not dry clothes, newspapers or other materials in oven. They may catch on fire.
5. Do not use recycled paper products, unless the paper product is labelled as safe for microwave oven use. Recycled paper products may contain impurities which may cause sparks and/or fires when used.
6. Do not use newspapers or paper bags for cooking.
7. Do not hit or strike control panel. Damage to controls may occur.
8. POT HOLDERS may be needed as heat from food is transferred to the cooking container and from the container to the oven. The oven can be very hot after removing the cooking container from the oven.
9. Do not store flammable materials next to, on top of, or in the oven. It could be a fire hazard.
10. Do not cook food directly on the base of oven unless indicated in recipes. (Food should be placed in a suitable cooking utensil.)
11. **DO NOT** use this oven to heat chemicals or other non-food products. **DO NOT** clean this oven with any product that is labelled as containing corrosive chemicals. **The heating of corrosive chemicals in this oven may cause microwave radiation leaks.**
12. When using the COMBINATION with microwave mode, never place any aluminum or metal container directly on the wire shelf, grill tray or metal tray.
13. Do not use the wire shelf, grill tray or metal tray when cooking in the MICROWAVE mode only.
14. During cooking, some steam will condense inside and/or on the oven door. This is normal and safe. Steam will disappear after the oven is cool down.
15. Do not leave the microwave unattended while reheating or cooking food in disposable containers made of plastic, paper or other combustible materials, as these types of containers can ignite if overheated.
16. Metallic containers for food and beverages are not allowed during microwave cooking.
17. Only use utensils that are suitable for use in microwave ovens.

Placement of the Oven

1. The oven must be placed on a flat, stable surface, more than 85 cm above the floor. For correct operation, the oven must have sufficient air flow. Allow 15 cm of space on the top of the oven, 10 cm at back. **If one side of the oven is 5 cm at one side, the other side or top must not be blocked. Do not remove feet.**
 - (a) Do not block air vents. If they are blocked during operation, the oven may be overheated and damaged. When using any cloth over the oven, the air intake and exhaust should not be blocked. Do not place a cloth on top of the unit during STEAM, GRILL, CONVECTION and COMBINATION cooking as the top of the oven gets very hot. Also allow sufficient space on back and both sides of the oven.
 - (b) Do not place oven near a hot or damp surface such as a gas stove, electric range or sink etc.
 - (c) Do not operate oven when room humidity is too high.
2. This oven was manufactured for household use only.

Building-in your oven

1. This oven is intended for counter-top and built-in use only. It is not intended for use inside a cupboard. This oven may be built into a wall cabinet by using the proper trim kit (NN-TK81LCSCP) which may be purchased from your local Panasonic dealer.
2. In case of fitting into an oven housing, please use Panasonic's Trim Kit, NN-TK81LCSCP.
3. Microwave ovens should not be built into a unit directly above a top front venting conventional cooker. This may be a safety hazard and could result in damage to your oven. This will invalidate your one year guarantee.
4. A microwave which is built in must be more than 850 mm above floor level. Read Trim-Kit instructions carefully before installation. It is recommended that the microwave oven is placed below a conventional oven to avoid heat damage to the fascia of the microwave.

Food

1. Do not use your oven for home canning or the heating of any closed jar. Pressure will build up and the jar may explode. In addition, the microwave oven cannot maintain the food at the correct canning temperature. Improperly canned food may spoil and be dangerous to consume.
2. Do not attempt to deep fat fry in your microwave oven.
3. Eggs in their shell and whole hard-boiled eggs should not be heated in microwave ovens since they may explode, even after microwave heating has ended.
4. Potatoes, apples, egg yolks, chicken wings, whole squash and sausages are examples of foods with nonporous skins. This type of food must be pierced before cooking, to prevent bursting.
5. When heating liquids, e.g. soup, sauces and beverages in your microwave oven, overheating the liquid beyond boiling point can occur without evidence of bubbling. This could result in a sudden boil over of the hot liquid. To prevent this possibility the following steps should be taken:
 - (a) Avoid using straight-sided containers with narrow necks.
 - (b) Do not overheat.
 - (c) Stir the liquid before placing the container in the oven and again halfway through cooking time.
 - (d) After heating, allow to stand in the oven for a short time, stirring again before carefully removing the container.
 - (e) Microwave heating of beverages can result in delayed eruptive boiling, therefore care must be taken when handling the container.
6. **DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN. To check the degree of cooking of roasts and poultry use a MICROWAVE THERMOMETER.** Alternatively, a conventional meat thermometer may be used after the food is removed from the oven. If undercooked, return meat or poultry to the oven and cook for a few more minutes at the recommended power level. It is important to ensure that meat and poultry are thoroughly cooked.

Installation and General Instructions (continued)

7. **COOKING TIMES given in the Cooking Guide section are APPROXIMATE.** Factors that may affect cooking time are preferred degree of moisture content, starting temperature, altitude, volume, size, shape of food and utensils used. As you become familiar with the oven, you will be able to adjust for these factors.
8. **It is better to UNDERCOOK RATHER THAN OVERCOOK foods.** If food is undercooked, it can always be returned to the oven for further cooking. If food is overcooked, nothing can be done. Always start with minimum cooking times recommended.
9. Extreme care should be taken when cooking popcorn in a microwave oven. Cook for minimum time as recommended by manufacturer. Use the directions suitable for the wattage of your microwave oven. NEVER leave oven unattended when popping popcorn.
10. When heating food in plastic or paper containers, keep an eye on the oven due to the possibility of ignition.
11. The contents of feeding bottles and baby food jars are to be stirred or shaken and the temperature is to be checked before consumption, in order to avoid burns.

Microwaves and How They Work

Microwaves are a form of high frequency radio waves similar to those used by a radio, including AM, FM and CB. They are similar to a television where the radio waves are converted to a picture on the screen. However, microwaves are much shorter than radio waves; approximately twelve centimetres wave length. Electricity is converted into microwave energy by the magnetron tube (which is the heart of the microwave oven).

From the magnetron tube, microwave energy is transmitted to the oven cavity. The microwaves are converted to heat in the food. The microwaves enter from the outside of the food and travel through the food losing half of their power every two to three centimetres. Continued cooking to the centre occurs by conduction.

Although pacemakers used to be affected by microwaves (as well as by other radio waves), they are now shielded and are not bothered by these interferences. This allows people with pacemakers to sit calmly by their radio or television and cook with microwave ovens.

When microwaves come in contact with a substance, any one or combination of three things may occur. They can be:

1. REFLECTED
2. TRANSMITTED
3. ABSORBED

Reflection:

Metal substances REFLECT microwave energy and because there is no absorption, there is no heating. This is why the oven interior is either stainless steel or epoxy-coated steel. This ensures that the microwaves are kept inside the cavity and evenly distributed throughout the food.

Transmission:

Such substances as paper, glass and plastic TRANSMIT microwave energy and do not become hot except from food. Because these substances do not reflect or absorb microwave energy, they are ideal materials for microwave cooking containers.

Absorption:

Food contains moisture and will ABSORB microwave energy, which causes the moisture molecules within the food to vibrate at an incredible rate (2,450,000,000 times per second). Friction, created by the vibration, produces heat energy which is conducted throughout the food.

It is important to use the correct container when cooking in a microwave oven. The following will help you make the right selection.

How to Test a Container for Safe Microwave Oven Use

TO TEST A CONTAINER FOR SAFE MICROWAVE OVEN USE: Fill a 1-cup glass measure with cool water and place it in the microwave oven alongside the empty container to be tested; **heat one (1) minute at 1000 W.** If the container is microwave oven safe (transparent to microwave energy), the container should remain comfortably cool, the water in glass measure should be hot. If the container is hot, it has absorbed some microwave energy and should NOT be used. This test cannot be used for plastic containers.

Paper Products and Freezer Wrap

Waxed paper, paper plates, cups and napkins should not be used for heating or cooking food. Freezer wrap should not be used as it is not heat resistant and may melt. Paper towel, greaseproof paper and bake paper may be safely used for short periods of time for covering or lining.

Glass, Ceramic and China

Heat-Resistant glass cookware is invaluable in microwave cooking. Many of these items are readily available in most homes: glass jugs, mixing bowls, loaf dishes, covered casseroles, oblong baking dishes, pie plates and round or square cake dishes. Examples of this type of cookware are Pyrex® and Corningware®.

Dinnerware can be used for microwave heating. Many brands of dinnerware are microwave safe. Check the care information for reference to microwave use for dinnerware and serving pieces. If dinnerware is marked ovenproof, it frequently is safe to use in the microwave oven. However, to be sure, check by conducting microwave dish test previously mentioned.

Several types of glassware and dinnerware are not recommended for use in the microwave oven. Do not use dishes with metallic trim or containers with metal parts. Do not use cups or mugs with glued on handles, as they may fall off with continued heating. Do not use delicate glassware. Although the glassware may be transparent to microwave energy the heat from the food may cause the glassware to crack.

Plastic

Plastic dishes, cups and some freezer containers should be used with care in a microwave oven. Choose plastic containers carefully, as some plastic containers may become soft, melt and may scorch. The majority of plastic dishes, even those designed for use in the microwave oven, are not suitable for cooking foods with high fat or sugar content, or for lengthy cooking times. Most microwave plastic dishes should not be used for longer than 3 to 5 minutes on **1000 W.** These dishes, although not suitable for extended cooking, may be used successfully for defrosting or for use on lower power levels.

Cooking Bags designed to withstand boiling, freezing, or conventional heating are microwave safe. Prepare bags according to manufacturer's directions. When cooking by microwave, **DO NOT** use wire twistties to close bag. They can act as an antenna and cause arcing (sparks).

DO NOT COOK IN PLASTIC FOOD STORAGE BAGS. Cling Film such as GLAD WRAP® can be used to cover dishes in most recipes. Over an extended heating time, some disfiguration of the wrap may occur. When removing cling film "covers", as well as any glass lid, be careful to remove it away from you to avoid steam burns.

Loosen plastic but let dish stand, covered.

Jars and Bottles

Jars and bottles can be used to warm food to serving temperature, if the lid is removed first. Cooking should not be done in these containers since most are not heat resistant and during extended heating times, heat from food would cause cracking or breaking.

Metal

Metal cookware or utensils, or those with metallic trim, should NOT be used in the microwave. Since microwave energy is reflected by metal, foods in metal containers will not cook evenly. There is also a possibility of "arcing".

Although metal utensils should be avoided in microwave cooking, some metal can be helpful when used correctly. Aluminum foil can be used safely, if certain guidelines are followed, to prevent overcooking. Small pieces of foil are used to shield areas such as chicken wings, tips of roasts, or other thin parts that cook before the rest of the recipe is finished. Make sure foil is attached securely and doesn't touch sides of oven, otherwise arcing may occur. Foil lined containers, either cardboard or plastic, should NOT be used in the microwave oven as arcing could occur.

Metal twist-ties, either paper or plastic coated, should NOT be used in the microwave oven. Frozen dinner trays can be used in the microwave, if the container is no deeper than 2 cm and is filled with food. Metal skewers can not be used in microwave ovens as arcing may occur. Wooden skewers are readily available and give the same result.

Shells: Scalloped baking shells are best used during reheating and for short periods of cooking time only.

Thermometers are available for use in microwave ovens. **DO NOT USE CONVENTIONAL MERCURY TYPE CANDY OR MEAT THERMOMETERS** in food while cooking in the microwave oven.

