CHARGING THE BATTERY PACK

At the time of purchase, the battery pack is not charged. Please charge it fully before using it.

It has been found that counterfeit battery packs which look very similar to the genuine product are made available to purchase in some markets. Some of these battery packs are not adequately equipped with protective devices to meet the requirements of appropriate safety standards. There is a possibility that these battery packs may lead to fire or explosion. Please be advised that we are not liable for any accident or failure occurring as a result of use of a counterfeit battery pack. To ensure that safe products are used we recommend that a genuine Panasonic battery pack be used.

Guide to charging time and recording capacity

■ Charging/recording time

- Temperature: 25 °C/humidity: 60 %RH
- It is recommended that the battery be recharged in a place where the ambient temperature (and the battery temperature as well) is between 10 °C and 30 °C. (The battery temperature should also be the same.)
The indicated charging time is for when the AC adaptor is used for charging.
