WARRANTY - Australia only

1. The product is warranted for 12 months from the date of purchase. Subject to the conditions of this warranty Panasonic or its Authorised Service Centre will perform necessary service on the product without charge for parts or labour if, in the opinion of Panasonic, the product is found to be faulty within the warranty period.

2. This warranty only applies to Panasonic products purchased in Australia and sold by Panasonic Australia or its Authorised Distributors or Dealers and only where the products are used and serviced within Australia or its territories. Warranty cover only applies to service carried out by a Panasonic Authorised Service Centre and only if valid proof of purchase is presented when warranty service is requested.

3. This warranty only applies if the product has been installed and used in accordance with the manufacturer’s recommendations (as noted in the operating instructions) under normal use and reasonable care (in the opinion of Panasonic). The warranty covers normal domestic use only and does not cover damage, malfunction or failure resulting from use of incorrect voltages, incorrect installation, accident, misuse, neglect, build-up of dirt or dust, abuse, maladjustment of customer controls, mains supply problems, thunderstorm activity, infestation by insects or vermin, tampering or repair by unauthorised persons (including unauthorised alterations), exposure to abnormally corrosive conditions or any foreign object or matter having entered the product.

4. This warranty does not cover the following items unless the fault or defect existed at the time of purchase:
   (a) Video or Audio Tapes
   (b) Video or Audio Heads and Stylii resulting from wear and tear in normal use
   (c) Shaver Heads or Cutters
   (d) Cabinet Parts
   (e) User replaceable Batteries
   (f) Thermal Paper, Toner/Link Cartridges, Drums, Developer, Film (Ink/Ribbon), Film Cartridge, Printer Heads
   (g) Microwave Oven cook plates.

5. If warranty service is required you should:
   • Telephone Panasonic’s Customer Care Centre on 132600 or visit our website and use the Service Centre Locator for the name/address of the nearest Authorised Service Centre.
   • Send or bring the product to a Panasonic Authorised Service Centre together with your proof of purchase receipt as a proof of purchase date. Please note that freight and insurance to and / or from your nearest Authorised Service Centre must be arranged by you.
   • Note that home or pick-up/delivery service is available for the following products in the major metropolitan areas of Australia or the normal operating areas of the nearest Authorised Service Centres:
     (a) Picture tube (CRT) based Television Receivers (screen sizes greater than 66cm); Rear Projection TV’s, Plasma/LCD televisions / displays (screen size greater than 103 cm)
     (b) Convection/Combination Microwave Ovens
     (c) Whiteboard (except portable type)

6. The warranties hereby conferred do not extend to, and exclude, any costs associated with the installation, de-installation or re-installation of a product, including costs related to the mounting, de-mounting or remounting of any screen, (and any other ancillary activities), delivery, handling, freighting, transportation or insurance of the product or any part thereof or replacement of and do not extend to, and exclude, any damage or loss occurring by reason of, during, associated with, or related to such installation, de-installation, re-installation or transit. Panasonic Authorised Service Centres are located in major metropolitan areas and most regional centres of Australia, however, coverage will vary dependant on product. For advice on exact Authorised Service Centre locations for your product, please telephone our Customer Care Centre on 132600 or visit our website and use the Service Centre Locator.

Unless otherwise specified to the consumer the benefits conferred by this express warranty are additional to all other conditions, warranties, guarantees, rights and remedies expressed or implied by the Trade Practices Act 1974 and similar consumer protection provisions contained in legislation of the States and Territories and all other obligations and liabilities on the part of the manufacturer or supplier and nothing contained herein shall restrict or modify such rights, remedies, obligations or liabilities.

November 2005

THIS WARRANTY CARD AND THE PURCHASE DOCKET (OR SIMILAR PROOF OF PURCHASE) SHOULD BE RETAINED BY THE CUSTOMER AT ALL TIMES

If you require assistance regarding warranty conditions or any other enquiries, please visit the Panasonic Australia website www.panasonic.com.au or by phone on 132 600

If phoning in, please ensure you have your operating instructions available.

Safety Precautions

Handling the mains plug and lead
- Insert the mains plug fully into the socket outlet. If the mains plug is loose, it could generate heat and cause fire.
- Ensure that the mains plug is easily accessible.
- Ensure the earth pin on the mains plug is securely connected to prevent electrical shock.
- Do not touch the mains plug with a wet hand. This may cause electrical shock.
- Do not use any mains lead other than that provided with this TV. This may cause fire or electrical shock.
- Do not damage the mains lead. A damaged lead may cause fire or electrical shock.

Do not:
- Move the TV with the lead plugged in the socket outlet.
- Place a heavy object on the lead or place the lead near a high-temperature object.
- Twist the lead, bend it excessively, or stretch it.
- Pull on the lead. Hold onto the mains plug body when disconnecting lead.
- Use a damaged mains plug or socket outlet.

If you find any abnormality, remove the mains plug immediately!

AC 220 - 240 V
50 / 60 Hz

Power source
- This TV is designed to operate on 220 - 240 V, 50 / 60 Hz AC.

Avoid exposing the TV to high atmospheric moisture (such as tropical rain) or night time dew condensation
- This TV is designed and manufactured for indoor use only.

Do not place foreign objects inside the TV
- Do not allow any objects to drop into the TV through the air vents. Fire or electrical shock may result.

Do not place the TV on sloped or unstable surfaces
- The TV may fall off or tip over.

Use only the dedicated pedestals / mounting equipment
- Using an unapproved pedestal or other fixtures may make the TV unstable, risking injury. Be sure to ask your local Panasonic dealer to perform setup.
- Use approved pedestals / mounts (p. 8).

Avoiding children to handle SD Card
- As with any small object, SD Cards can be swallowed by young children. Please remove SD Card immediately after use and store out of reach of children.

Do not remove covers
NEVER modify the TV yourself
- High-voltage components may cause serious electrical shock.
- Have the TV checked, adjusted, or repaired at your local Panasonic dealer.

Keep liquids away from the TV
- To prevent damage which may result in fire or shock hazard, do not expose this appliance to dripping or splashing.
- Do not place containers with water (flower vase, cups, cosmetics, etc.) above the TV, including on shelves above, etc.

Do not expose to direct sunlight and other sources of heat
- Avoid exposing the TV to direct sunlight and other sources of heat. To prevent fire never place any type of candle or naked flame on top or near the TV.
Install TV on a stable surface
If a television is not positioned in a sufficiently stable location, it can be potentially hazardous due to falling. Many injuries, particularly to children, can be avoided by taking simple precautions such as:
- Using cabinets or stands recommended by the manufacturer of the television.
- Only using furniture that can safely support the television.
- Ensuring the television is not overhanging the edge of the supporting furniture.
- Not placing the television on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the television to a suitable support.
- Not standing the televisions on cloth or other materials placed between the television and supporting furniture.
- Educating children about the dangers of climbing on furniture to reach the television or its controls.

When cleaning the TV, remove the mains plug
- Cleaning an energized TV may cause electrical shock.

When the TV is not going to be used for a long period of time, remove the mains plug
- This TV will still consume some power even in the Off mode, as long as the mains plug is still connected to a live socket outlet.

Transport only in upright position
- Transporting the TV with its display panel facing upward or downward may cause damage to the internal circuitry.

Allow sufficient space around the TV for radiated heat

<table>
<thead>
<tr>
<th>Minimum distance</th>
<th>(cm)</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
<td>10</td>
</tr>
</tbody>
</table>

- When using the pedestal, keep the space between the bottom of the TV and the surface where the TV is set.
- In case of using Wall-hanging bracket, follow the manual of it.

Do not block the rear air vents
- Blocked ventilation by newspapers, table cloths, curtains, etc. may cause overheating, fire or electrical shock.