Straw, Wicker and Wood

Straw and wicker baskets may be used in the microwave oven for short periods of time to warm rolls or bread. Large wooden utensils, such as bowls or cutting boards should NOT be used for prolonged heating as the microwave energy may cause the wood to become dry and brittle.

Oven Accessories

Accessories

The oven comes equipped with a variety of accessories. Always follow the directions given for use of the accessories.

Metal Tray

1. The metal tray is for cooking on **convection, grill** or **steam** mode only. Do not use on **microwave** or **combination** with microwave modes.
2. For 2 level **convection** cooking, the metal tray can be used as the lower level and the wire shelf can be used as the upper level.
3. The maximum weight that can be placed on the metal tray is 4 kg (this includes total weight of food and dish).

Metal Tray

Grill Tray

1. The grill tray is for cooking on **convection, grill, steam** mode or **combination 2-7** and **combination 10** only. Do not use on microwave modes.
2. Do not place it on the oven window. Otherwise, the oven window may be damaged.
3. Place it on the shelves when using.
4. When cooking food, place it in the middle of wavy range of the grill tray, avoiding letting the food into the groove around, so that food can't be completely baked.
5. The maximum weight that can be placed on the grill tray is 4 kg (this includes total weight of food and dish).

Grill Tray

Wire Shelf

1. The wire shelf can be used in the upper or middle shelf position for **grilling** or **steaming** foods. It can be used in the upper, middle or lower shelf positions for **convection** or **combination** cooking.
2. Do not use any metal container directly on the wire shelf in combination with microwave.
3. Do not use the wire shelf in **microwave** mode only.
4. The maximum weight that can be placed on the wire shelf is 4 kg (this includes total weight of food and dish).

Wire Shelf

Important User Information

Please note the protective covers on the wire shelf are designed to remain on the shelf when in use. They are not packaging and must not be discarded.

The following chart shows correct use of the accessories in the oven or you can follow the recipe instruction.

	Wire shelf	Metal tray	Grill tray
			
Microwave	x	x	x
Grill	✓	✓	✓
Convection	✓	✓	✓

*: Metal containers can not be placed directly on the accessory.

Either place food directly on the wire shelf or place a glass dish directly on the wire shelf.

Parts of Your Oven

1 Door handle

Pull the door handle downwards to open. When you open the oven door during cooking, the cooking is stopped temporarily without clearing the programmed settings. The cooking is resumed as soon as the door is closed and Start/Set is touched.

Drip Tray

1. Before using the oven, the drip tray must be fitted as it collects excess water during cooking. The drip tray should be removed and cleaned on a regular basis.
2. Fit the drip tray by holding with both hands and clicking onto the front legs of the oven.
3. To remove the drip tray, hold with both hands and gently ease forward. Wash in warm soapy water. Reposition the drip tray by clicking back onto the legs.
4. **Do not use a dishwasher to clean the drip tray.**

During cooking:

One touch temporarily stops the cooking program. Another touch cancels all your instructions and the time of day or a colon will appear in the display.

12 **Start/Set**

Touch to start operating the oven or

confirm the setting. If during cooking the door is opened or Stop/Cancel is touched once, Start/Set has to be touched again to continue cooking.

This oven is equipped with an energy saving function.

Note

1. The oven will enter stand-by mode after the last operation has completed. When in stand-by mode, the brightness of the display will be reduced.
2. When in stand-by mode, it is necessary to open and close the oven door before operating the oven.
3. If an operation is set and Start/Set is not touched within 6 minutes, the oven will automatically cancel the operation. The display will revert back to colon or clock mode.

Beep Sound

A beep sounds when a key is touched. If this beep does not sound, the setting is incorrect. When the oven changes from one function to another or an auto program reminds you to stir or turn food, two beeps sound. After the completion of the preheating on **convection** or **combination** mode, three beeps sound. After completion of cooking, the oven will beep 5 times.

Operation Guide in the Display Window

To assist you in programming your oven, the following operation will appear in the display window. When you become familiar with your oven, the Operation Guide can be turned off.

If the Timer/Clock is tapped 4 times, this will turn off the operation guide. To turn the operation guide back on, tap the Timer/Clock 4 times.

To turn off:

OPERATION GUIDE OFF

Colon or time of day appears in the display window.

Tap Timer/Clock four times.

Display window.

To turn on:

OPERATION GUIDE ON

Colon or time of day appears in the display window.

Tap Timer/Clock four times.

Display window.

Up/Down Selection

Select the time, weight or auto menu by tapping "∨" / "∧". The time, weight or auto menu number appears in the display window. The time/weight can be adjusted quickly by holding "∨" / "∧" key.

- **Time Setting:**
To set cooking time or clock. Use the key for the Add Time Function. (see page 37)
- **Weight Setting:**
To set weight of food for auto cook and auto steam programs. (see pages 42-51, 54, and 58-60).
- **Auto Programs Setting:**
To select auto menu.
- **More/Less Setting:**
To set more/less for auto sensor programs (see page 40-41 and 52-53).

Setting the Clock

When the oven is first plugged in “WELCOME TO PANASONIC MICROWAVE OVEN COOKING” appears in display window.

Tap Timer/Clock twice.

Select the time by tapping “∨” / “∧”. The time appears in the display and the colon blinks.

Touch Timer/Clock.

The colon stops blinking and time of day is now locked into the display.

Note

1. To reset time of day, repeat step 1 through to step 3, as above.
2. The clock will keep the time of day as long as the oven is plugged in and electricity is supplied.
3. One tap will increase or decrease the time by 1 minute, you can also adjust the time quickly by holding “∨” / “∧”.
4. This is a 12 hour clock, there isn't a.m. or p.m. setting.

Child Safety Lock

Using this system will make the oven controls inoperable; however, the door can be opened. Child Lock can be set when the display shows a colon or the time.

To Set:

Tap Start/Set three times. The time of day will disappear. Actual time will not be lost. '🔒' is indicated in the display.

To Cancel:

Tap Stop/Cancel three times. The time of day will reappear in the display.

Note

To activate or cancel child lock, Start/Set or Stop/Cancel must be tapped 3 times within a 10 second period.

Microwave Cooking and Defrosting

There are 7 different Micro Power levels available (see the chart below).

Tap Micro Power to select desired power level.

Select the cooking time by tapping “∨” / “∧”.

Touch Start/Set.

The cooking program will start and the time in the display will count down

Taps	Display	Power	Example of use	Max time
1 tap	1000 W	Max	Boil water. Cook fresh fruits, vegetables, preserved fruit and candies.	30 minutes
2 taps	800 W	Medium High	Cook fish and seafood, meat, poultry, eggs and cakes.	1 h 30 minutes
3 taps	270 W	Defrost ❄️	Defrost meat, poultry or seafood.	1 h 30 minutes
4 taps	600 W	Medium	Cook cakes, stew food, and melt butter and chocolate.	1 h 30 minutes
5 taps	440 W	Low	Cook tough meat, stew soup and soften butter.	1 h 30 minutes
6 taps	300 W	Simmer	Simmer, stew.	1 h 30 minutes
7 taps	100 W	Warm	Keep food warm and soften ice cream.	1 h 30 minutes

Use of Dishes/Accessory:

Use your own Pyrex® dishes, plates or bowls covered with a lid or pierced cling film directly on the base of the oven. Do not place food directly on the base of the oven.

Note

1. For multi-stage cooking refer to page 37.
2. Stand time can be programmed after Micro Power and time setting. Delay start cooking can be programmed before Micro Power and time setting. Refer to using the timer page 35.
3. You can change the cooking time during cooking if required. Tap “∨” / “∧” to increase or decrease the cooking time. Time can be increased/decreased in 1 minute increments, up to 10 minutes.
4. Maximum time that can be set on max power (1000 W) is 30 minutes. On all other power levels the maximum time that can be set is 1 hour 30 minutes.
5. **Do not** attempt to use **microwave** only with any metal accessory in the oven.

Bottom Feeding Technology

Please note that this product uses bottom feeding technology for microwave distribution which differs from traditional turntable side feeding methods and creates more useable space for a variety of different sized dishes. This microwave feeding style can give a difference in heating times (in microwave mode) when compared against side feeding appliances. This is quite normal and should not cause any concern.

Grilling

There are 3 different Grill settings available.

Tap Grill once, twice or three times to select the desired grill power.

Select the cooking time by tapping “√” / “^”. Maximum cooking time is 1 h 30 minutes.

Touch Start/Set. Time in the display will count down.

Taps	Power Level	Example of use
1 tap	Grill 1 (high)	Garlic Bread, Toast
2 taps	Grill 2 (medium)	Seafood
3 taps	Grill 3 (low)	Slice meat or poultry pieces

Place food on wire shelf on the upper or middle shelf position in the oven.

For grilling small foods use the metal tray or grill tray on the upper or middle shelf positions.

Place a glass dish on the base of the oven to catch fat and drips.

Note

1. Never cover foods when grilling.
2. The grill will only operate with the oven door closed.
3. There is no Micro Power on the **grill** only program.
4. Most foods require turning halfway during cooking. When turning food, open oven door and **carefully** remove accessories using oven gloves.
5. After turning, return food to the oven and close door. After closing oven door, touch Start/Set. The oven display will continue to count down the remaining grilling time. It is quite safe to open the oven door at any time to check the progress of the food as it is grilling.
6. Always clean the oven after using the Grill.
7. You can change the cooking time during cooking if required. Tap “√” / “^” to increase or decrease the cooking time. Time can be increased/decreased “√” / “^” in 1 minute increments, up to 10 minutes.

Caution

Use oven gloves when removing accessories. Never touch the outside window or inside metal parts of the door or oven when taking food in or out due to the high temperatures involved.

Convection Cooking

This key offers a choice of convection temperatures 30-230 °C in 10 °C increments. For quick selection of the most commonly used cooking temperatures, the temperatures start at 150 °C and count up to 230 °C then 30 °C. The oven can not preheat at 30-60 °C.

Set the desired convection temperature.

Touch Start/Set to preheat. A "P" will appear in the display window. When the oven is preheated the oven will beep and the "P" will flash. Then open the door and place the food inside.

** Skip this step when preheating is not required.*

After preheating, place the food in the oven.

Select the cooking time by tapping "V" / "^" (up to 9 hours).

Touch Start/Set. Time in the display will count down.

Note

1. The oven can not preheat at 30 °C - 60 °C.
2. If 'HOT' appears in the display window, the oven temperature is too high from previous use and 30 °C - 40 °C can not be set. Cooking mode and time may still be set manually.

Use of Accessory:

For 1 level **Convection** cooking use the metal tray, wire shelf or grill tray the middle or lower shelf position. Place a glass dish on the base of the oven to catch fat and drips, if you use wire shelf.

For 2 levels **Convection** cooking, the metal tray can be used in the lower shelf position and the grill tray or wire shelf can be used as the upper shelf position.

Note on Preheating

1. Do not open the door during preheating. After preheating 3 beeps will be heard and the "P" will flash in the display window. If the oven door is not opened after preheating, the oven will maintain the selected temperature. After 30 minutes, including preheating, the oven will shut off automatically and revert to a colon or time of day.
2. If you want to cook without preheating, after selecting the desired temperature, set the cooking time then touch Start/Set.

