Before use, please read these instructions completely.

Web Site : http://www.panasonic-europe.com
Dear Customer,

We would like to take this opportunity to thank you for purchasing this Panasonic SD Video Camera. Please read these Operating Instructions carefully and keep them handy for future reference. Please note that the actual controls and components, menu items, etc. of your SD Video Camera may look somewhat different from those shown in the illustrations in these Operating Instructions.

Caution for AC mains lead (For United Kingdom)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug. Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark ⊙ or the BSI mark ▶ on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as stated below. If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral, Brown: Live.

As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL ⊥ OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.
Before use
Remove the connector cover.

How to replace the fuse
The location of the fuse differ according to the type of AC mains plug (figures A and B).
Confirm the AC mains plug fitted and follow the instructions below.
Illustrations may differ from actual AC mains plug.
1) Open the fuse cover with a screwdriver.
2) Replace the fuse and close or attach the fuse cover.

EMC Electric and magnetic compatibility
This symbol (CE) is located on the rating plate. (EB/EP only)
IF THE POWER CORD OF THIS EQUIPMENT IS DAMAGED, IT MUST BE REPLACED WITH AN ELECTRICALLY APPROVED POWER CORD.

Use only the recommended accessories.
● Do not use any other AV cables and USB connection cables except the supplied one.
● When you use the cable which are sold separately, please make sure to use the one whose length is less than 3 m.
● Keep the Memory Card out of reach of children to prevent swallowing.

How to replace the Fuse (Only for Hong Kong Special Administrative Region of China and Saudi Arabia)
The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below. Illustrations may differ from actual AC mains plug.
1) Open the fuse cover with a screwdriver.
2) Replace the fuse and close or attach the fuse cover.
Information for your safety

WARNING:
TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK OR PRODUCT DAMAGE,
● DO NOT EXPOSE ACCESSORIES (AC ADAPTOR, AC CABLE, BATTERY PACK, SD MEMORY CARD AND ETC.) TO RAIN, MOISTURE, DRIPPING OR SPLASHING AND THAT NO OBJECTS FILLED WITH LIQUIDS, SUCH AS VASES, SHALL BE PLACED ON THEM.
● USE ONLY THE RECOMMENDED ACCESSORIES.
● DO NOT REMOVE THE COVER (OR BACK); THERE ARE NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

Warning
Risk of fire, explosion and burns. Do not disassemble, heat above 60 °C or incinerate.

CAUTION!
● DO NOT INSTALL OR PLACE THIS UNIT IN A BOOKCASE, BUILT-IN CABINET OR IN ANOTHER CONFINED SPACE. ENSURE THE UNIT IS WELL VENTILATED. TO PREVENT RISK OF ELECTRIC SHOCK OR FIRE HAZARD DUE TO OVERHEATING, ENSURE THAT CURTAINS AND ANY OTHER MATERIALS DO NOT OBSTRUCT THE VENTILATION VENTS.
● DO NOT OBSTRUCT THE UNIT’S VENTILATION OPENINGS WITH NEWSPAPERS, TABLECLOTHS, CURTAINS, AND SIMILAR ITEMS.
● DO NOT PLACE SOURCES OF NAKED FLAMES, SUCH AS LIGHTED CANDLES, ON THE UNIT.
● DISPOSE OF BATTERIES IN AN ENVIRONMENTALLY FRIENDLY MANNER.

The socket outlet shall be installed near the equipment and easily accessible.
The mains plug of the power supply cord shall remain readily operable.
To completely disconnect this apparatus from the AC Mains, disconnect the power supply cord plug from AC receptacle.
PRECAUTIONS

**IMPORTANT**

- **Indemnity concerning recording content**
  The manufacturer shall in no event be liable for the loss of recordings due to malfunction or defect of this unit, its accessories or recordable media.

- **Carefully observe copyright laws**
  Whatever you have recorded and created can be used for your personal entertainment only. Under copyright laws, other materials cannot be used without obtaining permission from the holders of the copyrights.

- **For the purposes of these operating instructions**
  SD Memory Card and SDHC Memory Card are referred to as the “SD card”.

- **Camera and SD card (sold separately) temperature**
  After use and battery charging, the battery will be hot. Also, during use, although the unit's body and SD card become hot, there is nothing wrong with the unit.

- **LCD monitor**
  Due to limitations in LCD production technology, there may be some tiny bright or dark spots on the LCD monitor screen. However, this is not a malfunction and does not affect the recorded picture.

- **Built-in lithium battery**

  **WARNING**
  THE LITHIUM BATTERY IN THIS EQUIPMENT MUST ONLY BE REPLACED BY QUALIFIED PERSONNEL. WHEN NECESSARY, CONTACT YOUR LOCAL PANASONIC SUPPLIER.

  (For Australia)

  **WARNING**
  THE LITHIUM BATTERY IN THIS UNIT MUST ONLY BE REPLACED BY QUALIFIED PERSONNEL. IF THIS IS NECESSARY, CONTACT THE PANASONIC CUSTOMER CARE CENTRE ON 132600 FOR YOUR NEAREST AUTHORIZED SERVICE CENTRE.

(IMPORTANT) Water resistance

Water resistance
The water-resistance and dustproofing of this unit comply with IP58 of IEC 60529 “Degrees of protection provided by enclosures (IP Code)”. The unit passed water-resistance tests (IEC 60529), in which it was submerged to a depth of 1.5 m for 30 minutes, and dustproof tests (IP Code: IP58) in accordance with Panasonic standards, but this does not guarantee that the unit will not be destroyed or damaged by contact with water and dust.
Observe the following precautions and avoid use in water pressure above the guaranteed performance level and in very dusty environments. (Accessories are not water-resistant.)
The penetration of water into the unit due to mishandling by the user is not covered by the guarantee given for the unit’s water resistance performance. If water should penetrate the unit, stop using the unit, and consult the dealer from whom you purchased the unit.

Underwater use
• Use the unit at depths no deeper than 1.5 m in water of 0˚C to 40˚C. Do not use it underwater for 30 continuous minutes or longer. After use underwater, wipe off adhering water and dry in a well-ventilated location before using the unit underwater again.
• Do not open the card/battery door or the terminal cover underwater.
• Do not impact the unit against anything underwater. (Impacts may lead to water infiltration.)
• Do not dive or jump into water with the unit in your hands. Also, do not use the unit in swift currents, waterfalls or other places where exposed to high water pressure. (Doing so may subject the unit to high water pressure levels which may lead to damage.)
• Securely attach the strap when submerging in water so as to not lose hold of the unit.

Care after underwater use
• Promptly wipe off any detergent, soap, hot spring water, bath liquids, suntan oil, sun block, medicines or other chemicals that splash on the unit. (The unit’s water-resistance is effective only in fresh and saltwater.)
• After use in water or near the sea, swish in fresh water (in a shallow container) with the LCD monitor open and closed to rinse off salt water, sand and other matter, then let soak for 30 minutes or less. After that, wipe off water with a dry cloth. (Washing the unit in soap or neutral detergents or leaving the unit with salt water adhering to it can cause corrosion, discolouring and degrade water-resistant performance.)
   After rinsing, set the unit with the drain port facing downward in a well-ventilated shady place to dry.
   Drying with the hot air of a hairdryer or other device can cause deformation and degrade water-resistant performance.
   Water may run from the drain port (P.11) if the unit is not dry on the inside.
Handling

• Avoid impacting the unit against anything, for example, when carrying it by the strap. Strong impacts can deform the unit's body and degrade water-resistant performance. The unit’s water resistance performance will no longer be guaranteed in the event that the unit has been dropped or otherwise subjected to strong impact.
• Do not leave the unit where exposed to low temperatures of 0 °C and below or high temperatures of 40 °C and above. (Extreme temperatures can degrade water-resistant performance.) In particular, do not leave the unit sitting on sandy beaches or in a sun-heated car. (The unit can become hot and sand can adhere to it.) If.
• Do not insert pointed objects into the microphone or speaker holes. (The internal water-resistant sheet can be damaged and compromise water-resistant performance.)
• Do not plug the unit in or unplug it with wet hands.

Replacing the water-resistant packing

The performance of the unit’s water-resistant packing degrades over the course of 18 months or more. It is recommended to have your dealer replace this packing (you will be charged for this) at least once every 18 months.

Card/Battery door and terminal cover

• Slide the lock to the OPEN side and lift the projection with a finger to open.
• When closing, be careful that sand, hair, dust and other foreign matter are not trapped in the door and the cover, and press [ ] until hearing them snap closed, to prevent water infiltration. (Check that the red marker of the lock is no longer visible.)

• Do not open and close the card/battery door and terminal cover with wet hands or when in or near water.
• If the unit is wet, wipe off water before opening the card/battery door and terminal cover.
• If water gets inside the compartments, wipe completely dry before closing the covers.

Lens, microphone and speaker

• Wipe water and dirt from the lens with a cleaning cloth before recording.
• The sound may be muffled or distorted by water droplets on the microphone or speaker. In such a case, wipe off water and dry the unit before using it.

Underwater button [UNDERWATER] (P.41)
Auto button [AUTO] (P.38)
Delete button [ ] (P.50)
Manual button [MANUAL AF/MF] (P.38)

Mode dial (P.20)

: Motion picture recording (P.28)
: Motion picture playback (P.46)
: Still picture recording (P.30)
: Still picture playback (P.49)
OFF : Turning the unit OFF (P.20)
Using the 2-way hand strap (supplied)

Using as strap

1. Hold the camera upright, hold the hand strap loop, and pull up to stretch the strap.
2. Fit over your wrist and adjust the length of the strap.

Using as a grip belt

1. Screw the adaptor hanging from the strap into the tripod hole.
2. Fit over your hand and adjust the length of the strap.

Using the LCD monitor

Images can be checked on the LCD monitor when recording.

1. Open the LCD monitor.
2. Adjust the angle.

- Hold \[ \text{ } \] to open.

- Opening the LCD monitor beyond the mechanical limit or turning it more than 90° may allow water to infiltrate and damage the mechanism.
- Brightness and colour density can be adjusted. (P.25)

- Please confirm the latest information on the following website. (This website is in English only.)
• SDHC Memory Cards can be used only with SDHC devices.
  Be careful when sharing cards between devices.
• Be sure to format SD cards with this unit only.
  If cards are formatted on a PC or other device, recording may take time and
  the card may become unusable with the unit.
• Before using an SD card from another device, copy the data onto a PC or
  other storage device and then format the card with this unit.
• Keep the Memory Card out of reach of children to prevent swallowing.
• This unit supports SD Memory Cards formatted to FAT12 or FAT16 file
  systems and SDHC Memory Cards formatted to a FAT32 file system.
• SD speed Class 2 **CLASS**<sup>2</sup>
  Class 2 speed standard for SD cards. This and higher types of SD cards
  operate stably in devices for which Class 2 or higher SD cards are
  recommended such as this unit.
**Setup 1 Charging**

The unit is in the standby condition when the AC adaptor is connected. The primary circuit is always "live" as long as the AC adaptor is connected to an electrical outlet.

