Basic Operating Instructions
Digital Camera/Body
Model No. DMC-G7

Please read these instructions carefully before using this product, and save this manual for future use.

More detailed instructions on the operation of this camera are contained in “Operating Instructions for advanced features (PDF format)” in the supplied DVD.
Dear Customer,

We would like to take this opportunity to thank you for purchasing this Panasonic Digital Camera. Please read these Operating Instructions carefully and keep them handy for future reference. Please note that the actual controls and components, menu items, etc. of your Digital Camera may look somewhat different from those shown in the illustrations in these Operating Instructions.

Carefully observe copyright laws.

• Recording of pre-recorded tapes or discs or other published or broadcast material for purposes other than your own private use may infringe copyright laws. Even for the purpose of private use, recording of certain material may be restricted.

Information for Your Safety

**WARNING:**

To reduce the risk of fire, electric shock or product damage,

• Do not expose this unit to rain, moisture, dripping or splashing.
• Use only the recommended accessories.
• Do not remove covers.
• Do not repair this unit by yourself. Refer servicing to qualified service personnel.

The socket outlet shall be installed near the equipment and shall be easily accessible.

- **Product identification marking**

About the battery pack

**CAUTION**
- Danger of explosion if battery is incorrectly replaced. Replace only with the type recommended by the manufacturer.
- When disposing of the batteries, please contact your local authorities or dealer and ask for the correct method of disposal.

- Do not heat or expose to flame.
- Do not leave the battery(ies) in a car exposed to direct sunlight for a long period of time with doors and windows closed.

**Warning**
Risk of fire, explosion and burns. Do not disassemble, heat above 60 °C or incinerate.

About the battery charger

**CAUTION!**
To reduce the risk of fire, electric shock or product damage,
- Do not install or place this unit in a bookcase, built-in cabinet or in another confined space. Ensure this unit is well ventilated.

- The battery charger is in the standby condition when the AC power supply cord is connected. The primary circuit is always “live” as long as the power cord is connected to an electrical outlet.
Cautions for Use

• Do not use any other USB connection cables except the supplied one or a genuine Panasonic USB connection cable (DMW-USBC1: optional).
• Use a “High Speed HDMI micro cable” with the HDMI logo. Cables that do not comply with the HDMI standards will not work.
  “High Speed HDMI micro cable” (Type D—Type A plug, up to 2 m long)
• Always use a genuine Panasonic AV cable (DMW-AVC1: optional).
• Always use a genuine Panasonic remote shutter (DMW-RSL1: optional).

Keep this unit as far away as possible from electromagnetic equipment (such as microwave ovens, TVs, video games etc.).

• If you use this unit on top of or near a TV, the pictures and/or sound on this unit may be disrupted by electromagnetic wave radiation.
• Do not use this unit near cell phones because doing so may result in noise adversely affecting the pictures and/or sound.
• Recorded data may be damaged, or pictures may be distorted, by strong magnetic fields created by speakers or large motors.
• Electromagnetic wave radiation may adversely affect this unit, disturbing the pictures and/or sound.
• If this unit is adversely affected by electromagnetic equipment and stops functioning properly, turn this unit off and remove the battery or disconnect AC adaptor (DMW-AC10G: optional). Then reinsert the battery or reconnect AC adaptor and turn this unit on.

Do not use this unit near radio transmitters or high-voltage lines.

• If you record near radio transmitters or high-voltage lines, the recorded pictures and/or sound may be adversely affected.
• Before cleaning the camera, remove the battery or the DC coupler (DMW-DCC8: optional), or disconnect the power plug from the outlet.
• Do not press the monitor with excessive force.
• Do not press the lens with excessive force.
• Do not spray the camera with insecticides or volatile chemicals.
• Do not keep rubber or plastic products in contact with the camera for a long period of time.
• Do not use solvents such as benzine, thinner, alcohol, kitchen detergents, etc., to clean the camera, since it may deteriorate the external case or the coating may peel off.
• Do not leave the camera with the lens facing the sun, as rays of light from the sun may cause it to malfunction.
• Always use the supplied cords and cables.
• Do not extend the cords or the cables.
• During access (image writing, reading and deleting, formatting etc.), do not turn this unit off, remove the battery, card or disconnect the AC adaptor (DMW-AC10G: optional). Furthermore, do not subject the camera to vibration, impact or static electricity.
• The data on the card may be damaged or lost due to electromagnetic waves, static electricity or breakdown of the camera or the card. We recommend storing important data on a PC etc.
• Do not format the card on your PC or other equipment. Format it on the camera only to ensure proper operation.
• The battery is not charged when the camera is shipped. Charge the battery before use.
• The battery is a rechargeable lithium ion battery. If the temperature is too high or too low, the operating time of the battery will become shorter.
• The battery becomes warm after using and during and after charging. The camera also becomes warm during use. This is not a malfunction.
• Do not leave any metal items (such as clips) near the contact areas of the power plug or near the batteries.
• Store the battery in a cool and dry place with a relatively stable temperature: [Recommended temperature: 15°C to 25°C, Recommended humidity: 40%RH to 60%RH]
• Do not store the battery for a long time while fully charged. When storing the battery for a long period of time, we recommend charging it once a year. Remove the battery from the camera and store it again after it has completely discharged.

Care of the camera

Do not subject to strong vibration, shock, or pressure.
• The lens, monitor, or external case may be damaged if used in the following conditions.
  It may also malfunction or image may not be recorded if you:
  – Drop or hit the camera.
  – Press hard on the lens or the monitor.

This camera is not dust/drip/water proof.
Avoid using the camera in places with a lot of dust, water, sand, etc.
• Liquid, sand and other foreign material may get into the space around the lens, buttons, etc. Be particularly careful since it may not just cause malfunctions, but it may also become irreparable.
  – Places with a lot of sand or dust.
  – Places where water can come into contact with this unit, such as when using it on a rainy day or at the beach.

Do not place your hands inside the mount of the digital camera body. Since the sensor unit is a precision apparatus, it may cause a malfunction or damage.

■ About Condensation (When the lens, the viewfinder or monitor is fogged up)
• Condensation occurs when the ambient temperature or humidity changes. Be careful of condensation since it causes lens, viewfinder and monitor stains, fungus and camera malfunction.
  • If condensation occurs, turn the camera off and leave it for about 2 hours. The fog will disappear naturally when the temperature of the camera becomes close to the ambient temperature.

About the firmware of your interchangeable lens
For smoother recording, we recommend updating the firmware of the interchangeable lens to the latest version.
• To view the latest information on the firmware or to download the firmware, visit the support site below:
  http://panasonic.jp/support/global/cs/dsc/
  (This Site is English only.)
• To check the firmware version of the interchangeable lens, attach it to the camera body and select [Version Disp.] in the [Setup] menu.
Standard Accessories

Check that all the accessories are supplied before using the camera. Product numbers correct as of May 2015. These may be subject to change.

Digital Camera Body
(This is referred to as camera body in these operating instructions.)

WB] (White Balance)
( (Auto Focus Mode)
[Fn3] (P23)
[Delete/Cancel) button (P37)/[Fn4] button (P23)

DC coupler cover (P64)
• When using an AC adaptor, ensure that the Panasonic DC coupler (DMW-DCC8: optional) and AC adaptor (DMW-AC10G: optional) are used.
• Always use a genuine Panasonic AC adaptor (DMW-AC10G: optional).
• When using an AC adaptor, use the AC cable supplied with the AC adaptor.

