Safety Precautions

Warning

Handling the mains plug and lead
- Insert the mains plug fully into the socket outlet. If the mains plug is loose, it could generate heat and cause fire.
- Ensure that the mains plug is easily accessible.
- Do not touch the mains plug with a wet hand. This may cause electrical shock.
- Do not damage the mains lead. A damaged lead may cause fire or electrical shock.
- Do not move the TV with the lead plugged in the socket outlet.
- Do not place a heavy object on the lead or place the lead near a high-temperature object.
- Do not twist the lead, bend it excessively, or stretch it.
- Do not pull on the lead. Hold onto the mains plug body when disconnecting lead.
- Do not use a damaged mains plug or socket outlet.

If you find any abnormality, remove the mains plug immediately!

AC 220 - 240 V
50 / 60 Hz

Power source
- This TV is designed to operate on AC 220 - 240 V, 50 / 60 Hz.

Avoid exposing the TV to high atmospheric moisture (such as tropical rain) or night time dew condensation
- This TV is designed and manufactured for indoor use only.

Do not remove covers NEVER modify the TV yourself
- High-voltage components may cause serious electrical shock.
- Have the TV checked, adjusted, or repaired at your local Panasonic dealer.

Do not place foreign objects inside the TV
- Do not allow any objects to drop into the TV through the air vents. Fire or electrical shock may result.

Keep liquids away from the TV
- To prevent damage which may result in fire or shock hazard, do not expose this appliance to dripping or splashing.
- Do not place containers with water (flower vase, cups, cosmetics, etc.) above the TV, including on shelves above, etc.

Do not expose to direct sunlight and other sources of heat
- Avoid exposing the TV to direct sunlight and other sources of heat. To prevent fire never place any type of candle or naked flame on top or near the TV.

Do not place the TV on sloped or unstable surfaces
- The TV may fall off or tip over.

Use only the dedicated pedestals / mounting equipment
- Using an unapproved pedestal or other fixtures may make the TV unstable, risking injury. Be sure to ask your local Panasonic dealer to perform setup.
- Use approved pedestals / mounts (p. 7).

Avoid exposing the TV to high atmospheric moisture (such as tropical rain) or night time dew condensation
- This TV is designed and manufactured for indoor use only.

Do not place foreign objects inside the TV
- Do not allow any objects to drop into the TV through the air vents. Fire or electrical shock may result.

Do not place the TV on sloped or unstable surfaces
- The TV may fall off or tip over.

Use only the dedicated pedestals / mounting equipment
- Using an unapproved pedestal or other fixtures may make the TV unstable, risking injury. Be sure to ask your local Panasonic dealer to perform setup.
- Use approved pedestals / mounts (p. 7).

Do not allow children to handle SD Card
- As with any small object, SD Cards can be swallowed by young children. Please remove SD Card immediately after use and store out of reach of children.
Important Installation Notices

Install TV on a stable surface
If a television is not positioned in a sufficiently stable location, it can be potentially hazardous due to falling. Many injuries, particularly to children, can be avoided by taking simple precautions such as:
- Using cabinets or stands recommended by the manufacturer of the television.
- Only using furniture that can safely support the television.
- Ensuring the television is not overhanging the edge of the supporting furniture.
- Not placing the television on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the television to a suitable support.
- Not standing the televisions on cloth or other materials placed between the television and supporting furniture.
- Educating children about the dangers of climbing on furniture to reach the television or its controls.

When cleaning the TV, remove the mains plug
- Cleaning an energized TV may cause electrical shock.

When the TV is not going to be used for a long period of time, remove the mains plug
- This TV will still consume some power even in the Off mode, as long as the mains plug is still connected to a live socket outlet.

Transport only in upright position

Allow sufficient space around the TV for radiated heat

![Minimum distance](image)
- When using the pedestal, keep the space between the bottom of the TV and the surface where the TV is set.
- In case of using Wall-hanging bracket, follow the manual of it.

Do not block the rear air vents
- Blocked ventilation by newspapers, table cloths, curtains, etc. may cause overheating, fire or electrical shock.

Do not expose your ears to excessive volume from the headphones
- Irreversible damage can be caused.

Auto power standby function
- If no signal is received and no operation is performed in Analogue TV mode for 30 minutes, the TV will automatically go to standby mode.

Keep the TV away from these types of equipment
- Electronic equipment
  - In particular, do not place video equipment near the TV. Electromagnetic interference may distort images / sound.
- Equipment with an infrared sensor
  - This TV also emits infrared rays. This may affect operation of other equipment.
Maintenance

First, remove the mains plug from the socket outlet.

Display panel

Regular care: Gently wipe the surface clean of dirt by using a soft cloth.
Major contamination: Wipe the surface clean using a soft cloth dampened with clean water or diluted neutral detergent (1 part detergent to 100 parts water). Then, using a soft dry cloth, evenly wipe the surface clean until it is dry.