Note

1. When the selected cooking time is less than one hour, the time counts down second by second.
2. When the selected cooking time is over one hour, the time counts down minute by minute until only "1H 00" (1 hour) remains. The display then indicates minutes and seconds and counts down second by second.
3. You can change the cooking time during cooking if required. Tap "√" / "∧" to increase or decrease the cooking time. Time can be increased/decreased in 1 minute increments, up to 10 minutes.
4. When preheating, the selected temperature can be recalled and changed. Touch Convection once to indicate the temperature in the display window. While the temperature is recalled in the display window, you can change the temperature by tapping Convection.
5. Depending on the recipe, you can preheat with or without the shelves in position. See individual recipes for details. The shelves are ideal for batch baking and when cooking in a large dish.
6. When preheating, the screen displays the actual temperature of the oven cavity. The current temperature is not displayed until more than 70 °C is reached. To change the temperature during cooking, touch Convection.
7. Turn the accessories 180° halfway during cooking to ensure a more even cooking result.

Caution

Always use oven gloves when removing the food and accessories after cooking as the oven and accessories will be very hot.

Guideline to Oven Temperatures

For best results always place food in a preheated oven. Don't forget that for ease of programming of the most commonly used temperatures, your oven will start at 150 °C and count up in 10 °C stages to 230 °C, then back to down to 30 °C. Food is generally cooked uncovered - unless it is a casserole or if you wish to use roasting bags for joints.

Level	Temp °C	Use
Low	30 / 40 °C	Drying-oven temperature for bread or pizza dough to rise, making yogurt.
	50 °C	Warming dishes.
	60 °C - 70 °C	Dried fruits, beef jerky.
	80 °C - 90 °C	Slow cooking.
	100 °C	Pavlova.
	110 °C	Meringues.
Medium	140 °C	Rich fruit cake.
	150 °C	Lemon meringue, meringue roulade, cheesecake.
	160/170 °C	Casseroles, gingerbread, small tarts, cookies.
High	180 °C	Souffle, strudel, victoria sandwich, fairy cakes, meat joints.
	190 °C	Filo pastry, quiche, gratins, lasagne, pastry pies, chicken.
	200 °C	Stuffed peppers, scones, eclairs, swiss roll, muffins.
	220 °C	Vegetable parcels, yorkshire puddings, bread.
	230 °C	Garlic bread, roast potatoes, baking pizza

Steam Cooking

The oven can be programmed as a steamer to cook vegetables, fish, chicken and rice. There are 2 different steam settings available.

Tap Steam until the power you require appears in the display window.

Select the cooking time by tapping “V” / “^”.
Maximum cooking time is 30 minutes.

Touch Start/Set.
The cooking program will start and the time in the display will count down.

Taps	Power Level	Example of use
1 tap	Steam 1 (Maximum)	Bun, Meat, Seafood, Chicken Breast
2 taps	Steam 2 (Low)	Soft-boiled egg, Prawn.

Oven Accessories to Use:

Steam 1 level

When steaming food, the wire shelf is placed in the middle shelf position. Place a glass dish on the base of the oven to catch fat and drips.

Steam 2 level

For the first level, place food on the grill tray in the lower shelf position. For the second level, place food on the wire shelf in the upper shelf position.

Note

1. Fill the water tank before using the steam function.
2. The maximum time for cooking in this mode is 30 minutes. If required to cook for longer than this time, re-fill the water tank and repeat the above operation for the remaining time.
3. If during operation the water tank becomes empty, the oven will stop operation. The prompt in the display will ask you to re-fill the water tank. After re-filling the water tank and positioning back in the oven, touch Start/Set. The oven will not continue cooking until the water tank has been re-filled and Start/Set touched.
4. You can change the cooking time during cooking if required. Tap “V” / “^” to increase or decrease the cooking time. Time can be increased/decreased in 1 minute increments, up to 10 minutes.
5. It is possible to refill water tank at any time during cooking, without having to touch Stop/Cancel first.
6. It is necessary to wipe the excess water in the cavity after Steam cooking.

Caution

The accessories and surrounding oven will get very hot. Use oven gloves.

When removing the food or cooking accessories, hot water may drip from the oven top.

Steam may billow out when you open the door. If there is steam in the oven, do not reach in with your bare hands! Risk of burns! Use oven gloves.

Take care when removing the drip tray. Wipe any water that drips from the inside of the oven. This is normal.

Guidelines for Water Tank

Carefully remove the water tank from the oven. Remove the lid and fill with tap water (do not use mineral water). Replace the lid and position back in the oven. Ensure the lid is closed tightly and securely positioned, otherwise leakage may occur. It is recommended to clean the water tank in warm water once a week.

Guidelines

1. There is no Micro Power on the **Steam** only program.
2. Use the accessories provided, as explained above.
3. The **Steam** will only operate with the oven door closed.
4. During and after cooking with steam function, do not open the oven door when your face is very close to the oven. Care must be taken when opening the door as steam may cause injury.
5. Always use oven gloves when removing the food and accessories after steaming as the oven and accessories will be very hot.
6. After each steam operation carefully remove the drip tray from the front of the oven. Gently ease forwards, holding with both hands. After emptying, wash in warm soapy water. To re-position, click back into position on the oven legs.

Re-position the drip tray by clicking back onto the legs.

Steam Shot

This feature allows you to add steam during cooking (up to 3 minutes). The following modes can use steam shot - microwave, grill, convection and combination 7-10. Adding steam during cooking enhances the heat distribution and aids the rising process of breads, cakes and pastries.

Set and operate the desired program.

Optional

As required during operation, hold steam for 2 seconds and 1 minute will be added.

If you want to add 2 or 3 minutes, tap Steam once or twice within 3 seconds after step 2. The remaining time displayed includes steam shot time.

Note

1. Steam shot is not available during preheating mode.
2. Fill the water tank before use.
3. The original program still counts down when operating steam shot.
4. The steam shot time can not exceed the remaining cooking time.
5. If adding 2 or 3 minutes, steam must be tapped once or twice within a 3 second time period.
6. It is not possible to change the convection temperature and cooking time during steam shot.

Cautions

The accessories and surrounding oven will get very hot. Use oven gloves.

When removing the food or cooking accessories, hot water may drip from the oven top.

Steam may billow out when you open the door. If there is steam in the oven, do not reach in with your bare hands! Risk of burns! Use oven gloves.

Food	Cooking mode	Steam Shot
Pastries	Convection	$\frac{2}{3}$ total time add 3 mins. Steam Shot
Breads	Convection	$\frac{2}{3}$ total time add 3 mins. Steam Shot
Sponge cakes	Convection	$\frac{1}{2}$ total time add 3 mins. Steam Shot
Part baked rolls	Combi 7	$\frac{2}{3}$ total time add 3 mins. Steam Shot

Combination Cooking with Steam

Steam can be used to cook foods simultaneously with microwave, grill or convection mode. This can often reduce traditional oven cooking times and keep the food moist.

Touch Combination. Tap combination until the level you require appears in the display window. (see chart below)

Touch if preheating
(only for Combi 2-5)

Select the cooking time by tapping “V” / “^”.
Maximum cooking time is 30 minutes.

Touch Start/Set. The time counts down in the display.

Tap	Combi Level	Max Time	Combination Type	Uses
Once	Combi 1	30 minutes	Steam 1 + MW 300 W (Simmer)	Fresh vegetables, frozen vegetables, fruits, mash, tinned vegetables, puddings.

Use of Accessory:

Combi 1

Wire shelf in middle shelf position. Place a glass dish on the base of the oven to catch fat and drips.

Combi 2 - 6

Use wire shelf in middle or lower shelf position. Place a glass dish on the base of the oven to catch fat and drips.

For small food items, place them on metal tray or grill tray.

Combination Cooking with Steam (continued)

Note

1. The maximum time for cooking in this mode is 30 minutes. If required to cook for longer than this time, re-fill the water tank and repeat the above operation for the remaining time.
2. If during operation the water tank becomes empty, the oven will stop operation. The prompt in the display will ask you to re-fill the water tank. After re-filling the water tank and positioning back in the oven, touch Start/Set. The oven will not continue cooking until the water tank has been re-filled and Start/Set touched.
3. Preheating is not available with Combi 1 or Combi 6.
4. You can change the cooking time during cooking if required. Tap “√” / “^” to increase or decrease the cooking time. Time can be increased/decreased in 1 minute increments, up to 10 minutes.
5. It is possible to refill water tank at any time during cooking, without having to touch Stop/Cancel first.
6. It is necessary to wipe the excess water in the cavity after Steam cooking.

Guidelines

1. **During and after cooking with steam function, do not open the oven door when your face is very close to the oven. Care must be taken when opening the door as steam may cause injury.**
2. **Always use oven gloves when removing the food and accessories after cooking as the oven and accessories will be very hot.**
3. **After each steam operation carefully remove the drip tray from the front of the oven. Gently ease forwards, holding with both hands. After emptying, wash in warm soapy water. To re-position, click back into position on the oven legs. (See page 14).**

Cautions

The accessories and surrounding oven will get very hot. Use oven gloves.

When removing the food or cooking accessories, hot water may drip from the oven top.

Steam may billow out when you open the door. If there is steam in the oven, do not reach in with your bare hands! Risk of burns! Use oven gloves.

Combination Cooking without Steam

There are 4 combinations settings without steam. Combination cooking is ideal for many foods. The Micro Power cooks them quickly, whilst the convection or grill gives traditional browning and crispness. All this happens simultaneously resulting in most foods being cooked in $\frac{1}{2}$ - $\frac{2}{3}$ of the conventional cooking time.

Touch Combination.

Tap combination until the level you require appears in the display window (see chart below)

Touch if preheating.

(only for Combi 7-9)

Select the cooking time by tapping "V" / "^".

Touch Start/Set. The time counts down in the display.

Tap	Combi Level	Max Time	Combination Type	Uses
7 times	Combi 7	9 hours	Convection 230 °C + Grill 1 (High)	Part baked bread, potato products, chicken pieces, steaks, chops
8 times	Combi 8	9 hours	Convection 230 °C + Grill 2 (Medium) + 300 W (Simmer)	Meat pies and pastries
9 times	Combi 9	9 hours	Convection 190 °C + 300 W (Simmer)	Whole chicken, fish steaks, whole fish, whole turkey
10 times	Combi 10	1 hour and 30 minutes	Grill 1 (High) + MW 300 W (Simmer)	Slice meat, fish, poultry pieces, reheat Fried foods Gratin, Potato Fries, Spring Rolls, Pizza etc.

Use of Accessory:

For combi 7:

Use wire shelf in middle or lower shelf position. Place a glass dish on the base of the oven to catch fat and drips.

For small food items, place them on metal tray or grill tray.

For combi 8, 9:

Place food directly on wire shelf. Place a glass dish on the base of the oven to catch fat and drips.

For combi 10:

Place food directly on grill tray or wire shelf in upper or middle shelf position.

Place a glass dish on the base of the oven to catch fat and drips, if you use wire shelf.

Combination Cooking without Steam (continued)

Note on Preheating

The oven can be preheated on Combination with Convection or Grill/Convection cooking. Touch Start/Set before setting the cooking time and follow the **note on preheating** on page 26.

No microwaves are emitted during combination preheating.

Note

1. When the selected cooking time is less than one hour, the time counts down second by second.
2. When the selected cooking time is over one hour, the time counts down minute by minute until only "1H 00" (1 hour) remains. The display then indicates minutes and seconds and counts down second by second.
3. You can change the cooking time during cooking if required. Tap "∨" / "∧" to increase or decrease the cooking time. Time can be increased/decreased in 1 minute increments, up to 10 minutes.

Caution!