Do not expose your ears to excessive volume from the headphones
- Irreversible damage can be caused.

Display panel is made of glass. Do not apply strong force or impact to the display panel.
- This may cause damage resulting in injury.

The TV is heavy. Handle the TV by 2 or more people. Support as shown to avoid injury by the TV tipping or falling.

Auto power standby function
- If no signal is received and no operation is performed in Analogue TV mode for 30 minutes, the TV will automatically go to standby mode.

Keep the TV away from these types of equipment
- Electronic equipment
  - In particular, do not place video equipment near the TV. Electromagnetic interference may distort images / sound.
- Equipment with an infrared sensor
  - This TV also emits infrared rays. This may affect operation of other equipment.

Do not display a still picture for a long time
- This causes the image to remain on the plasma screen ("image retention"). This is not considered a malfunction and is not covered by the warranty.

Typical still images
- Programme number and other logos
- Image displayed in “4:3” mode
- Video game
- Computer image

To prevent image retention, contrast is lowered automatically after a few minutes if no signals are sent or no operations are performed. (p. 49)
Maintenance

First, remove the mains plug from the socket outlet.

## Display panel

Regular care: Gently wipe the surface clean of dirt by using a soft cloth.
Major contamination: Wipe the surface clean using a soft cloth dampened with clean water or diluted neutral detergent (1 part detergent to 100 parts water). Then, using a soft dry cloth, evenly wipe the surface clean until it is dry.

**Caution**
- The surface of the display panel has been specially treated and may be easily damaged.
- Do not tap or scratch the surface with your fingernail or other hard object.
- Take care not to subject the surface to insect repellent, solvent, thinner, or other volatile substances.
  This may degrade surface quality.

## Cabinet, Pedestal

Regular care: Wipe the surface clean using a soft dry cloth.
Major contamination: Dampen a soft cloth with clean water or water containing a small amount of neutral detergent. Then, wring the cloth and wipe the surface clean with it. Finally, wipe the surface clean with a dry cloth.

**Caution**
- Take care not to subject the TV’s surfaces to detergent. A liquid inside the TV could lead to product failure.
- Take care not to subject surfaces to insect repellent, solvent, thinner, or other volatile substances.
  This may deteriorate the surface by peeling the paint.
- Do not allow the cabinet and pedestal to make contact with a rubber or PVC substance for a long time.

## Mains plug

Wipe the mains plug with a dry cloth at regular intervals. Moisture and dust may lead to fire or electrical shock.

  - N2QAYB000352
- Batteries for the Remote Control (2)
  - R6 (AA)
- Pedestal
  - p. 8
- Fall-prevention parts
  - p. 9

- Cleaning cloth
- Mains Lead
  - p. 11
- Operating Instructions with Warranty statement

Optional accessories

Wall-hanging bracket
- TY-WK4P1RW

Caution
In order to maintain the unit’s performance and safety, be absolutely sure to ask your dealer or a licenced contractor to secure the wall-hanging brackets.
Carefully read the instructions accompanying the pedestal, and be absolutely sure to take steps to prevent the TV from tipping over.
Handle the TV carefully during installation since subjecting it to impact or other forces may cause product damage.

Installing remote’s batteries

1. Pull open
2. Close

Caution
Incorrect installation may cause battery leakage and corrosion, resulting in damage to the remote control.
Do not mix old and new batteries.
Do not mix different battery types (such as alkaline and manganese batteries).
Do not use rechargeable (Ni-Cd) batteries.
Do not burn or breakup batteries.
Batteries must not be exposed to excessive heat such as sunshine, fire or the like.
Accessories / Options

Attaching the pedestal

**Warning**
Do not disassemble or modify the pedestal.
● Otherwise the TV may fall over and become damaged, and personal injury may result.

**Caution**
Do not use any other TV and displays.
● Otherwise the TV may fall over and become damaged, and personal injury may result.
Do not use the pedestal if it becomes warped or physically damaged.
● If you use the pedestal while it is physically damaged, personal injury may result. Contact your nearest Panasonic dealer immediately.

During set-up, make sure that all screws are securely tightened.
● If insufficient care is taken to ensure screws are properly tightened during assembly, the pedestal will not be strong enough to support the TV, and it might fall over and become damaged, and personal injury may result.

Ensure that the TV does not fall over.
● If the TV is knocked or children climb onto the pedestal with the TV installed, the TV may fall over and personal injury may result.

Two or more people are required to install and remove the TV.
● If two or more people are not present, the TV may be dropped, and personal injury may result.

---

**Assembling the pedestal**
Use the four assembly screws (A) to fasten the left and right poles to the base securely.
● Make sure that the screws are securely tightened.
● Forcing the assembly screws the wrong way will strip the threads.
● “L” or “R” mark is stamped on the bottom of the pole.

---

**Securing the TV**
Use the assembly screws (B) to fasten securely.
● Make sure that the screws are securely tightened.
● Carry out the work on a horizontal and level surface.

---

**Adjust the panel to your desired angle**
● Ensure that the pedestal does not hang over the edge of the base even if the TV swivels to the full rotation range.
● Do not place any objects or hands within the full rotation range.

---

### Base
- TBLX0110 (TH-P42G10A)
- TBLX0109 (TH-P46G10A / TH-P50G10A)

---

**View from the bottom**
- Hole for pedestal installation

---

**Arrow mark**

---

**Set the mark at the centre as illustrated, to have the swivel positioned at the centre of the rotation angle.**

- TH-P42G10A
  - a: 520 mm / b: 355 mm / c: 15°
- TH-P46G10A, TH-P50G10A
  - a: 528 mm / b: 407 mm / c: 10°
Preventing the TV from falling over

This TV could fall over if it's pushed, pulled or knocked down. We therefore recommend the TV is secured to the base as illustrated. This measure is designed to reduce the risk of injury from a falling TV. However, it cannot guarantee protection in all cases.

Fall-prevention parts

* Securing to a base
  Fix pedestal and base together with band.

Identifying Controls

VCR / DVD Panasonic equipment operations (p. 21)
Basic Connection

External equipment and cables shown are not supplied with this TV. Please ensure that the TV is disconnected from the mains socket before attaching or disconnecting any leads. When disconnecting the mains lead, be absolutely sure to disconnect the mains plug at the socket outlet first.

Connecting aerial

TV only

Connecting DVD Recorder / VCR

TV, DVD Recorder or VCR

Note

1. Do not put the RF cable close to the mains lead to avoid noise.
2. Do not place the RF cable under the TV.
3. To obtain optimum quality picture and sound, an Aerial, the correct cable (75 Ω coaxial) and the correct terminating plug are required.
4. If a communal Aerial system is used, you may require the correct connection cable and plug between the wall Aerial socket and the TV.
5. Your local Television Service Centre or dealer may be able to assist you in obtaining the correct Aerial system for your particular area and the accessories required.
6. Any matters regarding Aerial installation, upgrading of existing systems or accessories required, and the costs incurred, are the responsibility of you, the Customer.
7. VIERA Link connection p. 38
8. Read the manual of the equipment too.
Auto Tuning

Search and store TV channels automatically.
These steps are not necessary if the setup has been completed by your local dealer.

1. **Plug the TV into mains socket and switch On**
   - You can now use the remote control to turn On the TV or switch the TV to standby mode.
   - (Power LED: On)

2. **Select your area**
   - Select State / Territory
   - Northern Territory
   - Queensland
   - Victoria
   - South Australia
   - Western Australia
   - New South Wales / Australian Capital Territory
   - Tasmania

3. **Select Auto Scan Type**
   - Auto Scan Type
     - All Channels
     - Digital TV Channels only

4. **Start Auto Tuning**
   - Auto Tuning
   - This will take about 6 minutes.

