REFRIGERATOR

The kind of gift that everybody wants but nobody talks about.

#panasonicrefrigerator

Scan to find out more

7days Freshness

7 Days Freshness for Fish & Meat^{*1}

Prime Fresh freezes meat & fish lightly at approx. -3°C. Food soft frozen in this way retains freshness for about 7 days^{*1} without the need to defrost. Select the Prime Fresh+ mode to keep food fresh by soft freezing them at -3°C about four times faster^{*2}.

^{*1}Data prepared by Panasonic. The effect differs depending on operating conditions, & the type, condition & amount of food stored. ^{*2}Test conditions -- Ambient temperature: 32°C; Hertz: 50Hz; Voltage: 220V; Tested model: NR-BC369-VZ/ Temperature settings -- Fridge: Med; Freezer: Med; Prime Fresh: Prime Fresh+/ Normal Prime Fresh/ Food tested: 200g of beef kept in the fridge (at approx. 4°C) and 200g of beef kept at room temperature (at approx. 26°C)/ Test method: Both types of beef were placed in the Prime Fresh Case after the refrigerator that is running reaches a stable state. The time for cooling speed was compared from 4°C/ 26°C to -1.5°C between the Prime Fresh+ mode and the Normal Prime Fresh mode.

Freshness Retention

Prevents oxidation & bacteria growth to keep freshness.

Chilled

Prime Fresh+

Nutrient Retention

Seals in nutrients by eliminating the need for defrosting.

Defrost After Frozen

Prime Fresh+

Convenient & Time Saving

nanoe™ Moistens Scalp to Keep It Clean & Healthy

Moisture-rich nanoe™ moisturizes your scalp to keep it healthy, preventing the dryness that causes damage to hair.

Static Electricity Suppression Effect

Hair naturally tends to have a positive electrical charge that makes it stand on end. nanoe™ neutralizes the charge, reducing static electricity to settle your hair & make it smoother.