Release lever (P14)
Card/Battery door (P14)

Tripod mount
• It may not be possible to attach and securely fasten a tripod with a screw length of 5.5 mm or more to the camera. Doing so may also damage the camera.
Preparation

• Check that the camera is turned off.

Attaching the Shoulder Strap

• We recommend attaching the shoulder strap when using the camera to prevent it from dropping.

• Perform steps 1 to 6 and then attach the other side of the shoulder strap.

• Use the shoulder strap around your shoulder.
  – Do not wrap the strap around your neck.
  – It may result in injury or accident.

• Do not leave the shoulder strap where an infant can reach it.
  – It may result in an accident by mistakenly wrapping around the neck.
The battery that can be used with this unit is DMW-BLC12E.

1. Attach the battery paying attention to the direction of the battery.
2. Connect the AC cable.
   - The [CHARGE] indicator \( \text{A} \) lights up and charging begins.

### About the [CHARGE] indicator

- **On:** Charging.
- **Off:** Charging has completed.
  (Disconnect the charger from the electrical socket and detach the battery after charging is completed.)

### When the [CHARGE] indicator flashes

- The battery temperature is too high or too low. It is recommended to charge the battery again in an ambient temperature of between 10°C and 30°C.
- The terminals of the charger or the battery are dirty. In this case, wipe them with a dry cloth.

### Charging time

<table>
<thead>
<tr>
<th>Charging time</th>
<th>Approx. 140 min</th>
</tr>
</thead>
</table>

* The indicated charging time is for when the battery has been discharged completely. The charging time may vary depending on how the battery has been used. The charging time for the battery in hot/cold environments or a battery that has not been used for a long time may be longer than normal.
Inserting/Removing the Battery

- Always use genuine Panasonic batteries (DMW-BLC12E).
- If you use other batteries, we cannot guarantee the quality of this product.

- Being careful about the battery orientation, insert all the way until you hear a locking sound and then check that it is locked by lever A. Pull the lever A in the direction of the arrow to remove the battery.

Inserting/Removing the Card (Optional)

- Push it securely all the way until you hear a “click” while being careful about the direction in which you insert it.
  To remove the card, push the card until it clicks, then pull the card out upright.

About cards that can be used with this unit

<table>
<thead>
<tr>
<th>Type</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>SD Memory Card (512 MB to 2 GB)</td>
<td>SDHC Memory Cards and SDXC Memory Cards can be used only with their compatible devices. Check that the PC and other equipment are compatible when using the SDXC Memory Cards. <a href="http://panasonic.net/avc/sdcard/information/SDXC.html">http://panasonic.net/avc/sdcard/information/SDXC.html</a></td>
</tr>
<tr>
<td>SDHC Memory Card (4 GB to 32 GB)</td>
<td>This unit is compatible with UHS-I/UHS-II™ UHS Speed Class 3 standard SDHC/SDXC memory cards.</td>
</tr>
<tr>
<td>SDXC Memory Card (48 GB to 128 GB)</td>
<td>Operation of the cards on the left has been confirmed with Panasonic’s cards.</td>
</tr>
</tbody>
</table>

* UHS-I/UHS-II is a high speed interface standard for SD memory cards. UHS-II supports a theoretical transfer rate approximately three times faster than that of UHS-I.
About motion picture/4K photo recording and speed class ratings

According to the [Rec Format] (P34) and [Rec Quality] (P34) of a motion picture, the required card differs. To record 4K photos, you need a card with a speed class rating that supports 4K photo recording. Use a card that meets the following ratings of the SD Speed Class or UHS Speed Class.

- SD Speed Class and UHS Speed Class are the speed standards regarding continuous writing. To check the class, see the labelled side, etc. of the card.
- Please confirm the latest information on the following website. http://panasonic.jp/support/global/cs/dsc/ (This Site is English only.)
- Keep the Memory Card out of reach of children to prevent swallowing.

Formatting the card (initialisation)

Format the card before recording a picture with this unit. Since data cannot be recovered after formatting, make sure to back up necessary data in advance.

Select the menu. (P22)

MENU → ⚪ [Setup] → [Format]

- Confirmation screen is displayed. It is executed when [Yes] is selected.
Preparing/Basic

Attaching/Removing the Lens

• Change lenses where there is not a lot of dirt or dust.

• Do not press the lens release button A when you attach a lens.

Detaching the lens

1 Attach the lens cap.
2 While pressing on the lens release button B, rotate the lens toward the arrow until it stops and then remove.

Opening the Monitor/Adjusting the Monitor

At the time when this camera is purchased, the monitor is stowed in the camera body. Bring out the monitor as shown below.

1 Open the monitor. (Maximum 180°)
2 It can be rotated 180° forward.
3 Return the monitor to its original position.

• Only rotate the monitor after opening it wide enough, and be careful not to use excessive force as it may be damaged.

• When not using the monitor it is recommended that you close it with the screen facing inward to prevent dirt and scratches.
Setting Date/Time (Clock Set)

- The clock is not set when the camera is shipped.

1. Turn the camera on.
   - When the camera is turned on, the status indicator lights up green.

2. Press [MENU/SET].

3. Press ◀/▶ to select the items (year, month, day, hour, minute), and press ▲/▼ to set.

5. When [The clock setting has been completed.] is displayed, press [MENU/SET].

6. When [Please set the home area] is displayed, press [MENU/SET].

7. Press ◀/▶ to select the home area, and then press [MENU/SET].

Diopter adjustment

Adjust the diopter to suit your vision so that you can see the characters displayed in the viewfinder clearly.
Basic Operations

Shutter button (Taking pictures)
The shutter button works in two steps. To take a picture, press it.

Press the shutter button halfway to focus.

- Aperture value
- Shutter speed
- Focus indication

- Aperture value and shutter speed are displayed.
  (It will flash in red if the correct exposure is not achieved, except when set to flash.)
- Once the subject is in focus, the focus indication is displayed.
  (When the subject is not in focus, the indication flashes)

Press the shutter button fully (push it in further), and take the picture.

- When the image is correctly focused, the picture will be taken, since the [Focus/Release Priority] is set initially to [FOCUS].
- The focus range is different depending on the lens used.
- Even during menu operation or image playback, if you press the shutter button halfway, you can instantly set the camera ready for recording.

Motion picture button (Recording motion pictures)
Press the motion picture button to start and stop recording a motion picture.

Start recording by pressing the motion picture button.

- Release the motion picture button right after you press it.
Stop the recording by pressing the motion picture button again.
Mode dial (Selecting a Recording Mode)

Select the mode by rotating the mode dial.

• Rotate the mode dial slowly to select the desired mode.

<table>

</table>

• In [Dial Set.] in the [Custom] menu, you can change the operation methods of the rear dial and front dial.

Temporarily changing the items assigned to the front/rear dials ([Dial Operation Switch])

You can temporarily change the items assigned to the front/rear dials using the function button to which [Dial Operation Switch] is assigned. [Dial Operation Switch] is assigned to [Fn11] at the time of purchase. (P23)
• You can set the items to be assigned temporarily to the front/rear dials in [Dial Operation Switch Setup] in [Dial Set.] in the [Custom] menu.

1 Press [Fn11].
• A guide will be displayed showing the items temporarily assigned to the front/rear dials.

2 Rotate the front/rear dials while the guide is displayed.
• The setting of the item assigned to the dial you have rotated will change. To change the setting of the item assigned to the other dial, rotate it.

