Operating Instructions
Air Conditioner

Thank you for purchasing Panasonic Air Conditioner. Installation instructions attached. Before operating the unit, read these operating instructions thoroughly and keep them for future reference.

Provide fast cooling, maximum comfort, clean air and optimise energy saving

**i AUTO-X  *Cooling when it counts, Comfort when it matters***
i AUTO-X with the new Panasonic Thermal Enhancement Technology (P-TECh) is a unique Panasonic compressor control technology which enable compressor to achieve maximum frequency in a short time.
i AUTO-X also comes with new AEROWINGS - twin flaps that works dynamically to adjust airflow directions. AEROWINGS gives you fast cooling at start up by directing airflow downwards*, and comfort of shower cooling by directing airflow upwards*.
So, you get to enjoy instant fast cooling satisfaction on a hot day and cooling comfort that goes on all day long.
*Applicable for horizontal flap AUTO setting.

**ECONAVI + INVERTER  *The Perfect Energy Saving Technology***
ECONAVI detects where energy is normally wasted and adjusts cooling/heating power depending on room conditions and activity levels. Then, INVERTER leverages ECONAVI sensor data and varies compressor rotation speed. This helps to optimize cooling/heating operation and reduces wasteful cooling/heating.

**nanoe-G  *Purifies the air down to the smallest particles***
Deactivates harmful micro-organisms such as viruses, bacteria, etc. to keep air clean. It also deactivates viruses and bacteria on the filter to keep inside of the unit clean.

See “To learn more...” for details.
Quick guide

Inserting the batteries
1. Pull out the back cover of remote control
2. Insert AAA or R03 batteries (can be used ~ 1 year)
3. Close the cover

Clock setting
1. Press CLOCK
2. Set the time
3. Confirm

Basic operation
1. Select the desired mode
   - AUTO ➔ HEAT ➔ COOL
   - AUTO-X ➔ FAN ➔ DRY
2. Start/stop the operation
3. Select the desired temperature
   - Selection range: 16 °C ~ 30 °C (Not applicable for FAN mode).
   - Operating the unit within the recommended temperature may save energy.
     - HEAT: 20 °C ~ 24 °C.
     - COOL: 26 °C ~ 28 °C.
     - DRY: 1 °C ~ 2 °C lower than room temperature.
   - To dim or restore the unit’s indicator brightness, press and hold for 5 seconds.
   - Use remote control within 8 m from the remote control receiver of the indoor unit.

The illustrations in this manual are for explanation purposes only and may differ from the actual unit. They are subject to change without notice for future improvement.

WARNING
This symbol shows that this equipment uses a flammable refrigerant. If the refrigerant is leaked, together with an external ignition source, there is a possibility of ignition.

CAUTION
This symbol shows type of flammable refrigerant contained in the system.

CAUTION
This symbol shows that the Operation Instructions should be read carefully.

CAUTION
This symbol shows that a service personnel should be handling this equipment with reference to the Installation Instructions.

CAUTION
This symbol shows that there is information included in the Operation Instructions and/or Installation Instructions.
Safety precautions

To prevent personal injury, injury to others or property damage, please comply with the following: Incorrect operation due to failure to follow instructions below may cause harm or damage, the seriousness of which is classified as below:

**WARNING**

- This appliance is filled with R32 (mild flammable refrigerant). If the refrigerant is leaked and exposed to an external ignition source, there is a risk of fire.

**WARNING**

- This sign warns of death or serious injury.

**CAUTION**

- This sign warns of injury or damage to property.

The instructions to be followed are classified by the following symbols:

- ![This symbol denotes an action that is PROHIBITED.]

- ![These symbols denote actions COMPULSORY.]

---

**Indoor unit and outdoor unit**

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

The appliance shall be installed and operated in a room with floor area larger than 2.06m² and keep away from ignition sources (such as heat/sparks/open-flame) or, hazardous areas (such as gas appliances, gas cooking, reticulated gas supply systems, or electric cooling appliance, etc. (Refer to the Installation Instruction table $A_{min}(m^2)$)

Be aware that refrigerant may not contain an odour, highly recommended to ensure suitable flammable refrigerant gas detectors are present, operating and able to warn of a leak.

