Operating Instructions
FULL HD LCD Display

English Please read these instructions before operating your set and retain them for future reference.
Dear Panasonic Customer

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new LCD Display.

To obtain maximum benefit from your set, please read these Instructions before making any adjustments, and retain them for future reference.

Retain your purchase receipt also, and note down the model number and serial number of your set in the space provided on the rear cover of these instructions.

Visit our Panasonic Web Site http://panasonic.net

Important Safety Notice

WARNING
1) To prevent damage which may result in fire or shock hazard, do not expose this appliance to dripping or splashing.
Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set. (including on shelves above, etc.)
No naked flame sources, such as lighted candles, should be placed on / above the set.
2) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
3) Do not remove the earthing pin on the power plug. This apparatus is equipped with a three pin earthing-type power plug. This plug will only fit an earthing-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.
Do not defeat the purpose of the earthing plug.
4) To prevent electric shock, ensure the earthing pin on the AC cord power plug is securely connected.

CAUTION
This appliance is intended for use in environments which are relatively free of electromagnetic fields.
Using this appliance near sources of strong electromagnetic fields or where electrical noise may overlap with the input signals could cause the picture and sound to wobble or cause interference such as noise to appear.
To avoid the possibility of harm to this appliance, keep it away from sources of strong electromagnetic fields.

IMPORTANT INSTALLATION INFORMATION
If a display is not positioned in a sufficiently stable location, it can be potentially hazardous due to falling. Many injuries, particularly to children, can be avoided by taking simple precautions such as:
• Using cabinets or stands recommended by the manufacturer of the display.
• Only using furniture that can safely support the display.
• Ensuring the display is not overhanging the edge of the supporting furniture.
• Not placing the display on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the display to a suitable support.
• Not standing the displays on cloth or other materials placed between the display and supporting furniture.
• Educating children about the dangers of climbing on furniture to reach the display or its controls.

Trademark Credits
• VGA is a trademark of International Business Machines Corporation.
• Macintosh is a registered trademark of Apple Inc., USA.
• SVGA, XGA, SXGA and UXGA are registered trademarks of the Video Electronics Standard Association.
   Even if no special notation has been made of company or product trademarks, these trademarks have been fully respected.
• HDMI, the HDMI Logo, and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

Note:
Image retention may occur. If you display a still picture for an extended period, the image might remain on the screen. However, it will disappear after a while.
Safety Precautions

WARNING

Setup

This LCD Display is for use only with the following optional accessories. Use with any other type of optional accessories may cause instability which could result in the possibility of injury.

(All of the following accessories are manufactured by Panasonic Corporation.)

- Pedestal ....................................................... TY-STLF20

Always be sure to ask a qualified technician to carry out set-up.

Small parts can present choking hazard if accidentally swallowed. Keep small parts away from young children. Discard unneeded small parts and other objects, including packaging materials and plastic bags/sheets to prevent them from being played with by young children, creating the potential risk of suffocation.

Do not place the Display on sloped or unstable surfaces.

- The Display may fall off or tip over.

Do not place any objects on top of the Display.

- If water is spills onto the Display or foreign objects get inside it, a short-circuit may occur which could result in fire or electric shock. If any foreign objects get inside the Display, please consult your local Panasonic dealer.

Transport only in upright position!

- Transporting the unit with its display panel facing upright or downward may cause damage to the internal circuitry.

Ventilation should not be impeded by covering the ventilation openings with items such as newspapers, table cloths and curtains.

For sufficient ventilation;

Leave a space of 10 cm or more at the top, left and right, and 5 cm or more at the rear, and also keep the space between the bottom of the display and the floor surface.

Cautions for Wall Installation

- Wall installation should be performed by an installation professional. Installing the Display incorrectly may lead to an accident that results in death or serious injury. Furthermore, when installing on a wall, a wall hanging bracket that conforms to VESA standards (VESA 400 × 400) must be used.

- When installing the Display vertically, be sure to install the power switch onto the bottom of the Display.
Safety Precautions

When using the LCD Display

The Display is designed to operate on 220 - 240 V AC, 50/60 Hz.

Do not cover the ventilation holes.
• Doing so may cause the Display to overheat, which can cause fire or damage to the Display.

Do not stick any foreign objects into the Display.
• Do not insert any metal or flammable objects into the ventilations holes or drop them onto the Display, as doing so can cause fire or electric shock.

Do not remove the cover or modify it in any way.
• High voltages which can cause severe electric shocks are present inside the Display. For any inspection, adjustment and repair work, please contact your local Panasonic dealer.

Ensure that the mains plug is easily accessible.

An apparatus with CLASS I construction shall be connected to a mains socket outlet with a protective earthing connection.

Do not use any power supply cord other than that provided with this unit.
• Doing so may cause fire or electric shocks.

Securely insert the power supply plug as far as it will go.
• If the plug is not fully inserted, heat may be generated which could cause fire. If the plug is damaged or the wall socket is loose, they shall not be used.

Do not handle the power supply plug with wet hands.
• Doing so may cause electric shocks.

Do not do anything that may damage the power cable. When disconnecting the power cable, pull on the plug body, not the cable.
• Do not damage the cable, make any modifications to it, place heavy objects on top of it, heat it, place it near any hot objects, twist it, bend it excessively or pull it. To do so may cause fire and electric shock. If the power cable is damaged, have it repaired at your local Panasonic dealer.

If the Display is not going to be used for any prolonged length of time, unplug the power supply plug from the wall outlet.

If problems occur during use

If a problem occurs (such as no picture or no sound), or if smoke or an abnormal odour starts to come out from the Display, immediately unplug the power supply plug from the wall outlet.
• If you continue to use the Display in this condition, fire or electric shock could result. After checking that the smoke has stopped, contact your local Panasonic dealer so that the necessary repairs can be made. Repairing the Display yourself is extremely dangerous, and shall never be done.

If water or foreign objects get inside the Display, if the Display is dropped, or if the cabinet becomes damages, disconnect the power supply plug immediately.
• A short circuit may occur, which could cause fire. Contact your local Panasonic dealer for any repairs that need to be made.
CAUTION

When using the LCD Display

Do not bring your hands, face or objects close to the ventilation holes of the Display.
• Heated air comes out from the ventilation holes at the top of Display will be hot. Do not bring your hands or face, or objects which cannot withstand heat, close to this port, otherwise burns or deformation could result.