Insert the battery into the unit and charge it.

1. **Set the mode dial to [OFF].**
   The unit runs on AC power (status indicator lit red) and the battery cannot be charged when the mode dial is set to any position other than [OFF].

2. **Open the card/battery door.**
   Slide the lock to the OPEN side and lift the projection with a finger to open.

3. **Insert the battery.**
   Ensure that battery is oriented correctly, and push it into the compartment in the direction of the \[▲\] until it snaps into place and it is locked by the lever.
   (To remove the battery, press the lever downward.)

4. **Close the card/battery door.**
   Press \[\] until hearing the door snap closed.

5. **Connect the AC adaptor (supplied).**
   Connect the AC cable to the AC adaptor and then to an AC outlet.

*Do not use the AC cable and AC adaptor of this unit with other devices. Also, do not use the AC cables and AC adaptors of other devices with this unit.
We recommend using Panasonic batteries. (VW-VBJ10)
If you use other batteries, we cannot guarantee the quality of this product.

**CAUTION**
Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

- Do not heat or expose to flame.
- Do not leave the battery in an automobile exposed to direct sunlight for a long period of time with doors and windows closed.

6. **Open the terminal cover.**
Slide the lock to the OPEN side and lift the projection with a finger to open.

7. **Plug the DC plug into the DC input terminal on the unit.**

   **Status indicator**
   - Flashing red at approx. 1 second intervals: Charging in progress
   - Off: Charging complete

If the status indicator does the following:
- **Does not flash:** Remove and reinsert the battery, and disconnect and reconnect the AC adaptor.
  If the status indicator still does not flash, contact your dealer.
- **Flashes rapidly at approx. 0.25 seconds intervals:**
  The battery cannot be charged. Try doing the following:
  - Remove and reinsert the battery, and try recharging the battery.
  - The battery temperature or surrounding temperature is too high/low, therefore wait until the unit and the battery are at suitable temperatures and try recharging the battery.
  If battery charging still does not commence, contact your dealer.
- **Flashes slowly at approx. 3 seconds intervals:**
  Charging requires time for the following reasons:
  - The battery has been excessively discharged.
  - The battery temperature or ambient temperature is too high/low.

- If power to the unit is activated while the battery is charging, the AC power supply will be used and charging interrupted.

The battery is not charged at the time of purchase. Be sure to charge it before use.
For charging time (P.18)
Setup 2: Charging time, recordable time and Remaining battery capacity indication

Charging time and recordable time

Times are given for a temperature of 25 °C and humidity of 60%. The charging time shown in the table are approximations. In high or low temperatures, charging requires more time.

- Supplied battery VW-VBJ10 (3.6 V, 1000 mAh)

<table>
<thead>
<tr>
<th>Charging time</th>
<th>Approx. 2 hours 15 minutes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recordable time</td>
<td>Maximum continuously recordable time</td>
</tr>
<tr>
<td></td>
<td>Approx. 1 hour 10 minutes</td>
</tr>
</tbody>
</table>

- Actual recordable time includes recording and stopping, turning the unit ON/OFF, zooming and other operations.
- Recordable time varies according to conditions of use. For example, the recordable time shortens when the [POWER LCD] setting is on while recording.
- The recordable time shortens in some environments (i.e., low temperatures, etc.), therefore it is recommended to charge a spare battery.

Remaining battery capacity indication

The battery indication changes, as the remaining battery power decreases.

High ➔ Medium ➔ Low ➔ Flashing (Charge battery.)
Inserting/Removing SD cards (sold separately)

SD cards are sold separately.
Preparations: Set the mode dial to [OFF].
(Check that the status indicator is out.)

Inserting or removing an SD card with the power ON may damage the unit and destroy data on the card.

1. Open the card/battery door.
   Slide the lock to the OPEN side and lift the projection with a finger to open.

2. Insert/Remove the SD card.
   - To insert:
     Face the label upwards and slide the card in straight until hearing it catch.
   - To remove:
     Press the centre of the SD card and pull the card out straight.

3. Close the card/battery door.
   - Press [ ] until hearing the door snap closed.
   - If the door does not close completely, remove the SD card, check its orientation and reinsert it into the slot.

While the card access lamp is lit, reading, recording, playback, deletion or other processing is being executed. Performing the following operations while the lamp is lit may damage the SD card and its content and the unit may not function properly.
- Turning off the unit
- Removing battery or AC adaptor
- Opening card/battery door and removing SD card
- Rotating the mode dial
- Shaking or impacting the unit
Setup 4 Turning the unit ON/OFF (Selecting modes)

Rotate the mode dial slowly but surely to the desired position without turning it recklessly.

Set to icon of desired mode.

<table>
<thead>
<tr>
<th>Status indicator</th>
<th>When turning the unit ON: Lit red (When selecting)</th>
<th>When turning the unit OFF: Off</th>
</tr>
</thead>
</table>

- The very first time that power is turned ON, a message appears prompting you to set the date and time. (P.24)

Turning the unit ON/OFF from the LCD monitor

When [ ] or [ ] is selected, the unit turns ON when the LCD monitor is opened and OFF when it is closed. (During motion picture recording, the unit does not turn OFF when the LCD monitor is closed.)

- When [QUICK START] (next page) is [ON], the unit goes on quick start standby when the LCD monitor is closed.
- When not in use, set the mode dial to [OFF].

OFF - Turning the unit OFF
- Motion picture recording mode (P.28)
- Motion picture playback mode (P.46)
- Still picture recording mode (P.30)
- Still picture playback mode (P.49)
Rotate the mode dial to motion picture recording/playback, still picture recording/playback or turning the unit OFF.

Quick starts

Quick starts are available when the mode is set to [ ] and [ ].

When [QUICK START] is [ON], the unit responds as follows to LCD monitor operations:

<table>
<thead>
<tr>
<th>LCD monitor operation</th>
<th>Unit response</th>
<th>Status indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>When opened</td>
<td>Shooting can start in approx. 0.6 second.</td>
<td>Lit red</td>
</tr>
<tr>
<td>When closed</td>
<td>The unit goes on quick start standby*</td>
<td>Flashing green</td>
</tr>
</tbody>
</table>

* The unit consumes about half as much power as when recording is stopped.

Setting [QUICK START]

Make settings from the menus. (P.22)

MENU → [SETUP] → [QUICK START] → [ON]
(To turn OFF, select [OFF].)

• [QUICK START] is [ON] at the time of purchase.

- The quick start standby is cancelled and the unit turns OFF (status indicator out) in the following situations.
  - When quick start standby mode continues for more than about 5 minutes
  - When the mode dial is rotated
  - When white balance is set to [AWB], quick starts require more time if the light source differs from that prior to quick starting, because automatic adjustments are performed. (However, automatic adjustments are not performed when using the Colour night view function.)
  - Starting may require more time than usual if the unit is impacted.
  - Zoom magnification becomes 1x after quick starts.
  - If [POWER SAVE] (P.78) is set to [5 MINUTES] and the unit automatically goes on quick start standby, close and reopen the LCD monitor.
Setup 5 Setting from the menu, changing the display language

The menu cannot be displayed during recording or playback. For menu items (P.76 “Menu List”)

1 Display the menu.
   The menu displayed differs according to mode.
   
2 Select the top menu.
   (Top menu for [ ] and [ ] modes)
   
3 Enter the top menu.
   or

4 Select a submenu.

5 Enter the selected submenu.
   or
The cursor buttons are used to select functions, execute operations and make menu settings.

6 Select an item.

7 Enter the selected item.

8 Close the menu.

Using the cursor buttons
The cursor buttons are used to select and enter items on menus or thumbnail displays.

- To move the cursor
  - The cursor moves in the direction of the respective cursor buttons ▲▼◄► when pressed.

- Pressing the centre enters the selection.

- Do not rotate the mode dial while menus appear on the LCD monitor.
- You cannot record or perform other operations while menus appear on the LCD monitor.

Changing the display language
The display and menu language can be changed.

MENU—[LANGUAGE]
Setting the date and time

Before recording, check that the date and time have been set. The very first time that power is turned ON, a message appears prompting you to set the date and time. Select [YES (ใช่)], press the centre of the cursor buttons and proceed to step 3.

1. Set to [ ] or [ ].
2. Select the desired menu.
   - [BASIC] → [CLOCK SET] → [YES]
3. Set the date and time.
4. Enter the date and time.
   - The clock function starts at [00] seconds.
   - After pressing the [MENU] button and closing the menu, check the date and time displays.

To change the date and time display
- To change an item
  - [SETUP] → [DATE/TIME]
  - [OFF]: Date and time are not displayed.
  - [D/T]: Date and time are displayed.
  - [DATE]: Only the date is displayed.

To change the date format
- [SETUP] → [DATE FORMAT]

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
and adjusting the LCD monitor

- After setting the date and time, summer time can be set as in “Setting home city and region” of the world time function (P.44).
- If [ - - ] is displayed for the date and time, the built-in lithium battery has run down. Charge the battery and set the time as follows. The built-in lithium battery is charged when the AC adaptor is connected to the unit or when a battery is inserted into the unit. If charged for about 24 hours, the date and time can be saved in memory for about 6 months. (The battery is charged even if the unit is turned OFF.)

### Adjusting the LCD monitor

LCD monitor colour and brightness can be adjusted. (Settings do not affect recorded images.) For setting from the menu (P.22)

1. **Select the desired menu.**
   - Press **MENU** → [SETUP] → [LCD SET] → [YES]

2. **Select and adjust the item.**
   - Select an item. To adjust
     - [BRIGHTNESS]: Adjusts brightness.
     - [COLOUR]: Adjusts colour density.

   - **POWER LCD**
     - Normal brightness
     - : The LCD monitor brightens.
     - : The LCD monitor brightens more.
     - **[BRIGHTNESS]** is automatically selected when the AC adaptor is used.

   - **[COLOUR]**
Recording 1

Before recording

Basic stance

- Hold the unit firmly with both hands
- Be careful not to block microphone or sensor
- Stand with back to sun to avoid subject being in shadow
- Keep elbows close to body
- Using the “sub record” button can be helpful when recording at waist height
- Stand with legs slightly apart for stability

Taking pictures underwater

This unit can take pictures underwater to depths of 1.5 m (max. 30 minutes duration). To take pictures underwater, press and hold the UNDERWATER button so as to set the underwater mode. Colouring and audio recording are adapted for underwater environments. (P.41)

Before taking pictures underwater, read “(IMPORTANT) Water resistance” (P.6-7) in order to use the unit correctly. Improper use can lead to water infiltration and damage.
Record motion and still pictures onto the SD card. Recorded motion and still pictures are referred to as “scenes” with this unit.