5. **Select the viewing environment**
   - Please select your viewing environment.
     - Home
     - Shop
   - “Home” is the recommended mode for viewing at home. Select “Home” for optimal picture / power consumption.
   - “Shop” is for in-store display.
   - Home: “Viewing Mode” is set as “Normal”. (p. 24)
   - Shop: “Viewing Mode” is set as “Dynamic”. (p. 24)

---

**If you select “Shop” by mistake**
Return to the “Home” or “Shop” Selection menu

- Once you press the OK button in this menu, the TV is set to Shop mode.
- Please reset all settings to set to “Home” mode.
- “Shipping Condition” (p. 32)
Using the On-Screen Displays

Many features available on this TV can be accessed via the On-Screen Display menu.

On-screen operation guide

**How to use remote control**

- **MENU**: Open the Main Menu
- **OK**: Move the cursor / adjust levels / select from a range of options
- **RETURN**: Return to the previous menu
- **EXIT**: Exit the menu system and return to the normal viewing screen

**Note**

- To edit channels ⇒ “Editing Channels” (p. 28)
- If tuning has failed ⇒ “Tuning Channels” (p. 30)
- To reset all settings ⇒ “Shipping Condition” (p. 32)
- If you turned the TV Off during Standby mode last time, the TV will be in Standby mode when you turn the TV On with Mains power On / Off switch.
Watching TV

1. **Turn power on**
   - Press POWER
   - Mains power On / Off switch should be On. (p. 9)

2. **Select Digital TV or Analogue TV mode**
   - Press TV
   - Also possible to select the mode using the TV button on the side panel of the TV. (p. 9)

3. **Select a channel**
   - Press CH up or down
   - To select the two or three-digit channel number, e.g. 39 ➞ 3 ➞ 9 (in a short time)
   - If one or two-digit channel number quickly changes the channel
   - To select from the Channel List

**Select a channel using information banner (p. 15)**
- Possible to confirm the programme name before selecting channels.
  - Display information banner if it is not displayed
  - While the banner is displayed, select a channel
  - Possible to set display timeout in “Banner Display Timeout” (p. 25).

**Select a channel using TV Guide (Digital TV mode) (p. 17)**
- Possible to confirm the TV Guide (EPG) before selecting channels.
  - Display TV Guide
  - Select a channel

**Note**
- When the TV is switched to standby, there will be a clicking sound after a short delay. This is normal.

<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>16:9</td>
<td>Directly displays the image at “16:9” without distortion (anamorphic).</td>
</tr>
<tr>
<td>14:9</td>
<td>Displays the image at the standard “14:9” without distortion.</td>
</tr>
<tr>
<td>Just</td>
<td>Displays a “4:3” image full-screen. Stretching is only noticeable at the left and right edges.</td>
</tr>
<tr>
<td>4:3</td>
<td>Displays the image at the standard “4:3” without distortion.</td>
</tr>
<tr>
<td>4:3 Full</td>
<td>Displays a “4:3” image enlarged horizontally to fit the screen. HD signal only</td>
</tr>
<tr>
<td>Zoom1</td>
<td>Displays a “16:9” letterbox or “4:3:3” image without distortion.</td>
</tr>
<tr>
<td>Zoom2</td>
<td>Displays a “16:9” letterbox (anamorphic) image full-screen without distortion.</td>
</tr>
<tr>
<td>Zoom3</td>
<td>Displays a “2.35:1” letterbox (anamorphic) image full-screen without distortion. At “16:9”, displays the image at its maximum (with slight enlargement).</td>
</tr>
</tbody>
</table>

Note

• Only “16:9” and “4:3” Full are available in Digital TV mode.
• Only “16:9” and “4:3” are available in PC mode.
• Only “16:9” is available when “Viewing Mode” is set to “Game”.
• Not available in teletext mode.
• Aspect mode can be memorized separately for SD (Standard definition) and HD (High definition) signals. (except Digital TV mode)
Using TV Guide

Using TV Guide enables you to select programme easily, view programme informations, etc. TV Guide—Electronic Programme Guide (EPG) provides an on-screen listing of the programmes currently broadcast and the future broadcasts over the next seven days (depending on the broadcasters).

**View TV Guide**

Each time pressed, the layout will be changed. (Landscape / Portrait)

Example:

<table>

To view details of the programme

Select the programme

Press again to return to TV Guide.

- To the previous day ➔ R
- To the next day ➔ G
- To watch the programme ➔ select
- To view the programme ➔ watch
- To list favourite channels ➔ p. 29
- To view a channel list of the selected type ➔ (Type list)
- To view a channel list of the selected favourite list ➔ (favourite list)

**Note**

● When this TV is turned on for the first time, or the TV is switched off for more than a week, it may take some time before the TV Guide is completely shown.
Viewing Teletext

You can enjoy teletext broadcasting, including news, weather forecasts and subtitles, if this service is provided by the broadcasters.

To change mode ⇒ “Teletext” in Setup Menu (p. 25)

Switch to Teletext

1

Select the page (up to page 899)

2

What is FASTEXT mode?
In FASTEXT mode, four differently coloured subjects are situated at the bottom of the screen. To access more information about one of these subjects, press the appropriately coloured button. This facility enables fast access to information on the subjects shown.

What is TOP mode? (in case of TOP text broadcasting)
TOP is a particular improvement of the standard teletext service that results in an easier search and effective guide.

Fast overview of the teletext information available

Easy to use step-by-step selection of the topical subject

Page status information at the bottom of the screen

Available page up / down

To select among subject blocks

To select next subject within the subject block

(After the last subject, it moves to the next subject block.)

What is List mode?
In List mode, four differently coloured page numbers are situated at the bottom of the screen. Each of these numbers can be altered and stored in the TV’s memory. (“Store frequently viewed pages”, p. 19)

| The news page provides a function that indicates arrival of latest news (“News Flash”). |
Watching Videos and DVDs

Connect the external equipment (VCRs, DVD equipment, etc.) and you can watch the input.

To connect the equipment  p. 11

You can operate some functions of selected Panasonic external equipment with this remote control.

Display the input select menu

Select the input mode of the connected equipment

View

Displays the selected mode

Note

If the external equipment has an aspect adjustment function, set to “16:9”.
For details, see the manual of the equipment or ask your local dealer.
Panasonic equipment connected to the TV can be directly operated with the remote control.

### How to change the code for each equipment
Each type of Panasonic equipment has its own remote control code. Please change the code for each equipment you want to operate.

Press and hold `POWER` during the following operations:

- Enter the appropriate code:
  - DVD Recorder / DVD Player: 223
  - Player theatre / Blu-ray Disc theatre: 226
  - VCR: 228
- Press `REC`

**See table below**

<table>
<thead>
<tr>
<th>Type of equipment</th>
<th>Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>DVD Recorder / DVD Player</td>
<td>70 (default)</td>
</tr>
<tr>
<td>Player theatre / Blu-ray Disc theatre</td>
<td>71</td>
</tr>
<tr>
<td>VCR</td>
<td>72</td>
</tr>
<tr>
<td>VIERA Link compatible equipments =&gt; “VIERA Link Control” (p. 38)</td>
<td>73</td>
</tr>
</tbody>
</table>

**Note**
- Confirm if the remote control works correctly after changing the code.
- The codes will be reset to default values if batteries are replaced.
- Some operations may not be possible on some equipment models.
Various menus allow you to make settings for the picture, sound, and other functions.

1. Display the menu
   - Displays the functions that can be set (varies according to the input signal)

2. Select the menu
   - Access

3. Select the item
   - Select

4. Adjust or select
   - Change

Choose from among alternatives
   - Number and positions of alternatives

Adjust using the slide bar
   - Sharpness

Go to the next screen
   - Displays the next screen

Enter characters by free input menu
   - To delete a character
   - To delete all characters

Every press changes the character by one. Leave it for a second to set the character, or press OK or any numeric button within a second.

