Applying advanced technologies that truly make life better, we live by an unparalleled commitment to product quality. Our approach to product development originates in the DNA of Japanese craftsmanship.

Panasonic is building on the Japanese tradition of uncompromising quality control worldwide, developing and manufacturing fine products and delivering them to customers everywhere.

healthy EVERYDAY

WELLNESS BEGINS WITH HEALTHY EATING

REDISCOVER THE JOY OF REAL MOMENTS

Healthy Everyday represents the healthy lifestyle of being committed to consuming fresh and healthy meals.

It draws on the philosophy of consuming nutritiously balanced meals everyday with freshly cooked from fresh

and hygienic ingredients. The convenience of preparing good food to share with family and friends has never been simpler.

Healthy Everyday unites aspirations with technology to satisfy a new desire for healthy food experiences.

PRIME FREEZE

Rapid Freezing Technology That Simplifies Meal Preparation

Prime Freeze keeps your meats, vegetables, and fruits fresh for longer while ensuring that flavors, textures, and colors remain unchanged. The Prime Freeze modes provide you with multiple methods to prepare meals, enriching your lifestyle with endless ways to make healthy meal preparation easier.

SCAN TO LEARN MORE

How It Works

A dedicated duct and fan generate a powerful flow of cold air in the Prime Freeze compartment, while an aluminum plate absorbs cold air and removes heat from food for rapid freezing and cooling.

Three Types of Prime Freeze Modes

Seals in Texture and Flavor

Saves You Time Cooking

Reduces Time and Worries

*Prime Freeze compartment is at the same location in the freezer for all models.

PRIME FRESH

Prime Fresh freezes meat and fish lightly at approx. -3°C , thereby retaining freshness for about 7 days*¹ without the need to defrost.

Plan ahead and store ingredients in Prime Fresh to enjoy hassle-free and healthy eating on busy days. Effortlessly make a nutritious meal in a short time without having to defrost.

^{*1} Data prepared by Panasonic. The effect differs depending on operating conditions, and the type, condition and amount of food stored. ^{*2} Test conditions — Ambient temperature: 32°C ; Hertz: 50Hz; Voltage: 220V; Tested model: NR-BC369-V2/Temperature settings — Fridge: Med; Freezer: Med; Prime Fresh: Prime Fresh+Normal Prime Fresh/Food tested: 200g of beef kept in the fridge (at approx. 4°C) and 200g of beef kept at room temperature (at approx. 26°C)/Test method: Both types of beef were placed in the Prime Fresh Case after the refrigerator that is running reaches a stable state. The time for cooling speed was compared from $4^{\circ}\text{C}/26^{\circ}\text{C}$ to -1.5°C between the Prime Fresh+ mode and the Normal Prime Fresh mode.

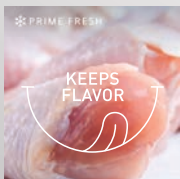

SCAN TO LEARN MORE

Prime Fresh — a unique soft freezing experience.

Enjoy fresh, tasty meat and fish for approx. 7 days*¹.

No defrosting, no dripping. Enjoy nutritious meat and fish.

Makes cooking easier without the need to defrost.

*Prime Fresh compartment is at the same location in the freezer for all models.

Fresh and Hygienic

Food served fresh and healthy
for you and your family everyday.

Prime Fresh freezes meat and fish softly at approx. -3°C . Food soft frozen in this way retains freshness for about 7 days*¹ without the need to defrost. Select the Prime Fresh+ mode to keep food fresh by soft freezing them at -3°C about four times faster*².

*¹ Data prepared by Panasonic. The effect differs depending on operating conditions, and the type, condition, and amount of food stored.

*² The time for cooling speed was compared from $4^{\circ}\text{C}/26^{\circ}\text{C}$ to -1.5°C between the Prime Fresh+ mode and the normal Prime Fresh mode.

Freshness Retention

Prevents oxidation and bacteria growth to keep freshness.

Chilled

Flavor Retention

Seals in meat's natural flavor by eliminating the need for defrosting.

Defrost after frozen

Benefits of -3° Prime Fresh Freezing

Keeps freshness longer

Retains nutrients

Easy to scoop

Quick seasoning

Inhibits 99.99%*³ of Bacteria with nanoe™ X

nanoe™ X, Hydroxyl Radicals Technology contains highly reactive hydroxyl radicals to effectively help inhibit bacteria in the air and on surfaces. It also deodorizes unpleasant odors and neutralizes pesticides so you can store your food safely.

*³ Testing organization: Kitasato Research Center for Environmental Science (general incorporated foundation), KRCEs—Bio. Test Report No. 2017_0188. Test method: After releasing floating bacteria (1 type) in a 400 L chamber, the number of bacteria in collected air were counted. Bacteria inhibition method: Release of nanoe™. Test results: With nanoe™ X, after 30 min, 99.99% more of bacteria inhibited. Does not guarantee the prevention of food poisoning.