3 Press [MENU/SET] and set.
• When the recording screen is displayed, the original assignment settings for the dials are restored.
• Items that are temporarily assigned to the front/rear dials can be used only while the guide (step 1) or setting screen (step 2) is displayed. If you display a menu or turn off the camera while making adjustments, the original assignment settings will be restored.
Press [LVF] to switch between the Monitor and Viewfinder.

- [LVF] button
- Eye sensor

Press [LVF].

- The monitor/viewfinder will switch as follows:

  - **Automatic viewfinder/monitor switching**
  - **Viewfinder display**
  - **Monitor display**

  ※ If [Eye Sensor AF] in the [Custom] menu is set to [ON], the camera automatically adjusts the focus as the eye sensor is activated.

**Notes on automatic viewfinder/monitor switching**

Automatic viewfinder/monitor switching enables the eye sensor to switch the display to the viewfinder automatically when you bring your eye or an object near it.

**Touch screen (Touch operations)**

Touch screen of this unit is capacitive. Touch the panel directly with your bare finger.

- **Touch**
  - To touch and release the touch screen.
  - When selecting features using the touch screen, be sure to touch the centre of the desired icon.

- **Drag**
  - A movement without releasing the touch screen.
  - This can also be used to move to the next image during playback, etc.

- **Pinch (enlarge/reduce)**
  - Pinch the touch screen apart (enlarge) or together (reduce) with two fingers.
Setting menu items

1. Press [MENU/SET].

2. Press ▲/▼ of the cursor button to select the menu item and press [MENU/SET].

3. Press ▲/▼ of the cursor button to select the setting and press [MENU/SET].
   • Depending on the menu item, its setting may not appear or it may be displayed in a different way.

- Close the menu
  Press [Q/□] or press the shutter button halfway.

- Switching to other menus
  e.g.: Switching to the [Setup] menu from [Rec] menu.

1. Press ◀.

2. Press ▲/▼ to select a menu selector icon, such as [ ].
   • You can also select the menu toggle icons by rotating the front dial.

3. Press [MENU/SET].
   • Select a menu item next and set it.
Calling frequently-used menus instantly

(Quick Menu)

By using the Quick Menu, some of the menu settings can be easily found.

• The features that can be adjusted using Quick Menu are determined by the mode or a display style the camera is in.

1 Press [Q.MENU] to display the Quick Menu.
2 Rotate the front dial to select the menu item.
3 Rotate the rear dial to select the setting.
4 Press [Q.MENU] to exit the menu once the setting is complete.

Assigning frequently used functions to the buttons (function buttons)

You can assign recording functions, etc. to specific buttons and icons.

1 Select the menu. (P22)

   MENU → Fn [Custom] → [Fn Button Set]

2 Press ▲/▼ to select [Setting in REC mode] or [Setting in PLAY mode] and then press [MENU/SET].
3 Press ▲/▼ to select the function button you want to assign a function to and then press [MENU/SET].
4 Press ▲/▼ to select the function you want to assign and then press [MENU/SET].

• Some functions cannot be assigned depending on the function button.
Taking Pictures using the Automatic Function (Intelligent Auto Mode)

Recording Mode:  

In this mode, the camera makes the optimal settings for the subject and scene, so we recommend it when you wish to leave the settings to the camera and record without thinking about them.

1. **Set the mode dial to [IA].**
   - The camera will switch to either the most recently used of Intelligent Auto Mode or Intelligent Auto Plus Mode. At the time of purchase, the mode is set to Intelligent Auto Plus Mode. (P24)

2. **Align the screen with the subject.**
   - When the camera identifies the optimum scene, the icon of the scene concerned is displayed in blue for 2 seconds, after which its colour changes to the usual red. (Automatic scene detection)

Switching between Intelligent Auto Plus Mode and Intelligent Auto Mode

1. **Press [MENU/SET].**

2. **Press ▼.**

3. **Press ▲/▼ to select the [IA] or [IA] tab.**

4. **Press ► to select [IA] or [IA] and then press [MENU/SET].**
   - If [DISP.] is pressed, the description of the selected mode will be displayed.

Recording night scenes ([iHandheld Night Shot])

When [iHandheld Night Shot] is set to [ON] and [IA] is detected while taking handheld night shots, pictures of the night scenery will be taken at a high burst speed and composed into a single picture.

This mode is useful if you want to take stunning night shots with minimal jitter and noise, without using a tripod.

MENU → [Rec] → [iHandheld Night Shot] → [ON]/[OFF]
**Combining pictures into a single picture with rich gradation ([iHDR])**

When [iHDR] is set to [ON] and there is, for example, strong contrast between the background and the subject, multiple still pictures are recorded with differing exposures and combined to create a single still picture rich in gradation. [iHDR] works automatically as needed. When it does, [HDR] is displayed on the screen.

**Taking a picture with a blurred background (Defocus Control)**

**Recording Mode:**

You can easily set the blurriness of the background while checking the screen.

1. Press [Fn4] to display the setting screen.
2. Set the blurriness by rotating the rear dial.
   - If you press [MENU/SET], you can return to the recording screen.

**Recording images by changing the brightness or colour tone**

**Recording Mode:**

This mode enables you to change the brightness and colour tone to your preferred settings from the ones set by the camera.

**Setting brightness**

1. Press [ ].
2. Rotate the rear dial to adjust brightness.
   - Press [ ] again to return to the recording screen.

**Setting colour**

1. Press [ ] to display the setting screen.
2. Rotate the rear dial to adjust colour.
   - This will adjust the colour of the image from a reddish colour to a bluish colour.
   - Press [MENU/SET] to return to the recording screen.
Recording motion pictures with manually set aperture value/shutter speed (Creative Video Mode)

Recording Mode: 

It is possible to manually change the aperture and shutter speed and record motion pictures.

1. Set the mode dial to [ ].
2. Select the menu. (P22)

   MENU → [Motion Picture] → [Exposure Mode]

3. Press ▲/▼ to select [P], [A], [S] or [M], and then press [MENU/SET].
   • The operation for changing the aperture value or shutter speed is the same as the operation for setting the mode dial to [P], [A], [S] or [M].
4. Start recording.
   • Press the motion picture button or the shutter button to start recording a motion picture.
     (Still pictures cannot be taken.)
5. Stop recording.
   • Press the motion picture button or the shutter button to stop recording a motion picture.
Setting the Picture Quality and Size

Setting the aspect ratio of pictures

Applicable modes: [REC] [M] [P] [A] [S] [M] [C] [B]

This allows you to select the aspect ratio of the pictures to suit printing or the playback method.

MENU → [Rec] → [Aspect Ratio]

- [4:3] [Aspect Ratio] of a 4:3 TV
- [3:2] [Aspect Ratio] of a 35 mm film camera
- [16:9] [Aspect Ratio] of a high-definition TV, etc.
- [1:1] Square aspect ratio

• The ends of the recorded pictures may be cut at printing so check before printing.

Setting the number of pixels

Applicable modes: [REC] [M] [P] [A] [S] [M] [C] [B]

Set the number of pixels. The higher the numbers of pixels, the finer the detail of the pictures will appear even when they are printed onto large sheets.

MENU → [Rec] → [Picture Size]

</table>

**1** If you delete a RAW file from the camera, the corresponding JPEG image will also be deleted.

**2** It is fixed to maximum recordable pixels ([L]) for each image aspect ratio.

- You can process RAW images in [RAW Processing] in the [Playback] menu. (P38)
- To process and edit RAW files on a PC, use the software “SILKYPIX Developer Studio” by Ichikawa Soft Laboratory on the DVD (supplied).
Adjusting Focus Manually

Applicable modes:

Use this function when you want to fix the focus or when the distance between the lens and the subject is determined and you do not want to activate Auto Focus.