See the table below for the corresponding characters for each numeric button.

</table>
| **Picture**     | **Viewing Mode**                    | Basic picture mode *(Dynamic / Normal / Cinema / Game)*  
|                 |                                     | Dynamic : Provides enhanced picture contrast and sharpness when viewing in a bright room  
|                 |                                     | Normal : Recommended for viewing under normal ambient room lighting conditions  
|                 |                                     | Cinema : For watching movies in a darkened room producing a cinema-like picture  
|                 |                                     | Game : Game playing time is displayed only when connecting a game equipment.  
|                 |                                     | ● Set for each input signal  
|                 |                                     | ● Colour setting is available in Normal and Cinema mode *(p. 33)*  
|                 | **Contrast, Brightness, Colour, Sharpness** | Increases or decreases the levels of these options according to your personal preference  
|                 | **Tint**                            | With an NTSC signal source connected to the TV, the picture hue can be adjusted to suit your taste  
|                 |                                     | ● For NTSC or Component / HDMI input signal reception only  
|                 | **Colour Balance**                  | Allows you to set the overall colour tone of the picture *(Cool / Normal / Warm)*  
|                 | **Colour Management**               | Automatically adjusts colours to vivid ones *(Off / On)*  
|                 | **x.v.Colour**                      | Increases the colour gradations *(Off / Auto)*  
|                 |                                     | This is effective when watching HD moving pictures with extended gamut *(xvYCC)* from external equipment  
|                 |                                     | ● HDMI input mode or Movie View Mode *(p. 37)* only  
|                 | **Eco Mode**                        | Adjusts picture settings automatically dependent on ambient lighting conditions *(Off / On)*  
|                 | **P-NR**                            | Picture Noise Reduction  
|                 |                                     | Automatically reduces unwanted picture noise and flicker noise in the contoured parts of a picture *(Off / Min / Mid / Max)*  
|                 |                                     | ● Not valid on PC signal  
|                 | **3D-COMB**                         | Occasionally, whilst viewing still or slow moving pictures, colour patterning may be seen  
|                 |                                     | Set to “On” to display sharper and more accurate colours *(Off / On)*  
|                 |                                     | ● For PAL or NTSC signal reception only  
|                 |                                     | ● Not valid on S-Video, Component, PC, HDMI and SD Card  
|                 | **Advanced Settings**               | Set for colour balance, view and position *(p. 33)*  
|                 |                                     | Set for colour balance in Normal or Cinema viewing mode  
|                 | **Reset Picture Defaults**          | Press the OK button to reset the present Picture Menu to the default settings  
| **Sound**       | **Mode**                            | Basic sound mode *(Music / Speech)*  
|                 |                                     | ● Set for each input signal  
|                 | **Bass**                            | Increases or decreases level to enhance or minimise lower, deeper sound output  
|                 | **Treble**                          | Increases or decreases level to enhance or minimise sharper, higher sound output  
|                 | **Balance**                         | Adjusts volume level of right and left speakers  
|                 | **Headphone Volume**                | Adjusts the volume of the headphones  
|                 | **Surround**                        | Surround sound settings *(Off / V-Audio / V-Audio Surround)*  
|                 |                                     | V-Audio: Provides a dynamic enhancer to simulate improved spatial effects  
|                 |                                     | V-Audio Surround: Provides a dynamic enhancer of width and depth to simulate improved spatial effects  
|                 |                                     | ● Switching is also possible by the Surround button on the remote control *(p. 10)*.  
|                 | **Volume Correction**               | Adjusts the low frequency sound *(Over 30cm / Up to 30cm)*  
|                 |                                     | ● Over 30cm: Recommended when the back space between the TV and wall is over 30 cm.  
|                 |                                     | ● Up to 30cm: Recommended when the back space between the TV and wall is within 30 cm.  
|                 | **Speaker Distance to Wall**        | Adjusts volume of individual channel or input mode  
|                 | **MPX**                             | Selects stereo / monaural *(Mono / Stereo)* *(p. 46)*  
|                 |                                     | ● Normally: Stereo  
|                 |                                     | ● Stereo signal cannot be received: Mono  
|                 |                                     | ● M1 / M2: Available while mono signal is transmitted  
|                 |                                     | ● Analogue TV mode only  
|                 | **Digital Audio Preference**        | Selects the initial setting for Audio tracks *(Dolby D / MPEG)*  
|                 |                                     | If programme has both Dolby Digital and MPEG audio tracks, priority is given to what you select  
|                 |                                     | Dolby D: A method of coding digital signals developed by Dolby Laboratories. Apart from stereo (2ch) audio, these signals can also be multi-channel audio.  
|                 |                                     | MPEG: An audio compression method that compresses audio to small size without any considerable loss of audio quality.  
|                 |                                     | ●Digital TV mode only  
|                 | **SPDIF Selection**                 | Selects the initial setting for digital audio output signal from DIGITAL AUDIO OUT terminal *(Auto / PCM)*  
|                 |                                     | Auto: Dolby Digital is output as Dolby Digital Bitstream. MPEG is output as PCM.  
|                 |                                     | PCM: Dolby Digital is output as PCM. MPEG is output as PCM.  
|                 |                                     | ● Digital TV mode only  

24
### MPEG Optical Level
You can adjust the audio level of MPEG output from DIGITAL AUDIO OUT terminal as the initial setting:
- 0dB to -12dB in -2dB reductions
- Digital TV mode only

### HDMI1 / 3 Input
Select to fit the input signal (Digital / Analogue) (p. 48)
- Digital: HDMI cable connection
- Analogue: HDMI-DVI adapter cable connection
- HDMI input mode only
- HDMI2 terminal is for digital signal only
- No setting for HDMI2 available

### Reset Sound Defaults
Press the OK button to reset the present Sound Menu to the default settings

### Off Timer
Sets the time the TV automatically turns Off (Off / 15 / 30 / 45 / 60 / 75 / 90 minutes) (p. 15)

### Favourites Edit
Creates list of favourite channels (Digital TV mode) (p. 29)

### Channel List
Skips the unwanted channels (p. 29)

### Auto Tuning
Sets all Digital TV or Analogue TV channels automatically (p. 30)

### Manual Tuning
Sets the TV channels manually (p. 31)

### Update Channel List
Update the channel list (Digital TV mode) (p. 31)

### New Channel Message
Displays a message when new Digital TV channels are found. (Off / On) (p. 31)

### Signal Condition
Checks the Digital TV signal condition (p. 31)

### Add MPEG-4 AVC Channels
Activates the reception of MPEG-2 and MPEG-4 AVC channels
- Use this function if MPEG-4 AVC services start in your area.
- All previous tuning settings are erased.
- Once activated, this option is removed from the Digital TV Tuning Menu.

### Teletext
Teletext display mode (TOP (FASTEXT) / List) (p. 18)

### Side Panel
Increases the brightness of the side panel (Off / Low / Mid / High)
- The recommended setting is “High” to prevent panel “image retention”.

### Input Labels
Labels or skips each input mode (p. 26)

### Banner Display Timeout
Sets how long the information banner stays on screen from 0 (No display) to 10 sec. in 1-sec. increments

### Playing Time Display
Displays the length of time in every thirty minutes for playing game (Off / On)
- When “Viewing Mode” is set to “Game”

### VIERA Link
Sets to use VIERA Link functions (Off / On)
- VIERA Link functions become available when “VIERA Link” is set to “On”.