**Recording can be done in two ways: “Automatic recording” or “Manual recording”**.

**Automatic recording (motion/still pictures)**
(This is the default setting at the time of purchase)
- To have colouring, focus, and brightness settings made automatically
[See P.28-31]

**Manual recording (motion/still pictures)**
(Manually adjust settings such as focus, white balance, shutter speed, iris/gain, etc.)
- To record with your own settings
- When automatic recording is unsatisfactory
- To use settings for particular scenes (scene mode)
[See P.38-43]

**Note**

Do not perform any of the following operations while the SD card is being accessed (card access lamp illuminated). Performing these actions may damage the card and its data.
- Turning off the unit
- Removing battery or AC adaptor
- Opening card/battery door and removing SD card
- Rotating the mode dial
- Shaking or impacting the unit

- For SD cards applicable with this unit (P.14)
Recording 2  🎥 Automatic recording (motion pictures)

1. Set to [ ].
2. Press AUTO  .
3. Start recording.
4. Stop recording.

Recording in progress (red)

Time remaining (flashes red when under 1 minute)

Recording continues even if the LCD monitor is closed.

Paused (green)
The unit is still recording if [ ] is red. Do not move the unit.

- When the unit is running on battery power, the unit is automatically turned OFF to conserve battery life if no operations are performed for about 5 minutes. To reuse the unit, set the mode dial to [OFF] and then reselect a mode.
- To prevent the unit from turning OFF automatically: (P.78 [POWER SAVE])
- The interval between starting and stopping recording is recorded as one single scene. The counter is reset to “0h00m00s” after each scene.

To change aspect ratio to 4:3

MENU → [ADVANCED] → [REC ASPECT] → [4:3]

Default aspect ratio at the time of purchase is set to 16:9 (widescreen).

To remove sound when record button is pressed

MENU → [SETUP] → [BEEP SOUND] → [OFF]

To remove on-screen display

MENU → [SETUP] → [DISPLAY] → [OFF]
Record motion picture with settings such as focus and colouring made automatically. For maximum recording times with battery see (P.18)

Recording mode and recording times

Recording times depend on the recording mode selected.

</tbody>
</table>

- The maximum continuous recording time for this unit is 8 hours.
- If a single scene exceeds 4 GB during motion picture recording, recording continues as a separate scene.
- Recording fast-moving objects or repeatedly writing on the same SD card numerous times shortens recording time.
- Mosaic-like interference may be generated on playback screens in the following circumstances:
  - Complicated pictures in background
  - The unit is moved greatly or quickly
  - Recording is of a rapidly moving object (particularly if recording mode is set to LP)

To change recording mode

MENU → [BASIC] → [REC MODE] → [XP] / [SP] / [LP]

If recording stops

- Recording may stop suddenly if an incompatible SD card has been inserted (P.14).
- Even with usable SD cards, recording may stop if you repeatedly write on the same SD card. Copy data onto a PC using MotionSD STUDIO, then format the SD card with this unit. (When formatted, all data on the SD card is erased.)
Recording

Automatic recording
(still pictures)

1. Set to [ ].
2. Press [ ].
3. Take picture.

- To remove shutter sound
  - Press [ MENU ] → [ ADVANCED ] → [ SHTR EFFECT ] → [ OFF ]

- To remove on-screen display
  - Press [ MENU ] → [ SETUP ] → [ DISPLAY ] → [ OFF ]

- Sound is not recorded.
- Recorded still pictures are referred to as “scenes” with this unit.
Take still pictures with settings such as focus and colouring made automatically. For maximum recording times with battery see (P.18)

### Picture quality

Picture size is 640×480 (0.3 M). The number of pictures that may be recorded depends on the picture quality selected.

**Picture quality and number of pictures for Panasonic SD cards (approximate)**

</tbody>
</table>

* This unit can record only up to 99,999 still pictures in these SD cards.

- Pictures taken with the [ ] setting may suffer a mosaic-like effect for certain objects.
- Depending on the object, the number of pictures that may be recorded may vary if a mixture of [ ] and [ ] settings have been used.

To change picture quality

-  MENU  →[BASIC]→[PICT.QUALITY]→[ ] / [ ]

To avoid jitter

(The image stabilizer function (P.33) cannot be used during still picture recording.)

- Hold the unit firmly with both hands, and keep elbows close to your body.
- Jitter becomes particularly difficult to avoid with zoom ratios of 4x and above. It is recommended that you reduce the zoom ratio and move closer to the object.
- Try using a tripod.
Recording 4  Zoom/avoid jitter/maintain

indicates functions used with motion pictures and  functions used with still pictures.

Enlarging (zoom)

Optical zoom can be used to enlarge objects by up to 10 times without degradation.

To enlarge further

Digital zoom can be used to enlarge objects by a maximum of 700 times. (Cannot be used during still picture recording.)

MENU  [ADVANCED]  [D.ZOOM]
[OFF]: No digital zoom
[25x]: Up to maximum of 25x
[700x]: Up to maximum of 700x
• Picture quality will be reduced by the same factor as the zoom ratio is increased by.
• The digital zoom range is displayed in blue in the zoom bar on the LCD monitor.

Release zoom button quietly (any sounds may be recorded).
• The image stabilizer function is recommended for motion picture recording at high zoom rates.
• Focus may not be aligned if zooming in too quickly.
• Zooming has two speeds. When the buttons are pressed lightly, zooming is done at slow speed. When pressed strongly, zooming is done at high speed.
Apply zoom effect to sounds (zoom microphone) [ZOOM MIC]
Synched with zooming operations, distance sounds are recorded when
enlarging and peripheral sounds are recorded at wide angles.

Avoid jitter (image stabilizer function) [SIS]
- Default setting at time of purchase is [ON].
- The image stabilizer function cannot be used in shooting still pictures or with Colour night view.
- Brightness may change and colouring may appear unnatural when using beneath fluorescent lighting.
- The image stabilizer function may not perform successfully in the following circumstances:
  - Using digital zoom
  - Jitter is significant
  - Location is extremely dark
  - When following moving object

Maintain brightness in dark locations (auto slow shutter) [AUTO SLW SHTR]
Shutter speed is automatically slowed (1/25 - 1/350) in dark places in order to
brighten captured images.

- Default setting at time of purchase is [ON].
- (When [ON], shutter speed is automatically adjusted between 1/25 and 1/350. When [OFF], shutter speed is automatically adjusted between 1/50 and 1/350.)
- Focus may not be aligned perfectly in extremely dark locations or where there is little contrast.
- When shutter speed is 1/25 - 1/49:
  - Images may appear as if frames were skipped and ghost images may appear.
  - The image stabilizer function does not work even when [ ] appears.
- During manual recording, shutter speed can be adjusted manually. The range in which shutter speed may be adjusted depends on the auto slow shutter setting. (P.42)
Other recording options

While recording is paused,
1. Display operation icons.

2. Change operation icons.
   Icons change with each press, as displayed below.

For manual focus mode (Press [MANUAL AF/MF] two times).
For manual mode (Press [MANUAL AF/MF] one time).

■ To hide operation icons ➔
Operation icons can be used to set effects, compensate brightness or perform other operations in one easy step. 

- Indicates functions used with motion pictures and functions used with still pictures.

**View explanations of functions during automatic recording (help mode)**

1. Select [1] in step 1 on the previous page.
2. Select function to be explained.

- To close, select [EXIT] in step 2, or press the [MENU] button.
- Functions cannot be set nor can pictures be taken in the help mode.

**Fade-in/Fade-out**

This function gradually fades images and audio in and out at the very beginning and very end of recording.

1. Display operation icons.
2. Select [●].

Selecting again cancels setting.

3. Start recording.
4. Stop recording.

- Cannot be used during still picture recording.
- Thumbnail can be either black or white.
- Setting is cancelled after recording is stopped or the unit is turned off.

To change the fade-in and fade-out image colour to black or white

- Press [MENU] → [ADVANCED] → [FADE COLOUR] → [WHITE] / [BLACK]
Recording 5 Other recording options (cont.)

**Backlight compensation function**
Brightens objects that appear dark against backlighting.

1. Display operation icons.
2. Select [ ].

Selecting again cancels setting.

- Turning off the unit rotating the mode dial cancels the setting.

**Self-timer**
Still pictures may be taken using the self-timer.

1. Display operation icons.
2. Select [ ].

Selecting again cancels setting.

3. Take picture.

Picture is taken approx. 10 seconds after [ ] begins to flash.

**To quit halfway through**

- Cannot be used during motion recording.
- Setting is cancelled once picture is taken or the unit is turned off.
Operation icons can be used to set effects, compensate brightness or perform other operations in one easy step. 

- Indicates functions used with motion pictures and functions used with still pictures.

### Soft skin mode

Softens skin colours when people’s faces are prominent in picture.

1. Display operation icons.
2. Select [ ].

Selecting again cancels setting.

- Background colours that are close to skin colours may also be softened.
- Faces may be blurred if people in picture are distant.
- Function may not be effective in locations with insufficient brightness.
- The setting is not cancelled even when the unit is turned OFF or the mode dial is rotated.

### Colour night view function

Colours can be brought out even in dark locations (brightness of at least 2 lx). (Recorded scene is seen as if frames were missed.)

1. Display operation icons.
2. Select [ ].

Selecting again cancels setting.

- Cannot be used during still picture recording.
- Normally invisible spots of light may become visible.
- Using a tripod is recommended.
- If focus does not successfully align automatically, adjust using manual focus (P.38).
- The screen may appear white momentarily if using in bright locations.
- Turning OFF the unit or rotating the mode dial cancels the setting.
- When the underwater mode (P.41) is set, the colour night view function is cancelled.
Recording manually (motion/still pictures)

1. Set to [ ] or [ ].
2. Select manual recording.

- To return to automatic recording
  AUTO

- To hide operation icons

Adjusting focus manually (manual focus adjustment)

Manually focus the subject if it cannot be brought into focus by automatic focus. For example, focusing is hard in the following situations:
- Mixture of close and distant objects
- Bright peripheral lights
- Fast-moving objects
- Objects beyond unclear glass
- Dark locations
- Objects with little contrast

After steps 1 and 2:
1. Display MF.
2. Adjust focus.

- Focuses adjusted on wide-angle settings may become unaligned when subsequently zooming in. Focuses adjusted when zoomed in will be unaffected when subsequently zooming back out.

- To return to automatic focus
  MANUAL AF/MF or AUTO
Focus, colouring, shutter speed and brightness can be manually adjusted. 

indicates functions used with motion pictures and functions used with still pictures.

Using situation-specific settings (scene mode)

Already prearranged settings can be used.

After steps 1 and 2 (previous page)

- MENU → [BASIC] → [SCENE MODE] → select from the five modes below:

Sports  
For fast-moving scenes
- Avoids blurring during slow-motion playback or playback pause. (In normal playback, image movement may not look smooth.)
- Avoid fluorescent, mercury, and sodium lighting. Such lighting conditions may affect colouring and brightness.
- Horizontal bands of light may appear during playback on shining or highly reflective objects.
- This function may not work if lighting is insufficient ([ ] flashes).
- Screen may flicker if using indoors.

Portrait  
Blurs background to make people stand out
- Screen may flicker if using indoors.

Low light  
Brightens dark scenes such as evening skies
- May not function successfully in extremely dark scenes.