Please consult authorised dealer or specialist to clean the internal parts, repair, install, remove and reinstall the unit. Improper installation and handling will cause leakage, electric shock or fire.

Confirms with authorised dealer or specialist on usage of any specified refrigerant type. Using refrigerant type other than the specified may cause product damage, burst and injury etc.

- Do not use means to accelerate the defrosting process or to clean, other than those recommended by manufacturer. Any unfit method or using incompatible material may cause product damage, burst and serious injury.

- Do not pierce or burn as the appliance is pressurized. Do not expose the appliance to heat, flame, sparks, or other sources of ignition. Else it may explode and cause injury or death.

- Do not install the unit in a potentially explosive or flammable atmosphere. Failure to do so could result in fire.

- Do not insert your fingers or other objects into the air conditioner indoor or outdoor unit, rotating parts may cause injury.

- Do not touch the outdoor unit during lightning, it may cause electric shock.

- Do not expose yourself directly to cold air for a long period to avoid excess cooling.

- Do not sit or step on the unit, you may fall down accidentally.
Safety precautions

Remote control
Do not allow infants and small children to play with the remote control to prevent them from accidentally swallowing the batteries.

Power supply
Do not use a modified cord, joint cord, extension cord or unspecified cord to prevent overheating and fire.

To prevent overheating, fire or electric shock:
- Do not share the same power outlet with other equipment.
- Do not operate with wet hands.
- Do not over bend the power supply cord.
- Do not operate or stop the unit by inserting or pulling out the power plug.

If the supply cord is damaged, it must be replaced by the manufacturer, service agent or similarly qualified persons in order to avoid a hazard.

It is strongly recommended to be installed with Earth Leakage Circuit Breaker (ELCB) or Residual Current Device (RCD) to prevent electric shock or fire.

To prevent overheating, fire or electric shock:
- Insert the power plug properly.
- Dust on the power plug should be periodically wiped with a dry cloth.

Stop using the product if any abnormality/failure occurs and disconnect the power plug or turn off the power switch and breaker. (Risk of smoke/fire/electric shock) Examples of abnormality/failure
- The ELCB trips frequently.
- Burning smell is observed.
- Abnormal noise or vibration of the unit is observed.
- Water leaks from the indoor unit.
- Power cord or plug becomes abnormally hot.
- Fan speed cannot be controlled.
- The unit stops running immediately even if it is switched on for operation.
- The fan does not stop even if the operation is stopped.

Contact your local dealer immediately for maintenance/repair.

This equipment must be earthed to prevent electrical shock or fire.

Prevent electric shock by switching off the power supply and unplug:
- Before cleaning or servicing,
- When extended non-use, or
- During abnormally strong lightning activity.

Indoor unit and outdoor unit
Do not wash the indoor unit with water, benzine, thinner or scouring powder to avoid damage or corrosion at the unit.

Do not use for preservation of precise equipment, food, animals, plants, artwork or other objects. This may cause quality deterioration, etc.

Do not use any combustible equipment in front of the airflow outlet to avoid fire propagation.

Do not expose plants or pet directly to airflow to avoid injury, etc.

Do not touch the sharp aluminium fin, sharp parts may cause injury.

Do not switch ON the indoor unit when waxing the floor. After waxing, aerate the room properly before operating the unit.

Do not install the unit in oily and smoky areas to prevent damage to the unit.

Do not dismantle the unit for cleaning purpose to avoid injury.

Do not step onto an unstable bench when cleaning the unit to avoid injury.

Do not place a vase or water container on the unit. Water may enter the unit and degrade the insulation. This may cause an electric shock.

Do not open window or door for long time during operation, it may lead to inefficient power usage and uncomfortable temperature changes.

Prevent water leakage by ensuring drainage pipe is:
- Connected properly,
- Kept clear of gutters and containers, or
- Not immersed in water

After a long period of use or use with any combustible equipment, aerate the room regularly.

After a long period of use, make sure the installation rack does not deteriorate to prevent the unit from falling down.

Remote control
Do not use rechargeable (Ni-Cd) batteries. It may damage the remote control.

To prevent malfunction or damage of the remote control:
- Remove the batteries if the unit is not going to be used for a long period of time.
- New batteries of the same type must be inserted following the polarity stated.