### Power on Link
Sets to use Power on Link functions (Off / On) (p. 39)

### Power off Link
Sets to use Power off Link functions (Off / On) (p. 39)

### Standby Power Save
Controls the power consumption in Standby mode of the connected equipment to reduce the consumption (Off / On) (p. 39)

### Intelligent Auto Standby
Makes unwatched or unused connected equipment go into Standby mode to reduce the power consumption (Off / On (With reminder) / On (No reminder)) (p. 39)

### Shipping Condition
Resets all settings, for example, when moving house (p. 32)

### System Update
Downloads new software to TV (p. 27)

### Software Licence
Displays the software licence information

### System Information
Displays the system information of this TV

### Intelligent Frame Creation
Automatically compensates the picture frame rate to make the image smooth (Off / On)
- Set to “Off” if noise is generated on the screen.

### Power Save
Reduces brightness of picture to minimise power consumption (Off / On)

### Picture Overscan
Selects the screen area for displaying the image (Off / On)
- On: Enlarges the image to hide the edge of the image.
- Off: Displays the image in the original size.
- Set to “On” if noise is generated on the edges of the image.
- This function is available when aspect is set to “16:9”.
- This function can be memorized separately for SD (Standard Definition) and HD (High Definition) signals.

### SD Card LED
Lights blue LED while SD Card is inserted (Off / On) (p. 35)

### Region Select
Selects the region where you live to adjust the standard time (NSW / ACT / Victoria / Queensland / South Australia / Western Australia / Northern Territory / Tasmania) (p. 15)

### Daylight Saving Time
Select time offset from the standard time for Summer Time (Auto / Off / +1/2 hour / +1 hour) (p. 15)
- Set to “Auto” normally

---

*A different menu will be displayed while PC, DVI to HDMI adapter cable or SD Card is used. (p. 33 - 37)

*Only available items can be selected.*
Input Labels

For easier identification and selection of the input mode, you can label each input terminals or skip terminal that is not connected to any equipment.

To select the input mode ➔ p. 20

1. Display the menu
   - Menu

2. Select “Setup”
   - Access

3. Select “Display Settings”
   - Access

4. Select “Input Labels”
   - Access

5. Select an input terminal and set
   - Set

The labels you set will be displayed in “Input Selection” menu (p. 20) or banner.
If “Skip” is selected, you cannot select the mode.

User input
You can name each input terminals freely.

- Select “User input”
- Access
- Select
- Set
- Store

(maximum: ten characters)
You can set characters by using numeric buttons. ➔ p. 22
Digital TV Settings

Digital TV Settings provide access to various advanced features.

1. If in Analogue TV mode
   Select Digital TV mode
   ① select

2. Display the menu
   MENU
   ② access

3. Select “Setup”
   ① select

4. Select “System Menu”
   ② access

5. Select “System Update”
   ① select

6. Set

To return to TV  EXIT

---

**Update TV’s software system** [System Update]

Download new software to TV.

• For details  p. 46

If System Update is performed, the software will be updated. It may change TV functions.
If you do not wish to do so, set “Auto Update Search in Standby” to Off.

Select “Auto Update Search in Standby” and then set “On” or “Off”

- **On**: Automatically performs a search in standby and downloads an update, if any software updates are available
- **Off**: Turns off the automatic search function

**Note**

• When the TV is switched to standby, there will be a clicking sound after a short delay. Similar clicking sounds will also occur at 3:00 AM and 5:00 AM (p. 46) when “Auto update Search in Standby” is set to “On”. These sounds are normal.

To update immediately

Select “System Update Search Now”

- **Start**: Searches for an update (for several minutes) and displays a corresponding message if any

**Note**

• During downloading, the TV will display a blank screen for 40 to 50 seconds. Do not interrupt the TV during this procedure.

Download

- **OK**: Download may take for about 1 hour.
Editing Channels
You can make your favourite channel lists, skip unwanted channels, etc.

1. Select Digital TV or Analogue TV

2. Display the menu

3. Select “Setup”

4. Select “Digital TV Tuning Menu” or “Analogue TV Tuning Menu”

5. Select “Favourites Edit” or “Channel List”

6. Set
List favourite channels (Digital TV mode)  
Digital TV Favourites Edit

Create your favourite channel list (Favourites) from various broadcasters (up to 4: Favourites1 to 4). The list is added to “Favourites” list in TV Guide (p. 17) and information banner (p. 15) and then easily accessed.

Select a channel and add it to the list

To display another List

To add all channels to the list

A channel is added

To edit List

Select the field of List to edit and:

● To name the Favourites

● To move the channel

● To delete the channel

Note

Channel numbers are defined by the broadcaster and cannot be changed.

Hidden channels (see below) can be selected but not viewed.

Skip unwanted channels / Edit channels (Change name, Move)  
Channel List

You can hide unwanted channels. The hidden channels cannot be displayed except in this function. Use this function to skip unwanted channels.

Select a channel and add / delete

You can edit channels.

● If a VCR is connected only with the RF cable, edit “VCR”. (Analogue TV mode)

Select a channel to edit

Edit

To change the displayed name when selecting channels (Only in Analogue TV mode)

To move channel position

To swap channels

Tuning Channels
You can retune all the TV channels when moving house or search for new channels which may have recently started broadcasting.

1. Select Digital TV or Analogue TV
2. Display the menu
3. Select “Setup”
4. Select “Digital TV Tuning Menu” or “Analogue TV Tuning Menu”
5. Select a function
6. Set

For Auto Tuning, using the buttons on the side panel of the TV (p. 9)
① Press repeatedly until “Auto Tuning” appears
② Access “Auto Tuning”
③ Start “Auto Tuning”
● To return to TV

Set all Digital TV or Analogue TV channels automatically
Digital TV Auto Tuning or Analogue TV Auto Tuning

Automatically retune all Digital TV or Analogue TV channels received in the area.
● Only Digital TV channels are retuned in Digital TV mode.
● Only Analogue TV channels are retuned in Analogue TV mode.

Start Auto Tuning
All digital TV tuning data will be erased

Settings are made automatically
● All the previous tuning settings are erased.
● When the operation is completed, the channel at channel position “1” will be displayed.
● Search begins in the order from the lower channels to the higher channels. Channels received during this process are added to the list. (p. 31)
● If tuning has not been done completely “Digital TV Manual Tuning”, “Analogue TV Manual Tuning” (p. 31)
Set Digital TV channel manually [Digital TV Manual Tuning]

Normally use “Digital TV Auto Tuning” or “Update Channel List” to update Digital TV channels on your channel list.
If tuning has not been done completely or for adjusting the direction of the aerial, use this function.

Digital TV Manual Tuning

Select a channel position

Digital TV Manual Tuning

Digital TV: 0

Select a channel

Digital TV Manual Tuning

Update channels automatically [Update Channel List]

You can add new channels, delete duplicated channels, update channel name and position automatically to Channel List.

Digital TV Update Channel List

Display a message [New Channel Message]

Selects whether to give a message when new Digital TV channels are found. (Off / On)

Digital TV Signal Condition

Selects a channel and checks the Digital TV signal condition.

Digital TV Signal Condition

Check Digital TV signal [Digital TV Signal Condition]

A good Signal Strength is not an indication of suitable signal for Digital TV reception. Please use the Signal Quality indicator as follows:

Signal Quality:
● Green bar ➞ Good
● Yellow bar ➞ Poor
● Red bar ➞ Bad (Check the aerial)
Restore Settings

 Resets the TV to its original condition, i.e. no channels tuned in. All settings (channels, picture, sound quality, etc.) are reset.

1. Display the menu
   MENU

2. Select “Setup”

3. Select “System Menu”

4. Select “Shipping Condition”

5. Set

To return to TV

---

**Shipping Condition**

All tuning data will be erased
Are you sure?
Are you sure?