Be sure to disconnect all cables before moving the Display.
• If the Display is moved while some of the cables are still connected, the cables may become damaged, and fire or electric shock could result.

Disconnect the power supply plug from the wall socket as a safety precaution before carrying out any cleaning.
• Electric shocks can result if this is not done.

Clean the power cable regularly to prevent it becoming dusty.
• If dust built up on the power cord plug, the resultant humidity can damage the insulation, which could result in fire. Pull the power cord plug out from the wall outlet and wipe the mains lead with a dry cloth.

Do not burn or breakup batteries.
• Batteries must not be exposed to excessive heat such as sunshine, fire or the like.

Cleaning and maintenance

The front of the display panel has been specially treated. Wipe the panel surface gently using only a cleaning cloth or a soft, lint-free cloth.
• If the surface is particularly dirty, wipe with a soft, lint-free cloth which has been soaked in pure water or water in which neutral detergent has been diluted 100 times, and then wipe it evenly with a dry cloth of the same type until the surface is dry.
• Do not scratch or hit the surface of the panel with fingernails or other hard objects, otherwise the surface may become damaged. Furthermore, avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the surface may be adversely affected.

If the cabinet becomes dirty, wipe it with a soft, dry cloth.
• If the cabinet is particularly dirty, soak the cloth in water to which a small amount of neutral detergent has been added and then wring the cloth dry. Use this cloth to wipe the cabinet, and then wipe it dry with a dry cloth.
• Do not allow any detergent to come into direct contact with the surface of the Display. If water droplets get inside the unit, operating problems may result.
• Avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the cabinet surface may be adversely affected or the coating may peel off. Furthermore, do not leave it for long periods in contact with articles made from rubber or PVC.
Accessories

Accessories Supply

Check that you have the accessories and items shown

- Operating Instruction book
- Remote Control Transmitter N2QAYB000535
- Batteries for the Remote Control Transmitter (R6 Size × 2)
- Power supply cord

Remote Control Batteries

Requires two R6 batteries.
1. Pull and hold the hook, then open the battery cover.
2. Insert batteries - note correct polarity (+ and -).
3. Replace the cover.

Helpful Hint:
For frequent remote control users, replace old batteries with Alkaline batteries for longer life.

Precaution on battery use
Incorrect installation can cause battery leakage and corrosion that will damage the remote control transmitter. Disposal of batteries should be in an environment-friendly manner.

Observe the following precaution:
1. Batteries shall always be replaced as a pair. Always use new batteries when replacing the old set.
2. Do not combine a used battery with a new one.
3. Do not mix battery types (example: "Zinc Carbon" with "Alkaline").
4. Do not attempt to charge, short-circuit, disassemble, heat or burn used batteries.
5. Battery replacement is necessary when remote control acts sporadically or stops operating the Display set.
6. Do not burn or breakup batteries.
   Batteries must not be exposed to excessive heat such as sunshine, fire or the like.
Connections

AC cord connection and fixing, cable fixing

Connecting the AC cord:
- Plug the AC cord into the display unit.
- Plug the AC cord until it clicks.
- Make sure that the AC cord is locked on both the left and right sides.

Unplugging the AC cord:
- Unplug the AC cord pressing the two knobs.
- When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.

Cable fixing:
Fix the cable in place using the bead band attached to the display.

1. Remove the bead band
2. Bundle the cables
   - 1. Remove
   - 4. Stopper
   - 3. Bundle the cables
3. Attach the bead band
   - 1. Pass through to the back

Video equipment connection

AV IN:
- HDMI1, HDMI2
- HDMI Input Terminal (see page 10)

DVI-D IN:
- DVI-D Input Terminal (see page 10)

COMPONENT/RGB IN:
- Component/RGB Video Input Terminal (see page 9)

SERIAL:
- Control the Display by connecting to PC (see page 12)

AV IN:
- VIDEO
- Composite Video Input Terminal
- S-VIDEO
- S-VIDEO Input Terminal (see page 9)

PC IN:
- PC Input Terminal (see page 11)
Connections

VIDEO and COMPONENT / RGB IN connection

Note:
Additional equipment, cables and adapter plugs shown are not supplied with this set.

- Change the "Component/RGB-in select" setting in the "Setup" menu to "Component" (when Component signal connection) or "RGB" (when RGB signal connection). (see page 36)
- Accepts only RGB signals with "Sync on G".

Additional equipment, cables and adapter plugs shown are not supplied with this set.

Notes:
- Additional equipment and cables shown are not supplied with this set.
- Use the DVI-D cable with Ferrite core complying with the DVI standard. Image deterioration may occur depending on the length or the quality of the cable.
**Notes:**

- Computer signals which can be input are those with a horizontal scanning frequency of 30 to 110 kHz and vertical scanning frequency of 48 to 120 Hz. (However, the image will not be displayed properly if the signals exceed 1,200 lines.)

- The display resolution is a maximum of 1,440 × 1,080 dots when the aspect mode is set to “4:3”, and 1,920 × 1,080 dots when the aspect mode is set to “16:9”. If the display resolution exceeds these maximums, it may not be possible to show fine detail with sufficient clarity.

- The PC input terminals are DDC2B-compatible. If the computer being connected is not DDC2B-compatible, you will need to make setting changes to the computer at the time of connection.

- Some PC models cannot be connected to the set.

- There is no need to use an adapter for computers with DOS/V compatible Mini D-sub 15P terminal.

- The computer shown in the illustration is for example purposes only.

- Additional equipment and cables shown are not supplied with this set.

- Panasonic recommends using a PC cable that includes a Ferrite core.

- Do not set the horizontal and vertical scanning frequencies for PC signals which are above or below the specified frequency range.

- Component Input is possible with the pin 1, 2, 3 of the Mini D-sub 15P Connector.

**Signal Names for Mini D-sub 15P Connector**

</tr>
</tbody>
</table>
The SERIAL terminal is used when the Display is controlled by a computer.

**Notes:**
- Use the RS-232C straight cable to connect the computer to the Display.
- The computer shown is for example purposes only.
- Additional equipment and cables shown are not supplied with this set.

The SERIAL terminal conforms to the RS-232C interface specification, so that the Display can be controlled by a computer which is connected to this terminal.

The computer will require software which allows the sending and receiving of control data which satisfies the conditions given below. Use a computer application such as programming language software. Refer to the documentation for the computer application for details.