Power supply
Do not disconnect the plug by pulling the cord to prevent electric shock.
How to use

**To reach temperature quickly (Cooling only)**

- The unit controls set temperature according to room temperature to accelerate room cooling.

- After max 4 hours, the set temperature is shifted according to activity detection.
- Fan speed is fixed at AUTO, fan speed selection is prohibited.
- During unit is off, press will turn on the unit with i AUTO-X mode.
- i AUTO-X mode can be cancelled by pressing the respective button again.

**To select operation mode**

- AUTO - For your convenience
- HEAT - To enjoy warm air
- COOL - To enjoy cool air
- DRY - To dehumidify the environment
- FAN - To circulate air in the room
- i AUTO-X - To reach temperature quickly (Cooling only)

**To improve humidity and moisture level**

- This operation reduces air dryness and provides you with a comfortable living environment during COOL mode only.
- When vertical airflow direction is set to AUTO, it stops at lower position to avoid cold air contact. However, you can adjust the louver direction manually.

**To switch between powerful & quiet**

- POWERFUL: To reach temperature quickly
- QUIT: To enjoy quiet operation
- NORMAL: To enjoy normal operation

**Auto OFF/ON button**

Use when remote control is misplaced or a malfunction occurs. Raise the front panel:
- To use in AUTO mode, press the button once.
- To use in COOL mode, press and hold the button until 1 beep is heard, then release.
- To use in HEAT mode, press and hold the button until 1 beep is heard, then release. And press again until 2 beeps are heard, then release.
- Press the button again to turn off.
To optimise energy saving

ECONAVI

To purify the air

NANOE-G

NANOE-G starts automatically when the unit is turned on with OFF/ON or timer ON is activated.

Can be activated even when the unit is turned off. In this condition, the unit will operate as a fan with AUTO fan speed and flap swing.

To deactivate viruses/bacteria on the filter

POWER

NANOE-G in-filter deactivation may activate up to 150 minutes. Turning on the unit cancels this operation.

To disable this operation in the future, press and hold until a short beep sound is heard. This will not disable the nanoe-G to purify the air.

To restore the nanoe-G in-filter deactivation, press and hold until a long beep sound is heard.

AIR SWING

To adjust airflow direction

(Remote control display)

Keep the room ventilated.

In COOL/DRY mode, if AUTO is set, the flaps swings left/right and up/down automatically.

In HEAT mode, if AUTO is set, the horizontal flap is fixed at the predetermined position. The vertical flap swings left/right after the temperature rises.

In i AUTO-X mode, if AUTO is set, the horizontal flap is fixed at the lower position and shift to the upper position after reaches set temperature. The vertical flap movement depends on human activity sensor.

If manual is set, the horizontal and vertical flap are fixed at the predetermined position.

Do not adjust the flap by hand.

Auto Restart Control

If power is resumed after a power failure, the operation will restart automatically after a period of time with previous operation mode and airflow direction.

This control is not applicable when TIMER is set.

To set the timer

2 sets of ON and OFF timers are available to turn ON or OFF the unit at different preset times.

1. Select ON or OFF timer
   Each time pressed:
   - ON or OFF
   - Cancel

   Example: OFF at 22:00

2. Set the time
   
   Example: SET

3. Confirm
   
   • To cancel ON or OFF timer, press ON or OFF to select respective ON or OFF then press CANCEL.
   • If timer is cancelled manually or due to power failure, you can restore the timer again by pressing ON or OFF to select respective ON or OFF then press SET.
   • The nearest timer setting will be displayed and will activate in sequence.
   • When ON Timer is set, the unit may start earlier (up to 35 minutes) before the actual set time in order to achieve the desired temperature on time.
   • Timer operation is based on the clock set in the remote control and repeats daily once set.
   For clock setting, please refer to Quick guide.

Note

ECONAVI, POWERFUL/QUIET, NANOE-G

• Can be activated in HEAT, COOL and DRY mode and can be cancelled by pressing the respective button again.

• Cannot be selected at the same time.

• Cannot be activated during MILD DRY.
To learn more...

**Operation mode**

**AUTO**: During operation mode selection the POWER indicator blinks.
- Unit selects operation mode every 10 minutes according to setting temperature and room temperature.