Follow the on-screen instructions
“Auto Tuning” will automatically start when Mains power On / Off switch is next turned On. (p. 12)

To retune TV channels only, e.g. after moving house
“Digital TV Auto Tuning” or “Analogue TV Auto Tuning” (p. 30)
Displaying PC Screen on TV

The screen of the PC connected to the TV can be displayed on the TV. You can also listen to PC sound with the audio cable connected.

To connect PC ⇒ p. 44

To return to TV ⇒ TV

Other items ⇒ p. 24 and p. 25

* Corresponding signals ⇒ p. 48
* If “H-freq.” or “V-freq.” is shown in red, the signals may not be supported.
**HDMI Functions**

HDMI (high-definition multimedia interface) allows you to enjoy high-definition digital images and high-quality sound by connecting the TV and the equipment. HDMI-compatible equipment (*1) with an HDMI or DVI output terminal, such as a set top box, a DVD player or a game equipment, can be connected to the HDMI terminal using an HDMI compliant (fully wired) cable.

About connections, see “External Equipment” (p. 44).

**Note**

- HDMI is the world’s first complete digital consumer AV interface complying with a non-compression standard.
- Audio settings can be made on the “HDMI1 / 3 Input” menu screen. (p. 25)
- Applicable audio signal sampling frequencies (2ch L.PCM): 48 kHz, 44.1 kHz, 32 kHz
- HDMI2 terminal is for digital audio signal only.
- Use with a PC is not guaranteed. Only HDMI video formats in the HDMI table (p. 48) are applicable.
- If the connected equipment has an aspect adjustment function, set the aspect ratio to “16:9”.
- These HDMI connectors are “type A”.
- These HDMI connectors are compatible with HDCP (High-Bandwidth Digital Content Protection) copyright protection.
- An equipment having no digital output terminal may be connected to the input terminal of either “COMPONENT”, “S-VIDEO”, or “VIDEO” to receive analogue signals.
- The HDMI input terminal can be used only with the following image signals: 480i, 480p, 576i, 576p, 720p, 1080i and 1080p. Match the output setting of the digital equipment.
- For details of the applicable HDMI signals, see p. 48.

**DVI connection**

- If the external equipment has only a DVI output, connect to the HDMI1 / 3 terminal via a DVI to HDMI adapter cable (*2).
- When the DVI to HDMI adapter cable is used, connect the audio cable to the audio input terminal (HDMI1: use AV2 IN AUDIO terminals / HDMI3: use AV4 IN AUDIO terminals).

**DVI Position Settings**

If the picture position is not fit to the screen during the DVI connection, adjust the position on “DVI Position Settings” in Setup Menu. The settings are memorized for each HDMI terminals and input signals.

- To make settings ⇒ “How to Use Menu Functions” 1 to 4 (p. 22)

Enjoy additional HDMI interoperability with Panasonic products which have “HDAVI Control” function. This TV supports “HDAVI Control 4” function. Connections to the equipment (DIGA Recorder, HD Video Camera, Player theatre, Amplifier, etc.) with HDMI cable allow you to interface them automatically. These features are limited to models incorporating “HDAVI Control” and “VIERA Link”.

Some functions are not available depending on the equipment’s version of HDAVI Control. Please confirm the connected equipment’s version of HDAVI Control.

VIERA Link “HDAVI Control”, based on the control functions provided by HDMI which is an industry standard known as HDMI CEC (Consumer Electronics Control), is a unique function that we have developed and added. As such, its operation with other manufacturers’ equipment that supports HDMI CEC cannot be guaranteed.

Please refer to individual manuals for the equipments. About applicable Panasonic equipment, consult your local Panasonic dealer.

### Connection

To use DIGA Recorder / DVD Player / Blu-ray Disc Player / HD Video Camera / LUMIX Camera

To use Player theatre / Blu-ray Disc theatre:

To use Amplifier:
Note
This function may not work properly depending on the connected equipment.
- For DIGA Recorder / DVD Player / Blu-ray Disc Player / HD Video Camera / LUMIX Camera with VIERA
  function, connect to HDMI1, HDMI2 or HDMI3 terminal via an HDMI cable.
- For Player theatre / Blu-ray Disc theatre / Amplifier, connect to HDMI1, HDMI2 or HDMI3 terminal via an HDMI
cable and/or either the optical digital audio cable or RCA cable for audio output from the TV.
- Use fully wired HDMI compliant cable. Non-HDMI-compliant cables cannot be utilized.
Recommended Panasonic’s HDMI cable part number:
  • RP-CDHG10 (1.0 m) • RP-CDHG15 (1.5 m) • RP-CDHG20 (2.0 m) • RP-CDHG30 (3.0 m) • RP-CDHG50 (5.0 m)

Preparations
- Connect the equipment supporting VIERA Link.
- Set up the connected equipment. Read the manual of the equipment.
- For optimal recording, the settings of the recorder might be required. For details, read the manual of the
  recorder.
- Set VIERA Link On in Setup Menu “VIERA Link” (p. 25)
- Set up the TV After connection, turn the equipment on and then switch the TV on. Select the input
  mode to HDMI1, HDMI2 or HDMI3 (p. 20), and make sure that an image is displayed correctly.
This setup should be done each time when the following conditions occur:
  • for the first time / • when adding or reconnecting equipment / • when changing setup

Features available

Channel download
Channel setting can be downloaded to the recorder.

Easy playback
Automatic input switching - When the connected equipment is operated, input mode is switched
automatically.

Power on link
Set Power on Link “On” in Setup Menu to use this function “Power on Link” (p. 25)
When the connected equipment starts playback or direct navigator / function menu for the equipment
are activated, the TV is automatically turned on. (Only when the TV is in Standby mode.)

Power off link
Set Power off Link “On” in Setup Menu to use this function “Power off Link” (p. 25)
When the TV is set to Standby mode, the connected equipment is also automatically set to Standby.
This function will work even if the TV enters standby mode automatically by Off Timer function or auto power
standby function.

Reduce unnecessary power consumption in standby [Standby Power Save]
Set Standby Power Save “On” in the Setup Menu to use this function “Standby Power Save” (p. 25)
The power consumption in Standby mode of the connected equipment is controlled higher or lower in
synchronization with the TV On / Off state to reduce the consumption.
When the TV is set to Standby mode, the connected equipment is automatically set to Standby and
the power consumption in Standby mode of the connected equipment is automatically minimized.
When the TV is turned on, the connected equipment is still in Standby mode, but the power
consumption is increased to make startup time early.
This function is effective if the connected equipment can change the power consumption in Standby mode
and is set to higher consumption.

Auto standby for unnecessary equipment [Intelligent Auto Standby]
Set Intelligent Auto Standby “On (With reminder)” or “On (No reminder)” in the Setup Menu to
use this function “Intelligent Auto Standby” (p. 25)
When the TV is on, the connected equipments not in use go into Standby mode automatically to
reduce the power consumption.
If you select “On (With reminder)”, the on screen message will be displayed to be noticed before working this
function.
Features available (Using VIERA Link Menu)

Direct TV Recording - What you see is What you record

Recording the current programme in DIGA Recorder immediately.
1. If you connect several recorders including other manufacturers’ recorders at the same time, please connect DIGA Recorder to the TV’s lower HDMI terminal number.
2. If you cannot operate, check the settings and the equipment ⇒ “VIERA Link features and connections” (p. 38)

1. Display “VIERA Link Menu”
2. Select “Direct TV Rec” and start recording

To stop recording
Select “Stop” in “Direct TV Rec” and access

Pause Live TV programme

You can pause the live TV programme and resume later. Live TV programme will be recorded on HDD of the connected DIGA Recorder.
1. This function is available with DIGA Recorder which has HDD.
2. If you connect several recorders including other manufacturers’ recorders at the same time, please connect DIGA Recorder which has HDD to the TV’s lower HDMI terminal number.
3. If you cannot operate, check the settings and the equipment ⇒ “VIERA Link features and connections” (p. 38)

Access and pause the live TV programme

1. Display “VIERA Link Menu”
2. Select “Pause Live TV” and pause

TV picture will be paused.
1. Live TV programme is recorded on HDD from where it was paused.
2. Follow the operation guide to operate Pause Live TV function.