**Communication parameters**

<table>
<thead>
<tr>
<th>Signal level</th>
<th>RS-232C compliant</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

**Basic format for control data**
The transmission of control data from the computer starts with a STX signal, followed by the command, the parameters, and lastly an ETX signal in that order. If there are no parameters, then the parameter signal does not need to be sent.

```
STX C1 C2 C3 P1 P2 P3 P4 P5 ETX
```

**Notes:**
- If multiple commands are transmitted, be sure to wait for the response for the first command to come from this unit before sending the next command.
- If an incorrect command is sent by mistake, this unit will send an "ER401" command back to the computer.

With the power off, this display responds to PON command only.
Power On / Off

Connecting the AC cord plug to the Display.

Connecting the plug to the Wall Outlet

Notes:
• Main plug types vary between countries. The power plug shown at right may, therefore, not be the type fitted to your set.
• When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.

Press the Power switch on the Display to turn the set on: Power-On.

Power Indicator: Green

Press the button on the remote control to turn the Display off.

Power Indicator: Red (standby)

Press the button on the remote control to turn the Display on.

Power Indicator: Green

Turn the power to the Display off by pressing the 1/0 switch on the unit, when the Display is on or in standby mode.

Note:
During operation of the power management function, the power indicator turns orange in the power off state.
Power On / Off

When first switching on the unit

Following screen will be displayed when the unit is turned on for the first time. Select the items with the remote control. Unit buttons are invalid.

OSD Language

1. Select the language.
2. Set.

PRESENT TIME Setup

1. Select “DAY” or “PRESENT TIME”.
2. Setup “DAY” or “PRESENT TIME”.

1. Select “Set”.
2. Set.

Notes:
• Once the items are set, the screens won’t be displayed when switching on the unit next time.
• After the setting, the items can be changed in the following menus.
  OSD Language (see page 33)
  PRESENT TIME Setup (see page 27)

From the second time on, the below screen is displayed for a while (setting condition is an example).
Selecting the input signal

Press to select the input signal to be played back from the equipment which has been connected to the Display.

Input signals will change as follows:

PC → DVI → HDMI1 → HDMI2 → VIDEO → Component*

PC: PC input terminal in PC IN.
DVI: DVI input terminal in DVI-D IN.
HDMI1: HDMI input terminal in AV IN (HDMI1).
HDMI2: HDMI input terminal in AV IN (HDMI2).
VIDEO: Video input terminal in AV IN (VIDEO/S-VIDEO).
Component*: Component or RGB input terminal in COMPONENT/RGB IN.

* "Component" may be displayed as "RGB" depending on the setting of "Component/RGB-in select". (see page 36)

Notes:
• Selecting is also possible by pressing the INPUT button on the unit.
• Select to match the signals from the source connected to the component/RGB input terminals. (see page 36)
Basic Controls

Main Unit

- **Remote control sensor**
- **Brightness Sensor**
- **Speakers**

**Power Indicator**
The Power Indicator will light.
- Power-OFF .... Indicator not illuminated (The unit will still consume some power as long as the power cord is still inserted into the wall outlet.)
- Standby ........ Red
- Power-ON...... Green
- Power management (DPMS) ....................... Orange (PC IN or DVI-D IN signal. See page 31)

**MENU Screen ON / OFF**
Each time the MENU button is pressed, the menu screen will switch. (see page 20)

**Volume Adjustment**
Volume Up “+” Down “−”
When the menu screen is displayed:
“+”: press to move the cursor up
“−”: press to move the cursor down (see page 20)

**Enter / Aspect button**
(see page 18, 20)

**INPUT button**
(INPUT signal selection)
(see page 15)

Normal Viewing ➔ Picture ➔ Sound ← Pos./Size ← Setup ←
Remote Control Transmitter

**ACTION button**
Press to make selections.

**ASPECT button**
Press to adjust the aspect. (see page 18)

**Standby (ON / OFF) button**
The Display must first be plugged into the wall outlet and turned on at the power switch (see page 13). Press this button to turn the Display On, from Standby mode. Press it again to turn the Display Off to Standby mode.

**POS. /SIZE button**
(see page 22)

**PICTURE button**
(see page 24)

**Sound mute On / Off**
Press this button to mute the sound.
Press again to reactivate sound.
Sound is also reactivated when power is turned off or volume level is changed.

**N button**
(see page 23, 24, 25, 26)

**POSITION buttons**

**INPUT button**
Press to select Input signal sequentially. (see page 15)

**OFF TIMER button**
The Display can be preset to switch to stand-by after a fixed period. The setting changes to 30 minutes, 60 minutes, 90 minutes and 0 minutes (off timer cancelled) each time the button is pressed.

When three minutes remain, "Off timer 3" will flash.
The off timer is cancelled if a power interruption occurs.

**AUTO SETUP button**
Automatically adjusts the position/size of the screen. (see page 22)

**SET UP button** (see page 22)

**SOUND button** (see page 26)

**Volume Adjustment**
Press the Volume Up "+" or Down "-" button to increase or decrease the sound volume level.

**R button** (see page 20)
Press the R button to return to previous menu screen.

**RECALL button**
Press the "RECALL" button to display the current system status.

1 Input label
2 Aspect mode (see page 18)
3 Off timer
The off timer indicator is displayed only when the off timer has been set.
4 Clock display (see page 42)

**Digital Zoom** (see page 19)
**ASPECT Controls**

The Display will allow you to enjoy viewing the picture at its maximum size, including wide screen cinema format picture.

**Note:**
Be aware that if you put the display in a public place for commercial purposes or a public showing and then use the aspect mode select function to shrink or expand the picture, you may be violating the copyright under copyright law. It is prohibited to show or alter the copyrighted materials of other people for commercial purposes without the prior permission of the copyright holder.

Press repeatedly to move through the aspect options:

- 4:3 → Zoom1 → Zoom2 → 16:9

The aspect mode changes each time the ENTER button is pressed.