**HEAT**: Unit takes a while to warm up. The POWER indicator blinks during this operation.

**COOL**: Provides efficient comfort cooling to suit your needs.

**DRY**: Unit operates at low fan speed to give a gentle cooling operation.

**FAN**: To circulate air in the room.

**i AUTO-X**: The fast cooling is ideal when you come home on a hot day.

**nanoe-G in-filter deactivation**

Depending on the unit’s accumulated operation time, nanoe-G in-filter deactivation may activate only once a day after the unit turned off.

To remove the moisture left in the internal parts, the fan will operate for 30 minutes with flap opened slightly. This process only applicable when the unit is operated in COOL/DRY mode before turned off. Then, nanoe-G deactivates viruses/bacteria on the filter for 2 hours with fan stopped and flap closed.

Do not turn off the power supply during this operation. After power failure, this operation will not resume.

**ECONAVI**

ECONAVI

The unit will start to initialise (for approximately 1 minute) → The human activity sensor and the sunlight sensor will start to detect.

**Note**

**AIR SWING**: When manual AIR SWING is selected, the ECONAVI operations will be cancelled.

**Human activity sensor operation**

ECONAVI: Detecting human presence and activity, the unit controls room temperature to save energy.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Human</th>
<th>Low activity</th>
<th>Normal activity</th>
<th>High activity</th>
<th>Absent</th>
</tr>

<td>☀️</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**ECONAVI** is activated, the unit maintains set temperature until a high sunlight intensity is detected. The sunlight sensor detects sunlight intensity during weather or day/night changes, and the unit adjusts temperature.

- In a room without window or with thick curtain, the sunlight sensor will judge as cloudy/night.
The human activity sensor will also scan for area of heat source and movement in a room.

Detection area

- Based on area activeness horizontal airflow direction will adjust either fix at predetermined position or swing left/right periodically.
- The human activity sensor performance is influenced by indoor unit location, movement speed, temperature range, etc.

- The human activity sensor may:
  - mistakenly detect an object with heat source & movement similar to human, such as pets, etc.
  - mistakenly detect as non-heat source & movement if a human stays motionless for certain period of time.
- Do not place large objects near the sensor and keep away heating units or humidifier from the sensor’s detection area. They may cause sensor malfunction.

**i AUTO-X**

*Fast cooling to maximum of 4 hours, the unit continue to provide cooling comfort according human presence and activity detection.*

Cleaning instructions

To ensure optimal performance of the unit, cleaning has to be carried out at regular intervals. Dirty unit may cause malfunction and you may see nanoe-G indicator blinks or error code “H99”. Please consult authorised dealer.

- Switch off the power supply and unplug before cleaning.
- Do not touch the aluminium fin, sharp parts may cause injury.
- Do not use benzine, thinner or scouring powder.
- Use only soap (≥ pH 7) or neutral household detergent.
- Do not use water hotter than 40 °C.

**Indoor unit**
Wipe the unit gently with a soft, dry cloth.

**Human activity sensor**
Do not hit or violently press or poke it with a sharp object. This can lead to damage and malfunction.

**Outdoor unit**
Clear debris that surround the unit. Clear any blockage from drain pipe.

**Front panel**
Wash gently and dry.

Remove the front panel

1. Raise
2. Pull out

Close it securely

1. Insert at both sides
2. Close down
3. Press both ends of the front panel

**nanoe-G Generator**
Every 2 weeks

- Clean with dry cotton bud.
- Do not touch during operation.

**Air filters**
Every 2 weeks

- Wash/rinse the filters gently with water to avoid damage to the filter surface.
- Dry the filters thoroughly under shade, away from fire or direct sunlight.
- Replace any damaged filters.

**For seasonal inspection after extended non-use**

- Checking of remote control batteries.
- No obstruction at air inlet and air outlet vents.
- Use Auto OFF/ON button to select COOL/HEAT operation. After 15 minutes of operation, it is normal to have the following temperature difference between air inlet and air outlet vents:
  - COOL: ≥ 8 °C
  - HEAT: ≥ 14 °C

**For extended non-use**

- Activate HEAT mode for 2~3 hours to remove moisture left in the internal parts thoroughly to prevent mould growth.
- Turn off the power supply and unplug.
- Remove the remote control batteries.
## Troubleshooting