**When using an interchangeable lens (H-FS1442A) with a focus ring**

Rotate to **A** side:
- Focuses on nearby subject

Rotate to **B** side:
- Focuses on faraway subject

1. Set the focus mode lever to [MF].
2. Press 
3. Press 
   to adjust the focus position, and press [MENU/SET].
   - The assist screen is displayed, enlarging the area. (MF Assist)
   - Pressing [DISP.] resets the focus position back to the centre.
4. Adjust the focus.
   - Indicator for **∞** (infinity)
   - MF Assist (enlarged screen)
   - Peaking
   - MF Guide
   - The in-focus portions will be highlighted. (Peaking)
   - You can check whether the point of focus is to the near side or to the far side. (MF Guide)

</tbody>
</table>
Recording 4K Photos

Applicable modes: [Rec] PASM C

Press the shutter button to record a 4K photo. You can select the desired moment from a burst of pictures taken at 30 frames/second and save that moment as a picture of 8 million pixels (approx.).

- Use a UHS Speed Class 3 card to record 4K photos. (P15)
- When recording 4K photos, the angle of view is slightly narrower.

1 Set the drive mode dial to [ ].
   - Settings will be optimised for 4K photo recording. The recording method is set to [ ] (4K Burst) by default.
2 Select the menu. (P22)
   - [Rec] → [4K PHOTO]
3 Press ▲/▼ to select the item and then press [MENU/SET].

- [4K Burst]
  For capturing the best shot of a fast-moving subject (e.g., sports, aeroplanes, trains)
  Burst recording is performed while the shutter button is pressed and held.
  The shutter sound will be heard repeatedly.
  A Press and hold
  B Recording is performed
  Continuous recording length: Up to 29 minutes and 59 seconds

- [4K Burst(S/S)]
  “S/S” is an abbreviation of “Start/Stop”.
  For capturing unpredictable photo opportunities (e.g., plants, animals, children)
  Burst recording starts when the shutter button is pressed and stops when pressed again. Start and stop tones will be heard.
  C Start (First)
  D Stop (Second)
  E Recording is performed
  Continuous recording length: Up to 29 minutes and 59 seconds
Recording

**For recording as needed whenever a photo opportunity arises**
(e.g., the moment when a frisbee is caught or a ball is thrown)

- Burst recording is performed for approximately 1 second before and after the moment that the shutter button is pressed. The shutter sound will be heard only once.
- Approximately 1 seconds
- Recording is performed

- The battery drains faster when the drive mode is set to 4K Photo and [4K PHOTO] is set to [ ] ([4K Pre-Burst]).

**Recording length:** Approximately 2 seconds

* Recording will continue without interruption even when the file size exceeds 4 GB, but the file will be divided and saved/played back separately.

4 **Press the shutter button halfway.**

- The recording screen will be displayed. You can also perform the same operation by pressing and holding [ ] until the recording screen is displayed.

5 **Press the shutter button to perform recording.**

- After the 4K burst photo recording, a 4K burst file will be saved.
- 4K burst files are saved as motion pictures in MP4 format.
- When [Auto Review] is enabled, the picture selection screen will be displayed automatically. To continue recording, press the shutter button halfway to display the recording screen.

### Selecting pictures from 4K burst file and saving

- **The picture will be saved in JPEG format.**
- **The picture will be saved with recording information (Exif information), including its shutter speed, aperture and ISO sensitivity information.**

- Setting [Playback Mode] in the [Playback] menu to [4K PHOTO] enables you to play back only 4K burst files and pictures created from them.

- For details, refer to the "Operating Instructions for advanced features (PDF format)".
Recording Motion Picture

Applicable modes: \[
\begin{align*}
\text{AUTO} & \quad \text{P} & \quad \text{AS} & \quad \text{M} & \quad \text{C}
\end{align*}
\]

This camera can record full high definition motion pictures compatible with the AVCHD format or motion pictures recorded in MP4. In addition, the camera can record 4K motion pictures in MP4. (P35) Audio will be recorded in stereo.

1 Start recording by pressing the motion picture button.

- Elapsed recording time
- Available recording time

- Recording of motion picture appropriate for each mode is possible.
- The recording state indicator (red) \( \bigcirc \) will flash while recording motion pictures.
- If approximately 1 minute elapses without an operation being performed, part of the display will disappear. Press [DISP.] or touch the monitor to make the display reappear.
- Release the motion picture button right after you press it.

2 Stop the recording by pressing the motion picture button again.

- Still picture recording is also possible during the motion picture recording by fully pressing the shutter button.
Recording

- When the ambient temperature is high or motion picture is recorded continuously, the camera may display [ ] and stop the recording to protect itself. Wait until the camera cools down.
- It is recommended to use a fully charged battery or AC adaptor (DMW-AC10G: optional) when recording motion pictures.
- If while recording motion pictures using the AC adaptor (DMW-AC10G: optional) the power supply is cut off due to a power cut or if the AC adaptor (DMW-AC10G: optional) is disconnected etc., the motion picture will not be recorded.
- These times are for an ambient temperature of 23 °C and a humidity of 50%RH. Please be aware that these times are approximate.
- Actual recordable time is the time available for recording when repeating actions such as turning this unit on and off, starting/stopping recording, etc.
- MP4 motion pictures with a [Rec Quality] size of [FHD], [HD] or [VGA]: Recording stops when the continuous recording time exceeds 29 minutes and 59 seconds or the file size exceeds 4 GB.
  - Since the file size becomes larger with [FHD], recording with [FHD] will stop before 29 minutes 59 seconds.
- MP4 motion pictures with a [Rec Quality] size of [4K]: Recording stops when the continuous recording time exceeds 29 minutes and 59 seconds. (You can continue recording without interruption even if the file size exceeds 4 GB, but the motion picture file will be divided and recorded/played back separately.)

Setting the format, size and recording frame rate

- When [AVCHD] is selected
  - [AVCHD] This data format is suitable for when playing back on a high-definition TV, etc.
  - [MP4] This data format is suitable for when playing back on a PC, etc.

When [AVCHD] is selected

Recording motion pictures in 4K

**Applicable modes:**  

- **[Rec Format]** in the [Motion Picture] menu to [MP4]. (P34)
- **[Rec Quality]** in the [Motion Picture] menu to [4K/100M/25p] or [4K/100M/24p]. (P34)
- Start recording by pressing the motion picture button.
- Stop the recording by pressing the motion picture button again.

You can create finely-detailed motion pictures in 4K by recording motion pictures with their size set to [4K] in [Rec Quality].

- When recording motion pictures in 4K, use a card rated as UHS Speed Class 3. (P15)
- The angle of view of motion pictures in 4K is narrower than those of motion pictures in other sizes.
Playback

Playing Back Pictures

1. Press [ ].
2. Press ◄/►.
   - ◄: Play back the previous picture
   - ►: Play back the next picture

Sending an image to a web service
If you press ▼ when displaying images one by one, you can easily send an image to a web service.
• For details, refer to the “Operating Instructions for advanced features (PDF format)”.

Playing Back Motion Pictures

This unit was designed to play motion pictures using the AVCHD and MP4 formats.
• Motion pictures are displayed with the motion picture icon ( ).
Press ▲ to play back.

</table>

* 1 The fast forward/rewind speed increases if you press ►/◄ again.
* 2 When a motion picture recorded with [AVCHD] is rewound frame-by-frame, its frames will be shown in intervals of approximately 0.5 seconds.
• If you press [MENU/SET] during a pause, you can create a picture from a motion picture.
Deleting Pictures

Once deleted, pictures cannot be recovered.