To operate Pause Live TV
search backward
pause
search forward
playback
stop

To return to Live TV
(stop playback of Pause Live TV / cancel pause)
Select “Yes”

If you stop playback or cancel pause, the recorded programme will be deleted from HDD.
Features available  (Using VIERA Link Menu)

You can control some functions of the connected equipment with this TV remote control by pointing at the TV's signal receiver.

- If you cannot operate, check the settings and the equipment “VIERA Link features and connections” (p. 38)
- For details of the operations for the connected equipment, read the manual of the equipment.

Access and operate the menu of the equipment

1. Display “VIERA Link Menu”
2. Select “VIERA Link Control”
3. Select the equipment you want to access
   The type of the connected equipment is displayed. Select the type of the equipment and access.

   Recorder / Player / Home Cinema / Video Camera / LUMIX / Other

   “Home Cinema” means Player theatre, Blu-ray Disc theatre or Recorder theatre.
   “Other” means Tuner set top box.

The menu of the accessed equipment
   (Input mode will be changed automatically)

4. Operate the connected equipment
   1. Set the remote control code for TV (p. 21)
   2. Follow the operation guide

   To display the operation guide  
   Move the cursor / select the menu  
   Move the cursor / access / adjust

   When the key words are displayed on colour bar

   Note
   Some operations may not be available for some equipment. If so, use its own remote control.

If several recorders or players are connected
You can connect up to three recorders or players at the same time.

The number is given from the TV's lower HDMI terminal connected to the same type of equipment. For example, when two recorders are connected to HDMI2 and HDMI3, one connected to HDMI2 is displayed as Recorder1 and the other as Recorder2.

If you access the invalid equipment
When the equipment with “HDAVI Control” function is connected

Type of the connected equipment is displayed. You can access the menu of the equipment. But you cannot operate it. Use its own remote control to operate the equipment.
VIERA Link “HDAVI Control™”

Features available (Using VIERA Link Menu)

**Speaker control | Speaker Selection**

You can control the theatre speaker with this TV remote control by pointing at the TV’s signal receiver.

- If you cannot operate, check the settings and the equipment ⇒ “VIERA Link features and connections” (p. 38)

Access and control the speaker volume

1. Display “VIERA Link Menu”
2. Select “Speaker Selection”
3. Set to “Home Cinema” or “TV”

**Home Cinema**
Player theatre, Blu-ray Disc theatre or Amplifier will be automatically turned on if it is in Standby mode and the sound is from theatre speakers connected to the equipment.

- Volume up / down
  - (+) (Volume slide bar will be displayed when adjusting the volume of the equipment.)

- Mute
  - The sound of TV speakers is mute.
  - When the equipment is turned off, TV speakers will be active.

**TV**
TV speakers are active.

**Note**
- If you wish to enjoy the multi-channel sound (e.g. Dolby Digital 5.1ch) via an Amplifier, connect with HDMI cable and Optical digital audio cable (p. 38), and then select “Home Cinema”.
  - To enjoy the sound from the DIGA Recorder in multi-channel sound, connect an HDMI cable from the DIGA Recorder to the Amplifier (p. 38).

**Note**
- These functions may not work properly depending on the connected equipment.
- Image or sound may not be available for the first few seconds when input mode is switched.
- Easy playback may be available by using the remote control for Player theatre, Blu-ray Disc theatre or Amplifier. Read the manual of the equipment.
- “HDAVI Control 4” is the newest standard (current as of December, 2008) for HDAVI Control compatible equipment. This standard is compatible with conventional HDAVI equipment.
- To confirm this TV’s version of HDAVI Control ⇒ “System Information”
VIERA Tools

With VIERA Tools, you can directly access to some of the useful functions of connected equipment or SD card.

1 Display VIERA Tools Menu

2 Select a feature

3 Follow the operation of each feature

- **VIERA Link Control** (p. 41)
  The connected device can be operated with the VIERA remote control. When multiple devices are connected, an indicator appears below the icon so that one device can be selected.

- **Pause Live TV** (p. 40)
  A live TV programme can be paused and resumed later.

- **Direct TV Rec** (p. 40)
  What is on TV can be recorded immediately.

- **Speaker Control** (p. 42)
  Theatre speaker can be set.

- **SD card slideshow** (p. 36)
  Photo slideshow will start.

- **SD card photo view** (p. 35)
  Photo folders are displayed.

- **SD card movie view** (p. 37)
  The title list for SD movie image is displayed.
External Equipment

These diagrams show our recommendations for how to connect the TV to your various equipment. For other connections, consult the instructions for each piece of equipment, the table below, and the specifications (p. 51).

Updating the software system (Digital TV mode)

Update system software to ensure that you have latest version software.

If there is an update available, a notification banner is displayed when the channel has the update information.

To download new software, press “OK” ➔ Downloading (approx. 1 hour)
If you choose not to download, press “EXIT”.

To update automatically
Set “Auto Update Search in Standby” to “On” (p. 27)
If there is a new version software being broadcast, the TV will download this automatically.

The automatic updating sequence is carried out at 3:00 AM and 5:00 AM every morning under the following condition.
Standby (TV turned Off with the remote control)
Recording is not in progress.

To update manually
Perform “System Update Search Now” (p. 27)
If there is an update available, a notification banner is displayed.

Note
During downloading, do not turn Off the TV or touch any buttons.
(The TV is automatically activated after downloading is completed.)
When the TV is switched to standby, there will be a clicking sound after a short delay. Similar clicking sounds will also occur at 3:00 AM and 5:00 AM when “Auto update Search in Standby” (p. 27) is set to “On”. These sounds are normal.

Stereo / Bilingual Sound Selection (Analogue TV mode)

When you receive the stereo / bilingual sound system, sound output modes can be selected by pressing the Stereo / Bilingual Sound Selection button.

<table>

</tr>
</tbody>
</table>

If the stereo signal is poor or the receiving conditions are not optimum or if STEREO:MONO automatic switching occurs, it is recommended you switch from STEREO to MONO.
Even when the contents of the receiving signal undergo changes, selection mode is kept intact.
When the receiving conditions deteriorate, listening will be easier if the mode is set to the MONO position, using the stereo / bilingual sound selection button.
DUAL, also known as DUAL MONO or as BILINGUAL is not currently transmitted in some countries.
**SD Card**

**Cautions in handling SD Card**
- Do not remove the card while the TV is accessing data (this can damage card or TV).
- Do not touch the pins on the back of the card.
- Do not subject the card to a high pressure or impact.
- Insert the card in the correct direction (otherwise, card may be damaged).
- Electrical interference, static electricity, or erroneous operation may damage the data or card.
- Back up the recorded data at regular intervals in case of deteriorated or damaged data or erratic operation of the TV. (Panasonic is not liable for any deterioration or damage of recorded data.)