Spotlight  
For people beneath spotlights, etc.
- Pictures may appear white when object is extremely bright. Peripheries may also appear extremely dark.

Surf & snow  
For bright locations such as beaches and ski slopes
- Pictures may appear white when object is extremely bright.

The icon of the selected scene mode appears on the LCD monitor.

To cancel the setting

- MENU → [BASIC] → [SCENE MODE] → [OFF] or [AUTO]
Achieve natural colours (white balance)

Restore natural colours according to the light source when colouring has become unnatural.

After steps 1 and 2 (P.38)

Select [WB].

The mode changes as follows depending on whether the underwater mode (P.41) is ON or OFF.

When OFF:

- Automatic Adjusted automatically
- Underwater When underwater
- Indoor (incandescent lighting) In locations with incandescent or halogen lighting
- Outdoor In bright, outdoor conditions
- Set manually (see below) When ideal results cannot be produced with modes (Mercury lighting, sodium lighting, fluorescent lighting, hotel lighting, spotlights, sunsets, sunrises, etc.)

Setting manually

Set colours based on white objects within the required lighting environment.

1. Set to [WB].

- If the [WB] continues flashing after setting begins, the setting cannot be made. (Because the range is too dark, etc.)
- If the [WB] flashes during recording, adjustments cannot be completed for the current subject. Remake the setting until matching the subject.

2. Fill the entire display with white subject and begin making setting.

Setting complete when flashing stops.
Focus, colouring, shutter speed and brightness can be manually adjusted. ▶ indicates functions used with motion pictures and ◄ functions used with still pictures.

To return to automatic adjustment ◄ Set to [AWB] or AUTO ◄.
* When the underwater mode (see below) is ON, colouring is set for underwater environments.

Recording colours and audio suited for underwater environments (Underwater mode)

Press and hold UNDERWATER (Press and hold again to cancel.)
• ◄ appears on the LCD monitor.
• Cancel the underwater mode when not underwater.
• In underwater recording, a loud buzzing sound made by the unit’s motor will be heard, but by setting the underwater mode, an audio filter is activated to reduce the motor noise. (The sound quality in the underwater mode will differ from what is heard in other modes.) In addition, the motor noise can be further reduced by selecting manual focus. (P.38)
• The zoom microphone ◄ and wind noise reduction ◄ do not work.

• Please adjust white balance first if using in conjunction with iris/gain setting.

Auto white balance range

When out of range, images become reddish or bluish. Moreover, the mode does not work properly even when within range if multiple light sources are used. In such cases, adjust images manually.
Recording manually (motion/still pictures) (cont.)

Adjusting shutter speed (shutter speed)

Adjust shutter speed to record fast-moving objects, etc.

After steps 1 and 2 (P.38)

1. Select [SHTR].
2. Adjust shutter speed.

Shutter speed

SHTR–: Slower
SHTR+: Faster

Shutter speed adjustment range

* Slower extreme becomes 1/25 when auto slow shutter (P.33) is set to [ON].

- When adjusting both shutter speed and brightness (iris and gain), adjust the shutter speed first.
- Interference may increase with faster shutter speeds (as sensitivity becomes lower and gain value rises automatically).
- Horizontal bands of light may appear during playback on shining or highly reflective objects.
- Avoid fluorescent, mercury, and sodium lighting. Such lighting conditions may affect colouring and brightness.
- In normal playback, image movement may not look smooth.
- Colours may change and flicker when recording in extremely bright locations. Set the shutter speed between 1/50 and 1/100.
- In automatic recording, shutter speed can be adjusted up to 1/350.

■ To return to automatic adjustment ➤ AUTO

During motion picture recording

1/50
1/500
1/8000

During still picture recording

Slower
Faster
Focus, colouring, shutter speed and brightness can be manually adjusted. 
Indicates functions used with motion pictures and 
indicates functions used with still pictures.

Adjusting brightness (iris/gain)

Adjust iris/gain (sensitivity) settings if location is too bright or too dark.

After steps 1 and 2 (P.38)

1. Select [IRIS].
2. Adjust brightness.

Iris/gain value adjustment range

- Iris value (F number) may not be displayed for certain zoom ratios.
- Interference will increase as gain value is raised.

To return to automatic adjustment

Auto
Recording dates and times at travel destinations (set world time)

By setting your travel destination, the time difference is automatically calculated and displayed accordingly. Time settings (P.24) must be made first.

1. Press [MENU] → [BASIC] → [SET WORLD TIME] → [YES]

When making the setting the very first time, press the centre of the cursor buttons after [SET HOME LOCATION] appears on the LCD monitor and proceed to step 2 in “Setting home city and region”.

Setting home city and region

1. Select [HOME].
2. Set your home city and region.
   - Current time
   - City/region name
   - Difference from Greenwich Mean Time
   - To set summer time [ ] (The clock advances by 1 hour.) (Press again to cancel.)

3. Close the menu. [MENU]

Setting the city and region of your travel destination

1. Select [DESTINATION].
2. Set city and region.
   - Current time at selected location
   - City/region name
   - Difference from home time
   - To set summer time [ ] (The clock advances by 1 hour.) (Press again to cancel.)

3. Close the menu. [MENU]

- To cancel [MENU]
The date and time of travel destinations can be recorded, guidelines displayed and the sound of the wind reduced.

- Indicates functions used with motion pictures and functions used with still pictures.

When setting the travel destination, if the city and region of your travel destination do not appear, select another city and region in the same time zone.

After the destination has been set, a \[ \] appears before the recording date/time indication.

- **Restoring local date and time after returning home**

1. Perform step 1 in “Setting home city and region” (P.44).
2. Close the map and menu.

- **View slants and composition (guide lines)**

Guide lines are displayed so you can check for image tilting and balance composition.

- **Avoid wind noise (wind noise reduction function)**

Reduces the sound of wind hitting the microphone.

- Default setting at the time of purchase is [OFF].
- Guide lines will not be recorded.
- Stereo effects may be reduced in strong winds as sound of wind is automatically reduced according to wind strength.
**Playback**  

**1 Viewing motion pictures**

1. **Set to [■].**
   - Thumbnails are displayed.
2. **Select the desired scene.**
   - A yellow frame appears around the selected scene.
3. **Enter the picture to view.**

**To fast-forward/rewind**

- While pressed and held, only the scene No. changes rapidly.
- Release the cursor button when the desired scene No. appears.

**To adjust the volume**

- **T (+) side:** Increases the volume.
- **W (–) side:** Decreases the volume.

- Audio is output only during normal playback.
- The volume display appears on the LCD monitor while adjusting the volume.
- The sound may be muffled when the unit is wet.
Recorded motion pictures (scenes) can be played back on the unit.
Do not remove the SD card while it is being accessed (card access lamp lit).

- This unit complies with the SD-Video standard and can play back MPEG2 movies.
  “MPEG” is the acronym for the “Moving Pictures Experts Group” and is a
  compressed movie format of 25 fps.
- Some motion pictures recorded on other devices may not play back correctly.
  Similarly, motion pictures recorded on this unit may not play back correctly on
  other devices.
- Thumbnails in which [I] appears cannot be played back.
- Some motion pictures of short recording time cannot be played back.
- If the unit is running on battery power, [POWER SAVE] (P.78) is set to [5
  MINUTES] and play pause is continued for 5 minutes, the unit turns off.
- The unit does not turn off when the LCD monitor is closed.

Displaying thumbnails by date

2. Select the date to display.
3. Only thumbnails of motion pictures recorded that day appear.
   If more than 99 motion pictures are recorded on the same day, they are divided into separate
   displays.

   To quit displaying thumbnails by date (To display all thumbnails)
   - Select [DATE] in step 3 above and press the centre of the cursor button.

   - Select [DATE] in step 2 above.
Viewing motion pictures
(cont.)

Fast forward/rewind playback
During playback
- Returns to normal playback.
- Press and hold to fast-rewind.
- Press and hold to fast-forward.

- Pressing the buttons again changes to fast-forward (fast-rewind) speed.
The [▶] and [◀] buttons appearing on the LCD monitor change to [▶▶] and [◀◀].

Slow-motion playback
While playback is paused
- Returns to normal playback.
- Press and hold for slow-motion playback in reverse
- Press and hold for slow-motion playback in the forward direction

Frame-by-frame playback
While playback is paused
- Returns to normal playback.
- Press to return one frame.
- Press to advance one frame.

Resuming the previous playback
If playback was stopped halfway through a motion picture, it can be resumed from the point where it was stopped.

- Select [MENU] → [SETUP] → [RESUME PLAY] → [ON]
- An “R” appears in the thumbnail of the scene that was stopped halfway through.
- The memory of the resume position is erased by rotating the mode dial or performing other operations. (Menu settings do not change.)
- When an SD card is write-protected, [RESUME PLAY] is automatically set to [OFF].
This unit complies with the unified standard DCF (Design rule for Camera File system) established by JEITA (Japan Electronics and Information Technology Industries Association) and can play back JPEG pictures. (Some JPEG pictures cannot be played back.)

● Some still pictures recorded on other devices may not play back correctly. Similarly, still pictures recorded on this unit may not play back correctly on other devices.
● Thumbnails in which [ ] appears cannot be played back.
● Time may be required to play back some still pictures depending on the number of recorded pixels.
● If the unit is running on battery power, [POWER SAVE] (P.78) is set to [5 MINUTES] and play pause is continued for 5 minutes, the unit turns off.
● The unit does not turn off when the LCD monitor is closed.
● Do not rotate the mode dial during slideshows.

Viewing still pictures

Recorded still pictures (scenes) can be played back on the unit.
Do not remove the SD card while it is being accessed (card access lamp lit).

1. Set to [ ].

   Thumbnails are displayed.

2. Select the desired scene.

   A yellow frame appears around the selected scene.

   To move to the next page: either press the left and right cursor button or select < or > and press the centre of the cursor button.

3. Enter the picture to view.

   Thumbnails are displayed.

   To previous scene
   To next scene
   Return to thumbnail

   To fast-forward/rewind

   While pressed and held, only the scene No. changes rapidly.

   Release the cursor button when the desired scene No. appears.
Deleting motion/still pictures

Use a sufficiently charged battery or the AC adaptor. Do not turn off the unit or open the card/battery door while the unit is deleting pictures.

To cancel deletion halfway through

Pictures that were already deleted before the deletion operation was cancelled cannot be restored.

Deleting one picture at a time

1. While playing back the picture to be deleted
2. Select [YES].

- Only motion pictures can be deleted from the menu. ([DELETE] under [EDIT SCENE] P.76)
- Pictures that cannot be played back such as thumbnails appearing with a [0x0], cannot be deleted. (Non-JPEG still pictures recorded with other devices may be deleted.)
- When pictures recorded on other devices are deleted, related information, such as management information, may be deleted as well.
- When DCF pictures are deleted, all related information, such as management information, is deleted as well.
Deleting all pictures

1. With thumbnails displayed
   •

2. Select [ALL].
   •

3. Select [YES].
   •

4. End deleting.

   MENU

   Deletion may take time depending on the number of pictures to delete.

