Thank you for purchasing this Panasonic product. Please read these instructions before operating your set and retain them for future reference. The images shown in this manual are for illustrative purposes only.
Experience an amazing level of multimedia excitement

Receive digital terrestrial services using an integrated Digital TV tuner
Sharp pictures with HDMI terminal
Create home theatre and DVD recorder link-ups with “VIERA Link” without complicated settings!

Enjoy rich multimedia

This product is licensed under the AVC patent portfolio license for the personal and non-commercial use of a consumer to (i) encode video in compliance with the AVC Standard (“AVC Video”) and/or (ii) decode AVC Video that was encoded by a consumer engaged in a personal and non-commercial activity and/or was obtained from a video provider licensed to provide AVC Video. No license is granted or shall be implied for any other use. Additional information may be obtained from MPEG LA, LLC. See http://www.mpegla.com.
### Warning

#### Handling the mains plug and lead
- Insert the mains plug fully into the socket outlet. (If the mains plug is loose, it could generate heat and cause fire.)
- Ensure that the mains plug is easily accessible.
- Ensure the earth pin on the mains plug is securely connected to prevent electrical shock.
  - An apparatus with CLASS I construction shall be connected to a mains socket outlet with a protective earthing connection.
- Do not touch the mains plug with a wet hand. (This may cause electrical shock.)
- Do not use any mains lead other than that provided with this TV. (This may cause fire or electrical shock.)
- Do not damage the mains lead. (A damaged lead may cause fire or electrical shock.)
  - Do not move the TV with the lead plugged in the socket outlet.
  - Do not place a heavy object on the lead or place the lead near a high-temperature object.
  - Do not twist the lead, bend it excessively, or stretch it.
  - Do not pull on the lead. Hold onto the mains plug body when disconnecting the lead.
  - Do not use a damaged mains plug or socket outlet.

If you find any abnormality, remove the mains plug immediately!

#### Power source / Installation
- This TV is designed for:
  - AC 220 - 240 V, 50 / 60 Hz
  - Indoor use

#### Do not remove covers and NEVER modify the TV yourself
- Do not remove the rear cover as live parts are accessible when it is removed. There are no user serviceable parts inside. (High-voltage components may cause serious electrical shock.)
- Have the TV checked, adjusted, or repaired at your local Panasonic dealer.

#### Do not expose to rain or excessive moisture
- To prevent damage which might result in electric shock or fire, do not expose this TV to rain or excessive moisture. This TV must not be exposed to dripping or splashing water and objects filled with liquid, such as vases, must not be placed on top of or above the TV.

#### Do not expose to direct sunlight and other sources of heat
- Avoid exposing the TV to direct sunlight and other sources of heat.

To prevent the spread of fire, keep candles or other open flames away from this product at all times

#### Do not allow children to handle SD Card
- As with any small object, SD Cards can be swallowed by young children. Please remove SD Card immediately after use and store out of reach of children.
Install the TV on a stable surface
If a television is not positioned in a sufficiently stable location, it can be potentially hazardous due to falling. Many injuries, particularly to children, can be avoided by taking simple precautions such as:
• Using cabinets or stands recommended by the manufacturer of the television.
• Only using furniture that can safely support the television.
• Ensuring the television is not overhanging the edge of the supporting furniture.
• Not placing the television on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the television to a suitable support.
• Not standing the television on cloth or other materials placed between the television and supporting furniture.
• Educating children about the dangers of climbing on furniture to reach the television or its controls.

When cleaning the TV, remove the mains plug
• Cleaning an energised TV may cause electrical shock.

When the TV is not going to be used for a long period of time, remove the mains plug
• This TV will still consume some power even in the Off mode, as long as the mains plug is still connected to a live socket outlet.

Transport only in upright position
• Transporting the TV with its display panel facing upward or downward may cause damage to the internal circuitry.

Allow sufficient space around the TV for radiated heat
Minimum distance

<table>
<thead>
<tr>
<th>Distance (cm)</th>
</tr>
</thead>
<tbody>
<tr>
<td>10</td>
</tr>
<tr>
<td>10</td>
</tr>
<tr>
<td>7</td>
</tr>
</tbody>
</table>

• When using the pedestal, keep the space between the bottom of the TV and the surface where the TV is set.
• If using a Wall-hanging bracket, refer to its manual.

Do not block the rear air vents
• Blocked ventilation by newspapers, table cloths, curtains, etc. may cause overheating, fire or electrical shock.

Do not apply strong force or impact to the display panel
• This may cause damage resulting in injury.

Do not expose your ears to excessive volume from the headphones
• Irreversible damage can be caused.

The TV is heavy. Handle the TV by 2 or more people. Support as shown to avoid injury by the TV tipping or falling.

Notes

Do not display a still picture for a long time
This causes the image to remain on the plasma screen (“image retention”). This is not considered a malfunction and is not covered by the warranty.

Typical still images
• Programme number and other logos
• Image displayed in 4:3 mode
• Video game
• Computer image
To prevent image retention, contrast is lowered automatically after a few minutes if no signals are sent or no operations are performed. (p. 70)

Auto power standby function
• The TV will automatically go into Standby mode in the following conditions:
  • no signal is received and no operation is performed for 30 minutes in Analogue TV mode
  • [Off Timer] is active in the Setup Menu (p. 14)
  • no operation is performed for the period selected in [Auto Standby] (p. 27)

Keep the TV away from these types of equipment
• Electronic equipment
  In particular, do not place video equipment near the TV. Electromagnetic interference may distort images / sound.
• Equipment with an infrared sensor
  This TV also emits infrared rays. This may affect operation of other equipment.

**Ferrite core (2)**
- J0KG00000146 (p. 61)

Use the Ferrite cores to comply with the EMC standard.

**Fall-prevention parts**
- (p. 7)

**Operating Instructions with Warranty statement**
- This product contains possibly dangerous parts (such as plastic bags), which can be breathed in or swallowed by young children accidentally. Keep these parts out of reach of young children.

---

**Inserting and removing remote’s batteries**

1. **Open**
   - Hook

2. **Close**
   - Note the correct polarity (+ or -)

**Caution**
- Incorrect installation may cause battery leakage and corrosion, resulting in damage to the remote control.
- Do not mix old and new batteries.
- Do not mix different battery types (such as alkaline and manganese batteries).
- Do not use rechargeable (Ni-Cd) batteries.
- Do not burn or breakup batteries.
- Batteries must not be exposed to excessive heat such as sunshine, fire or the like.
- Do not disassemble or modify the remote control.

---

**Attaching the pedestal**

**Warning**
- Do not disassemble or modify the pedestal.
  - Otherwise the TV may fall over and become damaged, and personal injury may result.

**Caution**
- Do not use any pedestal other than that provided with this TV.
  - Otherwise the TV or the display may fall over and become damaged, and personal injury may result.
- Do not use the pedestal if it becomes warped or physically damaged.
  - If you use the pedestal while it is physically damaged, personal injury may result. Contact your nearest Panasonic dealer immediately.
- During set-up, make sure that all screws are securely tightened.
  - If insufficient care is taken to ensure screws are properly tightened during assembly, the pedestal will not be strong enough to support the TV, and it might fall over and become damaged, and personal injury may result.
- Ensure that the TV does not fall over.
  - If the TV is knocked or children climb onto the pedestal with the TV installed, the TV may fall over and personal injury may result.
- Two or more people are required to install and remove the TV.
  - If two or more people are not present, the TV may be dropped, and personal injury may result.
Assembling the pedestal
Use the assembly screws A to fasten the pole C to the base D securely.
• Make sure that the screws are securely tightened.
• Forcing the assembly screws the wrong way will strip the threads.

Securing the TV
Insert the pole into the TV, and then fasten securely with the assembly screws B.
• Tighten the four assembly screws loosely at first, then tighten them firmly to fix securely.
• Carry out the work on a horizontal and level surface.

Preventing the TV from falling over
This TV could fall over if it is pushed, pulled or knocked down. We therefore recommend the TV is secured to the furniture as illustrated.
• This measure is designed to reduce the risk of injury from a falling TV. However, it cannot guarantee protection in all cases.

Fall-prevention parts

Securing to a furniture
Fix pedestal and furniture together with band.
• This image is for illustrative purposes only.
Optional accessories

Please contact your nearest Panasonic dealer to purchase the recommended optional accessories. For additional details, please refer to the manual of the optional accessories.

Wireless LAN Adaptor
* DY-WL10E-K

Caution
- To use the Wireless LAN Adaptor, your network needs to have a Wireless Access Point.
- It is recommended to use the Wireless LAN Adaptor with the extension cable.
- To avoid radio wave interference, keep the TV away from the devices such as other wireless LAN devices, microwaves and the devices that use 2.4 GHz and 5 GHz signals when using the Wireless LAN Adaptor. Otherwise malfunction may occur.
- This optional accessory may not be available in your market region.
- Additional information for Wireless LAN Adaptor and Wireless Access Point may be found at the following web site. (English only)
  http://panasonic.jp/support/global/cs/tv/

Wall-hanging bracket
* TY-WK4P1RW

The angle of wall-hanging bracket can be adjusted in “zero tilting (vertical)” and “5, 10, 15 or 20-degree tilting” for this TV.

Warning
- Using other wall-hanging brackets, or installing a wall-hanging bracket by yourself have the risk of personal injury and product damage. In order to maintain the unit’s performance and safety, be absolutely sure to ask your dealer or a licensed contractor to secure the wall-hanging brackets. Any damage caused by installing without a qualified installer will void your warranty.
- Carefully read the instructions accompanying optional accessories, and be absolutely sure to take steps to prevent the TV from falling off.
- Handle the TV carefully during installation since subjecting it to impact or other forces may cause product damage.
- Take care when fixing wall brackets to the wall. Always ensure that there are no electrical cables or pipes in the wall before hanging bracket.
- To prevent fall and injury, remove the TV from its fixed wall position when it is no longer in use.
Basic Connection

External equipment and cables shown are not supplied with this TV. Please ensure that the unit is disconnected from the mains socket before attaching or disconnecting any leads. When disconnecting the mains lead, be absolutely sure to disconnect the mains plug at the socket outlet first.