**Note:**
The aspect mode is memorized separately for each input terminal.

<table>
<thead>
<tr>
<th>Aspect mode</th>
<th>Picture Enlarged screen</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>16:9</td>
<td></td>
<td>The display of the pictures fills the screen. In the case of SD signals, pictures with a 4:3 aspect ratio are enlarged horizontally, and displayed. This mode is suited to displaying anamorphic pictures with a 16:9 aspect ratio.</td>
</tr>
<tr>
<td>4:3</td>
<td></td>
<td>Pictures with a 4:3 aspect ratio are displayed with their original aspect ratio. Side panels are displayed at the left and right edges of the screen.</td>
</tr>
<tr>
<td>Zoom1</td>
<td></td>
<td>The pictures with a 4:3 aspect ratio among the 16:9 aspect ratio signals are displayed with their original aspect ratio. The left and right edges of the pictures are masked with side panels.</td>
</tr>
<tr>
<td>Zoom2</td>
<td></td>
<td>Letterbox pictures with a 16:9 aspect ratio are enlarged vertically and horizontally so that their display fills the screen. The top and bottom edges of the pictures are cut off.</td>
</tr>
</tbody>
</table>
Digital Zoom

This displays an enlargement of the designated part of the displayed image.

1 Display the operation guide.

[Remote control]

During Digital Zoom, only the following buttons can be operated.

2 Select the area of the image to be enlarged.

3 Select the magnification required for the enlarged display.

4 Return to normal display (quit Digital Zoom).

Notes:
- When power goes OFF (including “Off Timer” operation), Digital Zoom terminates.
- The Digital Zoom function cannot be selected while in the following operation state:
  - When MULTI DISPLAY Setup is On (see page 34).
  - When Screensaver is running (see page 29)
- While Digital Zoom is in operation, “Adjusting Pos. / Size” cannot be used.
On-Screen Menu Displays

Remote Control  Unit

1 Display the menu screen.
Press to select.
(Example: Picture menu)
Press several times.
Each time the MENU button is pressed, the menu screen will switch.
→ Normal Viewing  → Picture
Sound ← Pos./Size ← Setup ←

2 Select the item.
(Example: Picture menu)

3 Set.

4 Exit the menu.
Press.
Press to return to the previous menu.
Overview

Note: Menu that cannot be adjusted is grayout. Adjustable menu changes depending on signal, input and menu setting.
**Adjusting Pos. /Size**

1. Press to display the Pos. /Size menu.
2. Press to select the menu to adjust.
3. Press to adjust the menu.
4. Press to exit from adjust mode.

**Notes:**
- Unadjustable items are grayed out.
- Adjustable items differ depending on the input signal and the display mode.

**Auto Setup**
- H-Pos/V-Pos, H-Size/V-Size, Dot Clock and Clock Phase are automatically adjusted when the RGB or PC signal is received.
- This setting only operates when a PC signal or RGB signal is input, and the aspect is “16:9”.

**Using Remote Control**
- When on the remote control is pressed, “Auto Setup” will be executed.
- When Auto Setup does not work, “Invalid” is displayed.

**Notes:**
- If a “Cue” or “Rew” signal from a VCR or DVD player is received, the picture position will shift up or down. This picture position movement cannot be controlled by the Picture Pos./Size function.
- When digital RGB signal input, Dot Clock and Clock Phase cannot be made.
- Auto Setup may not work when a cropped or dark image is input. In such case, switch to a bright image with borders and other objects are clearly shown, and then try auto setup again.
- Depending on the signal, out of alignment may occur after Auto Setup. Carry out fine tuning for the position/size as required.
- If Auto Setup cannot set properly for vertical frequency 60Hz XGA signal (1024×768@60Hz and 1366×768@60Hz), pre-selecting the individual signal in “XGA Mode” (see page 38) may results in correct Auto Setup.
- Auto Setup does not work well when a signal such as additional information is superimposed out of valid image period or intervals between synchronizing and image signals are short.
- If Auto Setup cannot adjust correctly, select “Normalise” once and press ACTION (Action), then adjust Pos. /Size manually.
- If the picture goes off screen in the horizontal direction as a result of performing Auto Setup, perform Dot Clock adjustment.
Adjusting POS. / SIZE

H-Pos  Adjust the horizontal position.  

V-Pos  Adjust the vertical position.

H-Size  Adjust the horizontal size.  

V-Size  Adjust the vertical size.

Clock Phase 
(During Component, RGB and PC input signal) 
Eliminate the flickering and distortion.

Dot Clock 
(During Component, RGB and PC input signal) 
Periodic striped pattern interference (noise) may occur when a striped pattern is displayed. If this happens, adjust so that any such noise is minimized.

Over scan 
Turn image over scan On/Off.

Configurable signals are as follows:  
525i, 525p, 625i, 625p, 750/60p, 750/50p (Component Video, DVI, HDMI)

On                  Off

Notes:  
• "Off" is effective during only “16:9” aspect mode.  
• When “Off” is set, “H-Size” and “V-Size” cannot be adjusted.

1:1 Pixel Mode  
Adjusts the display size when 1125i, 1125p or 1250i signal is input.

Notes:  
• “On” is effective during only “16:9” aspect mode.  
• Select On when you would like to replay 1920 x 1080 input signal.  
• Applicable input signal:  
1125 (1080) / 50i · 60i · 24sF · 24p · 25p · 30p · 50p · 60p  
• Select Off when flickering is shown around the image.  
• H-Size and V-Size cannot be adjusted when On is selected.

Helpful Hint ( Normalise Normalisation)  
While the Pos. / Size display is active, if either the N button on the remote control is pressed at any time or the ACTION [ ] button is pressed during "Normalise", then all adjustment values (except “Clock Phase” and “Dot Clock”) are returned to the factory settings.
Picture Adjustments

1. Press to display the Picture menu.

2. Select to adjust each item.

Press to select the menu to adjust.

Select the desired level by looking at the picture behind the menu.

**Note:**
Menu that cannot be adjusted is grayout. Adjustable menu changes depending on signal, input and menu setting.

### Normal
For viewing in standard (evening lighting) environments.
This menu selects the normal levels of Brightness and Contrast.

### Dynamic
For viewing in brighter environments.
This menu selects higher than normal levels of Brightness and Contrast.