Selecting and deleting multiple pictures

1. With thumbnails displayed
   •

2. Select [SELECT].
   •

3. Select the pictures to delete.
   • A red frame appears around the selected pictures.
   • Selecting a picture a second time deselects it from deletion.
   • Up to 50 pictures can be selected at a time.

4. Delete the selected pictures.

5. When the message appears, select [YES].

   To delete other pictures, repeat steps 3 - 5.

   MENU

Deleted pictures cannot be restored.

Locking pictures (P.52) you do not want to delete prevents them from being deleted accidentally.
Preventing accidental deletion

Locking important pictures prevents them from being deleted accidentally. Even locked pictures are deleted when SD cards are formatted.

1. Set the mode dial to [ ] or [ ].

2. Make settings from the menus.
   (P.22)
   \[\text{MENU} \rightarrow \text{[EDIT SCENE]}
   \] (For still pictures, \[\text{[PHOTO SETUP]} \rightarrow \text{[LOCK SET]} \rightarrow \text{[YES]}

3. Select the picture to lock.

   ![Image of a locked picture]

   A [ ] appears on selected pictures.
   - Selecting a picture a second time deselects it from locking.
   - Multiple pictures can be selected at a time.

4. End locking.
   \[\text{MENU} \]

Formatting cards

All data, including locked pictures, are deleted and cannot be restored when SD cards are formatted.

Save important data on a PC ahead of time using the MotionSD STUDIO, etc.

1. Make settings from the menus.
   (P.22)
   \[\text{MENU} \rightarrow \text{[SETUP]} \rightarrow \text{[FORMAT CARD]} \rightarrow \text{[YES]}

2. When the message appears, select [YES].

3. End formatting.
   \[\text{MENU} \]

- Use a sufficiently charged battery or the AC adaptor. Do not turn the unit off or open the card/battery door while formatting cards.
- Format SD cards with this unit. If cards are formatted on a PC or other device, recording may take time and the cards may be unusable with the unit.
- Some SD cards require time to format.
**Setting DPOF for still pictures**

DPOF is the acronym for Digital Print Order Format and designates which still pictures are to be printed and how many copies are to be made on SD cards. This information can be used by DPOF printers and stores.

1. Set to [3].
2. Make settings from the menus. (P.22)
   - Set to [PHOTO SETUP] → [DPOF SET] → [SET]
3. Select the still pictures to print.
4. Set the number of copies.
   - Number of copies (Up to 999)
   - Set “0” to not print the picture.
5. End setting.

To cancel the setting
   - MENU → [PHOTO SETUP] → [DPOF SET] → [CANCEL ALL]
   - When the message appears, select [YES].

- Up to 999 still pictures can be selected by repeating steps 3 and 4.
- You cannot add the recording date to pictures for printing.
- DPOF settings made on other devices may not be recognised. Make settings with this unit.
Motion pictures and still pictures recorded with this unit can be viewed on TV. For TV settings, see the operating instructions of the TV.

1. Connect the unit and AC adaptor (P.16) and set the mode dial to [ ] or [ ].
2. Connect the unit and TV with the AV cable (supplied).

   Insert the plugs as far as they will go.

   If your TV is not equipped with AV Input Sockets, the 21-pin Adaptor (optional) is necessary. Consult your dealer.

3. Change the input mode on the TV.
4. Play back motion pictures or still pictures from the unit. (P.46, 49)

   To display LCD monitor information on TV
   
   MENU → [SETUP] → [EXT. DISPLAY] → [ON]
   
   • To not display the date, time and icons (P.24, 28)

   ● Do not use any other AV cables except the supplied one.
   ● If images or audio are not output, check the following:
     • That the plugs on the AV cable are inserted into terminal as far as they can go
     • That the plugs on the AV cable are connected to the correct terminals
     • That input settings and the selected input channel of the TV are correct
   ● If pictures are not displayed correctly on a wide-screen TV, adjust the display settings of the TV.
   ● If the image stretched in the vertical direction on TVs of a 4:3 aspect ratio
     MENU → [SETUP] → [TV ASPECT] → [4:3]
Motion pictures recorded with this unit can be copied to TV video recorders and DVD recorders (hereinafter referred to as "recorder"). For recorders settings, see the operating instructions of the recorders.

Copying pictures using the AV cable (supplied)

1. Connect the unit and AC adaptor (P.16) and set the mode dial to [ ].
2. Connect the unit and recorder with the AV cable (supplied).

![Insert the plugs as far as they will go.]

If your TV is not equipped with AV Input Sockets, the 21-pin Adaptor (optional) is necessary. Consult your dealer.

3. Change the input mode on the TV and recorder.
4. Play back motion pictures from the unit (P.46) and start recording on the recorder.
5. After ending recording on the recorder, stop playback from the unit.

- Do not use any other AV cables except the supplied one.
- When copied motion pictures are played back on a wide-screen TV, the image may be stretched in the vertical direction. In such case, see the operating instructions of the recorder. Also, see the operating instructions of the wide-screen TV and set aspect ratio to 16:9 (full).

Copying (dubbing) pictures using DVD recorders with SD card slot

By inserting SD cards recorded on this unit into DVD recorders with an SD card slot, pictures can be copied onto hard disk drives and DVDs.

1. After turning off the unit, eject the recorded SD card. (P.19)
2. Insert the SD card into the SD card slot of the DVD recorder.

- For details, see the operating instructions of the DVD recorder.
- The video format is converted when motion pictures recorded with this unit are copied onto hard disk drives or DVDs. The converted motion picture cannot be copied at high speed onto DVD-R discs. Moreover, motion pictures that are copied back onto SD cards using a computer or other device do not play back on this unit.
Printing pictures from PictBridge printers

1. Connect the unit and AC adaptor (P.16), and set the mode dial to a setting other than [OFF].

2. Connect the unit and printer with the USB cable (supplied).

Insert the plugs as far as they will go.

3. Select [PictBridge].

4. Select the still pictures to print.

5. Set the number of copies.
   - To not print the picture, set “0”.
   - Repeat steps 4 and 5 to select up to 8 still pictures for printing.

- Do not use any other USB connection cables except the supplied one. (Operation is not guaranteed with any other USB cables.)
- Connect the unit directly to the printer without going through a USB hub.
- For paper size and print quality, etc., check printer settings.
- Avoid the following operations during printing. Otherwise, pictures will not print correctly:
  - Disconnecting the USB cable
  - Opening the card/battery door
  - Rotating the mode dial
  - Turning off the unit
Still pictures recorded with this unit can be printed by connecting the unit directly to a printer that supports PictBridge.

Display the PictBridge menu.  
Make print settings.

### Print settings

<table>
<thead>
<tr>
<th>Item</th>
<th>Available settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>DATE PRINT</td>
<td>OFF/ON</td>

</tr>
<tr>
<td></td>
<td>[ ]: Frame print</td>
</tr>
</tbody>
</table>

*Settings not supported by the printer cannot be selected.

When printing is complete, disconnect the USB cable (supplied) and exit [PictBridge].

To cancel printing

A confirmation message appears.

[YES]: Cancels print settings and returns to step 4.

[NO]: Saves print settings made in steps 4 - 7 and returns to step 4.

*Still pictures recorded with other devices may not be printed.

*DPOF settings (P.53) cannot be used while this unit is directly connected to a PictBridge printer.
4 Using DVD burners

**Required equipment (as of December 2007)**
- DVD burner (VW-BN1+)
- Mini AB USB connection cable (included with DVD burner)
  * Use with the VW-BN1 DVD burner is recommended. No guarantees are given for operations involving the use of any other DVD burner.

**Supported discs: 12 cm disc**

<table>
<thead>
<tr>
<th>Motion pictures and still pictures</th>
<th>DVD-RAM</th>
<th>New or previously used discs</th>
</tr>
</thead>
<tbody>
<tr>
<td>DVD-R, DVD-R DL</td>
<td></td>
<td>New discs only</td>
</tr>
<tr>
<td>Motion pictures only</td>
<td>DVD-RW</td>
<td>New or previously used discs</td>
</tr>
<tr>
<td>Still pictures only</td>
<td>CD-RW</td>
<td>New or previously used discs</td>
</tr>
<tr>
<td></td>
<td>CD-R</td>
<td>New discs only</td>
</tr>
</tbody>
</table>

* The recording mode used for the DVD-RW is “video mode.”

- +RW/+R/+R DL discs or 8 cm discs cannot be used for copying.
- All content written on discs is erased before coping begins. Check whether data is needed or not before using the disc.
- When copying is finished, finalizing is initiated automatically. Finalized discs can be played back only. No further motion pictures or still pictures can then be added to these discs.
- For the following, see the operating instructions of the DVD burner:
  - Recommended discs and disc handling
  - Connections to DVD burners using the mini AB USB connection cable
  - Operation of the DVD burner itself

**Time required for copying (Reference)**
(When a 4 GB motion picture has been copied to a disc using the VW-BN1 drive)

<table>
<thead>
<tr>
<th>Disc type</th>
<th>DVD-RAM</th>
<th>DVD-RW</th>
<th>DVD-R</th>
</tr>
</thead>
<tbody>
<tr>
<td>Copying time</td>
<td>Approx. 40 to 90 min.</td>
<td>Approx. 30 to 60 min.</td>
<td>Approx. 15 to 60 min.</td>
</tr>
</tbody>
</table>

- The time taken to copy a disc differs depending on the number of scenes recorded, the types of discs used, the number of discs needed for copying and the ambient temperature.
- Copying to DVD-R DL discs may take 1.5 to 2 times longer than for DVD-R discs.
- In order for the copied data to be verified, the copying process may take longer than the recording time. Wait until the data copied message appears.
Motion pictures and still pictures recorded with this unit can be copied to discs using DVD burners (sold separately).

**Connecting this unit and a DVD burner**

1. Connect the AC adaptor provided with the DVD burner to the DVD burner.
2. Connect the unit and AC adaptor (P.16) and set the mode dial to a position other than [OFF].
3. Connect this unit and the DVD burner with the mini AB USB connection cable.

![Mini-A plug](image1) ![Mini-B plug](image2)
Insert the plugs as far as they will go.

4. Insert a disc into the DVD burner.

- Once connected, the [DVD BURNER] display appears on the LCD monitor of the unit. If it does not appear, reconnect the mini AB USB connection cable.
- First connect the DVD burner to the unit, and then insert the disc.