Use oven gloves when removing accessories. Never touch the outside window or inside metal parts of the door or oven when taking food in or out due to the high temperatures involved.

Using the Timer

This feature allows you to program the oven as a kitchen timer. It can be also used to program a standing time after cooking is completed or to program a delay start.

1. Delay Start Cooking

By using the Timer, you are able to program Delay Start cooking.

Note

1. Three stage cooking can be programmed including Delay Start cooking.
2. If the programmed delay time exceeds one hour, the time will count down in units of minutes. If less than one hour, the time will count down in units of seconds.
3. Delay Start cannot be programmed before an auto program.

Example:

Delay Start:
1 hour

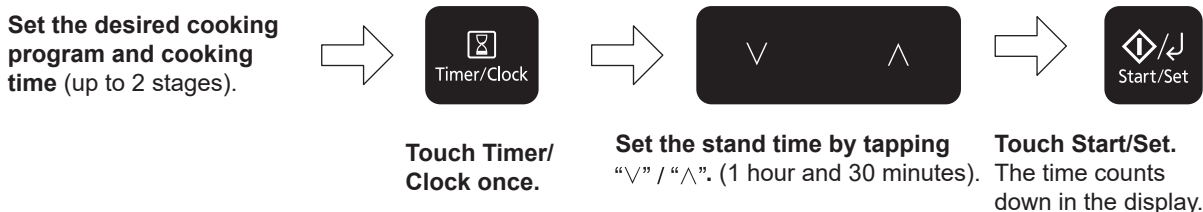

Max Power (1000 W):
10 minutes

Simmer Power (300 W):
20 minutes

2. Stand Time

By using the Timer, you can program Stand Time after cooking is completed or use to program the oven as a minute timer.

Note

1. Three stage cooking can be programmed including stand time.
2. If the oven door is opened during the Stand Time Delay Start or Kitchen Timer, the time in the display window will continue to count down.
3. Stand time cannot be programmed after an auto program.

Example:

Max Power (1000 W):
4 minutes

Max Power (1000 W):

Sensor Reheat Program

the Genius sensor

This unique feature 'the Genius' built in sensor allows you to simply reheat a chilled meal. It is not necessary to select the power level, weight or cooking time. The built-in sensor measures the humidity of the food and calculates the Micro Power level together with a cooking time.

Tap Auto Cook key once.

Touch Start/Set.

Program	Weight *	Accessories	Instructions
1. Sensor Reheat   	200 g - 1000 g		To reheat a fresh pre-cooked meal. All foods must be pre-cooked. Foods should be at refrigerator temperature approx. + 5 °C. Reheat in container as purchased. Pierce covering film with a sharp knife once in the centre and four times around the edge. If transferring food to dish, cover with pierced cling film. Place container on base of oven. Select program number 1, Sensor Reheat. Touch Start/Confirmation. Stir at beeps. Stir again at end of program and allow a few minutes standing time. Large pieces of meat/ fish in a thin sauce may require longer cooking. This program is not suitable for starchy food such as rice, noodles or potatoes. Meals in irregular bowl shaped containers may need longer cooking.

 Sensor Program

* Recommend weight range

How it works

Once the Sensor Reheat Programs has been selected and Start/Set is touched the food is heating up. As food begins to get hot, steam is emitted. When the food reaches a certain temperature and begins to cook, an even greater amount of steam is released. The increase in steam emission is detected by a humidity sensor in the oven. This acts as a signal for the oven to calculate how much longer the food needs to reheat.

The remaining cooking time will appear in the display window after two beeps.

Whilst the Sensor program is still in the display window the oven door **should not be opened**. Wait until the cooking time appears in the window, and then open the door if required, to stir or turn the food.

More / Less Control

The Sensor Reheat Programs reheat a chilled for average tastes. You are able to adjust the Sensor Reheat Programs to your own taste. After touching Start/Set, “√” / “^” symbol appears in the display, touch “^” for more time or “√” for less time. This operation should be completed within 14 seconds. Default mode is normal.

Note

1. This feature is not suitable for foods that cannot be stirred eg. lasagne / macaroni cheese.
2. The oven automatically calculates the reheating time or the remaining reheating time.
3. The door should not be opened before the time appears in the display window.
4. To prevent any mistakes during Sensor Reheat Programs ensure that base of oven and the container are dry.
5. The room temperature should not be more than 35 °C and not less than 0 °C.
6. If the oven has previously been used and it is too hot to be used on Sensor Reheat Programs, 'HOT' will appear in the display window. After the 'HOT' disappears, the Sensor Reheat Programs may be used. If in a hurry, cook food manually by selecting the correct cooking mode and cooking time yourself.

Defrosting Tips and Techniques

Preparation for Freezing

The quality of the cooked foods comes from the foods before freezing, freezing ways and defrosting tips and times. So it is important to purchase fresh and high quality foods. And freeze them immediately. Thick cling film, package, freezing wrap and the meat which has been sealed before selling are all able to be reserved in the refrigerator for some times.

Note

1. Please remove the aluminum foil if the package is made of aluminum to prevent arcing.
2. The foods in the refrigerator should be kept under -18°C . (At least 24 hours in freezer before defrosting.)
3. When freezing meats, poultry and fish or seafood, the foods should be arranged evenly and wrap as 2.5 cm - 5 cm square or a round shape.
4. Please clean the whole chicken before freezing. (The bowels can be frozen individually.) Clean the whole chicken and make it dry. Binding the leg and thigh.
5. Remove all air and seal securely. Label package with type and cut of meat, date and weight.

Turbo Defrost

The Turbo defrost function is operated based on the weight of foods. Most cut foods such as chicken, meat and fish can be defrosted by using this function easily. Set weight based on the real weight of foods, and the microwave oven will set the power and time automatically. The display window will display the time of defrost after setting. The foods listed in the below table are the most suitable for using defrost function. The minimize weight is 100 g and the maximum is 3000 g for getting the best result.

Foods	The maximum weight for the foods
Meat loaf, whole chicken, rib	3000 g
Beef, lamb, chicken portions	2000 g
Whole fish, shellfish, prawn and fish fillet	1000 g

Tips for Turbo defrost

Boneless meat always demands longer time to defrost than meat with bones, as to meat with bones, we recommend to subtract 500 g from total weight when it exceeds 2000 g, subtract 200 g - 300 g from total when it weights under 2000 g.

Two buzz beeps

Turn over the meat, chicken, fish and shellfish. Separate the stewed meat, chicken pieces and meat loaf. Apart the meat loaf from the hamburger. Shield the edge of chicken wings, roast, fat or bones.

Key to defrosting

For evenly defrosting, turn over the foods or move the position of the foods in the containers during the progress of defrosting.

Remove the package of the raw meat and place it on the plate.

Shield the front part of the chicken drumsticks by using aluminum foil.

Shield the head and tail of the whole fish by using aluminum foil.

Remove the package of the fish fillet and place it on the plate.

Tip for Auto Weight Programs

Note

The auto weight programs are designed to take the guesswork out of cooking or reheating your food. They must only be used for the foods described.

1. Only cook foods within the weight ranges described (pages 42-50).
2. Only use the accessories as indicated on pages 42-50.
3. Refer to program information for cooking modes.
4. Do not cover food unless stated, when using a Combination or Convection program, it will prevent the food browning. The heat will also melt any plastic covering.
5. Most foods benefit from a standing time after cooking on an auto program, to allow heat to continue conducting to the centre.
6. To allow for some variations that occur in food, check that food is thoroughly cooked and piping hot before serving.
7. Always weigh the food rather than relying on the package weight information.
8. If 'HOT' appears in the display window, the oven temperature is too high from previous use and an auto program can not be set. Cooking mode and time may still be set manually.

A variety of food may be cooked without having to enter the cooking time, weight or the power level.

Tap Auto Cook key once

Select desired menu by tapping “∨” / “∧”.

Touch Start/Set.

More / Less Control

Preferences for degree of cooking vary for each individual. After having used Auto Sensor Programs a few times, you may decide you would prefer your food cooked to a different degree of cooking. By using More/Less control, the programs can be adjusted to cook food for a longer or shorter time. Touch “∨” / “∧” after touching Start/Set within 14 seconds. If you are satisfied with the result of the Auto Sensor Programs, you do not have to use this control.

Note

1. The oven automatically calculates the cooking time or the remaining cooking time.
2. The door should not be opened before the time appears in the display window.
3. To prevent any mistakes during Auto Sensor Programs ensure that the base of the oven and the container are dry.
4. The room temperature should not be more than 35 °C and not less than 0 °C.
5. Only cook foods within the recommended weight range described on page 53.
6. If the oven has previously been used and it is too hot to be used on an Auto program, 'HOT' will appear in the display window. After the 'HOT' disappears, the Auto Sensor Programs may be used. If in a hurry, cook food manually by selecting the correct cooking mode and cooking time yourself.

Cleaning Programs

F1. Drain Water

Water is pumped through the system to clean the pipes. The water is drained into the drip tray.

Note

1. Only run this program with 100 g of water in the tank.
2. Do not remove the drip tray during the drain water program.
3. Empty the drip tray and rinse with running water after the program has finished.

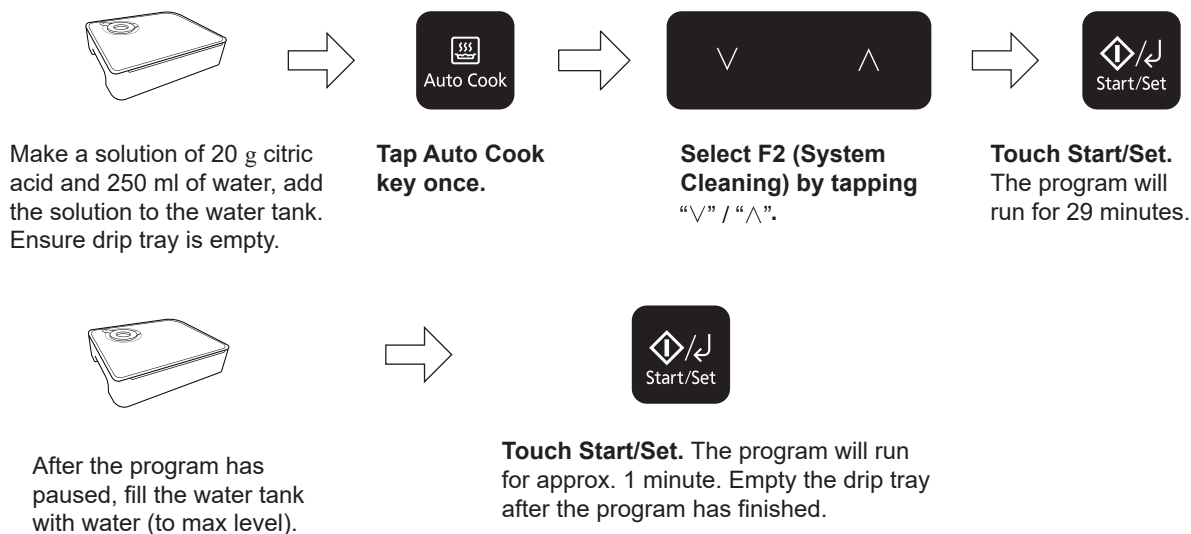

Caution!

If the Drain Water program is used directly after a steam cooking program, hot water may be drained into the drip tray.

F2. System Cleaning

The first stage of this program cleans the system with a citric acid solution. The second stage runs water through the system to rinse the pipes.