**Data format for Card browsing**

**Photo:** Still images recorded with digital still cameras compatible with JPEG files of DCF* and EXIF standards
- Data format - Baseline JPEG (Sub-sampling 4:4:4, 4:2:2 or 4:2:0)
- Max. number of files - 9,999
- Image resolution - 160 × 120 to 10,000,000

**Movie:** SD-Video Standard Ver. 1.2 [MPEG-2 (PS format)] and AVCHD Standard compatible files with an audio format that is either MPEG-1/Layer-2 format or Dolby Digital format
- AVCHD files recorded with vertical frequency 50 Hz are applicable. A modified data with a PC may not be displayed correctly.
- Compliant card type (maximum capacity): SDHC Card (32 GB), SD Card (2 GB) and miniSD Card (2 GB) (requiring miniSD adapter)
- If miniSD Card is used, insert / remove it together with the adapter.
- Check the latest information on the card type at the following website. (English only)

*DCF (Design rule for camera file system): Unified standard established by Japan Electronics and Information Technology Industries Association (JEITA).*

**Note**
- Format the card with the recording equipment.
- The picture may not appear correctly on this TV depending on the recording equipment used.
- Display may take some time when there are many files and folders.
- This function cannot display Motion JPEG and still image not DCF formatted (i.e. TIFF, BMP).
- A data modified with a PC may not be displayed.
- Images imported from a PC must be compatible with EXIF (Exchangeable Image File) 2.0, 2.1, and 2.2.
- Partly degraded files might be displayed at a reduced resolution.
- All “.JPG” extension datas in the card will be read in Photo View Mode.
- The folder and file names may be different depending on the digital camera used.
- Do not use two-byte characters or other special codes.
- The card may become unusable with this TV if the file or folder names are changed.

**On screen messages**

<table>
<thead>
<tr>
<th>Message</th>
<th>Meaning / Action</th>
</tr>
</thead>
</table>
| Cannot read file | ● The file is broken or unreadable.  
  ● The TV does not support the format.  
  (For the applicable formats and data, see above.) |
| Please confirm the SD card is OK | ● The inserted SD card has a problem. |
| No SD card inserted | ● Insert a SD Card. |
| No valid file to play | ● The card has no data. |
| Over 9999 pictures found. (max. is 9999) | ● Maximum valid number of photos is 9,999. |
| This operation is not possible | ● Your operation is not available. |
**Technical Information**

**PC connection**

A PC may be connected to this TV so that the PC screen is displayed and sound is heard from the TV.

- PC signals that can be inputted: Horizontal scanning frequency 31 to 69 kHz; vertical scanning frequency 59 to 86 Hz (more than 1,024 signal lines could result in incorrect display of the image).
- A PC adapter is not necessary for the DOS/V-compliant D-sub 15-pin connector.

**Note**

- Some PC models cannot be connected to this TV.
- When using PC, set the colour display quality of PC to the highest position.
- For details of the applicable PC signals, see below.
- Max. display resolution

</table>

**Note**

- Signals other than above may not be displayed properly.
- The above signals are reformatted for optimal viewing on your display.
- Applicable input signal for PC is basically compatible to VESA standard timing.
- PC signal is magnified or compressed for display, so that it may not be possible to show fine detail with sufficient clarity.
FAQs

Before requesting service or assistance, please follow these simple guides to resolve the problem. If the problem still persists, please contact your local Panasonic dealer for assistance.

**White spots or shadow images (noise)**
- Check the position, direction, and connection of the aerial.

**Neither image nor sound is produced**
- Is the TV in “AV mode”?
- Is the mains lead plugged into the socket outlet?
- Is the TV turned On?
- Check Picture Menu (p. 24) and volume.

**An error message appears**
- Follow the message’s instructions.
- If the problem persists, contact the authorized Service Centre.

**“VIERA Link” function does not work and an error message appears**
- Confirm the connection.
- Turn the connected equipment on and then switch the TV on. (p. 38)

**Contrast is reduced**
- Contrast is lowered in the following conditions without any user operation for a few minutes:
  - no signal in DVB or AV mode
  - selected invalid programme
  - selected radio service
  - displayed menu
  - Thumbnail or still picture in SD Card mode

**Pixel Statement**
- An image on a LCD or Plasma TV screen is created by many small groups of dots known as pixels (which is similar to the image in a newspaper). It also naturally follows that higher panel resolutions contain more pixels. To create a colour image, each pixel consists of three tiny coloured dots (known as sub-pixels), one each of red, green and blue. Each one of these dots is precisely controlled by the electronics of the TV to produce the picture.

Whilst Panasonic maintains the highest standards in manufacturing technology and processes in the construction of these panels, there are a number of allowable pixel/subpixel failures that still allow the panel to be defined as a good panel. It is not possible to guarantee absolutely no pixel loss.

</tr>
<tr>
<td><strong>Sound is unusual</strong></td>
<td>- Set the sound setting of the connected equipment to “2ch L.PCM”.&lt;br&gt;- Check the “HDMI1 / 3 Input” setting in the Sound Menu. (p. 25)&lt;br&gt;- If digital sound connection has a problem, select analogue sound connection. (p. 34)</td>
</tr>
<tr>
<td><strong>Pictures from external equipment are unusual when the equipment is connected via HDMI</strong></td>
<td>- Is the HDMI cable connected properly? (p. 44)&lt;br&gt;- Turn Off the TV and equipment, then turn them On again.&lt;br&gt;- Check an input signal from the equipment. (p. 48)&lt;br&gt;- Use an equipment compliant with EIA/CEA-861/861B.</td>
</tr>
<tr>
<td><strong>Digital TV reception technology requires high quality, robust DTV signals which in some domestic aerial installations, may be relatively poor despite good analogue reception.</strong></td>
<td>- To maintain optimum signal quality from TV aerial, use a TV aerial splitter (as illustrated) when connecting two or more equipments to the same aerial.</td>
</tr>
</tbody>
</table>
| **Aerial connection when using DTV and VCR / DVD Recorder** | - Check to ensure your area is covered by DVB transmissions.<br>- Check that the aerial and antenna cable are designed for DVB. For your safety, the aerial and cable should be inspected / installed by a licenced installer that should comply with Australian Standard AS1417.1.<br>  
  Note: If you live within 5-10 Km of DVB transmission towers, a combined VHF / UHF aerial should be adequate. Outside this area, separate VHF and UHF aerials provide superior reception performance.<br>- If you live in a unit or apartment, check to ensure the Master Antenna TV (MATV) system is designed for analogue and DVB-T reception. Please consult your body corporate. |
| **After Digital TV Auto Tuning only some or no services are found** | - Check “Signal Condition”. (p. 31) If “Signal Quality” or “Signal Strength” are displayed in red or constantly changing, check aerial. If problem persists consult your local TV aerial installer.<br>- Check that the aerial and antenna cable are designed for DVB. For your safety, the aerial and cable should be inspected / installed by a licenced installer that should comply with Australian Standard AS1417.1.<br>- Interference (known as impulse noise) from household appliances such as light switches, fridges etc may cause picture break up and / or audio distortion. Use high quality quad shielded coaxial cable fly lead between TV and antenna wall socket to minimise impulse noise pickup. If problem persists consult your local TV aerial installer.<br>- When “No Signal” message is displayed check TV aerial connection. The received signal may be too weak to allow the TV to reliably lock to the desired “No Signal” programme to generate a stable picture. Repeat the tuning procedure (p. 31). If problem persists consult your local TV aerial installer. |
| **Picture regularly breaks up on some programmes, or “No Signal” message** | - Electrical atmospheric interference caused by local or distant lighting storms or heavy rain with wind in “leafy” locations may cause pictures to break up and audio to mute or distort momentarily.<br>- Impulse noise interference from an infrequently used electrical appliance, or a passing vehicle or lawn mower with a “noisy” ignition system. |
| **Picture very infrequently breaks up on some or all programmes** | - Like your computer, the TV has to run a number of diagnostic and software checks before it can display any programmes. |
| **TV takes so long to turn on** | - Is the TV in Teletext mode? (p. 18) |
| **The programme cannot be changed** | - Is the programme skipped? (p. 29) |
| **The programme cannot be selected** | - Off Timer function is activated.<br>- The TV enters “Standby mode” about 30 mins. after analogue broadcasting ends. |
| **TV goes into “Standby mode”** | - Are the batteries installed correctly? (p. 7)<br>- Has the TV been switched On? |
