Getting started

Notes

Notes for an External HDD (USB HDD)

You can use an external HDD in the following two ways. (A single HDD cannot handle those two ways simultaneously.)

• For recorded titles
  Moving titles in the built-in HDD to a USB HDD to save the capacity of the built-in HDD.
  • The USB HDD must first be registered on this unit. (⇒ 71)

• For data files
  Playing back MP4, JPEG, MP3, etc. (data files) in a USB HDD with this unit.
  • The USB HDD must be formatted in FAT12, FAT16, FAT32 and NTFS file system.
  • The USB HDD over 2 TB is not usable.

  • This unit supports USB 2.0 High Speed.
  • Although this unit can use USB 3.0 devices as USB 2.0 devices, in certain cases USB 3.0 devices cannot be used due to differing connector shape, larger current ratings, etc. (Use of USB 2.0 devices is recommended.)
  • This unit does not recognize USB HDDs other than those in which the size of one sector is 512-bytes. (For details, consult the dealer of your USB HDD.)
  • This unit does not guarantee connection with all USB devices.

Notes for the disc

• Disc recorded on another device

• Play on other players
  • [BD-RE] [BD-R] When these discs cannot be played back on other Blu-ray Disc players, etc. (e.g., title recorded with HE-AAC audio format), convert the recording mode to play them back. (⇒ 44, File Conversion)
  • [DVD-R] [DVD-RW] [R] Finalisation is needed. (⇒ 70)
  • [R] If the disc failed to play on other equipment, we recommend you create a Top Menu (⇒ 70).

• Regarding 8 cm Disc
  This unit cannot record or edit the 8 cm disc. Only playback or copy to the HDD is possible.

• Discs that cannot be played

Unit care

HDD/USB HDD handling care

• The HDD is a high precision device
The HDD is a high precision recording instrument and is easily susceptible to damage. Therefore, be careful of the following points while the unit is turned on, especially during operation, otherwise the HDD and the recorded content may be damaged:
- Do not subject the unit to any vibration and shock.
- Do not remove the AC mains lead from the household mains socket.

• The HDD is a temporary storage device
• The HDD is not an everlasting storage device. It is recommended to save the recorded content on a disc or to keep the original data or CDs that they were copied from.
• If you notice a problem with the HDD such as repetitive strange sounds, immediately save (backup) all content and request service. If you continue using the HDD with a problem, the unit or the recorded content will be damaged.

• If the HDD or USB HDD is damaged, the recorded content cannot be recovered.

When moving the unit
Before moving the unit, ensure the disc tray is empty.
1 Switch the unit to standby mode. (Wait until “BYE” disappears from the display.)
2 Remove the AC mains lead from the household mains socket.
3 Move only after the unit has come to a complete stop (approx. 3 minutes) in order to avoid subjecting to vibration and shock. (Even after the unit is switched to standby mode, the HDD continues operating for a short time.)

Cleaning

• This unit
- Wipe with a soft, dry cloth.
- Never use alcohol, paint thinner or benzine to clean this unit.
- Before using chemically treated cloth, carefully read the instructions that came with the cloth.

• This unit’s lens
Use the Lens cleaner (optional) to clean the unit’s lens.

Lens cleaner: RP-CL720AE
• This lens cleaner may not be for sale depending on the region.

When requesting this unit for repair
The registration of the USB HDD may be cancelled in the process of repairing this unit. You can use the USB HDD again by re-registering, but all recorded content already on the USB HDD will be lost. In such cases, the recorded content (data) cannot be recovered.

To dispose or transfer this unit
This unit may contain private information. Before disposing of or transferring this unit, perform the following to delete the data, including personal or secret information:
- Format HDD (⇒ 77, 82)
- Perform “Shipping Condition” (⇒ 77, 93)

Setup precautions

• Place the unit on a surface that is flat and not subject to vibration or impact.
• Do not place on anything that generates heat like a Set Top Box, etc.
• Place in an area where condensation does not occur. Conditions where condensation may occur
- When there is an extreme change in temperature (e.g., when subjected to an air conditioner or when cooled air directly impacts the unit).
- When there is high humidity or a lot of steam in the room.
In the above situation, without turning the unit on, let the unit adjust to the room temperature and wait 2–3 hours until condensation is gone.
• Do not block the cooling fan on the rear of the unit.
• The unit may breakdown if cigarette smoke or bug spray/vapour, etc. gets inside the unit.

#### Recording modes and approximate recording times

Depending on the content being recorded, the recording time may become shorter than indicated.

- **DR mode**

</tr>
<tr>
<td>DR (SD quality)</td>
<td>264 hours</td>
<td>6 hours 30 min.</td>
</tr>
</tbody>
</table>

- Recording time of DR mode may vary depending on the bit rate of broadcasting:
  - High Definition (HD) quality: estimated bit rate is 15 Mbps
  - Standard Definition (SD) quality: estimated bit rate is 8 Mbps

- **Regarding recording time remaining:**
  Remaining time in the DR mode is calculated with a bit rate of 15 Mbps. But the bit rate differs depending on the broadcast, so the displayed remaining time might be different from the actual remaining time.