Rear of the TV

Mains Lead

- **Mains lead (supplied)**
- **AC 220 - 240 V, 50 / 60 Hz**
- **RF cable**
- **Aerial**
- **Satellite dish**
- **Set top box**
- **Fully wired HDMI compliant cable**

**Note**

- Keep RF (antenna) cable away from the mains lead to avoid and minimise mains interference pickup.
- Do not place the RF cable under the TV.
- To obtain optimum quality picture and sound, an aerial, the correct cable (75 Ω coaxial), and the correct terminating plug are required.
- If a communal aerial system is used, you may require the correct connection cable and plug between the wall aerial socket and the TV.
- Your local Television Service Centre or dealer may be able to assist you in obtaining the correct aerial system for your particular area and the accessories required.
- Any matters regarding aerial installation, upgrading of existing systems or accessories required, and the costs incurred, are the responsibility of you, the Customer.
- **VIERA Link connection** (p. 54)
- **Other equipment connection** (p. 59 - 61, 71)
- Read the manual of the external equipment, too.
Identifying Controls

1 Function select

2 Channel Up / Down, Value change (when using the F button), Switching the TV On

3 Changes the input mode

4 Headphones jack

5 USB 1/2 port

6 SD Card slot

7 HDMI3 terminal

8 AV3 terminals

9 Mains power On / Off switch
- Use to switch the mains power. If you turned the TV Off during Standby mode by the remote control last time, the TV will be in Standby mode when you turn the TV On with Mains power On / Off switch.

10 Remote control signal receiver
- Do not place any objects between the TV remote control signal receiver and remote control.

11 C.A.T.S. (Contrast Automatic Tracking System) sensor
- Senses brightness to adjust picture quality when [Eco Mode] in the Picture Menu is set to [On] (p. 22)

12 Power LED
- Red : Standby
- Green : On
- When using the remote control, indicates the TV has received a command.

About the Operation Guide - On Screen Displays

The Operation Guide is displayed at the bottom of the on Screen Displays. The button used on this screen and manner of operation is displayed.
Remote Control

1 **Standby On / Off switch**  
   • Switches TV On or Off standby

2 **[Media Player]**  
   • Switches to SD Card and USB device viewing / listening mode

3 **Sound Selection**  
   • Changes the sound track in Digital TV mode (if available)

  Select the programme
  
  1. select
  2. Press again to return to TV Guide.

- **To view a channel list of the selected type**
  (Type list)
  
  1. select type
  2. view

- **To the previous day**

- **To the next day**

( **Note** )

*When this TV is turned on for the first time, or the TV is switched off for more than a week, it may take some time before the TV Guide is completely shown.*
Watching External Inputs

Connect the external equipment (VCRs, DVD equipment, PC, etc.) and you can watch through the input.

To connect the equipment ➔ (p. 9, 59 - 61)

1. Display the input selection menu
2. Select the input mode connected to the equipment
3. View

Example (AV2)

- You can also select the input using the AV button on the remote control or the side panel of the TV (p. 10).
- Press the button repeatedly until the desired input is selected.
- You can label or skip each input mode ➔ [Input Labels] (p. 33)
  Skipped inputs will not be displayed when the AV button is pressed.

Example (PC)

- If the external equipment has an aspect adjustment function, set to [16:9].
- You can also listen to PC sound with the audio cable connected.
  To connect ➔ (p. 61)
- You can setup some functions ➔ PC Setup (p. 26) in the Setup Menu.
- For HDMI-compatible PC, possible to connect to HDMI terminals (HDMI1 / HDMI2 / HDMI3) by using HDMI cable (p. 63 - 64).
How to Use VIERA TOOLS
You can access some special features easily by using the VIERA TOOLS function.

1 Display icons of the feature

2 Select a feature

3 Follow the operations of each feature

[VIERA Link Control] ⇒ “VIERA Link Control” (p. 57)
When two or more compatible equipment are connected, a selection screen will be displayed. Please select the correct description and access.

[Photo]* ⇒ “Photo mode” (p. 38)

[Video]* ⇒ “Video mode” (p. 41)

[Music]* ⇒ “Music mode” (p. 44)

[Media Server] ⇒ “Using DLNA® features” (p. 50)

*When two or more available devices are connected, a selection screen will be displayed. Please select the correct description and access.

Internet contents ⇒ “Accessing the Internet contents” (p. 53)
Part of Icons on VIERA TOOLS screen above provide you the usable Internet contents.

Note
If the selected feature is not available, the demonstration to explain how to use it can be displayed.
Press the OK button to view the demonstration after selecting the unavailable feature.
How to Use the Menu Functions

Various menus allow you to make settings for the picture, sound, and other functions.

1 Display the menu
   - Displays the functions that can be set (varies according to the input signal)

2 Select the menu
   - For details ➔ (p. 22)
   - For details ➔ (p. 24)
   - For details ➔ (p. 26)

3 Select the item
   - select

4 Adjust or select
   - change
   - store or access
   (Required by some functions)

Choose from among alternatives
Number and positions of alternatives

### Mode

- **Music**: Improves sound quality for watching music videos, etc.
- **Speech**: Improves sound quality for watching news, drama, etc.
- **User**: Adjusts the sounds manually by using the equaliser to suit your favourite sound quality.

*In Music and Speech modes, you can adjust [Bass] and [Treble] settings, and those settings will be stored for each mode.*

For the User mode, [Equaliser] will appear on the Sound Menu instead of [Bass] and [Treble]. Select the [Equaliser] and adjust the frequency.

### [Equaliser] (below)

- **Bass**: Increases or decreases level to enhance or minimise lower, deeper sound output
- **Treble**: Increases or decreases level to enhance or minimise sharper, higher sound output
- **Equaliser**: Adjusts the frequency level to suit your favourite sound quality
  - This function is available when [Mode] is set to [User]
  - Select the frequency and change the frequency level by using the cursor button
  - If you want to enhance the bass sound, raise the level of the lower frequency. If you want to enhance the treble sound, raise the level of the higher frequency
  - To reset the levels of each frequency to the default settings, select the [Reset Equaliser Settings] by using the cursor button, and then press the OK button

### Balance

Adjusts the volume level of right and left speakers

### Headphone Volume

Adjusts the volume of the headphones

### Surround

- **Off**: Surround sound settings are turned off
- **V-Audio**: Provides a dynamic enhancer of width to simulate improved spatial effects
- **V-Audio Surround**: Provides a dynamic enhancer of width and depth to simulate improved spatial effects

*Switching is also possible by the Surround button on the remote control (p. 11).*

### Auto Gain Control

- **Off**: Off.
- **On**: Adjusts the current volume level if it is extremely different from the previous viewed channel or input mode

### Volume Correction

Adjusts the volume of individual channel or input mode

### Speaker Distance to Wall

- **Over 30cm**: Adjusts the low frequency sound
  - If the back space between the TV and wall is over 30 cm, [Over 30cm] is recommended
- **Up to 30cm**: Adjusts the low frequency sound
  - If the back space between the TV and wall is within 30 cm, [Up to 30cm] is recommended

### How to Use the Menu Functions

**Main Menu**
- **Picture**
- **Sound**
- **Setup**

#### Input Resolution
Switches to a wide view
- VGA (640 x 480 pixels), WVGA (852 x 480 pixels), XGA (1,024 x 768 pixels), WXGA (1,280 x 768 pixels, 1,366 x 768 pixels)
- Options change depending on signals

#### Clock
Sets to the minimum level if noise occurs.

#### H-pos
Adjusts horizontal position

#### V-pos
Adjusts vertical position

#### Clock Phase
Eliminates flicker and distortion
- Adjust after Clock adjustment
- Set to the minimum level if noise occurs

#### Sync
- **H & V**: by the horizontal and vertical signals from your PC
- **SOG**: Sync on Green sync from your PC

#### Reset PC Settings
Press the OK button to reset the PC Setup settings to the default.

#### DVI Position Settings
- **H-pos**: Adjusts horizontal position settings of DVI
- **V-pos**: Adjusts vertical position settings of DVI
- **Reset DVI Position Settings**: Press the OK button to reset the DVI Position Settings to the default.

#### Off Timer
- **Off**
- **15 / 30 / 45 / 60 / 75 / 90 minutes**: Sets the time until the TV automatically goes to Standby mode.

#### Eco Navigation
Automatically sets the TV to the most suitable energy-saving mode
- If you press the OK button, the following items are set as below:
  - [Eco Mode], [VIERA Link], [Power off Link], [Standby Power Save], [Power Save] ➔ [On]
  - [Intelligent Auto Standby] ➔ [On (No reminder)]
  - [Auto Standby] ➔ [2 hours]

#### Child Lock
Locks a channel / AV input to prevent access to it (p. 32)

### Tuning Menu

#### Favourites Edit
Creates a list of favourite channels (Digital TV mode) (p. 29)

#### Channel List
Skips the unwanted channels or edits channels (p. 29, 31)

#### Auto Tuning
Sets all Digital TV or Analogue TV channels automatically (p. 30, 31)

#### Manual Tuning
Sets the TV channels manually (p. 30, 31)

#### Update Channel List
Updates the channel list while keeping your settings (Digital TV mode) (p. 30)

#### New Channel Message
- **Off**
- **On**: Selects whether to give a notification message when a new channel is found (Digital TV mode) (p. 30)

#### Signal Condition
Checks the Digital TV signal condition (p. 30)

#### Add TV Signal
Adds the TV mode
- This function is available if you skip any modes to tune in [Auto Tuning] for first using the TV.
- To operate, refer to the [Auto Tuning] operations for first using the TV (p. 12).