### Cinema
Ideal for movies.

**Note:**
If you would like to change the picture and colour of the selected Picture menu to something else, adjust using the items in the Picture menu. (see next page)

### Advanced settings
Enables fine picture adjustment at a professional level (see next page).

### Helpful Hint (Normalise Normalisation)
While the “Picture” menu is displayed, if either the N button on the remote control is pressed at any time or the ACTION (■) button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.
**Picture Adjustments**

<table>
<thead>
<tr>
<th>Item</th>
<th>Effect</th>
<th>Adjustments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Backlight</td>
<td></td>
<td>Adjusts luminance of the back light.</td>

<tr>
<td>Colour</td>
<td></td>
<td>Adjusts colour saturation.</td>
</tr>
<tr>
<td>Tint</td>
<td></td>
<td>Adjusts for nice skin colour.</td>
</tr>
<tr>
<td>Sharpness</td>
<td></td>
<td>Adjusts picture sharpness.</td>
</tr>
</tbody>
</table>

**Notes:**
- “Colour” setting can be adjusted for Video input signal.
- You can change the level of each function (Backlight, Contrast, Brightness, Colour, Tint, Sharpness) for each Picture Mode.
- The setting details for normal, dynamic and cinema respectively are memorized separately for each input terminal.
- The “Tint” setting can be adjusted for NTSC signal only during Video (S Video) input signal.
- In Contrast, there is not a noticeable change even when contrast is increased with a bright picture or reduced with a dark picture.

---

**Advanced settings**

<table>
<thead>
<tr>
<th>Item</th>
<th>Effect</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Input level</td>
<td></td>
<td>Adjustment of parts which are extremely bright and hard to see.</td>
</tr>
<tr>
<td>Gamma</td>

<td></td>
<td>Adjusts the white balance for dark green areas.</td>
</tr>
<tr>
<td>W/B Low B</td>
<td></td>
<td>Adjusts the white balance for dark blue areas.</td>
</tr>
</tbody>
</table>

**Notes:**
- Carry out “W/B” adjustment as follows.
  1. Adjust the white balance of the bright sections using the “W/B High R”, “W/B High G” and “W/B High B” settings.
  2. Adjust the white balance of the dark sections using the “W/B Low R”, “W/B Low G” and “W/B Low B” settings.
  3. Repeat steps 1 and 2 to adjust.
- Steps 1 and 2 affect each other’s settings, so repeat each step in turn to make the adjustment.
- The adjustment values are memorized separately for each input terminal.
- The adjustment range values should be used as an adjustment reference.

**Helpful Hint (N / Normalise Normalisation)**

On the remote control unit, while the “Advanced settings” menu is displayed, if either the N button is pressed at any time or the ACTION (■) button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.
Sound Adjustment

1. Press to display the Sound menu.

2. Select to adjust each item.
   - Press to select the menu to adjust.
   - Select the desired level by listening to the sound.

3. Press to exit from adjust mode.

<table>
<thead>
<tr>
<th>Item</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sound Mode</td>
<td>Normal: Emits the original sound.</td>

<td>Adjusts low pitch sounds.</td>
</tr>
<tr>
<td>Treble</td>
<td>Adjusts high pitch sounds.</td>
</tr>
<tr>
<td>Balance</td>
<td>Adjusts left and right volumes.</td>
</tr>
<tr>
<td>Surround</td>
<td>Select On or Off.</td>
</tr>
</tbody>
</table>

Note: Bass, Treble and Surround settings are memorized separately for each Sound Mode.

Helpful Hint (Normalise Normalisation)

While the “Sound” menu is displayed, if either the N button on the remote control is pressed at any time or the ACTION ( ■ ) button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.
PRESENT TIME Setup / Set up TIMER

The timer can switch the Display On or Off. Before attempting Timer Set, confirm the PRESENT TIME and adjust if necessary. Then set POWER ON Time / POWER OFF Time.

1. Press to display the Setup menu.
2. Press to select Set up TIMER or PRESENT TIME Setup.

Press to display the Set up TIMER screen or PRESENT TIME Setup screen.

PRESENT TIME Setup

1. Press to select DAY or PRESENT TIME.
   Press to setup DAY or PRESENT TIME.
   ▶ button: Forward
   ◀ button: Back
   Notes:
   • Pressing “▼” or “▲” button once changes PRESENT TIME 1 minute.
   • Pressing “▼” or “▲” button continuously changes PRESENT TIME by 15 minutes.

2. Press to select Set.

Press to store PRESENT TIME Setup.

Notes:
• Set cannot be selected unless PRESENT TIME is set.
• Unless setting the present time other than “99:99”, “DAY” and “PRESENT TIME” can not be set.
• The settings of “DAY” and “PRESENT TIME” are reset when leaving the display turned off for about 7 days for the following reasons:
  Pressing ◆ / / switch of the unit to turn off the display.
  Disconnecting the AC cord.
  Interruption of power supply.

PRESENT TIME Setup / Setup TIMER

Set up TIMER

Set the program for turning the power On/Off and select the input signal at the specified time. Up to 20 programs can be set.

[Setting Example]
Program 1, Every Monday, 12:00, Power On, Input: VIDEO

<table>
<thead>
<tr>
<th>Set up TIMER</th>
<th>PRESENT TIME</th>
<th>MON 0:03</th>
</tr>
</thead>
<tbody>
<tr>
<td>Program</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Timer Function</td>
<td>On</td>
<td></td>
</tr>
<tr>
<td>Day</td>
<td>MON</td>
<td></td>
</tr>
<tr>
<td>Power Mode</td>
<td>Power On</td>
<td></td>
</tr>
<tr>
<td>Time</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Input</td>
<td>VIDEO</td>
<td></td>
</tr>
</tbody>
</table>

1. Set the program number.
2. To execute the program, set to “On”. The program is disabled when “Off” is set.
3. Set the day. The program is executed every day when “Everyday” is set.
4. Set the power On/Off.
5. Set the time. Pressing “<” or “>” button once changes “Time” 1 minute. Pressing “<” or “>” button continuously changes “Time” by 15 minutes.
6. Set the input.

Notes:
• This function cannot be set unless “PRESENT TIME Setup” is set.
• If more than one programs are set for the same time, only the program with the smallest program number is enabled.
**Screensaver (For preventing image retention)**

Do not display a still picture, especially in 4:3 mode, for any length of time. If the display must remain on, a Screensaver should be used. When the screen saver is operating, the following 5 patterns are displayed full screen for 5 seconds each.

Black→Dark Gray→Gray→Light Gray→White

1. **Press to display the Setup menu.**

2. **Press to select Screensaver.**

3. **Mode selection**
   - **Press to select Mode.**
   - **Press to select each mode items.**
   - **Off**
     - **Interval**
     - **Time Designation**
     - **Standby after SCR Saver**
   - **On**

4. **Start setting**
   - **When the Mode is set to On, press to select Start.**
   - **Press to start Screensaver.**

The menu screen will disappear and the Screensaver will be activated. **To stop the Screensaver under On, press the R button or any buttons on the main unit.**

**Note:** When the display is turned off, the Screensaver will be deactivated.
Setup of Screensaver Time

After selecting Time Designation, Interval or Standby after SCR Saver, the relevant Time Setup will become available for selection and the Operating Time may be set. (Time cannot be set when "Mode" is "On" or "Off".)