Note

1. When  is displayed, run the ‘system cleaning’ program.
2. If the system cleaning program is not used regularly, the pipe will get blocked and the steaming performance will be less effective.
3. Do not remove the drip tray during the drain program.
4. Empty the drip tray and rinse with running water after the program has finished.

F3. Deodorization

This feature is recommended for eliminating any odours from the oven.

Tap Auto Cook key once.

Select F3 (Deodorization) by tapping “∨” / “∧”.

Touch Start/Set. The program time appears in the display window and begins to count down. The program will run for 30 minutes.

F4. Cavity Cleaning

This feature is suitable for removing the build up of fat or grease in the cavity.

Tap Auto Cook key once.

Select F4 (Cavity Cleaning) by tapping “∨” / “∧”.

Touch Start/Set. The program time appears in the display window and begins to count down. The program will run for 20 minutes.

Note

1. Fill the tank with water before using.
2. After cleaning, open the door, wipe with a damp cloth and empty the drip tray.

Cleaning the Water Tank

Clean with a soft sponge in water.

Remove the water tank and clean the compartment where the water tank is inserted.

Open the water supply cap, remove the lid and pipe cap and clean.

Pipe cap

Ensure it faces downwards

If the pipe cap is difficult to remove, wiggle from side to side.
When re-fitting, make sure that the pipe faces down (see diagram).

The rubber seal of the tank can also be removed for cleaning.

Removing the Rubber Seal

Ensure that the rubber seal is not inside out when re-fitting. If the seal is not fitted correctly the lid will not close securely and it will leak.

Note

1. Clean the water tank at least once a week to prevent build up of limescale.
2. Do not use a dishwasher to clean the water tank or parts of the water tank.

Auto Steam Programs

This feature allows you to steam some of your favourite foods by setting the weight only. The oven determines the steam level and the cooking time automatically. Select the category and set the weight of the food. The weight is programmed in grams. For quick selection, the weight starts from the minimum weight for each category.

Tap Auto Steam Key once.

Select desired menu by tapping “∨” / “∧”.

Touch Start/Set to confirm the program. (skip this step for programs 35, 36)

Select the weight of the food by tapping “∨” / “∧”. The weight counts in 10 g steps. (skip this step for programs No. 35, 36)

Touch Start/Set. The display reminds you which accessory to use and which cooking modes are in use.

Note

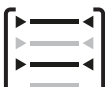

1. The auto steam programs must **only** be used for foods described.
2. Only cook foods within the weight ranges described.
3. Always weigh the food rather than relying on the package weight information.
4. Only use the accessories as indicated on pages 59-60.
5. Do not cover foods on the auto steam programs.
6. Most foods benefit from a **standing** time after cooking on an auto program, to allow heat to continue conducting to the centre.
7. To allow for some variations that occur in food, check that food is thoroughly cooked and piping hot before serving.
8. If 'HOT' appears in the display window, the oven temperature is too high from previous use and an auto program can not be set. Cooking mode and time may still be set manually.
9. If ♠♠ flash, please fill the water tank.

Defrosting Chart

Preparation for Freezing:

1. Heavy-duty plastic wraps, bags and freezer wrap are suitable.
2. Freeze meats, poultry and fish in packages with only 1 or 2 layers of food. To aid in separating layers, place two pieces of wax paper between them.
3. REMOVE ALL AIR and seal securely.
4. LABEL package with type and cut of meat, date and weight.
5. Defrosting times given in the charts are for thoroughly frozen foods (i.e. at least 24 hours in freezer maintained at -18 °C or lower).

Defrosting Technique:

1. Remove from wrapper and set on a defrosting rack in a dish on flat table.
2. On Turbo Defrost, the oven will beep during the defrosting time. At "beep", turn over all meat, poultry, fish and shellfish. Break apart stewing meat, chicken pieces and minced meat. Separate chops and hamburger patties. Shield thin ends of roasts, poultry legs and wings, fat or bones with foil.
3. Throughout the defrosting time, remove any defrosted portions of mince or cubed meat, etc.
4. After defrosting, large roasts may still be icy in the centre. Let stand, 15 to 30 minutes, in refrigerator to complete defrosting.

Defrosting Chart (by setting Micro Power at Defrost):

FOOD	APPROX. TIME (minutes per 500 g)	INSTRUCTION
Meat		
Beef		
Minced Beef	6 - 8	Halfway through the defrost cycle, break apart minced beef, separate chops and remove meat that is defrosted.
Roast: Topside	7 - 9	
Roast: Beef Tenderloin	7 - 9	
Roast: Chuck or Rump	6 - 8	
Roast: Sirloin, rolled	7 - 9	
Steak	6 - 7	
Miscellaneous	6 - 8	
Lamb		
Roast	6 - 8	Large roasts may still be icy in centre. Let stand.
Chops	5 - 7	
Ribs	5 - 7	
Poultry		
Chicken/whole	7 - 9	Turn poultry over two to four times during defrosting. Halfway through the defrost cycle, shield end of drumsticks, wings, breast bones and ends of poultry with foil.
Chicken/pieces	6 - 8	
Chicken/fillets	6 - 8	Break apart chicken pieces and remove small pieces such as wings, which may be defrosted before larger pieces.
Duck	6 - 8	
Turkey	7 - 9	
Fish & shellfish		
Fish Fillets	6 - 8	Halfway through the defrost cycle, turn whole fish or blocks of fillets over. Also, break apart prawns or scallops. Remove any pieces that are defrosted.
Whole Fish	6 - 8	
Crabmeat	5 - 7	
Lobster Tails	5 - 7	
Sea Scallops	4 - 6	Let stand, 5 to 10 minutes, before cooking.
Green Prawns	5 - 7	

Reheating Charts

The times given in the charts below are a guideline only, and will vary depending on STARTING temperature, dish size and quantity. Pastry or bread items reheated by microwave will be soft not crisp.

Food	Weight / Quantity	Power Level	Time to Select (approx)	Instructions /Guidelines
Canned vegetables				
Baked beans	200 g	1000 W	1 min 30 secs	Place in a heatproof bowl and cover. Place on base and stir halfway. Uncovered when cooking at Combi 1.
	415 g		2 mins 30 secs	
Baked beans with sausages	415 g		2 mins 30 secs	
Broad beans	300 g		2 mins	
Butter beans	210 g		1 min 30 secs	
Carrots, baby	300 g	Combi 1	4 mins

Drinks				
1 Mug cold milk	235 ml	1000 W	2 mins 30 secs	Place in a heatproof mug/jug on base. Stir halfway and after reheating.
1 Jug cold milk	568 ml (1 pint)		4 mins	
1 Mug cold coffee/tea / milky coffee	235 ml		1 min 20 secs	
Savoury pastry products - precooked pastries reheated by microwave will have a soft base.				
Pasties/slices	150 g	1000 W	1 min 30 secs	Place in glass dish on base.
	150 g	Combi 6	7-8 mins	Place on wire shelf in lower shelf position.
	300 g (2)	Combi 5		

Points for Checking

Always check that food is piping hot after reheating in the microwave. If unsure return to oven. Foods will still require a stand time, especially if they cannot be stirred. The denser the food the longer the stand time.

Before Requesting Service

ALL THESE THINGS ARE NORMAL:

The oven causes interference with my TV.

Some radio, TV, Wi-Fi, cordless telephone, baby monitor, blue tooth or other wireless equipment interference might occur when you cook with the microwave oven. This interference is similar to the interference caused by small appliances such as mixers, vacuums, blow dryers, etc. It does not indicate a problem with your oven.

Steam accumulates on the oven door and warm air comes from the oven vents.

During cooking, steam and warm air are given off from the food. Most of the steam and warm air are removed from the oven by the air which circulates in the oven cavity. However, some steam will condense on cooler surfaces such as inside and/or on the oven door. This is normal and safe. Steam will disappear after the oven is cool down.

I accidentally operate my microwave oven without any food in it.

Operating the oven empty for a short time will not damage the oven. However, we do not recommend this to be done.

The oven has an odour and generates smoke when using Combination and Grill function.

It is essential that your oven is wiped out regularly particularly after cooking by Combination or Grill. Any fat and grease that builds up on the roof and walls of the oven will begin to smoke if not cleaned.

The fan motor continue operating after cooking is over.

After using the microwave oven, the fan motor will operate for several minutes to cool the electric components.

Some smoke will be given off from the cavity when using grill, combination or convection for the first time.

It caused by the excessive oil in the cavity and oil used for rust protection volatilizing.

There are humming and clicking noises from my oven when I cook by combination.

The noises occur as the oven automatically switches from one power to another to create the combination setting. This is normal.

If it seems there is a problem with the oven, contact an authorized Service Center.

Care of your Microwave Oven

Turn the oven off and remove the power plug from the wall socket before cleaning.

Drip Tray

Always keep the drip tray clean. Clean and wipe dry after use. After cleaning, re-connect the drip tray to the plastic feet. **DO NOT USE A DISHWASHER TO CLEAN THE DRIP TRAY.**

Notes:

1. When using the Grill, Combination, Convection mode, some foods may inevitably splatter grease on to the oven walls. If the oven is not cleaned, occasionally it may start to "smoke" during use. These marks will be more difficult to clean later.
2. After Grill, Combination or Convection cooking the ceiling and walls of the oven should be cleaned with a soft cloth squeezed in soapy water. Particular care should be taken to keep the window area clean particularly after cooking by Grill, Combination. Stubborn spots inside the oven can be removed by using a small amount of microwave oven cleaner sprayed onto a soft damp cloth. Wipe onto problem spots, leave for recommended time and then wipe off. This method can not be used to clean the oven door.

DO NOT SPRAY DIRECTLY INSIDE THE OVEN.

Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass, since they can scratch the surface, which may result in shattering of the glass. A steam cleaner is not to be used.

3. Failure to maintain the oven in a clean condition could lead to deterioration of the surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.
4. When it becomes necessary to replace the oven light, please consult the service center specified by Panasonic.

Panasonic Warranty (For Australia)

Home Appliance 12 Month Warranty from Date of Purchase

1. Subject to the conditions of this warranty Panasonic or its Authorised Service Centre will perform necessary service on the product without charge for parts or labour, if in the opinion of Panasonic, the product is found to be faulty within the warranty period. For Communications products (i.e. Cordless Phones, etc) the genuine battery(s) has a 3 month warranty.
2. This warranty only applies to Panasonic products purchased in Australia and sold by Panasonic Australia or its Authorised Distributors or Dealers and only where the products are used and serviced within Australia or its territories. Warranty cover only applies to service carried out by a Panasonic Authorised Service Centre and only if valid proof of purchase is presented when warranty service is requested.
3. This warranty only applies if the product has been installed and used in accordance with the manufacturer's recommendations (as noted in the operating instructions) under normal use and reasonable care (in the opinion of Panasonic). The warranty covers normal domestic use only (also Clip & Trim Professional use) and does not cover damage, malfunction or failure resulting from use of incorrect voltages, incorrect installation, accident, misuse, neglect, build-up of dirt or dust, abuse, maladjustment of customer controls, mains supply problems, thunderstorm activity, infestation by insects or vermin, tampering or repair by unauthorised persons (including unauthorised alterations), exposure to abnormally corrosive conditions or any foreign object or matter having entered the product.
4. This warranty does not cover the following items unless the fault or defect existed at the time of purchase:
 - (a) Cabinet Parts
 - (b) Microwave Oven Plates.
 - (c) User replaceable Batteries
 - (d) Kneader Mounting Shaft, Shaver Heads, Cutters, Foils, Blades
 - (e) Accessories
 - (f) Noise or vibration that is considered normal
5. To claim warranty service, when required, you should:
 - Contact Panasonic's Customer Care Centre on 132600
 - Send or take the product to a Panasonic Authorised Service Centre together with your purchase receipt as a proof of purchase date. Please note that freight and insurance to and / or from your nearest Authorised Service Centre must be arranged by you.
6. The warranties hereby conferred do not extend to, and exclude, any costs associated with the installation, de-installation or re-installation of a product, including costs related to the mounting, de-mounting or remounting of any screen, (and any other ancillary activities), delivery, handling, freighting, transportation or insurance of the product or any part thereof or replacement of and do not extend to, and exclude, any damage or loss occurring by reason of, during, associated with, or related to such installation, de-installation, re-installation or transit.