**Caution**
- The surface of the display panel has been specially treated and may be easily damaged.
- Do not tap or scratch the surface with your fingernail or other hard object.
- Take care not to subject the surface to insect repellent, solvent, thinner, or other volatile substances.
- This may degrade surface quality.

Cabinet, Pedestal

Regular care: Wipe the surface clean using a soft dry cloth.
Major contamination: Dampen a soft cloth with clean water or water containing a small amount of neutral detergent. Then, wring the cloth and wipe the surface clean with it. Finally, wipe the surface clean with a dry cloth.

**Caution**
- Take care not to subject the TV's surfaces to detergent. A liquid inside the TV could lead to product failure.
- Take care not to subject surfaces to insect repellent, solvent, thinner, or other volatile substances.
- This may deteriorate the surface by peeling the paint.
- Do not allow the cabinet and pedestal to make contact with a rubber or PVC substance for a long time.

Mains plug

Wipe the mains plug with a dry cloth at regular intervals. Moisture and dust may lead to fire or electrical shock.

Accessories / Options

Standard accessories

Check that you have the accessories and items shown

- Remote Control  
  - N2QAYB000352
- Batteries for the Remote Control (2)  
  - R6 (AA)
- Pedestal  
  - TBL0A0207
- Assembly screw for Pedestal (4)  
  - M4
- Fall-prevention parts  
  - p. 8
- Cleaning cloth
- Operating Instructions with Warranty statement

Caution

This product contains possibly dangerous parts (such as plastic bags), that can be breathed in or swallowed by young children accidentally. Keep these parts out of reach of young children.

Optional accessories

Wall-hanging bracket  
- TY-WK3L2RW

Please contact your nearest Panasonic dealer to purchase the recommended wall-hanging bracket. For additional details, please refer to the wall-hanging bracket installation manual.

WARNING!

- Failure to use a Panasonic bracket or choosing to mount the unit yourself will be done at the risk of the consumer. Any damage resulting from not having a professional installer mount your unit will void your warranty.
- Always be sure to ask a qualified technician to carry out set-up. Incorrect fitting may cause equipment to fall, resulting in injury and product damage.
- Do not mount the unit directly below ceiling lights (such as spotlights, floodlights or halogen lights) which typically give off high heat. Doing so may warp or damage plastic cabinet parts.

Installing remote’s batteries

1. Pull open
2. Close

Caution

- Incorrect installation may cause battery leakage and corrosion, resulting in damage to the remote control.
- Do not mix old and new batteries.
- Do not mix different battery types (such as alkaline and manganese batteries).
- Do not use rechargeable (Ni-Cd) batteries.
- Do not burn or breakup batteries. Batteries must not be exposed to excessive heat such as sunshine, fire or the like.
Accessories / Options

Attaching the pedestal

- Fix securely with assembly screws. (Total 4 screws)
- Tighten screws firmly.

Foam mat or thick soft cloth

Warning
Do not disassemble or modify the pedestal.
※ Otherwise the TV may fall over and become damaged, and personal injury may result.

Caution
Do not use any other TV and displays.
※ Otherwise the TV may fall over and become damaged, and personal injury may result.
Do not use the pedestal if it becomes warped or physically damaged.
※ If you use the pedestal while it is physically damaged, personal injury may result. Contact your nearest Panasonic dealer immediately.

During set-up, make sure that all screws are securely tightened.
※ If insufficient care is taken to ensure screws are properly tightened during assembly, the pedestal will not be strong enough to support the TV, and it might fall over and become damaged, and personal injury may result.

Ensure that the TV does not fall over.
※ If the TV is knocked or children climb onto the pedestal with the TV installed, the TV may fall over and personal injury may result.

Two or more people are required to install and remove the TV.
※ If two or more people are not present, the TV may be dropped, and personal injury may result.

Preventing the TV from falling over

This TV could fall over if it’s pushed, pulled or knocked down.
We therefore recommend the TV is secured to the base as illustrated.
※ This measure is designed to reduce the risk of injury from a falling TV. However, it cannot guarantee protection in all cases.

Fall-prevention parts

A Band
TKLA4401

B Screw

C Wood screw

Securing to a base
Fix pedestal and base together with band.
Identifying Controls

**Identifying Controls**

- **Power LED**
  - Standby: red
  - On: green
  - When using the remote control, indicates the TV has received a command.

- **Remote control signal receiver**
  - Do not place any objects between the TV remote control signal receiver and remote control.

- **Function Select**
  - Volume / Contrast / Brightness / Colour / Sharpness / Tint (NTSC mode) / Bass / Treble / Balance / "Digital TV Auto Tuning" or "Analogue TV Auto Tuning" (p. 24 - 25)

- **Change the channel up/down**. When a function is displayed, press up/down to adjust the setting of the selected function. When in standby mode, switches TV on.

- **Change the input mode**

- **Mains power On / Off switch**

**Adjust the LCD panel to your desired angle**

- Ensure that the pedestal does not hang over the edge of the base even if the TV swivels to the full rotation range.
- Do not place any objects or hands within the full rotation range.