To delete a single picture

1 In Playback Mode, select the picture to delete and then press [ 

• The same operation can be performed by touching [ ].

2 Press ▲ to select [Delete Single] and then press [MENU/SET].

• Confirmation screen is displayed.
  Picture is deleted by selecting [Yes].

To delete multiple pictures (up to 100°) or all the pictures

* Picture groups are treated as a single picture.
  (All the pictures in the selected picture group will be deleted.)

1 In Playback Mode, press [ ].

2 Press ▲/▼ to select [Delete Multi] or [Delete All] and then press [MENU/SET].

• [Delete All] → Confirmation screen is displayed.
  Pictures are deleted by selecting [Yes].
  • It is possible to delete all pictures except the ones set as favourite when [All Delete Except Favorite] is selected with the [Delete All] set.

3 (When [Delete Multi] is selected)
Press ▲/▼/◄/► to select the picture, and then press [MENU/SET] to set. (Repeat this step.)

• [ ] appears on the selected pictures.
  If [MENU/SET] is pressed again, the setting is cancelled.

4 (When [Delete Multi] is selected)
Press◄ to select [OK], and then press [MENU/SET] to execute.

• Confirmation screen is displayed.
  Pictures are deleted by selecting [Yes].
Using the [Playback] Menu

[RAW Processing]

You can process the pictures taken in RAW format. The processed pictures will be saved in JPEG format. You can check how effects are applied to each picture while processing it.

1. Select the menu. (P22)

2. Select RAW images with \(\text{\textasciitilde} / / \text{\textasciitilde}\), and then press [MENU/SET].

3. Press \(\text{\textasciitilde} / / \text{\textasciitilde}\) to select an item.

   • The setting method differs according to the item.

5. Press [MENU/SET].
   • This operation returns you to the screen in step 3. To set other items, repeat steps 3 through 5.

6. Select [Begin Processing] with \(\text{\textasciitilde} / / \text{\textasciitilde}\), and then press [MENU/SET].
   • Confirmation screen is displayed. It is executed when [Yes] is selected. Exit the menu after it is executed.
How to set each item

When you select an item, the setting screen will be displayed.

<table>
<thead>

- If you touch the picture at the centre, it will be enlarged. If you touch [ ], the picture will be reduced to the original size.

Setup setting

When you select an item, the screen that asks you to select [Reinstate Adjustments], [Color Space], or [Picture Size] will be displayed.

1. Press ▲ / ▼ to select an item, and press [MENU/SET].
   - If you select [Reinstate Adjustments], a confirmation screen will be displayed. Selecting [Yes] will execute the operation and return you to the item selection screen.
2. Press ▲ / ▼ to select a setting, and press [MENU/SET].
What you can do with the Wi-Fi® function

• The camera cannot be used to connect to a public wireless LAN connection.

Controlling with a Smartphone/Tablet (P41)
• Recording with a smartphone (P43)
• Playing back pictures in the camera (P43)
• Saving images stored in the camera (P44)
• Sending images to an SNS (P44)
• Writing location information on images stored in the camera (P44)
• Combining motion pictures recorded with Snap Movie according to your preference on a smartphone (P45)

Displaying pictures on a TV

Printing Wirelessly
When sending images to AV device
When sending images to PC
Using Web services

These operating instructions refer to both smartphones and tablets as “smartphones” from this point on unless noted otherwise.
• For details, refer to the “Operating Instructions for advanced features (PDF format)”.  

About the [Wi-Fi] button
In these operating instructions, a function button to which [Wi-Fi] is assigned is referred to as the [Wi-Fi] button. (At the time of purchase, [Wi-Fi] is assigned to [Fn6].)
• Refer to P23 for details about the function button.

Steps for pressing [Wi-Fi]
1. Touch [Fn6].
2. Touch [Wi-Fi].
Controlling with a Smartphone/Tablet

Installing the smartphone/tablet app “Image App”

The “Image App” is an application provided by Panasonic.

- OS
  App for Android™: Android 4.0 or higher
  App for iOS: iOS 6.0 or higher
  (Please note that the iPhone 3GS is not supported.)

1. Connect the smartphone to a network.
2. (Android) Select “Google Play™ Store”.
   (iOS) Select “App Store℠”.
3. Enter “Panasonic Image App” or “LUMIX” into the search box.
4. Select “Panasonic Image App” and install it.

- Use the latest version.
- Supported OSs are current as of May 2015 and are subject to change.
- Read the [Help] in the “Image App” menu for further details on how to operate.
- The service may not be able to be used properly depending on the type of smartphone being used.
  For information on the “Image App”, refer to the support site below.
  http://panasonic.jp/support/global/cs/dsc/
  (This Site is English only.)
- When downloading the app on a mobile network, high packet communication fees may be incurred depending on the details of your contract.
Connecting to a smartphone/tablet

For both iOS devices (iPhone/iPod touch/iPad) and Android devices

Connecting without entering the password

You can easily set up a direct connection to your smartphone without entering a password.

1 Select the menu on the camera. (P22)

- The information required for connecting the smartphone to this unit (SSID) is displayed.

- You can also display the information by pressing [Wi-Fi] on the camera.

2 Turn on the Wi-Fi function in the setting menu of the smartphone.

3 Select the SSID displayed on the screen of the camera.

4 On the smartphone, start “Image App”.

- The connection confirmation screen is displayed on the camera.

- Select [Yes]. (Only when connecting for the first time)

When [Wi-Fi Password] is set to the default setting [OFF], third parties may intercept Wi-Fi radio waves and collect the content of communications. Set [Wi-Fi Password] to [ON] to enable the password.

- For details, refer to the “Operating Instructions for advanced features (PDF format)”.

For both iOS devices (iPhone/iPod touch/iPad) and Android devices
Wi-Fi

For both iOS devices (iPhone/iPod touch/iPad) and Android devices

**Terminating the connection**

After use, terminate the connection to the smartphone.

1. Select the menu on the camera. (P22)
   
   - You can also terminate the connection by pressing [Wi-Fi] on the camera.

2. On the smartphone, close "Image App".
   - (If you are using an iOS device)
     On the screen of “Image App”, press the home button to close the app.
   - (If you are using an Android device)
     On the screen of “Image App”, press the return button twice to close the app.

**Taking images via a smartphone/tablet (remote recording)**

1. Connect to a smartphone. (P42)
2. Operate the smartphone.
   - 1. Select [ ].
   - 2. Record an image.
      - The recorded images are saved in the camera.
      - Some settings are not available.

**Playing back images in the camera**

1. Connect to a smartphone. (P42)
2. Operate the smartphone.
   - 1. Select [ ].
   - 2. Touch the image to enlarge it.
Wi-Fi

**Saving images stored in the camera**

1. Connect to a smartphone. (P42)
2. Operate the smartphone.
   1. Select [ ].
   2. Touch and hold an image, and drag it to save it.

• The function can be assigned to the top, bottom, left or right according to your preference.
• Pictures in RAW format, AVCHD motion pictures, MP4 motion pictures with a [Rec Quality] size of [4K], and 4K burst files cannot be saved.
• 3D pictures (MPO format) will be saved as 2D pictures (JPEG format).

**Sending images in the camera to an SNS**

1. Connect to a smartphone. (P42)
2. Operate the smartphone.
   1. Select [ ].
   2. Touch and hold an image, and drag it to send it to an SNS, etc.

• The image is sent to a web service such as an SNS.
• The function can be assigned to the top, bottom, left or right according to your preference.