Panasonic Authorised Service Centres are located in major metropolitan areas and most regional centres of Australia, however, coverage will vary dependant on product. For advice on exact Authorised Service Centre locations for your product, please telephone our Customer Care Centre on 132600.

In addition to your rights under this warranty, Panasonic products come with consumer guarantees that cannot be excluded under the Australian Consumer Law. If there is a major failure with the product, you can reject the product and elect to have a refund or to have the product replaced or if you wish you may elect to keep the goods and be compensated for the drop in value of the goods. You are also entitled to have the product repaired or replaced if the product fails to be of acceptable quality and the failure does not amount to a major failure.

If there is a major failure in regard to the product which cannot be remedied then you must notify us within a reasonable period by contacting the Panasonic Customer Care Centre. If the failure in the product is not a major failure then Panasonic may choose to repair or replace the product and will do so in a reasonable period of time from receiving notice from you.

Microwaves penetrate the surface of the food to a depth of about two to three centimetres and then the heat is gradually conducted in a random pattern. Some parts of food matter cook faster than others. Special microwave techniques are used to promote fast and even cooking. Some of these techniques are similar to those used in conventional cooking, but because microwaves produce heat very quickly these following techniques are extremely important. It's a must for you to be familiar with the following tips.

Food Characteristics

Size and Quantity

Small portions cook faster than large portions. As you increase the quantity of food you put into the microwave oven, you must also increase your cooking time. The microwave oven has the same power regardless of quantity; thus the power is divided between more items and so it takes longer to cook. As a general guide, if you double the quantity of food suggested in the recipe, add half the time suggested again.

Liquid Content

Low moisture foods take a shorter time to cook than foods with a lot of moisture.

Shape

Uniform sizes cook more evenly. To compensate for irregular shapes, place thin pieces towards the centre of the dish and thicker pieces towards the outer edge of the dish.

Bone and Fat

Bones conduct heat and cause the meat next to them to be heated more quickly. Large amounts of fat absorb microwave energy and the meat next to these areas may overcook.

Starting Temperature

Food which has been sitting at room temperature takes less time to cook than refrigerated or frozen food.

Density and Composition

Porous, airy foods (cakes and breads) take less time to cook than heavy compacted foods (meat and vegetables). Recipes high in fat and sugar content cook more quickly.

Symbols Used in Recipes

G	Grill
C	Convection
SO	Steam only
CO	Combination
SS	Steam shot
A	Auto Cook
No symbol	Microwave only

Techniques for Preparation

Timing

A range of cooking times is given in each recipe for two reasons. First, to allow for the uncontrollable differences in food shapes, starting temperatures and personal preferences. Secondly, these allow for the differences in electrical voltage input which changes during peak load periods. Always remember that it is easier to add time to undercooked food. Once the food is overcooked, nothing can be done. For each recipe, an approximate cooking time is given.

Stirring

Stirring is often necessary during microwave cooking. We have noted when stirring is helpful in the recipes. Always bring the outside edges towards the centre and the centre portions to the outside.

Rearranging or Turning

Some foods should be turned in the container during cooking. For example, because of the different thicknesses in the breast and back sections of poultry, it is a good idea to turn poultry over once to ensure more even cooking. Rearranging or turning over uneven shaped food in the dish should be done as suggested to ensure a satisfactory result. Rearrange small items such as chicken pieces, prawns, hamburger patties, steak or chops. Rearrange pieces from the centre to the edge of the dish.

Cooking in Layers

This microwave oven is not designed to cook more than 1 layer of food. Cooking in 2 layers may not always be successful, it takes longer and may be uneven. You can successfully reheat two dinner plates of food at one time but remember to increase the reheating time and use a microwave warming rack.

Piercing of Foods

Pierce the skin or membrane of foods such as whole potatoes when cooked whole in the microwave oven. This allows steam to escape. If the skin has not been pierced, food may burst.

Cured Meats

Cured meats may overcook in some areas due to the high concentration of salts used in the curing process. So take care when cooking different brands of bacon as cooking times may vary slightly.

Soups

Use a bowl and stir before heating and at least once through reheat time and again at the end.

Techniques for Preparation

Covering

Covering food minimizes the microwave cooking time.

Because microwave cooking is done with time and not direct heat, the rate of evaporation cannot be easily controlled. However, this can be corrected by using different materials to cover dishes. Plastic wrap is the best substitute for a lid as it creates a tighter seal and so it retains more heat and steam. Wax paper and paper towels hold the heat in but not the steam. These materials also prevent splattering. Use a paper towel, wax paper or no cover when steam is not needed for tenderising.

Browning

Meats and poultry, when cooked longer than 10 to 15 minutes, will brown from their own fat. Foods cooked for shorter periods of time can be aided with the help of a browning sauce, worcestershire sauce or soy sauce. Simply brush one of these sauces over meat or poultry before cooking. Baked goods do not need long cooking time and therefore, do not brown. When cakes or cupcakes are iced, no one will notice the visual difference. For cakes or cupcakes, brown sugar can be used in the recipe in place of caster sugar or the surface can be sprinkled with dark spices before baking.

Standing Time

The moisture molecules continue to vibrate in the food when the microwave oven has turned itself off. After all, the molecules were vibrating at 2,450,000,000 times per second during cooking. So cooking continues even after the food is no longer being exposed to the microwaves whether in or outside your microwave oven.

Standing time refers to the time it takes (after the microwave time is completed) to allow the interior of the food to finish cooking.

The amount of standing time varies with the size and density of the food. In meat cookery, the internal temperature will rise between 5 °C and 10 °C if allowed to stand covered for ten to fifteen minutes. Casserole and vegetables need shorter standing time, but this time is necessary to allow foods to complete cooking in the centre without overcooking on the edges.

The power level used in microwave cooking also determines the standing time. For example, when using a lower power level the standing time is shorter because of a lower concentration of heat in the food. Foods should always be kept covered while standing in order to retain the heat. If a longer standing time is required (while you cook another food to serve with the first, for instance), cover with aluminum foil.

Converting Your Favourite Conventional Recipes for Microwave Cooking

When adapting conventional recipes for microwave cooking, time are reduced considerably.

For example, a chicken which takes 1 hour to cook in a moderate oven will take 15 to 20 minutes on 800 W in your microwave oven.

Use similar microwave recipes to help you adapt conventional recipes. Remember, it is always best to undercook a recipe and then add an extra minute or two to finish it off.

Here are some other tips that may help:

- Reduce liquids in a conventional recipe by one half to two thirds, e.g. 1 cup (250 ml) should be reduced to ½ cup (125 ml).
- Add more thickening such as flour or cornflour to sauces and gravies if you do not reduce the liquid.
- Reduce seasonings slightly in a recipe where ingredients do not have time to simmer by microwave.
- Do not salt meats, poultry or vegetables before cooking; otherwise, they will toughen and dry out.
- If one ingredient takes longer to cook than the others, pre-cook it in the microwave oven first. Onion, celery and potato are examples.
- When cooking meat or vegetables, omit any oil or fat that would have been used in a conventional recipe for browning.
- Reduce leavening agents for cakes by one quarter and increase liquids by one quarter.
- Biscuits require a stiff dough. Increase flour by about 20 percent. Substitute brown sugar for white sugar and use biscuit recipes that have dark spices or require icing. Because of the short cooking time, biscuits don't have time to brown. Chill dough for half an hour before baking. This produces a crisper biscuit. Bake biscuits on a glass tray lined with greaseproof paper.
- Since microwaves penetrate foods about two centimetres from the top, bottom and sides, mixtures in round shapes and rings cook more evenly. Corners receive more energy and may overcook.
- Items with a lot of water, such as rice and pasta, cook in about the same time as they would on a conventional stove. (Refer to Rice and Pasta chapter.)

Select recipes that convert easily to microwave cooking such as casserole, stews, baked chicken, fish and vegetable dishes. The results from foods such as grilled meats, cooked souffles or two-crust pies could be less than satisfactory. Never attempt to deep fry in your microwave oven.

Menu Planning for Microwave Cooking

How to Keep Everything Hot at The Same Time

Plan your meals so that the food will not all need last minute cooking or attention at the same time. The special features of microwave cookery make it easy to serve meals with everything piping hot. Cooking of some foods may be interrupted while you start others, without harming the nutritional value or flavour of either.

A recipe which requires standing time can be microwaved first and another food cooked while it stands. Dishes prepared in advance can be reheated briefly before serving.

It does take some experience and time to cook with confidence. Microwaves are fast so you will have to do some experimenting. You might find you will use your conventional range in conjunction with your microwave oven. For example, while cooking the roast in the microwave oven, you can be cooking the vegetables and gravy on the range top. This can also be done the other way around. Prepare your meals as follows.

1. Firstly, cook the most dense item (roast or casserole). Drain and retain meat juice from joints then cover with foil.
2. Cook the potatoes, rice or pasta.
3. Cover with foil for standing.
4. Cook greens and other vegetables.
5. Cover with foil for standing.
6. Cook the gravy with the retained meat juices, stock and thickening.
7. Carve the roast and serve the vegetables and gravy.

While you are learning to plan meals, you may get a bit behind time. Don't worry. Dinner servings may be suitably reheated on 800 W, for 1 to 2 minutes per serving.

If you prefer not to use foil, cover food with saucepan lids. A metal lid will retain the heat for at least 15 minutes.

Meanwhile, how can you cook all the vegetables at the same time? Simply place potatoes and pumpkin in one dish and less dense vegetables such as broccoli, cabbage, cauliflower, beans and peas in another. Sprinkle greens with water. Cover with a lid or plastic wrap. Cook on 1000 W for approximately 10 to 15 minutes for a serving for four people. Remember, if you increase the quantity of vegetables, increase the cooking time. Fresh and frozen vegetables can be mixed on a vegetable platter, but remember the latter are not as dense as fresh vegetables, as they have been blanched before freezing.

If vegetables are cut to a similar size, they can be cooked in separate ramekins or small dishes at the same time.