Press to select Start Time / Finish Time (When Time Designation is selected).
Press to select Periodic Time / Operating Time (When Interval is selected).
Press to select Screensaver duration (When Standby after SCR Saver is selected).
Press to setup.

- button: Forward
- button: Back

Notes:
- Pressing “↑” or “↓” button once changes the Time 1 minute. [However, switching occurs every 15 minutes when Periodic Time is selected.]
- Pressing “↑” or “↓” button continuously changes the Time by 15 minutes.
- “Screensaver duration” of the “Standby after SCR Saver” can be set from 0:00 to 23:59. When this is set to “0:00”, “Standby after SCR Saver” will not be activated.

Note: Timer function will not work unless “PRESENT TIME” is set.

Wobbling

Automatically shifts the display image (therefore unnoticeable to the eye) to prevent image retention of sharper contour of image.

1. Press to display the Setup menu.
2. Press to select “Wobbling”.
   - Press to select “On” or “Off”.
   - On: Shifts the position of the display image on a fixed time interval.
3. Press to exit from adjust mode.

Notes:
- If “MULTI DISPLAY Setup” is set to “On”, this function does not operate.
- When this function is operating, part of the screen may appear to be missing.
Reduces power consumption

• Power management: When this function is set to On, it operates under the following conditions to turn the power on or off automatically.
  - When no pictures are detected for 30 or so seconds during input from PC IN or DVI-D IN terminal:
    → Power is turned off (standby); the power indicator lights up orange.
  - When pictures are subsequently detected:
    → Power is turned on; the power indicator lights up green.

Notes:
• This function operates only during input from PC IN or DVI-D IN terminal.
• This function is effective when "Sync" is set to "Auto" and during normal viewing (one picture screen).

• Auto power off: Equipment power supply is turned Off when there is no signal.
  When this is set to On, the power supply of the unit goes Off 10 minutes after the input signals stop.

Note:
This function is effective during normal viewing (one picture screen).

• Standby save: When this function is set to "On", serial communication is disabled during standby mode, reducing the power consumption during standby.
  To perform serial communication while in standby, set this function to "Off(SERIAL)". However, the standby power consumption is greater than when it is set to "On".

• ECO: This function adjusts the brightness of the backlight to reduce power consumption.
  Off: This function does not operate.
  On: Backlight brightness is reduced.
  Sensor: The backlight brightness is automatically adjusted according to the viewing environment.

Note:
When this function is set to "On" or "Sensor", the "Backlight" setting in the Picture menu is disabled.

1 Press to select the menu to adjust.

2 Press to select "On" or "Off".
  On ↔ Off

3 Press to exit from Setup.
Customizing the Input labels

This function can change the label of the Input signal to be displayed. (see page 15)

1. Press to display the Setup menu.
2. Press to select Input label.
3. Press to display the Input label screen.
4. Press to select image input.
5. Press to change input label.

Image input | Input label
--- | ---
[Component]* | Component / DVD1 / DVD2 / DVD3 / Blu-ray1 / Blu-ray2 / Blu-ray3 / CATV / VCR / STB / (Skip)

(Skip): The INPUT button press will skip its input.

* “Component” may be displayed as “RGB” depending on the setting of “Component/RGB-in select”. (see page 36)
Selecting the On-Screen Menu Language

1. Press to display the Setup menu.

2. Press to select the OSD Language.
   - Press to select your preferred language.
   - Selectable languages:
     - English (UK)
     - Deutsch
     - Français
     - Italiano
     - Español
     - English (US)
     - 中文......(Chinese)
     - 日本語......(Japanese)
     - Русский......(Russian)

Customizing the On-Screen Menu Display

Set the display time and background transparency of the on-screen menu display.

1. Press to display the Setup menu.

2. Press to select “Menu Display Duration”.
   - Press to adjust the display duration.

3. Press to select “Menu Transparency”.
   - Press to adjust the transparency.

4. Press to exit from adjust mode.
Setup for MULTI DISPLAY

By lining up the Displays in groups, for example, as illustrated below, an enlarged picture may be displayed across all screens. For this mode of operation, each display has to be set up with a Display number to determine its location.

(Example)
group of 4 (2 x 2)  group of 9 (3 x 3)  group of 16 (4 x 4)  group of 25 (5 x 5)

How to Setup MULTI DISPLAY

1. Press to display the Setup menu.
2. Press to select the MULTI DISPLAY Setup.
3. Press to display the “MULTI DISPLAY Setup” menu.
4. Press to select the MULTI DISPLAY Setup.
5. Press to select “On” or “Off”.

<table>
<thead>
<tr>
<th>Item</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>MULTI DISPLAY Setup</td>
<td>Select “On” or “Off”.</td>
</tr>
<tr>
<td>Horizontal Scale</td>
<td>Select “1”, “2”, “3”, “4”, “5”.</td>

<td>Setting value: 100</td>
</tr>
</tbody>
</table>

Areas of the image that are hidden by the joint sections are adjusted both horizontally and vertically (0~100).
## Setup for MULTI DISPLAY

### Item Details

Select the required arrangement number. (A1-E5 : Refer to the following)

**Display Number locations for each arrangement.**

(Examples)

- **(2 × 1)**
  - A1
  - B1
  - C1

- **(2 × 3)**
  - A1, A2, A3
  - B1, B2, B3
  - C1, C2, C3

- **(4 × 2)**
  - A1, A2, A3, A4
  - B1, B2, B3, B4

- **(4 × 4)**
  - A1, A2, A3, A4
  - B1, B2, B3, B4
  - C1, C2, C3, C4
  - D1, D2, D3, D4

- **(5 × 5)**
  - A1, A2, A3, A4, A5
  - B1, B2, B3, B4, B5
  - C1, C2, C3, C4, C5
  - D1, D2, D3, D4, D5
  - E1, E2, E3, E4, E5

---

4

Press to exit from Setup.
Setup for Input Signals

Component / RGB-in select

Select to match the signals from the source connected to the COMPONENT/RGB IN terminal.
Y, Pb, Pr signals ↔ "Component"
RGB signals ↔ "RGB"

1. **Press to display the Setup menu.**

2. **Press to select the "Component / RGB-in select".**
   - Press to select the desired input signal.
   - Component ↔ RGB

3. **Press to exit from adjust mode.**

Note:
Make setting of the selected input terminal (COMPONENT/RGB IN).
Setup for Input Signals

Signal menu

Note:
“Signal” setup menu displays a different setting condition for each input signal.