- Use the mini AB USB connection cable that comes with the DVD burner (sold separately). Operation is not guaranteed with other cables.
- Connect the unit directly to the printer without going through a USB hub.
- Ensure without fail that only the AC adaptors designed solely to be used with the unit and DVD burner are connected. Power cannot be supplied from the unit to the DVD burner using a USB connection. While powered by the battery, the unit and DVD burner cannot be connected for use.
- If the DVD burner is connected to this unit with a disc already inserted, the message “CANNOT CHECK CONNECTED DEVICE. DISCONNECT THE USB CABLE FROM THIS UNIT.” may be displayed after “Please Wait.” is displayed for over a minute. When this happens, disconnect the Mini AB USB Connection Cable from the unit and remove the disc from the DVD burner to make sure the disc is usable and was not inserted upside down.
- If “READING DISC...” is displayed on the screen for more than 2 minutes, remove the disc from the DVD burner and make sure the disc is usable and was not inserted upside down.
## With other products

<table>
<thead>
<tr>
<th>Using DVD burners</th>
<th>(sold separately) (cont.)</th>
</tr>
</thead>
</table>

With still pictures, all scenes are copied at once. With motion pictures, either all scenes can be copied or specific scenes or scenes on specific dates can be selected and copied.

### Copying still pictures to discs

2. Select [PICTURE].
   
   Copying begins. Hereafter, operate the unit as instructed by the displayed messages.

### To cancel copying

Press \( \text{MENU} \). The [DVD BURNER] display now returns.

- After copying the still pictures, another disc with the same pictures can be created.

### Copying all motion pictures to discs

2. Select [VIDEO] \( \rightarrow \) [DVD COPY] \( \rightarrow \) [ALL SCENES] or [ADDED SCENES].
   
   - **[ALL SCENES]**: All the motion pictures are copied.
   - **[ADDED SCENES]**: Motion pictures additionally recorded after copying using [DVD COPY] (ones for which \( \square \) is not indicated) are copied onto another disc.
3. Select [YES].

   The number of discs required for the copying is displayed. If two or more discs are required, change over the discs as instructed by the displayed messages.

### To cancel copying

Press \( \text{MENU} \). The [DVD BURNER] display now returns.

- \( \square \) is displayed for the thumbnails of motion pictures which have already been copied using [DVD COPY]. All motion pictures for which \( \square \) is indicated can be deleted together. (P.63)
- After copying the still pictures, another disc with the same pictures can be created.
Motion pictures and still pictures recorded with this unit can be copied to discs using DVD burners (sold separately).

### Copying selected motion pictures to discs

2. Select [VIDEO] → [FAVOURITE SCENES] → [SELECT SCENES] or [SELECT DATE].

#### SELECT SCENES

3. Select thumbnails.

   - Scene size
     - The selected thumbnail is enclosed in a red frame. The frame is released when the centre of the cursor button is pressed again.

4. Enter selections.

   - When [START] is selected, a confirmation message appears.

5. Copying begins.

   - Select [YES] and operate the unit as instructed by the displayed messages.

#### SELECT DATE

3. Select a date.

   - The selected date is enclosed in a red frame. The frame is released when the centre of the cursor button is pressed again.

4. Enter selections.

   - When pressed, a confirmation message appears.

#### To cancel copying

Press [MENU]. The [DVD BURNER] display now returns.

- Repeat step 3 to select multiple motion pictures. Up to 50 motion picture scenes can be selected at a time when “SELECT SCENES” is selected and up to 50 days of motion pictures when “SELECT DATE” is selected.
- With [SELECT SCENES], the scenes are copied onto one disc. If the total size of the motion picture exceeds the disc capacity, “Remaining disc space” appears in red, and the exceeded capacity is displayed. Select the scenes that will fit onto one disc.
- With [SELECT DATE], the number of discs required for copying is displayed. If two or more discs are required, change over the discs as instructed by the displayed messages.
- After copying the still pictures, another disc with the same pictures can be created.
With other products 4 Using DVD burners (sold separately) (cont.)

■ Copying using a DVD burner
  ● After copying is complete but before erasing the data on the SD card, check that the disc plays back and that data was copied correctly. (P.63)
  ● While copying is underway, do not turn off the unit or DVD burner or disconnect the mini AB USB connection cable. Also, do not subject the unit or DVD burner to impact.
  ● While copying is underway, the disc cannot be removed.
  ● Pictures are copied in the order in which they were recorded. Copying sequence cannot be changed.
  ● Pictures from multiple SD cards cannot be copied onto the same disc.
  ● Motion pictures and still pictures cannot be copied onto the same disc.
  ● A maximum of 9,999 pictures can be copied onto a single disc.
  ● If two or more discs are required for copying, the motion picture which will be copied last on each disc will be automatically split up.
  ● The recording date for scenes or files copied to a disc using the DVD burner with this unit is the date that the scene or file was copied. This date may not be displayed properly depending on the software used.
  ● Motion pictures that are copied back to an SD card using the software packaged with the unit cannot be copied to discs on a DVD burner.
  ● It may not be possible to copy data which has been recorded by another unit. Such data may not be played back even if it is copied successfully.
  ● When still pictures have been copied onto an SD card using a computer, for instance, whatever is not displayed by the unit cannot be copied onto a disc.
  ● Depending on the playback device, it may not be possible to play back discs which have been created by connecting the DVD burner and the unit.
  ● When a disc that was created with this unit and the DVD burner is inserted into the DVD recorder, a message may be displayed prompting you to format the disc. Do not format the disc because all data will be erased and cannot be recovered.
  
Refer to the operating instructions of the DVD recorder for details.
Motion pictures and still pictures recorded with this unit can be copied to discs using DVD burners (sold separately).

**Playing back discs**

2. Select a thumbnail and play back the picture.
   
   For details, see the pages below:
   - Viewing motion pictures (P.46)
   - Viewing still pictures (P.49)

**To cancel copying**

Press [MENU]. The [DVD BURNER] display now returns.

- When discs containing motion pictures and still pictures copied from other devices are played back from the unit, only the motion pictures are played back. It may not be possible to play back the discs which have been recorded by other units.

**Exiting**

1. Display the [DVD BURNER] display. (P.59)
2. Remove the disc from the DVD burner.
3. Disconnect the mini AB USB connection cable.

**Deleting copied motion pictures**

Motion pictures with a [ ] can be deleted all at once.

1. Set the unit’s mode dial to [ ].
2. Make menu selections. (P.22)
   
   [MENU]→[EDIT SCENE]→[DELETE]→[COPIED]→[YES]

3. End deleting.
The supplied CD-ROM contains the software below:
This CD-ROM can only be used on Windows computers.

**Video editing software MotionSD STUDIO 1.3E**
This software allows motion pictures and still pictures to be acquired from this unit, edited and output.
The acquired motion pictures and still pictures can also be attached to e-mail or edited and saved on DVD.
For information about how to use MotionSD STUDIO, read the PDF operating instructions.

**DirectX (For Windows 2000)**
To use MotionSD STUDIO, you must have Microsoft DirectX 9.0b or 9.0c. If it is not installed on your computer, install it as follows:
• Install DirectX when installing MotionSD STUDIO.
• Click [DirectX] in the Setup Menu to install.

Depending on the operating environment, software applications supporting older versions of DirectX may not run properly after installing DirectX 9.0b or 9.0c. If this happens, contact the manufacturer of these applications.
(Your computer must support DirectX 9.0b or 9.0c.)

This unit does not have a card writing function. You cannot write data to the SD card in this unit. (EB/EP only)
We cannot guarantee proper operation of this unit if you use software other than that supplied.
End User License Agreement

Before opening the CD-ROM package, please read the following.

End User License Agreement

You (“Licensee”) are granted a license for the Software defined in this End User License Agreement (“Agreement”) on condition that you agree to the terms and conditions of this Agreement. If Licensee does not agree to the terms and conditions of this Agreement, promptly return the Software to Matsushita Electric Industrial Co., Ltd. (“Matsushita”), its distributors or dealers from which you made the purchase.

Article 1 License
Licensee is granted the right to use the Software, including the information recorded or described on the CD-ROM, instruction manuals, and any other media provided to Licensee (collectively “Software”), but all applicable rights to patents, copyrights, trademarks and trade secrets in the Software are not transferred to Licensee.

Article 2 Use by a Third Party
Licensee may not use, copy, modify, transfer or allow any third party, whether free of charge or not, to use, copy or modify the Software, except as expressly provided for in this Agreement.

Article 3 Restrictions on Copying the Software
Licensee may make a single copy of the Software in whole or in part solely for back-up purpose.

Article 4 Computer
Licensee may use the Software only on one computer, and may not use it on more than one computer.

Article 5 Reverse Engineering, Decompiling or Disassembly
Licensee may not reverse engineer, decompile, or disassemble the Software, except to the extent either of them is permitted under law or regulation of the country where Licensee resides. Matsushita, or its distributors will not be responsible for any defects in the Software or damage to Licensee caused by Licensee’s reverse engineering, decompiling, or disassembly of the Software.

Article 6 Indemnification
The Software is provided “AS-IS” without warranty of any kind, either expressed or implied, including, but not limited to, warranties of non-infringement, merchantability and/or fitness for a particular purpose. Further, Matsushita does not warrant that the operation of the Software will be uninterrupted or error free. Matsushita or any of its distributors will not be liable for any damage suffered by Licensee arising from or in connection with Licensee’s use of the Software.

Article 7 Export Control
Licensee agrees not to export or re-export to any country the Software in any form without the appropriate export licenses under regulations of the country where Licensee resides, if necessary.

Article 8 Termination of License
The right granted to Licensee hereunder will be automatically terminated if Licensee contravenes any of the terms and conditions of this Agreement. Upon termination hereof, Licensee must destroy the Software and related documentation together with all the copies thereof at Licensee’s own expense.

Installing MotionSD STUDIO

Before installing the software, check your operating environment (P.66) and close any other software applications which are running.
Do not perform other computer operations while installing the software.
Do not connect this unit to the computer until installation is complete.
Install MotionSD STUDIO only from the supplied CD-ROM.

1. Insert the supplied CD-ROM into your computer.
   The Setup Menu starts automatically.

2. Click [MotionSD STUDIO 1.3E].
   If installation is stopped halfway through, the software may not run properly.

3. Click [Next].
   Continue to follow the on-screen messages to install it.
   • Depending on the operating environment, you may be required to install DirectX.
     If so, click [Yes] and install it.

4. Select a video system and click [Next].
   [Readme.txt] is displayed when installation is complete. Be sure to check the contents.

5. Click [Finish].
   Selecting "Yes, I want to restart my computer now." automatically restarts the computer and completes installation.

Eject the CD-ROM from the computer.
After the installation is finished, the icon [ ] is displayed in the task tray.
When this unit and the computer are connected with the USB cable, the [SD Browser auto start] dialog box appears. (P.70)
After installation is complete, clicking on [MotionSD STUDIO 1.3E] in the Setup menu starts up the Uninstaller. Click [EXIT] in the Setup menu to close the menu.
● MotionSD STUDIO only runs on Windows computers.
● Install and uninstall the software with administrator authorization.

If the Setup Menu does not start up automatically
Double-click the CD-ROM icon [ ] containing the CD-ROM drive in [My Computer].

Uninstalling the software
● For Windows 2000 or XP
  Click [Start] → ([Settings] → ) [Add or Remove Programs (Applications)] in the [Control Panel].
● For Windows Vista
  From the Start menu, select [Control Panel] → [Programs] → [Uninstall Program].