Handy Hints and Tips

- To blanch (1 cup) nuts, place in a pie plate. Cover with hot tap water and heat on 1000 W for 2 to 3 minutes. Rinse in cold water and rub between sheets of paper towel to remove skins.
- To toast coconut, place half a cup on a paper towel, and cook on 1000 W for 1 to 2 minutes, stirring occasionally.
- To make buttered breadcrumbs, combine 1 cup breadcrumbs and 2 tablespoon butter and heat on 1000 W for 1 to 2 minutes, stirring occasionally.
- When heating 100 g baby food, select 1000 W for 15 to 30 seconds, depending on the amount of food or liquid and the starting temperature of it. Test temperature before serving or further heating.
- For an added touch at dinner parties, steam your own hand towels. Saturate in cold water, wring and place on a plate. Heat on 1000 W for 1 to 2 minutes.
- To soften cream cheese or butter, place in oven on 270 W for ½ to 1 minutes per ½ cup.
- Refrigerated cheese (250 g) can be heated to room temperature on 600 W for ½ to 1 minute, depending on size.
- When having a barbecue, partially cook food in the microwave, season and finish cooking on the barbecue.
- To melt chocolate, place 100 g broken chocolate in a 4 cup glass jug and heat on 600 W for 2 to 3 minutes. As chocolate holds its shape after heating, stir and stand before adding extra time to cooking.
- To remove oven odours, combine ½ teaspoon vanilla essence with 1 cup water in a small bowl and heat on 1000 W 4 to 5 minutes. Wipe oven interior with a damp cloth.
- To toast 1 cup almonds place onto a plate and heat on 1000 W for 2 to 3 minutes, stirring every minute.
- To dry herbs, arrange ½ cup of leaves evenly on paper towel. Place a mug of water into the oven next to the herbs and cook on 1000 W for 1 to 3 minutes, or until dry and crumbly. Check herbs frequently as timing may vary with different herbs. Please note that herbs dry and crumble on standing outside the microwave oven.
- To soften dried fruit, place 1 cup of dried fruit into a small bowl. Add 2 tablespoon of water, cover with plastic wrap and cook on 1000 W for 2 to 3 minutes.
- To skin tomatoes, place 1 cup of hot tap water in a 2 to 3 cup jug or bowl and heat on 1000 W for 1½ minutes or until boiling. Add 1 tomato and heat for a further 20 to 30 seconds, remove and repeat procedure with remaining tomatoes. The skin will be loosened and easily removed.
- To dry fresh breadcrumbs (1 cup), spread on the base of a plate and heat on 1000 W for 2 to 3 minutes, stirring twice during heating.

Cheesy Ham Omelette

BACON

Serves: 1 to 2

Ingredients:

2 rashers bacon

Method:

1. Place rashers between two sheets of paper towel on a dinner plate.
2. Cook on 1000 W for 1½ to 2 minutes.

BACON AND EGG IN A CUP

Serves: 1

Ingredients:

2 rashers bacon
 1 × 60 g egg
 1 tablespoon grated cheddar cheese

Method:

1. Place bacon on a dinner plate between 2 sheets of paper towel cook on 1000 W for 40 seconds to 1 minute.
2. Wrap bacon around the inside of a 1-cup ramekin dish. Crack egg into centre of dish and pierce with tooth pick. Cover and cook on 600 W for 50 seconds to 1 minute 10 seconds. Sprinkle with grated cheese.

MUESLI

Serves: 4 cups

Ingredients:

½ cup honey
 2 tablespoon butter
 2 cups rolled oats
 ½ cup unprocessed bran
 ½ cup shredded coconut
 ½ cup nuts, chopped
 ½ cup sunflower seeds
 ½ cup dried mixed fruit

Method:

1. Warm honey and butter in a large dish on 1000 W for 1 to 1½ minutes.
2. Add dry ingredients except dried fruit and mix well. Cook on 1000 W for 5 to 6 minutes, stir halfway through cooking.
3. Stir in dried fruit and allow to cool completely before storing in an airtight container.

CHEESY HAM OMELETTE

Serves: 1 to 2

Ingredients:

3 eggs, separated
 2 tablespoons milk
 salt and pepper
 ¼ cup grated cheese
 50 g ham, cut into strips
 40 g onion, finely sliced
 butter for greasing

Method:

1. Beat egg yolks, with milk and salt and pepper in a bowl. In a separate bowl, beat egg whites until soft peaks form. Gently fold egg whites through yolk mixture with cheese, ham and onion.
2. Place onto a well greased dinner plate. Cook on 600 W for 5 to 6 minutes. Stand for 2 minutes before folding in half to serve.

POACHED EGGS

Serves: 2

Ingredients:

2 × 60 g eggs
 ¼ cup hot tap water
 dash of vinegar
 pinch of salt

Method:

1. Place ¼ cup of water, dash of vinegar and pinch of salt into 2 small ramekin dishes or small glass bowls. Cook water on 1000 W for 40 seconds.
2. Break egg into boiling water and with a toothpick pierce egg yolk twice and egg white several times. Cover dish with plastic wrap and cook on 800 W for 40 seconds to 1 minute.
3. Stand covered for 1 minute before serving.

Note: The size of the egg will alter cooking time.

CAUTION!

Boiled Eggs: Do not boil eggs in your microwave. Raw eggs boiled in their shells can explode and cause serious injury.

SCRAMBLED EGGS

Serves: 2

Ingredients:

2 × 60 g eggs
 2 tablespoons milk
 pinch salt

Method:

1. In a 1-litre dish, beat eggs lightly with a whisk. Add milk and salt and whisk until well combined.
2. Cover dish with plastic wrap and cook on 800 W for 1 minute.
3. Stir eggs and cook for a further 1 to 1½ minutes. Stand covered for 1 minute before serving.

PORRIDGE

Serves: 1

Ingredients:

¼ cup quick cooking oats
 ⅔ cup water
 ¼ teaspoon salt

Method:

1. Combine all ingredients in a breakfast bowl. Cook on 1000 W for 1 minute, stir, then cook on 600 W for 1 minute.
2. Let stand 1 to 2 minutes before serving. Top as desired with sugar or spices.

HOT LEMON AND HONEY DRINK

Serves: 1

Ingredients:

½ lemon, juiced
 1 tablespoon honey
 1 cup (250 ml) water

Method:

1. Mix all ingredients in a 2-cup heatproof jug. Cook on 1000 W for 2 to 3 minutes. Stir well.

TEA

Serves: 1

Ingredients:

1 cup (250 ml) tap water
 1 tea bag

Method:

1. Pour water into a heatproof cup. Cook on 1000 W for 1 to 2 minutes. Stir, then submerge tea bag in water. Stand until desired strength is reached. Remove tea bag. Add milk and sugar if desired. Stir.

COFFEE

Serves: 1

Ingredients:

1 cup (250 ml) water
 1 teaspoon instant coffee

Method:

1. Pour water into a heatproof cup. Add coffee. Stir. Cook on 1000 W for 1 to 2 minutes. Add milk and sugar if desired. Stir.

HOT CHOCOLATE

Serves: 1

Ingredients:

2 teaspoons drinking chocolate
 1 teaspoon sugar (optional)
 2 tablespoons water
 ¾ cup (185 ml) milk

Method:

1. Combine chocolate, sugar and water in a heatproof cup. Cook on 1000 W for 10 to 20 seconds.
2. Stir in milk. Cook on 800 W for about 1 minute.

SEAFOOD TOAST **Ingredients:**

50 g prawns (peeled)
 50 g cuttlefish (small cut)
 certain amount salt, aginomoto,
 green onion and butter
 2 pieces sliced bread
 4 teaspoons tomato sauce
 50 g mozzarella cheese

Method:

1. Put prawns, cuttlefish, salt, butter, aginomoto and green onion into a microwave safe container and stir, cook for 1½ minutes on 1000 W, put aside after dehydrated.
2. Apply tomato sauce on the top of the bread, spread mozzarella cheese evenly on it, add some peeled prawns and cuttlefish cut, and add the rest cheese.
3. Put the bread at the center of the metal tray in upper shelf position. Select Grill 1, and cook for 6 to 7 minutes or until the cheese are completely melted.

FRENCH TOAST G

Ingredients:

1 bar	french loaf
70 g	butter (melted)
10 g	garlic (chopped)
3 g	dried caraway
a little	salt

Method:

1. Cut the french loaf into 2 cm slices. Stir butter, garlic, caraway and salt in a dish and mix them well.
2. Apply garlic sauce on the top of the bread and put it on the metal tray in upper shelf position. Select Grill 1, cook for 5 to 6 minutes to golden brown.

GRILLED CHEESE ON TOAST G

Serves: 2 to 4

Ingredients:

4 slices	bread
	butter for spreading
4 slices	tasty cheese

Method:

1. Place bread on metal tray in upper shelf position and cook one side of bread on Grill 1 for 5 minutes.
2. Spread untoasted side with butter and top with cheese slices. Cook on Grill 1 for 3 to 5 minutes.

FRENCH-STYLE STEAMED EGG WITH BACON AND VEGETABLES SO CO

Ingredients:

20 g	spinach
2	small tomatoes
1 rasher	bacon
2	eggs (100 g without shells)
½ cup	milk
moderate	salt, pepper
200 g	natural cheese (mozzarella, for pizza)

Method:

1. Cut the spinach into 1 cm wide pieces. Remove the stalks of small tomatoes, and cut vertically into 4 equal parts. Cut bacon into 5 mm wide pieces.
2. Put eggs into a bowl, add milk, salt and pepper, then stir and sieve well.
3. Place half of 1 with natural cheese into each of the 2 heat-resistant containers with a diameter of approximately 9 cm, and then add egg mixture prepared in 2.
4. Pour water into the tank before cooking. Place onto the grill tray as shown in the illustration; place the grill tray in the middle shelf position. Select steam 1 for 9 minutes, and then select Combi 1 for 2 to 2½ minutes.

HANDMADE SAUSAGES SO CO

Ingredients:

200 g	meat mince
4	sheets baking paper (30 x 10 cm)

A:

200 g	onion (chopped)
½ teaspoon	ground garlic
1½ tablespoons	milk
1 tablespoon	corn starch
½ teaspoon	salt
moderate	common sage
moderate	coarsely ground pepper
1 teaspoon	olive oil

Method:

1. Place meat and A into the bowl, stir until it becomes sticky, and then divide into 4 equal parts.
2. Grease hands with butter (not listed in the ingredients), place ingredient from 1 onto plastic wrap strip by strip, shape into strips of 20 cm thick. Remove the plastic wrap, wrap with baking paper, and then twist both ends tight.
3. Pour water into the tank before cooking. Place 2 on the center of the grill tray in the middle shelf position. Select Steam 1 for 7 minutes, and then select Combi 1 for 4-6 minutes.
4. Remove the baking paper after heating.

French-style Steamed Egg with Bacon and Vegetables

PEA AND HAM SOUP

Serves: 6

Ingredients:

- 2½ cups green split peas
- 850 g smoked ham hock
- 1 medium onion, chopped
- 1 tablespoon fresh thyme leaves
- 1 bay leaf
- 6 cups chicken stock
- ½ cup frozen peas

Method:

1. Wash split peas and place in a 2-litre bowl with 1-litre of water. Cover and allow soaking for 8 hours or overnight.
2. Remove rind from ham hock and discard. Cut meat away from the bone and roughly chop. Reserve bone.
3. Drain peas and place into a 5-litre microwave-safe dish. Add ham bone, chopped ham, onion, thyme, bay leaf and chicken stock. Cook uncovered on 1000 W for 15 minutes. Reduce power to 600 W and cook for 15 minutes. Skim top of soup and cook on 600 W for a further 30 minutes.
4. Remove ham bone and bay leaf and stir in frozen peas. Cook on 600 W for 10 minutes. Blend half the soup and return to the bowl, stirring through the remaining soup. Serve hot with crusty bread.

Tip:

Substitute 500 g bacon bones and 250 g of diced bacon rashers for the ham hock. Do not add salt when cooking lentils or pulses, as they will toughen. Add salt after cooking if desired.