**Adding location information to images stored in the camera from a smartphone/tablet**

You can send location information acquired with a smartphone to the camera. After sending the information, you can also write it on images stored in the camera.

1. Start recording location information
2. Start recording images
3. Finish recording the location information
4. Sending and writing location information
Operate the smartphone

1. Connect to a smartphone. (P42)
2. Select [ ].
3. Select [Geotagging].
4. Select an icon.

Using a smartphone, you can combine motion pictures recorded with the camera’s [Snap Movie] function. Music can be added to motion pictures to be combined. In addition, you can save the combined motion picture or upload it on a web service.

Combining motion pictures recorded with Snap Movie according to your preference on a smartphone/tablet

Using a smartphone, you can combine motion pictures recorded with the camera’s [Snap Movie] function. Music can be added to motion pictures to be combined. In addition, you can save the combined motion picture or upload it on a web service.

1. Connect to a smartphone. (P42)
2. Operate the smartphone.

   1. Select [ ].
   2. Select [Snap Movie].

   - [Snap Movie] motion pictures with recent recording dates will be selected and automatically sent to the smartphone.
   - When motion pictures with recent recording dates are not available, a screen that lets you select motion pictures will be displayed. Select motion pictures and send them.

3. Edit the motion pictures.

   - Read the [Help] in the “Image App” menu for further details on how to operate.

   - [Snap Movie] of the “Image App” requires a smartphone that supports Android OS 4.3 or higher.
   - The iPhone 4 and iPod touch (4th generation) do not support [Snap Movie] of the “Image App.”
About the supplied software

The supplied DVD includes the following software. Install the software on to your computer before use.

• PHOTOfunSTUDIO 9.7 PE (Windows Vista/Windows 7/Windows 8/Windows 8.1)
• SILKYPIX Developer Studio 4.3 SE
  (Windows Vista/Windows 7/Windows 8/Windows 8.1, Mac OS X v10.6 to v10.10)
• LoiLoScope 30 day full trial version (Windows Vista/Windows 7/Windows 8/
  Windows 8.1)

For details on how to use the SILKYPIX Developer Studio, refer to the “Help” or the
Ichikawa Soft Laboratory’s support website:
http://www.isl.co.jp/SILKYPIX/english/p/support/

For more information on how to use LoiLoScope, read the LoiLoScope manual
available for download at the link below.

Installing supplied software

1 Check the environment of your PC.
   • For details about information such as the operating environment or operating method,
     refer to the “Operating Instructions for advanced features (PDF format)” or the operating
     instructions for the respective software programmes.
2 Insert the DVD with the supplied software.
   • If the automatic playback screen is displayed, you can display the menu by selecting and
     executing [Launcher.exe].
   • In Windows 8/Windows 8.1, you can display the menu by clicking a message that is
     displayed after inserting the DVD and then selecting and executing [Launcher.exe].
   • You can also display the menu by double-clicking [SFMXXXX] in [Computer] (XXXX
     differs depending on the model).
3 Click [Applications].
4 Click on the [Recommended Installation] on the install menu to install.
   • Proceed with installation according to messages appearing on the screen.

• The software compatible with your PC will be installed.
• On the Mac, SILKYPIX can be installed manually.
  1 Insert the DVD with the supplied software.
  2 Double-click the application folder on the DVD.
  3 Double-click on the automatically displayed folder.
  4 Double-click the icon in the application folder.

Not available in these cases:
• “PHOTOfunSTUDIO” and “LoiLoScope” are not compatible with Mac.
**Monitor Display/Viewfinder Display**

- The following images are examples of when the display screen is set to [ ] (monitor style) in the monitor.

Menu list

To display explanations of the menu items.
When [Menu Information] in the [Setup] menu is set to [ON], explanations of the menu items and settings are displayed on the menu screen.

Explanations of the menu

[Rec]
This menu lets you set the aspect ratio, number of pixels, 4K Photo and other aspects of the pictures you are recording.

[Photo Style] [Highlight Shadow] [ISO Limit Set]
[Filter Settings] [i.Dynamic] [ISO Increments]
[Aspect Ratio] [i.Resolution] [Extended ISO]
[Picture Size] [iHandheld Night Shot] [Long Shtr NR]
[Quality] [HDR] [Shading Comp.]
[AFS/AFF] [HDR] [Diffraction Compensation]
[Metering Mode] [Multi Exp.] [Ex. Tele Conv.]
[Burst Rate] [Panorama Settings] [Digital Zoom]
[4K PHOTO] [Electronic Shutter] [Color Space]
[Auto Bracket] [Shutter Delay] [Stabilizer]
[Self Timer] [Flash] [Face Recog.]
[Time Lapse/Animation] [Red-Eye Removal] [Profile Setup]

[Motion Picture]
This menu lets you set the [Rec Format], [Rec Quality], and other aspects for motion picture recording.

[Photo Style] [Metering Mode] [Silent Operation]
[Filter Settings] [Highlight Shadow] [Mic Level Disp.]
[Snap Movie] [i.Dynamic] [Mic Level Adj.]
[Rec Format] [i.Resolution] [Special Mic.]
[Rec Quality] [Diffraction Compensation] [Mic Level Limiter]
[Exposure Mode] [Luminance Level] [Wind Noise Canceller]
[AFS/AFF] [Ex. Tele Conv.] [Wind Cut]
[Continuous AF] [Digital Zoom] [Lens Noise Cut]

[4K PHOTO] [Electronic Shutter] [Color Space]
Others

**[Custom]**

Operation of the unit, such as displaying of the screen and button operations, can be set up according to your preferences. Also, it is possible to register the modified settings.

- [Cust.Set Mem.]
- [Silent Mode]
- [AF/AE Lock]
- [AF/AE Lock Hold]
- [Shutter AF]
- [Half Press Release]
- [Quick AF]
- [Eye Sensor AF]
- [Pinpoint AF Time]
- [Pinpoint AF Display]
- [AF Assist Lamp]
- [Direct Focus Area]
- [Focus/Release Priority]
- [AF+MF]

- [Resize]
- [Cropping]
- [Rotate]
- [Rotate Disp.]
- [Favorite]
- [Print Set]
- [Protect]
- [Face Rec Edit]
- [Picture Sort]
- [Delete Confirmation]
Troubleshooting

First, try out the following procedures.

If the problem is not resolved, it may be improved by selecting [Reset] on the [Setup] menu.

• Please also refer to the “Operating Instructions for advanced features (PDF format)”, which describes more detailed information.

The camera cannot be operated even when it is turned on.
The camera turns off immediately after it is turned on.

• The battery is exhausted.
  → Charge the battery.
• If you leave the camera on, the battery will be exhausted.
  → Turn the camera off frequently by using the [Economy] etc.

The battery becomes flat too quickly.

• Is the drive mode set to 4K Photo and [4K PHOTO] set to [ ] ([4K Pre-Burst])? When [ ] ([4K Pre-Burst]) is selected, the battery drains faster.
  → Select [ ] ([4K Pre-Burst]) only when recording.

Taking pictures is not possible.
The shutter will not operate immediately when the shutter button is pressed.

• When the drive mode is set to 4K Photo and [4K PHOTO] in the [Rec] menu is set to [ ] ([4K Pre-Burst]), the camera temperature rises. In some cases, the camera may display [ ] and stop the recording to protect itself. Wait until the camera cools down.

The subject is not focused properly.