* A different menu will be displayed in the mode of Media Player / Network service operations. (p. 36 - 53)
* Only available items can be selected.
Tuning and Editing Channels

You can make Auto Tuning, listing your favourite channels, skipping unwanted channels, etc.

Preparations:
1 Select Digital TV or Analogue TV
2 Display the menu
3 Select [Setup] TV

* The selected mode is displayed on the screen (p. 14).

■ When you select Digital TV

1 Select [Digital TV Tuning Menu]

2 Select a function

Digital TV Tuning Menu
- Favours Edit
- Channel List
- Auto Tuning
- Manual Tuning
- Update Channel List
- New Channel Message
- Signal Condition

For details (p. 29 - 30)

■ When you select Analogue TV

1 Select [Analogue TV Tuning Menu]

2 Select a function

Analogue TV Tuning Menu
- Channel List
- Auto Tuning
- Manual Tuning

For details (p. 31)

For Auto Tuning, using the buttons on the side panel of the TV (p. 10)
1 Press repeatedly until [Auto Tuning] appears
2 Access [Auto Tuning]
3 Start [Auto Tuning]

* To return to TV
Digital TV Tuning Menu

[Favourites Edit] - List favourite channels

Create your favourite channel lists (Favourites) from various broadcasters (up to 4: [Favourites]1 to 4). The Favourites lists are available from the Information banner (p. 15) and the TV Guide (p. 18).

1 Select a channel to list

select

- To display other Favourites
- To add all channels to the list

■ To edit list

Select the field of Favourites to edit and:

To name the Favourites

You can set characters by using numeric buttons (p. 21).

To move the channel

- To delete the channel

To delete all channels

Note

- Channel numbers are defined by the broadcaster and cannot be changed.
- Hidden channels (see below) can be selected but not viewed.

[Channel List] - Skip unwanted channels, Edit Channels

You can hide unwanted channels. The hidden channels cannot be displayed except in this function. Use this function to skip unwanted channels.

Select a channel and reveal / hide

- To reveal all channels
- To retune each channel (Manual Tuning)

To swap the channel position

You can also edit each channel in the Channel List.

1 Select a channel to edit

Channel position

2 Swap the channel position

- User input Name (maximum: ten characters)
- To reveal all channels
- To retune each channel (Manual Tuning)

Note

- Channel numbers are defined by the broadcaster and cannot be changed.
- Hidden channels (see below) can be selected but not viewed.

[Channel List] - Skip unwanted channels, Edit Channels

You can hide unwanted channels. The hidden channels cannot be displayed except in this function. Use this function to skip unwanted channels.
[Auto Tuning] - Set all Digital TV channels automatically

1 Start Auto Tuning

Digital TV Auto Tuning
All digital TV tuning data will be erased

- All the previous tuning settings are erased.
- When the operation is completed, the channel at channel position [1] will be displayed.
- Search begins in the order from the lower channels to the higher channels.
- If tuning has not been done completely ➔ [Manual Tuning] (see below)

2 Settings are made automatically

Automatically retune all Digital TV channels received in the area.

[Manual Tuning] - Set Digital TV channel manually

Normally use [Auto Tuning] or [Update Channel List] to update Digital TV channels on your channel list. If tuning has not been done completely or for adjusting the direction of the aerial, use this function.

[Update Channel List] - Update channels automatically

You can add new channels, delete duplicated channels, update channel name and position automatically to Channel List.

- Channel List is updated while keeping your settings in [Favourites Edit], [Channel List], [Child Lock], etc.
- Depending on the signal condition, the update may not work properly.

[New Channel Message] - Display a notification message

Selects whether to give a notification message when a new Digital TV channel is found. [Off] / [On]

- Selecting OK will perform [Update Channel List].
- Sometimes, mainly during summer months at night, the TV may pickup distant TV stations outside your broadcast due to favourable short term ionosphere conditions. In such circumstances when you press OK button, the TV does not add any new channels. This is normal.

[Signal Condition] - Check Digital TV signal

Selects a channel and checks the Digital TV signal condition.

- To change the channel

These bars show the maximum signal value of the selected channel.

A good Signal Strength is not an indication of suitable signal for Digital TV reception. Please use the Signal Quality indicator as follows:

[Signal Quality]:
- Green bar ➔ Good
- Yellow bar ➔ Poor
- Red bar ➔ Bad (Check the aerial)
Analogue TV Tuning Menu

[Channel List] - Skip unwanted channels / Edit Channels (Change name, Move)

You can hide unwanted channels. The hidden channels cannot be displayed except in this function. Use this function to skip unwanted channels.

Select a channel and reveal / hide

You can hide unwanted channels. The hidden channels cannot be displayed except in this function. Use this function to skip unwanted channels.

Select a channel and reveal / hide

To reveal all channels  

To retune each channel (Manual Tuning)

(see below)

To edit channels

You can also edit each channel in the Channel List. Select a channel to edit and:

To move the channel position

Select the new position

Store

To rename the channel name

Set characters

( maximum: five characters )

Note

• If a VCR is connected only with the RF cable, edit [VCR].

[Auto Tuning] - Set all Analogue TV channels automatically

1 Start Auto Tuning

All analogue tuning data will be erased

2 Settings are made automatically

Automatically retune all Analogue TV channels received in the area.

• All the previous tuning settings are erased.
• When the operation is completed, the channel at channel position [1] will be displayed.
• Search begins in the order from the lower channels to the higher channels.
• If tuning has not been done completely ⇒ [Manual Tuning] ( see below )

[Manual Tuning] - Set Analogue TV channel manually

Set Analogue TV channel manually after Auto Tuning.

• If a VCR is connected only with the RF cable, select channel position [0].

1 Select a channel position

2 Select a channel

3 Search and store
Child Lock

You can lock specific channels / AV input terminals and control who watches them. When the locked channel / input is selected, a message appears; by entering the PIN number, you can watch it.

Preparations:
1 Display the menu
2 Select [Setup]

Select [Child Lock]

Select [Child Lock List] or [Parental Rating]

Child Lock List - TV and AV

To set [Child Lock List]

To set [Parental Rating]

To change the PIN number
1. Select [Change PIN] in [Child Lock]
2. Enter a new PIN number twice

Note

- Performing [Shipping Condition] (p. 34) erases the PIN number and all settings.
- If you have forgotten your changed PIN, input "6969" as the PIN number.
- Keep these Operating Instructions out of reach of children.
For easier identification and selection of the input mode, you can label each input mode or skip terminals that are not connected to any equipment.

- To select the input mode (p. 19)

**Preparations:**
1. Display the menu
2. Select [Setup]

**Select [Display Settings]**

1. Select [Display Settings]
2. Select [Input Labels]
3. Select an input terminal and set

The labels you set will be displayed in [Input Selection] menu (p. 19) or banner.

- If [Skip] is selected, you cannot select the mode.

**User input**

You can name each input mode freely.

1. Select [User input]
2. Set characters one by one
3. Store

(maximum: ten characters)

- You can set characters by using numeric buttons. (p. 21)
Shipping Condition (Reset settings)

Resets the TV to its original condition, i.e. no channels tuned in. All settings are reset (channels, picture, sound settings, etc.).

Preparations:
1 Display the menu
2 Select [Setup]

Select [System Menu]

1 Select [System Menu]

Select [Shipping Condition]

[Shipping Condition] - Restore Settings

1 Check the message and reset
2 Follow the on screen instructions

Reset to Factory Shipping Condition Completed.
Please switch off TV.

[Auto Tuning] will automatically start when Mains power On / Off switch is next turned on (p. 12).

■ To retune TV channels only, e.g. after moving house
⇒ [Auto Tuning] in “Tuning and Editing Channels” (p. 30, 31)
Updating the TV Software

From time to time, a new version of software may become available for download to enhance the performance or operations of the TV. If there is an update available, a notification banner is displayed when the channel has the update information.

• To download

• If you choose not to download

You can update any new software automatically or update manually.

### Preparations:
1. Display the menu
2. Select [Setup]

### Select [System Menu]

1. Select [System Update]

### Select [System Update]

1. Select [System Update Search Now]
2. Searches for an update (for several minutes) and displays a corresponding message if any

**Note**

• Download may take about 60 minutes.
• During software download and update, DO NOT switch Off the TV or press any buttons. The TV will automatically be activated after downloading is completed.
• During downloading, the TV will display a blank screen for 40 to 50 seconds. Do not interrupt the TV during this procedure.
• The message might be the notification beforehand. In this case, the schedule information (the date that the new version can be used) will appear. You can set the reservation for update. The update will not start when the TV is set to Off.
• Software updates may be distributed in several ways; Automatic Update via the TV antenna, the internet via the TV’s LAN port or downloaded by you from the internet using your PC, copying the software image to your SD card or USB stick then updating TV software using the TV’s USB port or TV’s SD card slot. No other distribution method is available.
Using Media Player

Media Player allows you to enjoy photo, video or music recorded on an SD Card and a USB Flash Memory.

VIERA IMAGE VIEWER is the function of the easy viewing for photos or videos recorded on an SD Card on the TV screen by simply inserting into the SD Card slot.

Photo mode: Still pictures recorded by digital cameras will be displayed.
Video mode: Moving pictures recorded by digital video cameras will be played back.
Music mode: Digital music data will be played back.

When these functions are used, the audio signal is output from audio output terminals.
* [Date] shows the date on which the recording was made by the recording equipment. The file without record of the date is shown “***/**/****”.
* The picture may not appear correctly on this TV depending on the recording equipment used.
* Display may take some time when there are many files and folders.
* Partly degraded files might be displayed at a reduced resolution.
* The folder and file names may be different depending on the digital camera or digital video camera used.