1. Press to display the Setup menu.
2. Press to select the “Signal”.
3. Press to display the Signal menu.
4. Press to select the menu to adjust.
5. Press to adjust the menu.
6. Press to exit from adjust mode.

For Video (S VIDEO)

For RGB

For Component

For Digital

3D Y/C Filter

Select “Signal” from the “Setup” menu during Video (S Video) input signal. (“Signal [AV]” menu is displayed.)

Press to select the “3D Y/C Filter”

Press to set On / Off.
Setup for Input Signals

Colour system

Select Signal from the “Setup” menu during Video (S Video) input signal. (“Signal [AV]” menu is displayed.)

Press to select the “Colour system”.

Press to select each functions.

If the picture image becomes unstable:

With the system set on Auto, under conditions of low level or noisy input signals the image may in rare cases become unstable. Should this occur, set the system to match the format of the input signal.

Colour system: Set the colour system to match the input signal. When “Auto” is set, Colour system will be automatically selected from NTSC/PAL/SECAM/NTSC 4.43/PAL M/PAL N.

To display PAL60 signal, select “Auto”.

<table>
<thead>
<tr>
<th>Signal</th>
<th>[ AV ]</th>
</tr>
</thead>
<tbody>
<tr>
<td>3D Y/C Filter</td>
<td>On</td>
</tr>
<tr>
<td>Colour system</td>
<td>Auto</td>
</tr>
<tr>
<td>Cinema reality</td>
<td>Off</td>
</tr>
<tr>
<td>Noise reduction</td>
<td>Off</td>
</tr>
</tbody>
</table>

Cinema reality

Cinema reality:

When on, the display attempts to reproduce a more natural interpretation of sources such as movie pictures, which are recorded at 24 frames per second. If the picture is not stable, turn the setting to off.

Note:

When On, this setting only affects the following signal input:

- NTSC / PAL signal input during Video (S Video) input signal.
- 525i (480i), 625i (575i), 1125 (1080) / 60i signal input during Component input signal.

Press to select Cinema reality.

Press to set On / Off.

XGA Mode

This menu is displayed when the input signal is analog (Component/PC). This menu sets two types of XGA signals with 60Hz vertical frequency having different aspect ratios and sampling rates (1,024 × 768 @ 60Hz and 1,366 × 768 @ 60Hz).

When a 1,280 x 768 @ 60Hz input signal is automatically detected, the image is processed as a 1,280 x 768 @ 60Hz XGA input signal irrespective of this setting.

Press to select “XGA Mode”.

Press to select “1024×768”, “1366×768”.

Note:

After making this setting, be sure to make each adjustment (such as “Auto Setup”) on the “Pos. /Size” menu as necessary. (see page 22)
Noise reduction

Press to select “Noise reduction”.
Press to select “Off”, “Auto”, “Min”, “Mid”, “Max”.

Auto: Noise reduction will be automatically selected from “Min”, “Mid” or “Max”.

Note:
Noise reduction can be adjusted while a Video or Component signal is being applied.

Sync

This function operates only during input from PC IN terminal.
Select Signal from the “Setup” menu during Component input signal.

Confirm that the input is set to RGB input (this setting is valid only for RGB input signal).

Auto: The H and V sync or synchronized signal is automatically selected. If both input, it is selected the H and V sync. However, the synchronized signal that is input first is selected.

on G: Uses a synchronized signal on the Video G signal, which is input from the G connector.

Note:
Accepts only RGB signals from COMPONENT/RGB IN terminal with “Sync on G”
Setup for Input Signals

Input signal display

Displays the frequency and the type of the current input signal.

This display is valid only for Component / RGB / PC and Digital input signal.

Display range:
- Horizontal 30 - 110 kHz
- Vertical 48 - 120 Hz

The dot clock frequency is displayed during digital signal input.

Note:
The automatically detected signal format may be displayed differently than the actual input signal.
## Options Adjustments

### 1. Press to display the Setup menu.

### 2. Press to select “OSD Language”.

### 3. Press for more than 3 seconds.

### 4. Press to select your preferred menu.

### 5. Press to adjust the menu.

### 6. Press to exit from Options menu.

<thead>
<tr>
<th>Item</th>
<th>Adjustments</th>
</tr>
</thead>
</table>
| **On screen display** | **On**: Displays all the following on screen.  
- Power on display  
- Input signal switch display  
- No signal display  
- Mute and the remaining time of off-timer after was pressed.  
**Off**: Hides all the items above from view. |
| **Initial input**     | **Off ↔ VIDEO ↔ Component/RGB ↔ PC ↔ DVI ↔ HDMI1 ↔ HDMI2 ↔ Off**  
Notes:  
- Only the adjusted signal is displayed. (see page 15)  
- This menu is available only when “Input lock” is “Off”. |
| **Initial VOL level** | **Off ↔ On**  
**Off**: Sets normal volume.  
**On**: Sets your preferred volume.  
Notes:  
- When “Maximum VOL level” is “On”, the volume can only be adjusted between 0 and your maximum range.  
- You can hear the changed volume regardless of your volume setting before opening the options menu if you adjust the volume when “Initial VOL level” is “On” and cursor is on the menu. |
| **Maximum VOL level** | **Off ↔ On**  
**Off**: Sets auto maximum volume.  
**On**: Sets your preferred maximum volume.  
Notes:  
- If the “Maximum VOL level” is set lower than the “Initial VOL level”, the “Initial VOL level” automatically becomes the same as the “Maximum VOL level”.  
- The volume display can go up to 100 regardless of the settings.  
- You can hear the changed volume regardless of your volume setting before opening the options menu if you adjust the volume when “Maximum VOL level” is “On” and cursor is on the menu. |
| **Input lock**        | **Off ↔ VIDEO ↔ Component/RGB ↔ PC ↔ DVI ↔ HDMI1 ↔ HDMI2 ↔ Off**  
Notes:  
- Only the adjusted signal is displayed (see page 15).  
- Input switch can be used when this is set to “Off”. |
## Options Adjustments