Select [MotionSD STUDIO 1.3E] and click [Remove] or [Uninstall/Remove].
Continue to follow the on-screen messages to uninstall it.
After uninstalling the software, restart the computer.

Reading the MotionSD STUDIO operating instructions (PDF file)
Click [All Programs (or [Programs])] → [Panasonic] → [MotionSD STUDIO 1.3E] → [Manual] from the Start menu in Windows.
Or, select [Manual] from the [Help] menu at the top of the [Edit Screen] windows in MotionSD STUDIO.
• Adobe Acrobat Reader 5.0 or later or Adobe Reader 7.0 or later is required to read the PDF operating instructions.
With a computer 5 Using MotionSD STUDIO

Importing motion pictures and still pictures

When this unit is connected to the computer, MotionSD STUDIO starts up automatically.

● To use the application with Windows Vista, log on with administrator authorization or via a standard user account. Guest accounts cannot be used. To use the application with Windows XP or 2000, log on with administrator authorization.

● Before using MotionSD STUDIO, please read [Readme First] by selecting from the start menu. This file contains additional instructions or updated information.

● The very first time that the software is started up, the End User License Agreement is displayed. Read it carefully and click [I agree].

1. Connect the unit and AC adaptor (P.16) and set the mode dial to a position other than [OFF].

2. Connect this unit and a computer with the USB cable (supplied).

4. Click [Yes]. The [SD Browser] window appears, therefore do as instructed by displayed messages.

- Do not use any other USB connection cables except the supplied one. (Operation is not guaranteed with any other USB cables.)
- Do not disconnect the USB cable or turn off the unit while the card access lamp is lit.
- The first time the unit is connected to the computer, the computer may have to be restarted.
- To output motion pictures edited with MotionSD STUDIO to SD cards, use an applicable SD card. (P.14)
- When outputting a large number of scenes to an SD card, DVD-R/RW or DVD-RAM, it may take time to display thumbnails or to output.
Editing motion pictures and still pictures

1. Double-click the icon on the desktop. The window at left appears.
   • If the icon does not appear on the desktop, select [All Programs (or [Programs])] → [Panasonic] → [MotionSD STUDIO 1.3E] → [MotionSD STUDIO] from the start menu.

2. Click [EXIT this screen]. The startup window appears.

Closing MotionSD STUDIO

■ From the [SD Browser] screen
   Click in the lower right-hand corner of the screen.

■ From the [Edit Screen] screen
   Click in the lower left-hand corner of the screen.
   Or, select [Exit] from the [File] menu.

For a detailed explanation on how to use the software, see the MotionSD STUDIO operating instructions (PDF file). (P.69)
With a computer

6 Using this unit as an external drive (Mass storage)

Connecting the unit to a computer

Use the AC adaptor to supply power to this unit and connected devices.

1. Connect the unit and AC adaptor (P.16) and set the mode dial to a position other than [OFF].
2. Connect this unit and a computer with the USB cable (supplied). (P.70)
3. Select [PC CONNECT].
   - The SD card in the unit appears on the computer as an external drive.

- When this unit is connected to the computer, [Removable Disk] appears in [My Computer].
- The SD card appears as an external drive (E drive, etc.) in Windows Explorer.
- While the computer is accessing the SD card of this unit, [ ] appears at the bottom right of the unit’s LCD monitor.

Disconnecting the unit

1. Click the or icon on the task bar.
2. Click “Safely remove USB Mass Storage Device.”
3. When the disconnection confirmation message appears, click [OK].
4. Disconnect the USB cable (supplied) from the computer.
This unit can be used as an external drive.

**SD card folder structure**

The content of the SD card in the unit can be checked from the computer. Motion pictures and still pictures recorded with the unit are saved in the folder tree below.

- SD card with data recorded on this unit
- DCIM
  - 100DPPPP9: Still pictures (Max. 999) taken in [ ] mode
  - MISC: DPOF setting information on still pictures
- SD_VIDEO
  - IMG_INFO: Motion pictures (Max. 99) taken in [ ] mode

- Do not move, rename, delete, compress, format or perform other operations to the motion pictures or folders using Windows Explorer or the Macintosh Finder. Motion pictures will no longer play back.
- To edit motion pictures, use software capable of editing SD-Video files, such as MotionSD STUDIO.

- Data not supported by this unit cannot be played back on this unit even if copied onto an SD card.
Connect this unit and a computer with the USB cable (supplied). (P.70)

Display the Device Manager.

- For Windows 2000
  Click [Start] → [Settings] → [Control Panel] → [System] → [Hardware] tab → [Device Manager] button.

- For Windows XP
  Click [Start] → [Control Panel] → [Performance and Maintenance] → [System] → [Hardware] tab in the [System Properties] window → [Device Manager] button.

- For Windows Vista
  From the Start menu, select [Control Panel] → [System and Maintenance] → [System] → [Device Manager] (from the [Task] window).

If a confirmation window appears halfway through, click the [Continue] button.

When the driver is recognised
[USB Mass Storage Device] appears in [Universal Serial Bus controllers]. (The display differs according to the type of computer.)

When the driver is not recognised
[!] or [Unknown device] appears in [Universal Serial Bus controllers] or [Other devices].

Try the following.
- Method [1]: Turn off the unit and your computer once and turn on again to reconnect.
- Method [2]: Remove the SD card from the unit and insert it back into the unit.
- Method [3]: Connect the USB cable to another USB port on the computer.

If the driver cannot be recognised by any of the methods above, contact the computer manufacturer.
Connecting to a Macintosh computer

Operating environment required for external drives
Operating environment for the card reader function (EB/EP only), the card reader/writer function (GC/GN/GJ only) (Mass storage)

- Even if the system requirements mentioned in these operating instructions are fulfilled, some personal computers cannot be used.

Connecting the unit to a the computer

Connect this unit and a computer with the USB cable (supplied). (P.70)
An icon labeled [NO_NAME] or [Untitled] appears on the desktop.

Copying still pictures to computers

1. Double click the [NO_NAME] or [Untitled] icon on the desktop. The still pictures are in the [100CDPFP] folder inside the [DCIM] folder.
2. Drag and drop the still pictures to copy onto the computer.

Disconnecting the unit

1. Drag and drop the [NO_NAME] or [Untitled] icon to the Trash.
2. Disconnect the USB cable (supplied) from the computer.

  • Depending on the situation, the data may not be completely repaired.  
  • If the unit is turned off without repairing data, data can be repaired the next time that the unit is turned on.  
  • If repairing fails, the data cannot be played back. Format the SD card with this unit.  
  • Do not repair SD cards recorded on other devices on this unit.                                                                 |
| DISC IS UNUSABLE. CHECK DISC.                | The disc cannot be used or cannot be written on. Use a new disc.                                                                                |
| CANNOT CHECK CONNECTED DEVICE. DISCONNECT THE USB CABLE FROM THIS UNIT. | A device that cannot be used with this unit is connected to the unit.                                                                         |
## Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>What to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The unit does not turn on. The status indicator is flashing while using the battery.</td>
<td>Is the battery sufficiently charged?</td>
</tr>
<tr>
<td>The unit turns off on its own.</td>
<td>To conserve the battery, the unit automatically turns off if the unit is not operated for about 5 minutes. To resume unit use, set the mode dial to [OFF] and then the desired mode position. When [POWER SAVE] is set to [OFF], the unit does not turn off automatically. (P.78)</td>
</tr>
<tr>
<td>The unit turns off as soon as it is turned on.</td>
<td>Is the battery run down? Charge the battery if the remaining battery life indication is flashing or the [LOW BATTERY] message appears on the LCD monitor. (P.18)</td>
</tr>
</tbody>
</table>
| The battery runs down quickly. | ● Is the battery sufficiently charged?  
● Is the unit being used in low temperatures?  
The battery is affected by ambient temperature. In cold places, battery availability shortens.  
● Is the battery at the end of its service-life?  
If the battery lasts only a short while when fully charged, it has reached the end of its service-life. |
| The battery is swollen. | The lithium ion battery used with this unit may swell if charged/discharged often, but this is no risk to safety. |
| The unit cannot be operated though it is turned on. The unit does not operate normally. | ● Is the LCD monitor open?  
● Check that the card access lamp is out, then eject the SD card, remove the battery or disconnect the AC adaptor, wait about 1 minute, then reinsert the battery or reconnect the AC adaptor. Then about 1 minute later, turn the unit off and turn back on. (Performing the above operation while the SD card is being accessed can damage data.) |
<table>
<thead>
<tr>
<th>Problem</th>
<th>What to check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The display changes suddenly.</td>
<td>If the demo (camera introduction) video starts, set [DEMO MODE] to [OFF]. (P.78)</td>
</tr>
<tr>
<td>Indications (remaining pictures, elapsed time, etc.) do not appear on the LCD monitor.</td>
<td>When [DISPLAY] of the [SETUP] menu is set to [OFF], indications other than warnings and the date do not appear.</td>
</tr>
</tbody>
</table>
| Pictures cannot be recorded even though the SD card is properly inserted. | ● Is the SD card write-protected? (P.15)  
● Is the SD card full? Either delete unnecessary scenes or insert a new card. (P.50)  
● Is the unit in a recording mode?  
● Is the card/battery door open?                                                                                                                     |
| Motion picture recording stops on its own.   | ● Are you using an applicable SD card? (P.14)  
● Even with applicable SD cards, recording may stop when using an SD card on which data has been written many times. Copy the data to a computer, then format the SD card on this unit. (Formatting deletes all data on the SD card.) |
| Still pictures come out like mosaics.        | When [PICT. QUALITY] is set to [ ] and detailed subjects are recorded, pictures come out like mosaics. Set to [ ] when recording. (P.31)                                                                       |
| The unit does not focus automatically.       | ● Is the unit set to manual focus? Press the [AUTO] button to set auto focus.  
● Are you recording a scene that is hard to focus automatically? Focus the subject manually. (P.38)                                                                                             |
<p>| Audio is not output.                         | Is the volume set low? (P.46)                                                                                                                                                                                  |</p>

<tr>
<td>The SD card cannot be used even after formatting with this unit.</td>
<td>This unit or the SD card may be broken. Consult the dealer from which you purchased the unit. For SD cards applicable with this unit (P.14)</td>
</tr>
<tr>
<td>The unit does not recognise the SD card when inserted.</td>
<td>Was the SD card formatted on the computer? Format SD cards with the unit. Formatting deletes all data on the SD card. Data cannot be restored afterwards. (P.52)</td>
</tr>
<tr>
<td>Problem</td>
<td>What to check</td>
</tr>
<tr>
<td>------------------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
</tbody>
</table>
| The indication disappears, the display does not work or cannot be operated. | ● Is the unit connected to a computer? When connected to a computer, the unit cannot be operated from the unit itself.  
● Turn the unit off. If the unit does not turn off, eject the SD card, remove and then reinsert the battery (disconnect and reconnect the AC adaptor), and turn back on. If the unit still does not work right, disconnect the power supply and consult the dealer from which you purchased the unit. |
| The SD card is not recognised when inserted into other devices.        | Check the supported SD cards in the device’s operating instructions.                                                                 |
| The computer does not recognise the unit even when connected with USB cable. | ● While the menu appears on the LCD monitor, the USB function screen does not appear even if the USB cable is connected. Close the menu, then connect the USB cable.  
● Is the AC adaptor connected?  
● If the computer has multiple USB terminals, try using another terminal.  
● Check the operating environment. (P.66)  
● Disconnect the USB cable, turn the unit off and turn back on, then reconnect the cable. |
| After disconnecting the USB cable, an error message appears on the computer. | ● For Windows  
  To safely disconnect the USB cable, click the ( or ) icons in the task tray, and do as instructed by displayed messages.  
● For Macintosh  
  Drag the unit icon to the Trash, then disconnect the USB cable. |
## Troubleshooting (cont.)