To insert or remove the SD Card / USB Flash Memory

** USB Flash Memory
* Insert or remove straightly and completely.

** SD Card
To insert the SD Card
Gently insert the SD Card label surface facing front.

To remove the SD Card
Push the centre of the card

* For more information of the SD Card, USB Flash memory and supported file format ➪ (p. 65 - 66)
Starting Media Player

1 Insert the SD Card or USB Flash Memory

⇒ (p. 36)
When the SD Card is inserted, switching to Media Player will be done automatically.

2 Switch to Media Player

3 Select the icon you want to access

⇒ If only one device is connected, this step will be skipped.

4 Select the content

[Photo]
⇒ “Photo mode” (p. 38)
[Video]
⇒ “Video mode” (p. 41)
[Music]
⇒ “Music mode” (p. 44)

⇒ You can also access each mode directly by using VIERA TOOLS.
⇒ “How to Use VIERA TOOLS” (p. 20)

Change the device
You can change to the other device directly in the same mode if two or more devices are connected.

1 Display the menu

2 Select the icon you want to access

⇒ (p. 36)
**Photo mode**

Supported file format ⇒ (p. 65)

The thumbnail of all the photos in the SD Card or USB Flash Memory will be displayed.

Example : Thumbnail - [All photos]

To change the number of photos on a thumbnail screen at a time (7 × 4 ↔ 10 × 6)

**To change the background music ⇒ “Photo Setup” (p. 39)**

**To display the information of the highlighted photo**

**INFO**

- File name: p1010001.JPG
- Date: 23/10/2010
- Pixel: 1600×1200

* To return to the thumbnail of all photos

* To display the information of the highlighted group

**To sort by folder, recorded date or recorded month**

1 Display the view selection

2 Select the sort type

- **Folder view**: Displays the thumbnail grouped by folder
  - The files which are not into a folder will be collected to the folder named “/”.

- **Sort by Date**: Displays the thumbnail grouped by the same date
  - The group of the photos without a recorded date is shown as [Unknown].

- **Sort by Month**: Displays the thumbnail grouped by the same month
  - The group of the photos without a recorded date is shown as [Unknown].

3 Select one of the sorted groups to display the thumbnail of the selected group

* To return to the thumbnail of all photos

* To display the information of the highlighted group
[Single view] - Photos are displayed one at a time. Select the file from the thumbnail of photos to be viewed

Example:

- To display / hide the operation guide
- To return to thumbnail

[Slideshow] - Slideshow will complete when all photos have been viewed within the present thumbnail.

1. Select the file from the thumbnail of photos for the first view
2. Start Slideshow

- To display / hide the operation guide
- To pause (return to Single view)
- To return to thumbnail

Photo Setup

Setup the settings for Photo mode.

1. Display the option menu
2. Select [Slideshow Settings]
3. Select the items and set

Option Menu
- Slideshow Settings
- Change Size

Slideshow Settings
- Frame: Off
- Colour Effect: Off
- Transition Effect: Normal
- Screen Mode: Normal
- Burst Playback: Off
- Interval: 5 seconds
- Repeat: On
- Back Ground Music: Off

Note
- Picture quality may become lower depending on the slideshow settings.
- Picture setting may not work depending on the slideshow settings.

|                   | - [Auto]: Music data stored in the root folder of the current device will be played back randomly.  
|                   | - If there is no available music data, no sound will be produced.  

**Using Media Player**
Change the contents

You can switch to the other mode of Media Player from the thumbnail view.

1 While the thumbnail is displayed, display the contents selection

2 Select the contents

![Thumbnail view](Image)

[Photo] ⇒ “Photo mode” (p. 38)
[Video] ⇒ “Video mode” (below)
[Music] ⇒ “Music mode” (p. 44)

Video mode

Supported file format ⇒ (p. 66)
The thumbnail of video titles in the SD Card or USB Flash Memory will be displayed.

Example : Thumbnail - [Title view]

![Thumbnail - Title view](Image)

The preview will start when the title is highlighted if it supports a preview.

- To turn off the preview ⇒ “Video Setup” (p. 42)
- To display the information of the highlighted title

![Info view](Image)

File format

Title

Date & Time 19/02/2010 11:21
Duration 00h15m39s

To view the scenes of the title

Select the title

Example : Thumbnail - [Scene view]

![Thumbnail - Scene view](Image)

The preview will start when the scene is highlighted if it supports a preview.

- To turn off the preview ⇒ “Video Setup” (p. 42)
- To display the information of the highlighted scene

![Info view](Image)

Scene

Date & Time 19/02/2010 11:21
Duration 00h04m12s

Playback from Title view

Playback of the selected title will start.

- To repeat playback ⇒ “Video Setup” (p. 42)

1 Select the title

select

2 Start playback

R

Playback from the selected scene in the title

Playback will start from the selected scene to the end of the title.

- To repeat playback ⇒ “Video Setup” (p. 42)

1 Select the title

select

2 Select the scene

select

3 Start playback

R

Note

- The structure of titles and scenes may vary depending on the digital video camera used.
Using Media Player

How to operate playback

Example: Playback

- To display / hide the operation guide and information banner
- To operate playback
  - Rewind
  - Pause / Playback
  - Fast forward
  - Stop
- To change aspect
- To the previous title / scene
- To the next title / scene
- To return to thumbnail

To change the content “Change the contents” (p. 41)

Video Setup

Setup the settings for Video mode.

1 Display the option menu in the thumbnail view
2 Select [Video Setup]
3 Select the items and set

**Option Menu**
- Video Setup

**Video Setup Menu**
- Video Preview: [Off] / [On]
- Repeat: [Off] / [On]

Using Network Services

**DLNA®**

This TV is a DLNA Certified™ product.

DLNA (Digital Living Network Alliance) is a standard that makes DLNA Certified digital electronics easier and more convenient to use on a home network. To learn more, visit www.dlna.org.

It allows you to share photos, videos and music stored in a DLNA Certified media server (for example, PC with windows 7 installed (with suitable CODEC pack plug-in), etc.) connected to your home network, and enjoy them on the TV.

Supported file format ⇒ (p. 65 - 66)

**Media server**

Ensure the connected equipment is a DLNA Certified media server.

To use a PC, install the server software on the PC for obtaining a media server.

Store photos, videos or music into the media server, and then you can watch them on the TV.

“TwonkyMedia server 6” and “Windows 7” are the server software that has been tested for the performance with this TV (current as of January, 2011).

For installing, read the manual of the server software.

- The DLNA control function of Windows 7 is not supported with this TV.
- When a server software for the media server is installed on the PC, the data may be at risk of being accessed by other people. Please take care of the settings and connections under the network circumstances at the office, hotel or even at home when not using a router.

**Network connection**

⇒ “Example 1” or “Example 2” in “Network connections” (p. 46)

**Network setup**

⇒ (p. 47 - 49)

**DLNA operations**

⇒ (p. 50 - 52)

**Internet contents**

You can access the Internet contents.

**Network connection**

⇒ “Example 1” or “Example 3” in “Network connections” (p. 46)

**Network setup**

⇒ (p. 47 - 49)

**Accessing the Internet contents**

⇒ (p. 53)
Network connections

To use only DLNA features, you can operate the features without a Broadband network environment. To enjoy the Internet contents, you need a Broadband network environment.

- If you do not have any Broadband network services, please consult your retailer for assistance.
- Confirm the terms and conditions of the contracts with your Internet Service Provider (ISP) or telecommunications company.
- Set up and connect any equipment required for the network environment.
- Required speed (effective): at least 1.5 Mbps for SD and 6 Mbps for HD picture quality, respectively. If the transfer speed is not enough, contents may not be played back properly.
- Read the manual of the network equipment, too.

Example 1

Ensure to use a LAN straight cable for this connection.
If your modem has no broadband router functions, use a broadband router.
If your modem has broadband router functions but there are no vacant ports, use a hub.
Ensure that the Broadband routers and hubs are compatible with 10BASE-T / 100BASE-TX.
If you use the equipment compatible only with 100BASE-TX, category 5 LAN cables are required.

Example 2

Ensure to use a LAN cross cable for this connection.

Example 3

If you cannot access the Internet contents, use Example 1 connection.

Note

- Depending on the ISP or telecommunications company, the required equipment and the internet connection procedure are different. Ensure that you use network equipment that is authorised by your ISP and telecommunications company.
- You cannot make settings for the network equipment on this TV. You may be required to make settings on your computer.
- Depending on the terms and conditions of the contracts with your ISP or telecommunications company, additional fees may be charged or multiple connections to the internet may be impossible.
- Please contact your ISP or telecommunications company if you require further assistance regarding the network equipment.
[Network Setup]

Ensure the connections are completed before starting Network Setup.

“Network connections” (p. 46)

Preparations:
1 Display the menu
2 Select [Setup]

1 Select [Network Setup]

Network settings for the LAN Cable connection

This setting is for the network connection by using the LAN cable.

1 Select [Network Type] and set to [Wired]

<table>
<thead>
<tr>
<th>Network Setup</th>
<th>Wired</th>
<th>12-34-56-78-9a-bc</th>
</tr>
</thead>
<tbody>
<tr>
<td>Network Type</td>
<td>Wired</td>
<td></td>
</tr>
<tr>
<td>Access Point Settings</td>

</tbody>
</table>

[Acquire IP Address]
[Acquire DNS Address]

Sets [IP Address], [Subnet Mask], [Gateway] and [DNS Address].

For most users, the recommended method of connection to your network is by using [Auto] feature.

Select [Acquire IP Address] and then set to [Auto]
Select [Acquire DNS Address] and then set to [Auto]

The available settings are displayed automatically.
Using Network Services

48

■ [Proxy Settings]
Set only if specified by the provider. It is not required for normal household use.