</tr>
<tr>
<td><strong>Initial Power Mode</strong></td>
<td><strong>Normal</strong> ↔ <strong>On</strong> ↔ <strong>Standby</strong>&lt;br&gt;<strong>Normal</strong>: Power returns in as the same state as before the power interruption.&lt;br&gt;<strong>Standby</strong>: Power returns in standby mode. (Power Indicator : red/orange)&lt;br&gt;<strong>On</strong>: Power returns in power On. (Power Indicator : green)&lt;br&gt;<strong>Note</strong>: When using multiple displays, &quot;Standby&quot; is preferred to be set in order to reduce a power load.</td>
</tr>
<tr>
<td><strong>Power On Screen Delay</strong></td>
<td><strong>Off</strong> ↔ <strong>1</strong> ↔ <strong>2</strong> ↔ <strong>3</strong> ↔ <strong>30</strong>&lt;br&gt;You can set the power-on delay time of the displays to reduce the power load, when you press ( )/ ( ) to turn on the multiple displays that are set together, for example, on MULTI DISPLAY system.&lt;br&gt;<strong>Set each display’s setting individually.</strong>&lt;br&gt;<strong>Off</strong>: The display will be turned on at the same time as ( )/ ( ) is pressed.&lt;br&gt;<strong>1 to 30 (sec.)</strong>: Set the power-on delay time (second).&lt;br&gt;<strong>After pressing ( )/ ( ), the display will be powered on with time delay depending on this setting.</strong>&lt;br&gt;<strong>Notes</strong>:&lt;br&gt;• During this function is working, the power indicator is blinking green.&lt;br&gt;• This function also works when the power recovers from failure or after plugging off and in again the power cord.</td>
</tr>
<tr>
<td><strong>Clock Display</strong></td>
<td><strong>Off</strong>: Not display the clock.&lt;br&gt;<strong>On</strong>: Display the clock.&lt;br&gt;The clock is displayed at the lower left of the screen when button is pressed.&lt;br&gt;<strong>Note</strong>: When &quot;PRESENT TIME Setup&quot; is not set, the clock is not displayed even if &quot;Clock Display&quot; is &quot;On&quot;. (see page 27)</td>
</tr>
</tbody>
</table>

### Normalization

When both main unit buttons and remote control are disabled due to the "Button lock" or "Remocon User level" adjustments, set all the values "Off" so that all the buttons are enabled again.

Press the button on main unit together with button on the remote control and hold for more than 5 seconds. The "Shipping" menu is displayed and the lock is released when it disappears.
Troubleshooting

Before you call for service, determine the symptoms and make a few simple checks as shown below.

<table>
<thead>
<tr>
<th>Symptoms</th>
<th>Sound</th>
<th>Checks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interference</td>
<td>Noisy Sound</td>
<td>Electrical Appliances, Cars / Motorcycles, Fluorescent light</td>
</tr>
<tr>
<td>Normal Picture</td>
<td>No Sound</td>
<td>Volume (Check whether the mute function has been activated on the remote control.)</td>
</tr>
<tr>
<td>No Picture</td>
<td>No Sound</td>
<td>Not plugged into AC outlet, Not switched on Picture and Brightness/Volume setting (Check by pressing the power switch or stand-by button on the remote control.)</td>
</tr>
<tr>
<td>No Picture</td>
<td>Normal Sound</td>
<td>If a signal with a non-applicable colour system format, or frequency is input, only the input terminal indication is displayed.</td>
</tr>
<tr>
<td>No Colour</td>
<td>Normal Sound</td>
<td>Colour controls set at minimum level (see page 24, 25), Colour system (see page 38). No remote control operations can be performed. Check whether the batteries have discharged completely and, if they have not, whether they were inserted properly. Check whether the remote control sensor is exposed to an outdoor light or a strong fluorescent light. Check whether the remote control designed specifically for use with the unit is being used. (The unit cannot be operated by any other remote control.)</td>
</tr>
</tbody>
</table>

If there is nothing wrong with the picture or sound, this is the sound of the cabinet undergoing very slight contractions in response to changes in the room temperature. There are no adverse effects on the performance or other aspects.

The top or bottom of the picture on the screen is cut off when I use the zoom function. Adjust the position of the picture on the screen.

Areas at the top and bottom of the screen where the image is missing appear when I use the zoom function. When using a video software program (such as a cinema size program) with a screen wider than one in the 16:9 mode, blank areas separate from the images are formed at the top and bottom of the screen.

I can hear sounds coming from inside the unit. When the power is turned on, a sound of the display panel being driven may be heard. This is normal and not indicative of malfunctioning.

Parts of the unit become hot. Even when the temperature of parts of the front, top and rear panels has risen, these temperature rises will not pose any problems in terms of performance or quality.

Power automatically turns off unexpectedly. Check the settings of “Power management” and “Auto power off” in the Setup menu. Any of them may be set to “On”. (see page 31)

This LCD Display uses special image processing. Hence a slight time lag may occur between image and audio, depending on the type of input signal. However, this is not a malfunction.

**LCD Display panel**

<table>
<thead>
<tr>
<th>Symptoms</th>
<th>Check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The screen darkens slightly when bright pictures with minimal movements are shown.</td>
<td>The screen will darken slightly when photos, still images of a computer or other pictures with minimal movements are shown for an extended period. This is done to reduce image retention on the screen and the shortening of the screen’s service life: It is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>It takes a while for the picture to appear.</td>
<td>The unit digitally processes the various signals in order to reproduce esthetically pleasing images. As such, it sometimes takes a few moments for the picture to appear when the power has been turned on, when the input has been switched.</td>
</tr>
<tr>
<td>The edges of the images flicker.</td>
<td>Due to the characteristics of the system used to drive the panel, the edges may appear to flicker in the fast-moving parts of the images: This is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>There may be red spots, blue spots, green spots and black spots on the screen.</td>
<td>This is a characteristic of liquid crystal panels and is not a problem. The liquid crystal panel is built with very high precision technology giving you fine picture details. Occasionally, a few non-active pixels may appear on the screen as fixed points of red, blue, green, or black. Please note this does not affect the performance of your LCD.</td>
</tr>
<tr>
<td>Image retention appears</td>
<td>Image retention may occur. If you display a still picture for an extended period, the image might remain on the screen. However, it will disappear after a while. This is not considered as malfunction.</td>
</tr>
</tbody>
</table>