The following symptoms do not indicate malfunction.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mist emerges from indoor unit.</td>
<td>• Condensation effect due to cooling process.</td>
</tr>
<tr>
<td>Water flowing sound during operation.</td>
<td>• Refrigerant flow inside the unit.</td>
</tr>
<tr>
<td>The room has a peculiar odour.</td>
<td>• This may be due to damp smell emitted by the wall, carpet, furniture or clothing.</td>
</tr>
<tr>
<td>Indoor fan stops occasionally during automatic fan speed setting.</td>
<td>• This helps to remove the surrounding odour.</td>
</tr>
<tr>
<td>Airflow continues even after operation has stopped.</td>
<td>• Extraction of remaining heat from the indoor unit (maximum 30 seconds).</td>
</tr>
<tr>
<td>Operation is delayed a few minutes after restarting.</td>
<td>• The delay is a protection to the unit’s compressor.</td>
</tr>
<tr>
<td>Outdoor unit emits water/steam.</td>
<td>• Condensation or evaporation occurs on pipes.</td>
</tr>
<tr>
<td>TIMER indicator is always on.</td>
<td>• The timer setting repeats daily once set.</td>
</tr>
<tr>
<td>POWER indicator blinks during HEAT mode with no warm air supply (and flap is closed).</td>
<td>• The unit is in defrost mode (and AIR SWING is set to AUTO).</td>
</tr>
<tr>
<td>Indoor fan stops occasionally during heating operation.</td>
<td>• To avoid unintended cooling effect.</td>
</tr>
<tr>
<td>POWER indicator blinks before the unit is switched on.</td>
<td>• This is a preliminary step in preparation for the operation when the ON timer has been set.</td>
</tr>
<tr>
<td>Cracking sound during operation.</td>
<td>• Changes of temperature caused the expansion/contraction of the unit.</td>
</tr>
<tr>
<td>Discoloration of some plastic parts.</td>
<td>• Discoloration is subject to material types used in plastic parts, accelerated when exposed to heat, sun light, UV light, or environmental factor.</td>
</tr>
<tr>
<td>Louder noise at outdoor unit during early operation of i AUTO-X.</td>
<td>• The compressor and fan rotate at higher speed to boost cooling performance during initial operation.</td>
</tr>
<tr>
<td>Dust may have collected around the front panel, grilles and wall surrounding the unit after extended use.</td>
<td>• The dust accumulation is due to air purification effect of negative ions from nanoe-G. Remove the dust regularly with a clean dampened cloth.</td>
</tr>
</tbody>
</table>

Check the following before calling for servicing.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Check</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operation in HEAT/COOL mode is not working efficiently.</td>
<td>• Set the temperature correctly.</td>
</tr>
<tr>
<td>Noisy during operation.</td>
<td>• Close all doors and windows.</td>
</tr>
<tr>
<td>Remote control does not work.</td>
<td>• Clean or replace the filters.</td>
</tr>
<tr>
<td>Remote control does not work. (Display is dim or transmission signal is weak.)</td>
<td>• Clear any obstruction at the air inlet and air outlet vents.</td>
</tr>
<tr>
<td>The unit does not work.</td>
<td>• Check if the unit has been installed at an incline.</td>
</tr>
<tr>
<td>The unit does not receive the signal from the remote control.</td>
<td>• Close the front panel properly.</td>
</tr>
</tbody>
</table>

**NON SERVICEABLE CRITERIAS**

TURN OFF POWER SUPPLY AND UNPLUG then please consult authorised dealer under the following conditions:
• Abnormal noise during operation.
• Water/foreign particles have entered the remote control.
• Water leaks from indoor unit.
• Circuit breaker switches off frequently.
• Power cord becomes unnaturally warm.
• Switches or buttons are not functioning properly.

**The unit stops and the TIMER indicator blinks.**

Use remote control to retrieve error code.

1. Press for 5 seconds
2. Press until you hear beep sound, then write down the error code
3. Press for 5 seconds to quit checking
4. Turn the unit off and reveal the error code to authorised dealer

• For certain errors, you may restart the unit for limited operation with 4 beeps when operation starts.
Information for Users on Collection and Disposal of Old Equipment and used Batteries

[Information on Disposal in other Countries outside the European Union]
These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Note for the battery symbol (bottom two symbol examples):
This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.