Select [Proxy Settings] and set the items

Select [Proxy Settings] and set the items

1. Select [Proxy Settings]

2. Enter the address
Set characters one by one

3. Store

[Proxy]
Sets Proxy address.
• This is the address of the relay server that is connected to the target server instead of the browser and sends data to the browser. Setting is required if specified by the provider.

1. Select [Proxy]

2. Enter the address
Set characters one by one

3. Store

[Proxy Port]
Sets Proxy port number.
• This number is also specified by the provider with the Proxy address.

1. Select [Proxy Port]

2. Move the cursor and enter the number

Select [Connection Test] and access to test

Select [Connection Test] and access to test

1. Select [Connection Test]

2. access

After settings, return to [Network Setup] screen

RETURN

[Proxy]
Sets Proxy address.
• This is the address of the relay server that is connected to the target server instead of the browser and sends data to the browser. Setting is required if specified by the provider.

1. Select [Proxy]

2. Enter the address
Set characters one by one

3. Store

[Proxy Port]
Sets Proxy port number.
• This number is also specified by the provider with the Proxy address.

1. Select [Proxy Port]

2. Move the cursor and enter the number

Select [Connection Test] and access to test

Select [Connection Test] and access to test

1. Select [Connection Test]

2. access

• Performs automatic testing of the network connection for the TV. (It takes a while to test.)

✓: succeeded
The test is successful and the TV is connected to the network.

✗: failed
Check the settings and connections, and then perform this function again.
Network settings for the Wireless LAN connection

This setting is for the network connection by using a Wireless LAN Adaptor.

- Confirm the encryption key, settings and positions of your access point before starting setup.

For details, read the manual of the access point.

1. **Select [Network Type] and set to [Wireless]**

   - Network Type: Wireless
   - Network Setup
   - Connection Test
   - Network Type: Wireless
   - Access Point Settings
   - IP/DNS Settings
   - Software Update
   - MAC Address: 12-34-56-78-9a-bc

2. **Select [Access Point Settings]**

   - Network Setup
   - Connection Test
   - Network Type: Wireless
   - Access Point Settings
   - ID/DNS Settings
   - MAC Address: 12-34-56-78-9a-bc

3. **Select the connection type and set**

   - Connection Type
     - Please select network connection type:
       - WPS(Push button)
       - WPS(PIN)
       - Search for access point
       - Manual
   - [WPS(Push button)] (p. 13)
   - [WPS(PIN)]: Sets by entering the PIN code to the access point
   - [Search for access point] (p. 13)
   - [Manual]: Sets manually by entering the SSID of access point
   - *Follow the on screen instructions*

4. **Select [Connection Test] and access to test**

   - Connection Test
     - Check access point connection.
     - Check acquired IP address.
     - Check for devices using same IP address.
     - Check gateway connection.
     - Check server connection.
   - Check access point connection.
   - Check acquired IP address.
   - Check for devices using same IP address.
   - Check gateway connection.
   - Check server connection.
   - : succeeded
     - The test is successful and the TV is connected to the network.
   - : failed
     - Check the settings and connections, and then perform this function again.
     - If you continue to have difficulty, please contact your internet service provider.

**Update TV’s software**

Accesses the specific web site to update TV’s software and search if any software updates are available.

- Network Setup
  - Connection Test
  - Network Type: Wired
  - Access Point Settings
  - IP/DNS Settings
  - Software Update
  - MAC Address: 12-34-56-78-9a-bc

- **Follow the on screen instructions**

**Note**

- **[MAC Address]**
  - *MAC address is a unique address that identifies hardware in the network.
  - (for information only)
Using DLNA® features

- Ensure the preparation of the media server, network connections and network settings are completed.
  ➔ “Media server” (p. 45), “Network connections” (p. 46), “Network Setup” (p. 47 - 49)

1. Display icons of the feature

2. Select [Media Server]

### Accessing the Internet contents

This function allows you to access the Internet contents.

- Using this function requires a broadband internet connection. Dial-up internet connections cannot be used.
- Ensure the network connections and network settings are completed.
  - “Network connections” (p. 46), “Network Setup” (p. 47 - 49)

#### Display icons of the feature

1. Display icons of the feature
2. Select the icon

![Example icons](example)

■ To return to TV

#### USB Keyboard

You can input characters by using a USB Keyboard connected to the USB port.
- You cannot use two or more keyboards simultaneously.
- A USB Keyboard which requires a driver is not supported.
- Characters may not be displayed correctly on the TV screen depending on the connected keyboard.

**Note**

- Be sure to update the software when a software update notice is displayed on the TV screen. If the software is not updated, you will not be able to enjoy this function.
- You can update the software later manually ➔ [Software Update] in the Network Setup Menu (p. 49)
- The Internet contents are operated by their respective service providers, and service may be discontinued either temporarily or permanently without notice. Therefore, Panasonic will make no warranty for the content or the continuity of the services.
- All features of websites or content of the service may not be available.
- Available contents are subject to change without notice.
- Some content may be inappropriate for some viewers.
- Some content may only be available for specific countries and may be presented in specific languages.
- Depending on the connection environment, the internet connection may be slow or may not be successful.
- Turn the TV off, and then on again when changing or reconnecting the network connection.
- Registration is required to access certain Internet contents. Refer registration steps shown on the screen when accessing Internet contents feature.
VIERA Link Functions

**VIERA Link “HDAVI Control™”**

Enjoy additional HDMI interoperability with Panasonic products which have "HDAVI Control" function. This TV supports "HDAVI Control 5" function.

Connections to equipment with HDMI cable such as a DIGA Recorder, HD Video Camera, Player theatre, Amplifier, etc., allow you to interface to them automatically.

These features are limited to models incorporating "HDAVI Control" and "VIERA Link".

- Some functions are not available depending on the equipment’s version of HDAVI Control. Please confirm the connected equipment’s version of HDAVI Control.
- VIERA Link “HDAVI Control”, based on the control functions provided by HDMI which is an industry standard known as HDMI CEC (Consumer Electronics Control), is a unique function that we have developed and added. As such, its operation with other manufacturers’ equipment that supports HDMI CEC cannot be guaranteed.
- Please refer to individual manuals for the external equipment. About applicable Panasonic equipment, consult your local Panasonic dealer.

*1: HDMI Connection only
*2: HDMI and Audio out connections
*3: available with equipment which has “HDAVI Control 2 or later” function
*4: available with equipment which has “HDAVI Control 3 or later” function
*5: available with the equipment which has “HDAVI Control 4 or later” function
*6: available with DIGA Recorder which has HDD
*7: while playing a disc
*8: except for watching a disc
*9: HDMI Connection only

**Connection**

- To use DIGA Recorder / DVD Player / Blu-ray Disc Player / HD Video Camera / LUMIX Camera:

  ![Diagram](https://example.com/diagram_1.png)

- To use Player theatre / Blu-ray Disc theatre:

  ![Diagram](https://example.com/diagram_2.png)

- To use Amplifier:

  ![Diagram](https://example.com/diagram_3.png)

*9: If the connected equipment has “HDAVI Control 5” function, you do not have to use this audio cable (Optical digital audio cable or RCA cable). In this case, connect the equipment to the TV’s HDMI2 terminal via an HDMI cable.
VIERA Link Functions

Note

• For a DIGA Recorder / DVD Player / Blu-ray Disc Player / HD Video Camera / LUMIX Camera with VIERA Link function, connect to HDMI1, HDMI2 or HDMI3 terminal via an HDMI cable.

• For a Player theatre / Blu-ray Disc theatre / Amplifier, connect to HDMI1, HDMI2 or HDMI3 terminal via an HDMI cable, and also connect either the optical digital audio cable or RCA cable for audio output from the TV.

• Use fully wired HDMI compliant cable. Non-HDMI-compliant cables cannot be utilised.

A recommended Panasonic’s HDMI cable part number:
• RP-CDHS15 (1.5 m) • RP-CDHS30 (3.0 m) • RP-CDHS50 (5.0 m)

Preparations

• Connect the equipment supporting VIERA Link.

• Set up the connected equipment. Read the manual of the equipment.

• For optimal recording, the settings of the recorder may need to be changed. For details, read the manual of the recorder.

• Set [VIERA Link] [On] in the Setup Menu [VIERA Link] (p. 27)

• Set up the TV

- After connection, turn the equipment on and then switch the TV on.
- Select the input mode to HDMI1, HDMI2 or HDMI3 (p. 19), and make sure that an image is displayed correctly.

This setup should be done each time when the following conditions occur:
• for the first time • when adding or reconnecting equipment • when changing setup

Features available

Channel download

Channel settings can be downloaded to the recorder.

Easy playback

Automatic input switching - When connected equipment is operated, the input mode is switched automatically.

[Power on Link]

Set Power on Link [On] in the Setup Menu to use this function [Power on Link] (p. 27)

When the connected equipment starts playback or direct navigator / function menu for the equipment are activated, the TV is automatically turned on. (Only when the TV is in Standby mode.)

[Power off Link]

Set Power off Link [On] in the Setup Menu to use this function [Power off Link] (p. 27)

When the TV is set to Standby mode, the connected equipment is also automatically set to Standby.

• This function will work even if the TV enters Standby mode automatically by auto power standby function.

[Standby Power Save] - Reduce unnecessary power consumption in standby

Set Standby Power Save [On] in the Setup Menu to use this function [Standby Power Save] (p. 27)

The power consumption in Standby mode of the connected equipment is controlled higher or lower in synchronisation with the TV On / Off state to reduce the consumption.

When the TV is set to Standby mode, the connected equipment is automatically set to Standby and the power consumption in Standby mode of the connected equipment is automatically minimised.

When the TV is turned on, the connected equipment is still in Standby mode, but the power consumption is increased to make startup time early.