• The subject is beyond the focus range of the camera.
• There is camera shake (jitter) or the subject is moving slightly.
  • Is [Focus/Release Priority] in the [Custom] menu set to [RELEASE]?
  • Is [Shutter AF] in the [Custom] menu set to [OFF]?
  • Is the AF Lock applied incorrectly?

The recorded picture is blurred.
The Optical Image Stabiliser is not effective.

• The shutter speed will become slower and the Optical Image Stabiliser function may not work properly when taking pictures especially in dark places.
  → We recommend holding the camera firmly with both hands when taking pictures.
  → We recommend using a tripod and the self-timer when taking pictures with a slow shutter speed.
• Are you using a lens which supports the Stabiliser function?
• When a moving subject is recorded with the electronic shutter, the subject may appear distorted on the picture.
Striping or flicker may appear under lighting such as fluorescent lighting and LED lighting fixture.

- This is characteristic of MOS sensors which serve as the camera’s pickup sensors. This is not a malfunction.
- Are you taking pictures with the electronic shutter?
  → When using the electronic shutter, lowering the shutter speed may reduce the effect of the horizontal stripes.

The brightness or the hue of the recorded picture is different from the actual scene.

- When recording under fluorescent or LED lighting fixture, etc., increasing the shutter speed may introduce slight changes to brightness and colour. These are a result of the characteristics of the light source and do not indicate a malfunction.
- When recording subjects in extremely bright locations or recording under fluorescent lighting, LED lighting fixture, mercury lamp, sodium lighting, etc., the colours and screen brightness may change or horizontal striping may appear on the screen.

4K photo recording stops before finishing.

- When the ambient temperature is high or recording with [ ] (4K Burst) or [ ] (4K Burst(S/S)) of the 4K Photo function is performed continuously, the camera may display [ ] and stop the recording to protect itself. Wait until the camera cools down.

Recording motion pictures is not possible.

- You may not be able to record for a short while after turning this unit on when using a large capacity card.

Motion picture recording stops in the middle.

- When the ambient temperature is high or motion picture is recorded continuously, the camera may display [ ] and stop the recording to protect itself. Wait until the camera cools down.

The screen may be blacked out momentarily, or the unit may record noise.

- Depending on the environment at the time of motion picture recording, the screen may be blacked out momentarily or the unit may record noise due to static electricity or powerful electromagnetic waves (radio towers, high voltage power lines, etc.).

Sometimes it is difficult to focus with Auto Focus when recording 4K motion pictures.

- This phenomenon occurs when the camera is trying to record with highly accurate focus at a reduced Auto Focus speed, and is not a malfunction.
The flash is not activated.

- Is the flash closed?
  → Open the flash.
- When the electronic shutter is used, the flash is not activated.
  → Set [Electronic Shutter] to [OFF].
- When [Silent Mode] is set to [ON], the flash is not activated.
  → Set [Silent Mode] to [OFF].

The flash is activated 2 times.

- (Except for when [Firing Mode] in [Flash] is set to [MANUAL]) The flash is activated 2 times. The interval between the first and second flash is longer when Red-Eye Reduction is set so the subject should not move until the second flash is activated.

The picture is not played back.
There are no recorded pictures.

- Is the card inserted?
- Is there a picture on the card?
- Is this a folder or picture which was processed in the PC?
  If it is, it cannot be played back by this unit.
  → It is recommended to use the “PHOTOfunSTUDIO” software in the DVD (supplied) to write pictures from PC to card.
- Has [Playback Mode] been set for playback?
  → Change to [Normal Play].

The folder number and the file number are displayed as [—] and the screen turns black.

- Is this a non-standard picture, a picture which has been edited using a PC or a picture which was taken by another make of digital camera?
- Did you remove the battery immediately after picture-taking or did you take the picture using a battery with a low remaining charge?
  → To delete such pictures, make a backup of the data and format the card (P15).

[Thumbnail is displayed] appears on the screen.

- Is it a picture that has been recorded with other equipment?
  In such cases, these pictures may be displayed with a deteriorated picture quality.

Motion pictures recorded with this model cannot be played back on other equipment.

- The picture quality or sound quality of recorded motion pictures may be deteriorated even when these are played back with the compatible devices. Also, recording information may not be displayed correctly.
**General tips for using a Wi-Fi connection**

- Use within the communication range of the device to be connected.
- Is any device, such as microwave oven, cordless phone, etc., that uses 2.4 GHz frequency operated nearby?
  → Radio waves may get interrupted when used simultaneously. Use them sufficiently away from the device.
- When the battery indicator is flashing red, the connection with other equipment may not start or the connection may be disrupted. (A message such as [Communication error] is displayed.)
- If you place the camera on a metal table or shelf, the radio waves may be adversely affected. In such cases, you may not be able to establish a connection. Move the camera away from the metal surface.

**About a wireless access point**

- Check if the wireless access point to connect is in operating state.
- The camera may not display or connect to a wireless access point depending on the radio wave condition.
  → Move this unit closer to the wireless access point.
  → Remove the obstacles between this unit and the wireless access point.
  → Change the direction of this unit.
  → Change the location and orientation of the wireless access point.
  → Perform the [Manual Input].
- It may not display even if the radio waves exist depending on the setting of the wireless access point.
  → Check the settings of the wireless access point.
  → When the network SSID of the wireless access point is set not to broadcast, the wireless access point may not be detected. Enter the network SSID to start the connection or enable the SSID broadcast of the wireless access point.
- Connection types and security setting methods are different depending on the wireless access point. (Refer to the operating instructions of the wireless access point.)
- Is the 5 GHz/2.4 GHz switchable wireless access point connected to other equipment using the 5 GHz band?
  → The use of a wireless access point that can use 5 GHz/2.4 GHz simultaneously is recommended. It cannot be used simultaneously with this camera if it is not compatible.
Others

Images cannot be transmitted to a PC.

- When the firewall of the OS, security software, etc. is enabled, connecting to the PC may not be possible.

When I try to set up a Wi-Fi connection with a Windows 8 PC, my user name and password are not recognised, so I cannot connect to the PC.

- Some OS versions, including Windows 8, use two types of accounts: a local account and a Microsoft account.
  → Be sure to use the user name and password for the local account.
    If you haven’t set up a local account, please create one.

The PC is not recognised when I use a Wi-Fi connection. The camera cannot be connected to PC via Wi-Fi connection.

- The default workgroup name is set to “WORKGROUP”. If you changed the workgroup name, the PC will not be recognised.
  In [Change Workgroup Name] in [PC Connection] of the [Wi-Fi Setup] menu, change the workgroup name to that of the PC you are connecting to.
- Please confirm login name and password are correctly typed.
- When the system time of Mac computer or Windows PC connected to a camera differs severely from that of the camera, the camera cannot be connected to the computer or PC in some OSs.
  → Please confirm [Clock Set] and [World Time] of the camera matches with time, date and time zone in Windows PC or Mac computer. When both settings do not match severely, please match them.

Transmission of the image fails midway. Some images cannot be transmitted.

- Image cannot be transmitted when the battery indicator is flashing red.
- Is the size of the image too large?
  → Reduce the image size at [Size], and then send.
  → Transmit after dividing the motion picture with [Video Divide].
- File format of the motion picture that can be sent differs depending on the destination.
- Capacity or number of images in the web service is full.
  → Login to “LUMIX CLUB”, and check the status of the destination on the web service link settings.
Others

The motion pictures cannot be played back on a TV.

• Are you trying to play back the motion pictures by directly inserting the card in the card slot of the TV?
  → Connect the camera to the TV with the AV cable (optional), or with the HDMI micro cable, and then play back the motion pictures on the camera.