MUSHROOM SOUP

Serves: 4

Ingredients:

- 1 tablespoon butter
- 250 g mushrooms, sliced
- 1 tablespoon flour
- 4 cups stock
- ¼ cup white wine
- 1 teaspoon mustard
- ½ cup cream

Method:

1. Place butter and mushrooms in a 2-litre casserole dish. Cover partly and cook on 1000 W for 5 minutes.
2. Add flour, stock, wine and mustard to mushrooms and mix well. Cover and cook on 1000 W for 6 to 8 minutes, stirring halfway through cooking.
3. Add cream and cook on 1000 W for a further 2 minutes. This soup can be pureed if preferred.

CHICKEN AND VEGETABLE SOUP

Serves: 4

Ingredients:

- 1 medium onion, diced
- 1 clove garlic, crushed
- 750 g soup vegetables, diced
- 1-litre chicken stock
- ½ cup arborio rice
- 1 bay leaf
- 400 g cooked chicken meat

Method:

1. Place onion and garlic into a 3-litre microwave-safe bowl. Cook on 1000 W for 1 minute.
2. Add vegetables, cover and cook on 1000 W for 10 minutes, stir halfway through cooking.
3. Remove covering and add chicken stock and bay leaf. Cook on 1000 W for 10 minutes.
4. Stir in rice and cook for a further 10 minutes.
5. Remove bay leaf and add diced chicken. Heat on 1000 W for 5 minutes.

PUMPKIN SOUP

Serves: 2 to 4

Ingredients:

- 1 kg pumpkin
- 1 diced onion
- 1 teaspoon curry powder
- 2 cups chicken stock

Method:

1. Peel pumpkin and remove seeds. Dice pumpkin into 3 cm pieces.
2. Place pumpkin, onion and curry powder in a 3-litre casserole dish. Cover and cook on 1000 W for 15 minutes.
3. Add stock. Cover and cook on 1000 W for 15 minutes.
4. Cool slightly. Puree pumpkin and liquid in a blender or food processor.

Pumpkin Soup

SHORT AND LONG SOUP

Serves: 4

Ingredients:

200 g	fresh Singapore noodles
12 (200 g)	frozen mini dim sims
4	green onions, sliced
1-litre	chicken stock
1 teaspoon	crushed garlic
½ teaspoon	chopped fresh ginger
2 tablespoons	soy sauce
1	chicken breast, cooked and sliced
4	baby bok choy, quartered
1 cup	bean sprouts
2 tablespoons	dried onion (optional)

Method:

1. Place all ingredients except bok choy, bean sprouts and dried onion in a 4-litre casserole dish and cook on 1000 W for 16 to 18 minutes, stir half way.
2. Add bok choy and cook on 1000 W for 2 minutes. Serve in individual bowls topped with bean sprouts and dried onion.

Hints:

1. To cook a single chicken breast. Place onto a dinner plate. Cover and cook on 800 W for 3 to 4 minutes.
2. To reheat a single portion of soup. Place in a microwave-safe dish and cook on 800 W for 2 to 3 minutes.

POTATO AND LEEK SOUP

Serves: 4 to 6

Ingredients:

4 (1 kg)	large potatoes, peeled, diced
2	medium leeks, thinly sliced
2 teaspoon	dried thyme
3 cups	hot chicken stock
1 teaspoon	salt and pepper
250 ml	cream

Method:

1. Place potatoes, leeks, thyme and chicken stock in a 3-litre casserole dish. Cover and cook on 1000 W for 22 to 25 minutes.
2. Cool slightly. Puree potato mixture in a food processor or blender, adding salt, pepper and cream. Return to dish. Cook on 800 W for 4 to 6 minutes. Serve hot, in individual bowls.

CRAB AND CORN SOUP

Serves: 4 to 6

Ingredients:

1 tablespoon	oil
1	onion, finely chopped
425 ml	boiling chicken stock
300 g	can creamed corn
	salt and pepper
170 g	can crabmeat, drained
150 ml	milk
3 tablespoons	cream
	chopped parsley for garnish

Method:

1. Place oil and onion in a 3-litre casserole dish. Cover and cook on 1000 W for 3 to 4 minutes.
2. Add chicken stock, corn, salt and pepper. Cook on 1000 W for 5 minutes.
3. Add crabmeat and milk and mix well. Cook on 1000 W for 3 minutes.
4. Stir in cream and sprinkle with parsley. Serve.

SPICY TOMATO SOUP

Serves: 4

Ingredients:

1	onion, sliced
2	small red chillies, chopped
2 cloves	garlic, crushed
800 g	can tomato pieces
1 tablespoon	tomato paste
1½ cups	chicken stock
1 teaspoon	dried oregano
	salt and pepper

Method:

1. Place onion, garlic and chillies in a 3-litre dish and cook on 1000 W for 1 to 2 minutes.
2. Add tomatoes and tomato paste and cook on 1000 W for 8 to 10 minutes.
3. Pour in the stock and oregano. Cover and cook on 1000 W for 15 minutes.
4. Purée in a food processor or blender if desired. Season to taste with salt and pepper. Serve in individual soup bowls.

HEALTHY PEAR SOUP**Ingredients:**

350 g	pork rib (blanched in hot water)
3	pears (cut, with skin)
20 g	sweet almond
10 g	bitter almond
30 g	dried scallop (soaked)
1	honey date
10 g	wolfberry
10 g	ginger (sliced)
1 litre	water

Directions for Cooking Whole Poultry by Microwave

Cooking

Season as desired, but salt after cooking. Browning sauce (e.g. soy, Worcestershire) mixed with equal parts of butter will enhance the appearance.

Poultry may be stuffed or unstuffed. Tie legs together with cotton string. Place on microwave rack set in a rectangular dish. Place poultry breast-side down: turn over halfway through cooking. Cover with wax paper to prevent splattering. If the poultry is not cooked enough return it to the oven and cook a few more minutes at the recommended power level.

DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN.

Let stand, covered with foil, 10 to 15 minutes after cooking. Standing time allows the temperature to equalise throughout the food and finishes the cooking process.

If a large amount of juice accumulates in the bottom of the baking dish occasionally drain it. If desired, reserve for making gravy. Less-tender birds should be cooked in liquid such as soup or broth. Use $\frac{1}{4}$ cup per 500 g of poultry. Use an oven cooking bag or covered casserole. Select a covered casserole dish deep enough so that bird does not touch the lid.

After cooking, check the internal temperature of the bird with a microwave or conventional meat thermometer, inserted into the thigh muscle. Check temperature in both muscles. The thermometer should not touch bone. If it does, the reading could be inaccurate. A thermometer cannot be accurately inserted into a small bird. To check desired cooking of a small bird, juices should be clear and the drumsticks should readily move up and down.

During cooking it may be necessary to shield legs, wings and the breast bone to prevent overcooking. Wooden toothpicks can be used to hold foil in place.

If an oven cooking bag is used, prepare according to package directions. Do not use wire twist-ties to close bag. Use only nylon tie, a piece of cotton string, or a strip cut from the open end of the bag. Make six 2 cm slits in top of bag. Multiply the weight of the poultry by the minimum recommended minutes per 500 g. Programme Power and Time.

Directions for Cooking Poultry Pieces by Microwave

Arrange pieces skin-side up, and evenly spread in a shallow dish.

Cover with wax paper, or paper towel. Multiply the weight by the minimum time recommended in the chart.

Directions for Cooking Tender Cuts of Meat by Microwave

For best results, select roasts that are uniform in shape. Place meat on a microwave suitable rack in a rectangular dish. Beef rib roast should be placed outside down. Other bone-in roasts should be placed fat-side down. Boneless roasts should be placed fat-side up. Halfway through cooking turn roasts.

Meats can be shielded at the beginning of cooking or halfway through cooking. If you wish to shield at the beginning of cooking, remove foil halfway through the cooking time. Beef and pork rib roasts should be shielded by the bones. Foil should extend about 5 cm down from bones. The shank, thin ends of boneless roasts should also be shielded.

Loosely cover baking dish with wax paper or paper towel to prevent splatter. If a large amount of juice accumulates in the bottom of the dish, drain occasionally. If desired, reserve for making gravy. Multiply the weight of the roast by the minimum recommended times per 500 g. Programme Power and Time.

After heating, check temperature using a meat thermometer. The thermometer should not touch bone or fat. If it does, the reading could be inaccurate. Lower temperatures are found in the centre of the roast and in the muscle close to a large bone, such as a pork loin centre rib roast. If the temperatures are low, return meat to the oven and cook a few more minutes at the recommended power level. **DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN.** Let stand, covered with foil, 10 to 15 minutes. During standing time the internal temperature equalises and the temperature rises 5 °C to 10 °C.

Half hams should be shielded by wrapping an 8 cm wide strip of foil around the large end of the ham. Secure to the body of the ham with wooden toothpicks. Fold 3 cm over cut surface. For shank ham halves, shield shank bone by cupping it with foil. One third of the way through cooking, remove ham from oven and cut off skin. Turn fat-side up and re shield edges. If desired, glaze last 10 to 20 minutes of cooking.

Canned hams should be shielded on the top cut-edge with a 3 cm strip of foil. Wrap strip of foil around ham and secure to body of ham with wooden toothpicks. Fold 2 cm over cut surface. If desired, glaze last 10 to 20 minutes of cooking.

Directions for Cooking Less-Tender Cuts of Meat by Microwave

Less-tender cuts of meat such as pot roasts should be cooked in liquid. Use ½ to 1 cup of soup, broth, etc per 500 g of meat. Use an oven cooking bag or covered casserole when cooking less-tender cuts of meat. Select a covered casserole deep enough so that the meat does not touch the lid.

If an oven cooking bag is used, prepare the bag according to package directions. Do not use wire or metal twist-ties. Use the nylon tie provided, otherwise, use a piece of cotton string or a strip cut from the open end of the bag. Make six 2 cm slits in top of bag to allow steam to escape.

Arrange pieces skin-side up, and evenly spread in a shallow dish.

Multiply the weight of the roast by the minimum recommended minutes per 500 g. Programme Power and Time. Turn meat over halfway through cooking.

Directions for Cooking Vegetables by Microwave

Fresh Vegetables

Place vegetables in a casserole dish. Add 2 to 3 tablespoon of water per 500 g of vegetables. Add salt to water or add after cooking. Do not place salt directly on vegetables. Cover dish with glass lid or plastic wrap.

Cook on 1000 W according to time recommended in charts. Halfway through cooking, stir, turn vegetables over or rearrange, if required.

Vegetables that are to be cooked whole and unpeeled, need to be pierced to allow steam to escape. Place vegetables on a paper towel lined dinner plate.

Allow to stand covered according to the time indicated in the charts.

Frozen Vegetables

Remove vegetables from package and place in an appropriate sized container. Vegetables frozen in pouch should be placed in a dish and the top pierced. Cook on 1000 W according to directions given in chart. Vegetables should be cooked covered with a lid or plastic wrap.

Dried Beans or Peas

Place hot tap water, in a 4-litre dish. Bring hot water to the boil on 1000 W for 10 to 12 minutes.

To Cook by Time:

Add beans and 2 tablespoon oil to water. Cook according to directions in chart. Stir.

Note: Beans such as red kidney beans and lima beans should be soaked overnight before cooking. 250 g of dried beans equals about 3 cups cooked. Use in place of canned beans. Allow to stand, covered, for 15 to 20 minutes after cooking.