• This function is effective if the connected equipment can change the power consumption in Standby mode and is set to higher consumption.

• This function will work when [Power off Link] is set to [On].

[Intelligent Auto Standby] - Auto standby for unnecessary equipment

Set Intelligent Auto Standby [On (With reminder)] or [On (No reminder)] in the Setup Menu to use this function [Intelligent Auto Standby] (p. 27)

When the TV is On, non-watched or non-used connected equipment goes into Standby mode automatically to reduce the power consumption. For example, when the input mode is switched from HDMI, when Speaker Selection is changed to [TV] (except for watching a disc).

• If you select [On (With reminder)], the on screen message will be displayed to be noticed before working this function.

• This function may not work properly depending on the connected equipment. If required, set to [Off].
Features available (Using VIERA Link Menu)

[Pause Live TV]
You can pause the live TV programme and resume later. Live TV programmes will be recorded on HDD of the connected DIGA Recorder.

• This function is available with a DIGA Recorder which has HDD.
• If you connect a variety of recorders including other manufacturers’ recorders at the same time, please connect the DIGA Recorder which has a HDD to the TV’s lower HDMI terminal number. For example, if you use HDMI1 and HDMI2 for two recorders, in this case connect DIGA Recorder which has HDD to HDMI1.
• If you cannot operate, check the settings and the equipment
  ➔ “Summary of features”, “Connection”, “Preparations” (p. 54 - 55)
Access and pause the live TV programme

1 Display [VIERA Link Menu]

2 Select [Pause Live TV] and pause
The TV picture will be paused.

- The live TV programme is recorded on HDD from where it was paused.
- If the paused TV picture disappears after a few minutes, the paused picture will be restored

To operate Pause Live TV
search backward
  pause
search forward
  playback
  stop

- Operations may be different depending on the recorder. In this case, follow the operation guide or read the manual of the recorder.

■ To return to Live TV
(stop playback of Pause Live TV / cancel pause)

[Direct TV Rec] - What you see is What you record
Recording the current programme in DIGA Recorder immediately.

• If you connect a variety of recorders including other manufacturers’ recorders at the same time, please connect DIGA Recorder to the TV’s lower HDMI terminal number. For example, if you use HDMI1 and HDMI2 for two recorders, in this case connect DIGA Recorder to HDMI1.
• If you cannot operate, check the settings and the equipment
  ➔ “Summary of features”, “Connection”, “Preparations” (p. 54 - 55)

1 Display [VIERA Link Menu]

2 Select [Direct TV Rec] and start recording

■ To stop recording
Select [Stop] in [Direct TV Rec] and stop recording

- If you stop playback or cancel pause, the recorded programme will be deleted from HDD.
[VIERA Link Control] - Operate the connected equipment with VIERA remote control

You can control some functions of the connected equipment with this TV remote control by pointing at the TV's signal receiver.

- If you cannot operate, check the settings and the equipment
  - "Summary of features", "Connection", "Preparations" (p. 54 - 55)
- For details of the operations for the connected equipment, read the manual of the equipment.

Access and operate the menu of the equipment

1 Display [VIERA Link Menu]

2 Select [VIERA Link Control]

3 Select the equipment you want to access

   The type of the connected equipment is displayed. Select the type of the equipment and access.

   - You can also access directly by using VIERA TOOLS (p. 20)
   - The displayed item may vary depending on the connected equipment.
   - [Home Cinema] means Player theatre, Blu-ray Disc theatre or Recorder theatre.
   - [Other] means Tuner set top box.

   The menu of the accessed equipment (Input mode will be changed automatically)

4 Operate the connected equipment

- To display the operation guide
- Store / set / access
- Move the cursor / select the menu
- Return to the previous menu
- Move the cursor / access / adjust
- Exit the menu

When the key words are displayed on colour bar

( Note )

- Some operations may not be available depending on the equipment. If so, use its own remote control.

If multiple recorders or players are connected

The number is given from the TV's lower HDMI terminal number connected to the same type equipment. For example, two recorders to HDMI2 and HDMI3, in this case the recorder connected to HDMI2 is displayed as [Recorder1], and the recorder connected to HDMI3 is displayed as [Recorder2].

If you access non-VIERA Link equipment

Type of the connected equipment is displayed.

You can access the menu of the equipment, but you cannot operate it. Use its own remote control to operate the equipment.
[Speaker Selection] - Speaker control

You can control the theatre speaker with this TV remote control by pointing at the TV’s signal receiver.

* If you cannot operate, check the settings and the equipment
  ⇒ “Summary of features”, “Connection”, “Preparations” (p. 54 - 55)

Access and control the speaker volume

1. Display [VIERA Link Menu]

2. Select [Speaker Selection]

3. Set to [Home Cinema] or [TV]

[Home Cinema]
Player theatre, Blu-ray Disc theatre or Amplifier will be automatically turned on if it is in Standby mode and the sound is from theatre speakers connected to the equipment.

* Volume up / down

* Mute

* The sound of TV speakers is mute.
* When the equipment is turned off, TV speakers will be active.

[TV]
TV speakers are active.

Multi-channel sound
* If you wish to enjoy the multi-channel sound (e.g. Dolby Digital 5.1ch) via an Amplifier, connect with HDMI cable and Optical digital audio cable (p. 54), and then select [Home Cinema]. If your Amplifier has “HDAVI Control 5” function, you can connect only with HDMI cable. In this case, connect your Amplifier to the TV’s HDMI2 terminal.
To enjoy the sound from the DIGA Recorder in multi-channel sound, connect an HDMI cable from the DIGA Recorder to the Amplifier (p. 54).

Note
* These functions may not work properly depending on the connected equipment.
* Image or sound may not be available for the first few seconds when the Input mode is switched.
* Easy playback may be available by using the remote control for Player theatre, Blu-ray Disc theatre or Amplifier. Read the manual of the equipment.
* “HDAVI Control 5” is the newest standard (current as of December, 2010) for HDAVI Control compatible equipment. This standard is compatible with conventional HDAVI equipment.
* To confirm this TV’s version of HDAVI Control ⇒ [System Information] (p. 27)
External Equipment

These diagrams show our recommendations for connection of your TV to various pieces of equipment. For other connections, consult the instructions for each piece of equipment, the table below, and the specifications (p. 73).

Types of connectable equipment to each terminal

Panasonic does not guarantee operation and performance of peripheral devices made by other manufacturers; and we disclaim any liability or damage arising from operation and/or performance from usage of such other maker’s peripheral devices.
To play back

- Fully wired HDMI compliant cable*1 or
- Antenna RF cable

*1 : Only for DVD Recorder

HDMI equipment

- Fully wired HDMI compliant cable
  - HDMI connection (p. 54, 63)

To watch DVDs

- (Listening)
- (Viewing)

To listen with Home Theatre

- Fully wired HDMI compliant cable
- Optical digital audio cable
- RCA cable

*2 : If the connected equipment has “HDAVI Control 5” function, you do not have to use this audio cable (Optical digital audio cable or RCA cable). In this case, connect the equipment to the TV’s HDMI2 terminal via an HDMI cable.
External Equipment

**Headphones**

- (M3 stereo mini plug)
- To adjust volume
  - [Headphone Volume] in the Sound Menu (p. 24)

**USB devices**

- USB cable

**Camcorder / HDMI equipment**

- Fully wired HDMI compliant cable
  - Camcorder etc.

**Camcorder / Game equipment**

- Viewing
- Listening
  - Camcorder etc.

**Network**

- Less than 10 cm
  - LAN cable
  - Hub or Router
  - Internet
  - Modem
  - Hub or Router

_In Installing the Ferrite core_

1. Pull back the tabs (in two places)
2. Wind the cable twice
3. Press the cable through and close

**PC**

- Viewing
- Listening
  - Conversion adaptor (if necessary)
  - Computer

</tbody>
</table>

*If the stereo signal is poor or the receiving conditions are not optimum or if STEREO:MONO automatic switching occurs, it is recommended you switch from STEREO to MONO.

*Even when the contents of the receiving signal undergo changes, selection mode is kept intact.

*When the receiving conditions deteriorate, listening will be easier if the mode is set to the MONO position, using the Sound Selection button.

*DUAL, also known as DUAL MONO or as BILINGUAL is not currently transmitted in some countries.
**HDMI connection**

HDMI (high-definition multimedia interface) is the world’s first complete digital consumer AV interface complying with a non-compression standard. HDMI allows you to enjoy high-definition digital images and high-quality sound by connecting the TV and the equipment.

HDMI-compatible equipment*1 with an HDMI or DVI output terminal, such as a DVD player, a set top box or game equipment, can be connected to the HDMI terminal using an HDMI compliant (fully wired) cable. About connections, see “External Equipment” (p. 59 - 61).

**Applicable HDMI features**
- Input audio signal: 2ch Linear PCM (sampling frequencies - 48 kHz, 44.1 kHz, 32 kHz)
- Input video signal: 480i, 480p, 576i, 576p, 720p, 1080i and 1080p
  ⇒ “Input signal that can be displayed” (p. 64)
  Match the output setting of the digital equipment.
- Input PC signal: ⇒ “Input signal that can be displayed” (p. 64)
  Match the output setting of the PC.
- VIERA Link (HDAVI Control 5): ⇒ [VIERA Link] (p. 54)
- Audio Return Channel*2 (HDMI2 terminal only)

**DVI connection**
If the external equipment has only a DVI output, connect to the HDMI terminal via a DVI to HDMI adaptor cable*3. When the DVI to HDMI adaptor cable is used, connect the audio cable to the audio input terminal (HDMI1 / 2: use AV2 audio terminals / HDMI3: use AV3 audio terminals).

