Three Types of Prime Freeze Modes

*Prices and specifications are subject to change without prior notice.
**Colors and size proportionality as seen in the visuals may vary in actual.

NO FROST REFRIGERATORS

Inhibits 99.99%* of bacteria in the air and on surfaces with nanoe™ X. It also deodorizes unpleasant odors and neutralizes pesticides so you can store your food safely.

*3 Testing organization: Kitasato Research Center for Environmental Science (general incorporated foundation). KRCS—Bio. Test Report No. 2017_0188. Test method: After releasing floating bacteria (1 type) in a 400 L chamber, the number of bacteria in collected air were counted. Bacteria inhibition method: Release of nanoe™. Test results: With nanoe™ X, after 50 min, 99.99% more of bacteria inhibited. Does not guarantee the prevention of food poisoning.

Test results: novel coronavirus activity inhibited

Test of a generator of nanoe™ X

*2 Overview

The objective of this test was to determine if nanoe™ X inhibit the activity of the SARS-CoV-2 virus. Gauze saturated with SARS-CoV-2 virus solution was exposed to a generator of nanoe™ X from a distance of 15cm in a 45L box for 2 hours. Over 99.99% of the activity of the SARS-CoV-2 virus was inhibited.

*3 Details

Testing organization: TEXCELL (France). Test subject: novel coronavirus (SARS-CoV-2). Test volume: 45 L enclosed box (400 mm x 350 mm x 350 mm). Exposure time: 2 hours. Exposure distance: 15 cm.

Test results

Notes: (1) The virus infectious titer was measured and used to calculate the inhibition rate. (2) This verification was designed to generate basic research data on the effects of nanoe™ X on the novel coronavirus in laboratory conditions. It was not designed to evaluate product performance. (3) Photograph is for illustrative purposes.

Manage at Ease Using the Panasonic Comfort Cloud App

Bringing simplicity and convenience to your fingertips, Panasonic Comfort Cloud application gives you complete control of your air conditioning units anytime, anywhere.

The Panasonic Comfort Cloud application enables your mobile device to act as a remote controller, synchronizing with your air conditioner in a matter of seconds. Perfect for multiple air conditioning units in a single and multiple locations.

Eliminates 99.99%*1 Bacteria with Cold Wash

Blue Ag+ technology eliminates bacteria and provides a powerful anti-bacterial effect with UV light and Ag ions during the regular wash cycle without hot water**.

*1 As certified by the Institute of Biotechnology (Vietnam/No. 050522/VCCM). Bacteria Elimination rate: 99.99% Escherichia coli 99.99% Staphylococcus aureus. Test conditions apply.

** Effective for loads up to 3kg.

*Prices and specifications are subject to change without prior notice.
**Colors and size proportionality as seen in the visuals may vary in actual.

StainMaster+

Easily handle stubborn dirt and allergens!

StainMaster+ washes away a variety of stains, bacteria, and allergens to keep clothes clean through optimized wash programs selected with just the touch of a button.

TOP LOAD WASHING MACHINES

Powerful wash, effective cleaning
with less energy consumption.

TD INVERTER^{*3} WaterBazooka

^{*2} Motor rotation speed is converted to torque, generating 6 times more power. This drives a stronger water flow resulting to greater wash and rinse performance.

This allows a more better foam-water penetration and enhances washing performance for more efficient dirt removal.

^{*1} Based on Panasonic's internal laboratory testing.

^{*3} TD Inverter and Water Bazooka are features applied to our FD Series top load washing machines.