</tbody>
</table>

When [INITIAL SET] is executed from the SETUP menu, since all settings except for the display language are restored to the defaults at the time of purchase, therefore functions can be selected. (P.78)
In the event of abnormal operation (e.g. if the unit emits smoke or an unusual smell), immediately stop operating the unit and consult the Panasonic Customer Care Centre on 132600.

When using the unit

- Keep the SD Video Camera as far away as possible from electromagnetic equipment (such as microwave ovens, TVs, video games etc.).
  - If you use the SD Video Camera on top of or near a TV, the pictures and sound on the SD Video Camera may be disrupted by electromagnetic wave radiation.
  - Do not use the SD Video Camera near cell phones because doing so may result in noise adversely affecting the pictures and sound.
  - Recorded data may be damaged, or pictures may be distorted, by strong magnetic fields created by speakers or large motors.
  - Electromagnetic wave radiation generated by microprocessors may adversely affect the SD Video Camera, disturbing the pictures and sound.
  - If the SD Video Camera is adversely affected by electromagnetic equipment and stops functioning properly, turn the SD Video Camera off and remove the battery or disconnect AC adaptor. Then reinset the battery or reconnect AC adaptor and turn the SD Video Camera on.

- Do not use the SD Video Camera near radio transmitters or high-voltage lines.
  - If you record near radio transmitters or high-voltage lines, the recorded pictures and sound may be adversely affected.

- Use the cord or cable supplied with the unit or other devices. Do not extend the cords and the cables.

- Do not expose the unit to insecticide or volatile substances, or allow prolonged contact with rubber or vinyl products. (This can cause deformation and peeling.)

- Do not drop or impact the unit while carrying.
  - Strong impacts may damage the outer casing, causing it to malfunction.
  - Do not use the unit for business purposes such as surveillance.
  - This unit is not of professional grade, and can build up heat internally over extended use, resulting in trouble.

- Before long periods of disuse:
  - Wipe away moisture and dirt with a soft dry cloth, dry naturally and store with desiccant (silica gel).

- To dry this unit, do not use a microwave oven or regular oven, and do not place the unit in the immediate vicinity of a stove or open fire. Doing so may cause the unit to catch fire or cause smoke to emanate, resulting in malfunctioning.
SD cards

- The memory capacity indicated on the SD card label is the total of the capacity for copyright protection and management, and that ordinarily used by the unit, computers, etc.
- MiniSD cards require a purpose-specific adaptor. Do not insert just the miniSD card or just the adaptor. Also, do not insert and remove a miniSD card while keeping the adaptor inserted into the unit. (This can cause damage.)

Battery

- The rechargeable lithium ion battery used with this unit is readily affected by temperature and humidity. In cold places, the full battery indication may not appear and a low battery warning may appear approx. 5 minutes after starting use. In high temperatures, a protective function may be triggered, preventing use.
- After use, always remove and store the battery.
  - If left inside the unit, the battery may over-discharge because of small amounts of current flow, ultimately damaging the battery.
  - Place the battery in a plastic bag so as to prevent metal from contacting terminals and store in a cool (15 - 25 °C) dry (40 - 60 % RH) place subject to minimal temperature changes.
  - Storing the battery in extreme cold or high heat may shorten the battery’s service-life. Moreover, places that are hot, humid or oily can rust terminals and cause damage to the battery.
  - During long-term storage, charge the battery once a year, then use it until depleted and store it again.
  - Clean battery terminals of adhering dust, etc.
- Bring a spare battery with you when going out.
  - Bring 3 - 4x more battery power than you plan to use. In cold places such as ski resorts, recording time becomes shorter.
  - Do not forget the AC adaptor when traveling so that you can recharge batteries.
- Do not use batteries if damaged or deformed (especially terminals) from dropping, etc.
  - This can cause damage to the unit.
- Do not throw batteries into fire.
  - The battery may burst if heated or thrown into fire.
- If the battery does not last long immediately after charging, it has reached the end of its service-life. Purchase a new battery.
- Notice about the rechargeable battery
  - The battery is designated recyclable.
  - Please follow your local recycling regulations.
Others 5 Cautions for use (cont.)

AC adaptor
- Use the supplied AC adaptor.
- If the battery itself is too hot or too cold, it may take time to charge or may not charge at all.
- Keep the AC adaptor at least 1 m away from the radio. (Interference may affect the radio.)
- During use, the AC adaptor may make noises internally, however, this is normal.
- After use, unplug the AC adaptor from its AC outlet. (Leaving it connected consumes 0.3 W [max.] of power.)
- Keep the terminals of the AC adaptor clean.
  Keep the AC adaptor near an AC outlet and yourself within arm's reach of a breaker (AC plug).

LCD monitor
- If the LCD monitor fogs up or becomes dirty, wipe it clean with a soft dry cloth.
- When the unit is extremely cold in cold places or in other such conditions, although the LCD monitor may be slightly dark immediately after turning power on, the normal brightness is restored when internal temperature rises.

The LCD monitor is made with high-precision technology, however black spots may appear in displays or stuck lighting (red, blue or green) may occur. There is nothing wrong with the monitor.
The LCD monitor pixels are controlled to a 99.99 % degree of accuracy; however, dead or stuck pixels may occur in the remaining 0.01 %. These pixel defects are not recorded in SD card images, therefore do not worry.
Condensation

- If condensation adheres to the unit, the lens may fog and the unit and SD card may not function properly. Avoid sharp changes in temperature and humidity.
- Condensation may adhere in the following cases:
  - After summer rain showers or in humid places where the air is thick with steam
  - When heaters are turned on in cold rooms
  - When moving from cold places to warm places
  - When the unit is directly exposed to cold drafts (i.e., air-conditioners, etc.)
- In the event of differences in temperature or humidity, place the unit in a plastic bag, remove as much air as possible, seal and let it sit for about 1 hour to adjust to the ambient temperature.
- If the lens fogs up, remove the battery and disconnect the AC adaptor, open the card/battery door and let it sit for about 1 hour to adjust to the ambient temperature.

Cleaning

- Remove the battery and disconnect the AC adaptor.
- Do not use benzene, thinner, alcohol, etc. (These substances can cause deformation and peeling.)
- Wipe off fingerprints and dust with a soft dry cloth. For stubborn dirt, soak a cloth in water, wring it out well, and use it to wipe the dirty surfaces. Then wipe the surfaces with a dry cloth.
- Use chemically impregnated tissues in accordance with warnings and indications.

Shock proof

This unit is a highly shock-proof video camera that has passed a drop test* from a height of 1.2 m.

* This test confirmed to "MIL-STD 810F Method 516.5 – Shock". (The product was dropped on top of 5 cm thick plywood.)

This does not guarantee that the unit will not be damaged or malfunction. The water resistance of the unit may be reduced depending on the force of the shock from the fall, or if the unit is repeatedly impacted. In this kind of situation, consult your dealer from which you purchased the unit.
Specifications

SD Video Camera : Information for your safety

Power source: DC 5.0 V (When using AC adaptor), DC 3.6 V (When using battery)
Power consumption: Recording: 2.9 W, Charging: 4.5 W

Signal system
- EIA Standard: 625 lines, 50 fields PAL colour signal

Image sensor
- 1/6” CCD image sensor
- Total: 800 K
- Effective pixels:
  - Moving picture: 400 K (4:3), 350 K (16:9)
  - Still picture: 410 K (4:3)

Lens
- Auto Iris, F1.8 to F2.4
- Focal length: 2.3 mm to 23.0 mm
- Macro (Full range AF)

Zoom
- 10x optical zoom, 25/700x digital zoom

Monitor
- 2.7” wide LCD monitor (approx. 123 K pixels)

Microphone
- Stereo (with a zoom function)

Speaker
- 1 round speaker

White balance adjustment
- Auto tracking white balance system

Standard illumination
- 1,400 lx

Minimum required illumination
- Approx. 6 lx (Low light mode, 1/25) [Approx. 2 lx with the Colour night view function]

Video output level
- 1.0 Vp-p, 75 Ω

Audio output level
- 316 mV, 600 Ω

USB
- Card reader function (EB/EP only) Card reader/writer function (GC/GN/GJ only) (No copyright protection support) Hi-Speed USB (USB 2.0), USB terminal Type miniAB, PictBridge-compliant

Dimensions (excluding the projecting parts)
- 33.8 mm (W) x 63.4 mm (H) x 115.4 mm (D)

Mass (Weight)
- Approx. 224 g without an SD card and supplied battery
- Approx. 246 g with an SD card and supplied battery

Mass (Weight) in operation
- Approx. 224 g without an SD card and supplied battery
- Approx. 246 g with an SD card and supplied battery

Operating temperature
- 0 °C to 40 °C

Operating humidity
- 10 % to 80 %

Battery operation time
- Refer to page 18.

Integral water-resistant function
- Equivalent to IEC 60529 “Degrees of protection provided by enclosures (IP code)” IPX8. (Supports use underwater down to a depth of 1.5 m for up to 30 minutes.)

Shock-proof performance
- Discrete drop tests, where the unit is dropped from a height of 1.2 m in accordance with “MIL-STD 810F Method 516.5—Shock,” passed. (The product was dropped on top of 5 cm thick plywood.)
Dustproof performance

Equivalent to IEC 60529 “Degrees of protection provided by enclosures (IP code)” IP5X.

Motion pictures

| Recording media | SD Memory Card: 256 MB/512 MB/1 GB/2 GB (FAT12 and FAT16 format corresponding) SDHC Memory Card: 4 GB/8 GB/16 GB (FAT32 format corresponding) |

Information on Disposal for Users of Waste Electrical & Electronic Equipment (private households)

This symbol on the products and/or accompanying documents means that used electrical and electronic products should not be mixed with general household waste. For proper treatment, recovery and recycling, please take these products to designated collection points, where they will be accepted on a free of charge basis. Alternatively, in some countries you may be able to return your products to your local retailer upon the purchase of an equivalent new product.

Disposing of this product correctly will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling. Please contact your local authority for further details of your nearest designated collection point.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

For business users in the European Union

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union

This symbol is only valid in the European Union.
If you wish to discard this product, please contact your local authorities or dealer and ask for the correct method of disposal.