If the picture position is not fit to the screen during the DVI connection, adjust the position on [DVI Position Settings] in the Setup Menu (p. 26). The settings are memorised for each HDMI terminals and input signals.

**Note**
- Audio settings can be made on the [HDMI1 / 2 / 3 Input] in the Sound Menu. (p. 25)
- If the connected equipment has an aspect adjustment function, set the aspect ratio to [16:9].
- These HDMI connectors are "type A".
- These HDMI connectors are compatible with HDCP (High-Bandwidth Digital Content Protection) copyright protection.
- Equipment having no digital output terminal may be connected to the input terminal of “COMPONENT” or “VIDEO” to receive analogue signals.
- This TV incorporates HDMI™ technology.
*1: The HDMI logo is displayed on HDMI-compliant equipment.
*2: Audio Return Channel (ARC) is a function to be able to send digital sound signals via an HDMI cable.
*3: Enquire at your local digital equipment retailer shop.

**PC connection**
A PC may be connected to this TV so that the PC screen is displayed and sound is heard from the TV.
- PC signals that can be inputted: Horizontal scanning frequency 31 to 69 kHz; vertical scanning frequency 59 to 86 Hz (more than 1,024 signal lines could result in incorrect display of the image).
- A PC adaptor is not necessary for the DOS/V-compliant D-sub 15-pin connector.

**Note**
- Some PC models cannot be connected to this TV.
- When using PC, set the colour display quality of PC to the highest position.
- For details of the applicable PC signals, see p. 64.
- Max. display resolution

- The above signals are reformatted for optimal viewing on your display.
- PC signal is magnified or compressed for display, so that it may not be possible to show fine detail with sufficient clarity.
Media Player / DLNA

SD Card
Card format: SDXC Card - exFAT
SDHC Card / SD Card - FAT16 or FAT32
Compliant card type (maximum capacity): SDXC Card (64 GB), SDHC Card (32 GB), SD Card (2 GB), miniSD Card (2 GB) (requiring miniSD adaptor)

• If miniSD Card is used, insert / remove it together with the adaptor.
• Check the latest information on the card type at the following website.
  (English only)
  http://panasonic.jp/support/global/cs/tv/
• Use an SD Card which meets SD standards. If not, it may cause the TV to malfunction.
• Do not remove the card while the TV is accessing data (this can damage the card or TV).
• Do not touch the pins on the back of the card.
• Do not subject the card to high pressure or impact.
• Insert the card in the correct direction (otherwise, the card may be damaged).
• Electrical interference, static electricity, or erroneous operation may damage the data or card.
• Back up the recorded data at regular intervals in case of deteriorated or damaged data or erratic operation of the TV. (Panasonic is not liable for any deterioration or damage of recorded data.)

USB Flash Memory

DivX

DivX Certified® to play DivX® video up to HD 1080p, including premium content.

ABOUT DIVX VIDEO:
DivX® is a digital video format created by DivX, Inc. This is an official DivX Certified® device that plays DivX video.
Visit www.divx.com for more information and software tools to convert your files into DivX video.

Subtitle text file of DivX
Subtitles format - MicroDVD, SubRip, TMPlayer

• The DivX video file and subtitles text file are inside the same folder, and the file names are the same except for the file extensions.
• If there are more than one subtitles text files inside the same folder, they are displayed in the following order of priority: “.srt”, “.sub”, “.txt”.
• To confirm or change the current subtitle status while playing DivX content, press the OPTION button to display Option Menu.
• Depending on the methods used to create the file or the state of recording, only parts of the subtitles may be displayed, or the subtitles may not be displayed at all.

Note

• Depending on how you make SD Card or USB Flash Memory, files and folders may not be displayed in the order you numbered.
• Depending on how you create the files and the structure of folders, the files and folders may not be displayed.
• When there are many files and folders, operation may take time to complete or some files may not be displayed or playable.

ABOUT DIVX VIDEO-ON-DEMAND:
This DivX Certified® device must be registered in order to play purchased DivX Video-on-Demand (VOD) movies. To obtain your registration code, locate the DivX VOD section in your device setup menu. Go to vod.divx.com for more information on how to complete your registration.

To show DivX VOD registration code

➤ [DivX® VOD] in the Setup Menu (p. 27)

• If you want to generate the new registration code, you have to deregister the present registration code. After playing DivX VOD content once, the confirmation screen to deregister will be displayed in [DivX® VOD] in the Setup Menu. If you press the OK button on the confirmation screen, the deregistration code will be generated and you will not be able to play any contents that you purchased using the present registration code.
You will obtain the new registration code by pressing the OK button on the deregistration code screen.
• If you purchase DivX VOD content using a registration code different from this TV’s code, you will not be able to play this content. ([Your device is not authorized to play this DivX protected video.] is displayed.)

Regarding DivX content that can only be played a set number of times
Some DivX VOD content can only be played a set number of times.

When you play this content, the remaining number of plays is displayed. You cannot play this content when the number of remaining plays is zero. ([This DivX rental has expired.] is displayed.)
• When playing this content, the number of remaining plays is reduced by one in the following conditions:
  • If you exit the current application.
  • If you play the other content.
  • If you go to the next or previous content.

USB connection

• It is recommended to connect the USB Flash Memory directly to the TV’s USB ports.
• Some USB devices or USB HUB may not be used with this TV.
• You cannot connect any devices by using USB card reader.

The combination of USB devices that have been tested for each TV’s USB port

Combination of USB port 1 + port 2 (and vice versa):
• USB Flash Memory + Wireless LAN Adaptor
• USB Flash Memory + USB Keyboard
• Wireless LAN Adaptor + USB Keyboard

Note

• Additional information for USB devices may be on the following web site. (English only)
  http://panasonic.jp/support/global/cs/tv/
Maintenance

First, remove the mains plug from the socket outlet.

**Display panel, Cabinet, Pedestal**

**For regular care:**
Gently wipe the surface of the display panel, cabinet, or pedestal by using a soft cloth to clean the dirt or fingerprints.

**For stubborn dirt:**
Dampen a soft cloth with clean water or diluted neutral detergent (1 part detergent to 100 parts water). Then wring the cloth and wipe the surface. Finally, wipe away all the moisture.

**Caution**
- Do not use a hard cloth or rub the surface too hard. This may cause scratches on the surface.
- Take care not to subject the TV’s surfaces to water or detergent. Liquid inside the TV could lead to product failure.
- Take care not to subject the surfaces to insect repellent, solvent, thinner, or other volatile substances. This may degrade surface quality or cause peeling of the paint.
- Do not allow the cabinet and pedestal to make contact with a rubber or PVC substance for a long time. This may degrade surface quality.

**Mains plug**
Wipe the mains plug with a dry cloth at regular intervals. Moisture and dust may lead to fire or electrical shock.
**FAQs**

Before requesting service or assistance, please follow these simple guides to resolve the problem. If the problem still persists, please contact your local Panasonic dealer for assistance.

### White spots or shadow images (noise)
- Check the position, direction, and connection of the aerial.

### Neither image nor sound is produced
- Is the TV in “AV mode”?
- Is the mains lead plugged into the socket outlet?
- Is the TV turned On?
- Check the Picture Menu (p. 22 - 23) and volume.
- Check all required cables and connections are firmly in place.

### An error message appears
- Follow the message’s instructions.
- If the problem persists, contact your local Panasonic dealer.

### “VIERA Link” function does not work and an error message appears
- Confirm the connection. (p. 54)
- Turn the connected equipment on and then switch the TV On. (p. 55)

### Contrast is reduced
- Contrast is lowered in the following conditions without any user operation for a few minutes:
  - no signal in Digital TV mode or AV mode
  - selected locked channel
  - selected invalid channel
  - selected radio channel
  - displayed menu
  - thumbnail or still picture

### Pixel Statement
- An image on a LCD or Plasma TV screen is created by many small groups of dots known as pixels (which is similar to the image in a newspaper). It also naturally follows that higher panel resolutions contain more pixels. To create a colour image, each pixel consists of three tiny coloured dots (known as sub-pixels), one each of red, green and blue. Each one of these dots is precisely controlled by the electronics of the TV to produce the picture. Whilst Panasonic maintains the highest standards in manufacturing technology and processes in the construction of these panels, there are a number of allowable pixel/subpixel failures that still allow the panel to be defined as a good panel. It is not possible to guarantee absolutely no pixel loss.

### Problem Actions

<table>
<thead>
<tr>
<th>Problem</th>
<th>Actions</th>
</tr>
</thead>
</table>
| Chaotic image, noisy | • Change the setting of [P-NR] in the Picture Menu (to remove noise).
  ➔ (p. 22)
  • Check nearby electrical products (car, motorcycle, fluorescent lamp). |
| No image can be displayed | • Is [Colour] or [Contrast] in the Picture Menu set to the minimum?
  ➔ (p. 22) |
| Blurry or distorted image (no sound or low volume) | • Reset channels ➔ (p. 30, 31) |
| Unusual image is displayed | • Turn the TV Off with Mains power On / Off switch, then turn it On again. |
| [Shop] appears on screen at switch on | • [Shop] was selected in [Auto Tuning] (p. 12)
Reset settings in [Shipping Condition] (p. 34), then select [Home] in [Auto Tuning] ➔ (p. 12) |
| No sound is produced | • Is “Sound Mute” active? ➔ (p. 11)
• Is the volume set to the minimum? |
| Sound level is low or sound is distorted | • Sound signal reception may be deteriorated.
• Set [MPX] in the Sound Menu to [Mono] ➔ (p. 25) |
<p>| Unusual sound from the TV | • When power is on, drive noise may be heard from inside the TV (not a sign of faulty operation). |</p>
<table>
<thead>
<tr>
<th>Problem</th>
<th>Actions</th>
</tr>
</thead>
</table>
| **Sound is unusual** | • Set the sound setting of the connected equipment to “2ch L.PCM”.  
• Check the [HDMI1 / 2 / 3 Input] setting in the Sound Menu. ⇒ (p. 25)  
• If digital sound connection has a problem, select analogue sound connection. ⇒ (p. 63) |
| **Pictures from external equipment are unusual when the equipment is connected via HDMI** | • Check the HDMI cable is connected properly. ⇒ (p. 54, 59 - 61)  
• Turn the TV and equipment Off, then turn them On again.  
• Check an input signal from the equipment. ⇒ (p. 64)  
• Use equipment compliant with EIA/CEA-861/861D. |
| **Cannot connect to the network** | • Check the LAN cable or Wireless LAN Adaptor is connected properly. ⇒ (p. 46)  
• Check the connections and settings. ⇒ (p. 46 - 49)  
• Check the network equipment and network environment.  
• If the problem persists, consult your Internet Service Provider or telecommunications company. |
| **Cannot select the file during DLNA operations** | • Is the media server prepared? ⇒ (p. 45)  
• Check applicable data format. ⇒ (p. 65 - 66) |
| **Cannot access the Internet contents** | • Check the connections and settings. ⇒ (p. 46 - 49)  
• The server or connected line might be busy now. |

**Note:** Digital TV reception is only as good as the antenna and the antenna cabling delivering the DTV signals to the television. Reliable digital TV reception requires high quality, robust DTV signals which can only be achieved when using a TV antenna and cabling designed for digital TV reception.