VIERA Link does not work.

• Is it connected properly with the HDMI micro cable?
  • Is the [VIERA Link] on this unit set to [ON]?
  → If the input channel does not switch automatically, use the remote control for the TV to switch it.
  → Check the VIERA Link setting on the connected device.
  → Turn this unit off and on.
  → Set [HDAVI Control] to [Off] on the TV and then turn it back to [On].
    (Refer to the operating instructions of the TV for details.)

There is a sound from lens unit.

• It is a sound of lens movement or aperture operation when this unit is turned on or off, and it is not a malfunction.
• The sound, which is caused by the automatic adjustment of the aperture, is heard when the brightness has changed due to, for example, zooming or the movement of the camera. This is not a malfunction.

The camera becomes warm.

• The surface of the camera and the reverse side of the monitor may become warm during use. This does not affect the performance or quality of the camera.

The clock is reset.

• If you do not use the camera for a long time, the clock may be reset.
  → [Please set the clock] message will be displayed; please reset the clock. (P17)

*1 The AC Adaptor (optional) can only be used with the designated Panasonic DC Coupler (optional). The AC adaptor (optional) cannot be used by itself.

*2 Use if the attached lens is in contact with the tripod pedestal.

Product numbers correct as of May 2015. These may be subject to change.

- Some optional accessories may not be available in some countries.
- NOTE: Accessories and/or model numbers may vary between countries. Consult your local dealer.
- For lens-related optional accessories such as compatible lenses and filters, refer to catalogues/Web pages, etc.
Reading the Operating Instructions (PDF format)

More detailed instructions on the operation of this camera are contained in “Operating Instructions for advanced features (PDF format)” in the supplied DVD.

■ For Windows
1 Turn the PC on and insert the DVD containing the Operating Instructions (supplied).
   • If the automatic playback screen is displayed, you can display the menu by selecting and executing [Launcher.exe].
   • In Windows 8/Windows 8.1, you can display the menu by clicking a message that is displayed after inserting the DVD and then selecting and executing [Launcher.exe].
   • You can also display the menu by double-clicking [SFMXXX] in [Computer] (XXXX differs depending on the model).
2 Click the [Operating Instructions].
   • The list of Operating Instructions (PDF format) will be displayed.
3 Click the language of the Operating Instructions you want to open.
   • The “Operating Instructions for advanced features (PDF format)” will open.
   You can save the “Operating Instructions for advanced features” on the PC.
   • You will need Adobe Reader to browse or print the “Operating Instructions for advanced features (PDF format)”. You can download and install a version of Adobe Reader that you can use with your OS from the following website. (As of May 2015)
   http://www.adobe.com/products/acrobat/readstep2.html

■ For Mac
1 Turn the PC on and insert the DVD containing the Operating Instructions (supplied).
2 Open the “Manual” folder in the DVD.
3 Double click the [INDEX.pdf].
   • The list of Operating Instructions (PDF format) will be displayed.
4 Click the language of the Operating Instructions you want to open.
   • The “Operating Instructions for advanced features (PDF format)” will open.
   You can save the “Operating Instructions for advanced features” on the PC.
   • You can also open the “Operating Instructions for advanced features (PDF format)” directly from the “Manual” folder.
Limited Warranty (ONLY FOR AUSTRALIA)

Panasonic Warranty

1. The product is warranted for 12 months from the date of purchase. Subject to the conditions of this warranty Panasonic or its Authorised Service Centre will perform necessary service on the product without charge for parts or labour, if in the opinion of Panasonic, the product is found to be faulty within the warranty period.

2. This warranty only applies to Panasonic products purchased in Australia and sold by Panasonic Australia or its Authorised Distributors or Dealers and only where the products are used and serviced within Australia or its territories. Warranty cover only applies to service carried out by a Panasonic Authorised Service Centre and only if valid proof of purchase is presented when warranty service is requested.

3. This warranty only applies if the product has been installed and used in accordance with the manufacturer’s recommendations (as noted in the operating instructions) under normal use and reasonable care (in the opinion of Panasonic). The warranty covers normal domestic use only and does not cover damage, malfunction or failure resulting from use of incorrect voltages, incorrect installation, accident, misuse, neglect, build-up of dirt or dust, abuse, maladjustment of customer controls, mains supply problems, thunderstorms, abnormal operating conditions, tampering or repair by unauthorised persons (including unauthorised alterations), introduction of sand, humidity or liquids, commercial use such as hotel, office, restaurant, or other business or rental use of the product, exposure to abnormally corrosive conditions or any foreign object or matter having entered the product.

4. This warranty does not cover the following items unless the fault or defect existed at the time of purchase:
   (a) Cabinet Parts
   (b) Video or Audio Tapes
   (c) SD cards or USB devices
   (d) User replaceable Batteries
   (e) DVD, Blu-ray or Recordable Discs
   (f) DTV reception issues caused by TV Aerial / Cabling / Wall socket(s) etc.

5. Some products may be supplied with Ethernet connection hardware. The warranty is limited on such products and will not cover:
   (a) Internet and or DLNA connection / setup related problems
   (b) Access fees and or charges incurred for internet connection
   (c) The use of incompatible software or software not specifically stipulated in the product operations manual;
   (d) Any indirect or consequential costs associated with the incorrect use or misuse of the hardware, its connection to the internet or any other device.

6. To claim warranty service, when required, you should:
   • Telephone Panasonic’s Customer Care Centre on 132 600 or visit our website referred to below and use the Service Centre Locator for the name/address of the nearest Authorised Service Centre.
   • Send or take the product to a Panasonic Authorised Service Centre together with your proof of purchase receipt as a proof of purchase date. Please note that freight and insurance to and / or from your nearest Authorised Service Centre must be arranged by you.
   • Refer to the note below for the following products in the major metropolitan areas of Australia or the normal operating areas of the nearest Authorised Service Centris:

7. The warranties hereby conferred do not extend to, and exclude, any costs associated with the installation, de-installation or re-installation of a product, including costs related to the mounting, de-mounting or remounting of the product (and any other ancillary activities), delivery, handling, freighting, transportation insurance of the product, or any part thereof or replacement of and do not extend to, and exclude, any damage or loss occurring prior to installation, associated with, or related to such installation, de-installation, re-installation or relocation.

Panasonic Authorised Service Centres are located in major metropolitan areas and most regional centres of Australia; however, coverage will vary dependant on product. For advice on exact Authorised Service Centre locations for your product, please telephone our Customer Care Centre on 132 600 or visit our website and use the Service Centre Locator.

In addition to your rights under this warranty, Panasonic products come with consumer guarantees that cannot be excluded under the Australian Consumer Law. If there is a major failure in regard to the product which cannot be remedied then you must notify us within a reasonable period by contacting the Panasonic Customer Care Centre. If the failure in the product is not a major failure then Panasonic may choose to repair or replace the product and will do so in a reasonable period of time from receiving notice from you.

THIS WARRANTY CARD AND THE PURCHASE DOCKET (OR SIMILAR PROOF OF PURCHASE) SHOULD BE RETAINED BY THE CUSTOMER AT ALL TIMES

If you require assistance regarding warranty conditions or any other queries, please visit the Panasonic Australia website www.panasonic.com.au or contact by phone on 132 600

If phoning in, please ensure you have your operating instructions available.
This product incorporates the following software:
(1) the software developed independently by or for Panasonic Corporation,
(2) the software owned by third party and licensed to Panasonic Corporation, and/or
(3) open source software

The software categorised as (3) is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY, without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.