Fresh and Clean

Fresh Safe

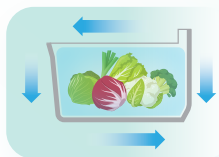

Enjoy vegetables and fruits kept fresh and crisp longer.

The vegetable case maintains the ideal humidity for vegetables thanks to the airtight structure with gaskets. Indirect cooling also gently cools vegetables by preventing cold air from blowing directly on the vegetables.

This optimum condition, with high humidity and a constant temperature keep everything inside the Fresh Safe fresh and juicy longer.

Indirect Cooling

Fruits and vegetables are gently cooled with indirect cooling instead of with direct cold air to prevent drying and damage.

Airtight Structure

Rubber at the edges seals in air to maintain a high level of humidity inside the case for optimum storage of vegetables.

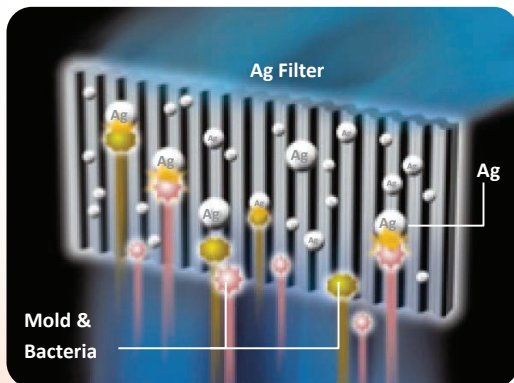

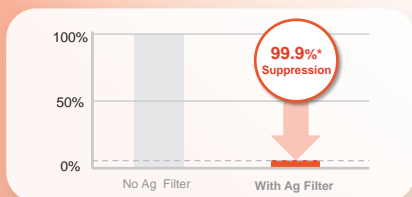

Ag Clean

Clean air throughout the fridge compartment keeping food hygienic.

Clean Air Everywhere

The anti-bacterial effect of the silver ions deactivates 99.9%*¹ of mold and bacteria resolving unpleasant odors and keeping your food storage even more hygienic.

Energy Saving

Enjoy more energy saving with advanced intelligent cooling technology.

*2 Data based on Panasonic internal laboratory testing; energy consumption rate on average for all Panasonic refrigerators with AI ECONAVI Eco Sensors & INVERTER Compressor.

More Advanced Cooling with Intelligent INVERTER Control

INVERTER compressor varies power to suit the situation during the day when it's often opened and closed, and less power during the night when it's hardly used. The result is extremely efficient operation for dramatic energy saving, less noise, and quick, powerful cooling.

ASENSO-REF

Bravely venture into starting your own business with a reliable companion.

Lamig Doble Bilis, Para sa Iyong Business

Enjoy the benefits of quick ice formation, faster freezing, and increased refrigerator cooling speed by 30% with Panasonic ASENSO-REF with TurboMax [Turbo Freezing + Turbo Cooling] **

**1 Applicable for NR-BQ261VB

Benefits of INVERTER Compressor

- 1 Energy Saving**
Reduce electricity bill with efficient operation
- 2 Quick, Powerful Cooling**
Freezes items faster and makes ice quickly.
- 3 Quiet Operation**
Enjoy a sleep-easy level of quiet.

Save Energy Intelligently

AI ECONAVI sensors detect while a microprocessor analyzes usage conditions.

The INVERTER compressor adjusts the rotation speed of the motor according to the results of the microprocessor analysis to optimize cooling performance and to save energy.

*1 Applicable set of sensors may differ on each model with AI ECONAVI Eco Sensors.

AI ECONAVI Sensors Monitor Condition of Usage for Automatic Energy Saving

- Internal Temperature Sensor**
Detects temperature inside the refrigerator.
- Room Temperature Sensor**
Detects surrounding temperature.
- Door Sensor**
Detects the frequency of fridge and/or freezer door opening/closing

Direct Cool Refrigerators

More savings! Get real value for your home investment.

Higher EEF Rating with Big Energy Savings

Panasonic direct cool refrigerators offer excellent cooling performance with low power input. This results in a higher Energy Efficiency Factor (EEF) rating*¹.

Truly, Panasonic refrigerators are reliable energy saving companions.

*¹ Higher Energy Efficiency Factor (EEF) rating claim pertains to NR-BQ241NS, NR-BQ211NS, NR-AQ241NS, NR-AQ211NS and NR-AQ151NS; data based on Panasonic internal laboratory testing, comparing new Panasonic Direct Cool non-inverter refrigerator line-up to previous Panasonic models.

Modern Flat Door Design

Minimalist yet trendy design made to appeal more to customers and can complement any kitchen.

Spacious Freezer

The spacious freezer compartment allows you to keep more frozen items.

Eco-Friendly

R600a refrigerant has low global warming potential, hence it is friendlier to the environment.

Tempered Glass Veggie-Case Cover

Durable veggie-case cover made of tempered glass that can hold up to 150 kilograms of weight load.