*For your safety, the antenna and cabling should be inspected / installed by a licensed installer that should comply with Australian Standard AS1417.1 for Domestic installations or AS1367 for MATV installations.*

<table>
<thead>
<tr>
<th>Problem</th>
<th>Actions</th>
</tr>
</thead>
</table>
| **Connecting devices such as DTV recorder / PVR / VCR etc that also require an antenna connection to the digital television** | • To maintain optimum antenna signal quality, use an ‘F’ type TV signal splitter (as illustrated) when connecting two or more devices to the same antenna socket.  
[Diagram: TV, DTV Recorder / PVR / VCR, ‘F’ type Antenna Splitter, RG6Q Fly Lead]  
• Hint: Some degradation of the DTV signal may occur if you are connecting the aerial through an external device (e.g. DVD Recorder or Set Top Box). In this case it is better to use a splitter and connect the aerial directly to both devices. |
| **After digital TV tuning, (or re-tuning) some or all DTV channels are missing** | • Check to ensure your area is covered by DTV transmissions.  
• Check that the aerial and antenna cable are designed for DTV reception. If you live within 5-10 km of DTV transmission towers, a combined VHF / UHF Digital TV aerial should be adequate. Outside this area, separate VHF and UHF aerials provide superior reception performance.  
• If you live in a unit or apartment, check to ensure the Master Antenna TV (MATV) system is designed for analogue and DTV reception. Please consult your body corporate. |

</thead>
</table>
| **Digital TV**                                                         | • Check [Signal Condition] via TV Setup menu. If [Signal Quality] or [Signal Strength] is red/orange or constantly changing, check aerial/cable/connections. If problem persists, consult your local TV antenna installer.  
• Too much signal; is [Signal Strength] always at full strength? If yes, try attenuating (reducing) the signal strength.  
• Check that the aerial and antenna cable are designed for DTV reception.  
• The received signal may be too weak to allow the TV to reliably lock to the selected channel to generate a viewable picture. If problem persists, consult your local TV aerial installer.  
• Interference from household appliances (known as impulse noise) such as light switches, fridges etc. may cause picture break up and / or audio distortion. Use high quality quad shielded coaxial cable (RG6Q) fly lead between TV and antenna wall socket to minimise impulse noise pickup. If problem persists, consult your local TV aerial installer.  
• Antenna installation may be using an aerial amplifier that is faulty or an older style aerial amplifier that was not designed for digital TV.  
• Older style antenna cabling, loose fitting / corroded wall socket connections / terminals etc. |
| **Picture regularly pixelates on some channels, or ‘No Signal’ message**|                                                                                                                                                                                                    |
| **Picture infrequently pixelates on some or all channels**             | • Electrical interference caused by local or distant lighting storms, heavy rain, high wind etc. may cause picture to break up and or audio to mute / distort momentarily.  
• Impulse noise interference from an infrequently used electrical appliance, or a passing vehicle or lawn mower with a “noisy” ignition system.  
• Older style antenna cabling, loose fitting/corroded wall socket connections / terminals etc. |
| **The TV goes into Standby mode**                                       | • Auto power standby function is activated.  
• The TV enters Standby mode about 30 minutes after analogue broadcasting ends. |
| **Other**                                                              | • Are the batteries installed correctly? ⇒ (p. 6)  
• Has the TV been switched On?  
• Point the remote control directly at the front of the TV (within about 7 m and a 30 degree angle of the front of the TV).  
• Situate the TV away from sunshine or other sources of bright light not to shine on the TV’s remote control signal receiver. |
| **Parts of the TV become hot**                                          | • Even when the temperature of parts of the front, top and rear panels has risen, these temperature rises will not pose any problems in terms of performance or quality. |

Information on Disposal in other Countries outside the European Union

This symbol is only valid in the European Union.
If you wish to discard this product, please contact your local authorities or dealer and ask for the correct method of disposal.
Panasonic Warranty

1. The product is warranted for 12 months from the date of purchase. Subject to the conditions of this warranty Panasonic or its Authorised Service Centre will perform necessary service on the product without charge for parts or labour, if in the opinion of Panasonic, the product is found to be faulty within the warranty period.

2. This warranty only applies to Panasonic products purchased in Australia and sold by Panasonic Australia or its Authorised Distributors or Dealers and only where the products are used and serviced within Australia or its territories. Warranty cover only applies to service carried out by a Panasonic Authorised Service Centre and only if valid proof of purchase is presented when warranty service is requested.

3. This warranty only applies if the product has been installed and used in accordance with the manufacturer’s recommendations (as noted in the operating instructions) under normal use and reasonable care (in the opinion of Panasonic). The warranty covers normal domestic use only and does not cover damage, malfunction or failure resulting from use of incorrect voltages, incorrect installation, accident, misuse, neglect, build-up of dirt or dust, abuse, maladjustment of customer controls, mains supply problems, thunderstorm activity, infestation by insects or vermin, tampering or repair by unauthorised persons (including unauthorised alterations), introduction of sand, humidity or liquids, commercial use such as hotel, office, restaurant, or other business or rental use of the product, exposure to abnormally corrosive conditions or any foreign object or matter having entered the product.

4. This warranty does not cover the following items unless the fault or defect existed at the time of purchase:
   (a) Cabinet Part(s)
   (b) Video or Audio Tapes
   (c) SD cards or USB devices
   (d) User replaceable Batteries
   (e) DVD, Blu-ray, or Recordable Discs
   (f) Video / Audio Heads from wear and tear in normal use
   (g) Information stored on Hard Disk Drive, USB stick or SD card
   (h) DTV reception issues caused by TV Aerial / Cabling / Wall socket(s)

5. Some products may be supplied with Ethernet connection hardware. The warranty is limited on such products and will not cover:
   (a) Internet and or DLNA connection / setup related problems
   (b) Access fees and or charges incurred for internet connection
   (c) The use of incompatible software or software not specifically stipulated in the product operations manual; and
   (d) Any indirect or consequential costs associated with the incorrect use or misuse of the hardware, its connection to the internet or any other device.

6. To claim warranty service, when required, you should:
   - Telephone Panasonic’s Customer Care Centre on 132600 or visit our website referred to below and use the Service Centre Locator for the name/address of the nearest Authorised Service Centre.
   - Send or take the product to a Panasonic Authorised Service Centre together with your proof of purchase receipt as a proof of purchase date. Please note that freight and insurance to and / or from your nearest Authorised Service Centre must be arranged by you.
   - Note that home or pick-up/delivery service is available for the following products in the major metropolitan areas of Australia or the normal operating areas of the nearest Authorised Service Centres:
     - Plasma/LCD televisions / displays (screen size greater than 103 cm)

7. The warranties hereby conferred do not extend to, and exclude, any costs associated with the installation, de-installation or re-installation of a product, including costs related to the mounting, de-mounting or remounting of any screen, (and any other ancillary activities), delivery, handling, freighting, transportation or insurance of the product or any part thereof or replacement of and do not extend to, and exclude, any damage or loss occurring by reason of, during, associated with, or related to such installation, de-installation, re-installation or transit.

Panasonic Authorised Service Centres are located in major metropolitan areas and most regional centres of Australia, however, coverage will vary dependant on product. For advice on exact Authorised Service Centre locations for your product, please telephone our Customer Care Centre on 132600 or visit our website and use the Service Centre Locator.

In addition to your rights under this warranty, Panasonic products come with consumer guarantees that cannot be excluded under the Australian Consumer Law. If there is a major failure with the product, you can reject the product and elect to have a refund or to have the product replaced or if you wish you may elect to keep the goods and be compensated for the drop in value of the goods. You are also entitled to have the product repaired or replaced if the product fails to be of acceptable quality and the failure does not amount to a major failure.

If there is a major failure in regard to the product which cannot be remedied then you must notify us within a reasonable period by contacting the Panasonic Customer Care Centre. If the failure in the product is not a major failure then Panasonic may choose to repair or replace the product and will do so in a reasonable period of time from receiving notice from you.

THIS WARRANTY CARD AND THE PURCHASE DOCKET (OR SIMILAR PROOF OF PURCHASE) SHOULD BE RETAINED BY THE CUSTOMER AT ALL TIMES

If you require assistance regarding warranty conditions or any other enquiries, please visit the Panasonic Australia website www.panasonic.com.au or contact by phone on 132 600
If phoning in, please ensure you have your operating instructions available.