Set the mark at the centre as illustrated, to have the swivel positioned at the centre of the rotation angle.

VCR / DVD Panasonic equipment operations (p. 20)
Basic Connection

External equipment and cables shown are not supplied with this TV. Please ensure that the TV is disconnected from the mains socket before attaching or disconnecting any leads. When disconnecting the mains lead, be absolutely sure to disconnect the mains plug at the socket outlet first.

Connecting aerial

**TV only**

Connecting DVD Recorder / VCR

**TV, DVD Recorder or VCR**

*Note*

- Do not put the RF cable close to the mains lead to avoid noise.
- Do not place the RF cable under the TV.
- To obtain optimum quality picture and sound, an Aerial, the correct cable (75 Ω coaxial) and the correct terminating plug are required.
- If a communal Aerial system is used, you may require the correct connection cable and plug between the wall Aerial socket and the TV.
- Your local Television Service Centre or dealer may be able to assist you in obtaining the correct Aerial system for your particular area and the accessories required.
- Any matters regarding Aerial installation, upgrading of existing systems or accessories required, and the costs incurred, are the responsibility of you, the Customer.
- VIERA Link connection p. 38
- Read the manual of the equipment too.
Auto Tuning

Search and store TV channels automatically. These steps are not necessary if the setup has been completed by your local dealer.

1. Plug the TV into mains socket and switch On
   - You can now use the remote control to turn On the TV or switch the TV to standby mode.
   - (Power LED: On)

2. Select your area
   - Select State / Territory
     - Northern Territory
     - Queensland
     - Victoria
     - New South Wales / Australian Capital Territory
     - Tasmania
     - South Australia
     - Western Australia
   - select
   - set

3. Select Auto Scan Type
   - Auto Scan Type
     - All Channels
     - Digital TV Channels only
   - select
   - set

4. Start Auto Tuning
   - Auto Tuning
     - This will take about 6 minutes.

5. Select the viewing environment
   - Please select your viewing environment.
     - Home
     - Shop
   - "Home" is the recommended mode for viewing at home. Select "Home" for optimal picture / power consumption.
   - "Shop" is for in-store display.
   - Home: "Viewing Mode" is set as "Normal". (p. 24)
   - Shop: "Viewing Mode" is set as "Dynamic". (p. 24)

If you select "Shop" by mistake
Return to the "Home" or "Shop" Selection menu

Once you press the OK button in this menu, the TV is set to Shop mode.
Please reset all settings to set to "Home" mode.
- "Shipping Condition" (p. 32)

Select "Home"

Auto Tuning is complete
Using the On-Screen Displays

Many features available on this TV can be accessed via the On-Screen Display menu.

**ON SCREEN HELP Instructions box** (example: Sound Menu)

![On-screen operation guide]

**How to use remote control**

- **MENU**
  - Open the Main Menu

- **Move the cursor / select the menu**

- **Move the cursor / adjust levels / select from a range of options**

- **OK**
  - Access the menu / store settings after adjustments have been made or options have been set

- **RETURN**
  - Return to the previous menu

- **EXIT**
  - Exit the menu system and return to the normal viewing screen

**Note**

- To edit channels ➔ “Editing Channels” (p. 28)
- If tuning has failed ➔ “Tuning Channels” (p. 30)
- To reset all settings ➔ “Shipping Condition” (p. 32)
- If you turned the TV Off during Standby mode last time, the TV will be in Standby mode when you turn the TV On with Mains power On / Off switch.
Watching TV

1. **Turn power on**
   - Turn on the TV by pressing the POWER button.
   - **Note:** Mains power On / Off switch should be On. (p. 9)

2. **Select Digital TV or Analogue TV mode**
   - Select the mode using the TV button on the side panel of the TV. (p. 9)

3. **Select a channel**
   - Press the CH up, CH down, or number buttons to select a channel.
   - **Note:** To select the two or three-digit channel number, e.g. 39 ➔ 3 ➔ 9 (in a short time)
   - If one or two-digit channel number quickly changes the channel, press the CH up, CH down, or number buttons to select a channel.
   - To select from the Channel List ➔ ① select a channel ➔ ② watch

   - **Select a channel using information banner (p. 15)**
     - Display information banner if it is not displayed ➔ ① select a channel ➔ ② watch
     - Possible to set display timeout in “Banner Display Timeout” (p. 25).

   - **Select a channel using TV Guide (Digital TV mode) (p. 17)**
     - Possible to confirm the TV Guide (EPG) before selecting channels.
     - Display TV Guide ➔ ① select a channel ➔ ② watch

Off Timer

Turn the TV off automatically after a fixed period of time (Off / 15 / 30 / 45 / 60 / 75 / 90 minutes)

Select the region where you live to adjust the standard time.

The time contained in the broadcast signal is UTC (Universal Time coordinated) formally known as GMT (Greenwich Mean Time).

Adjust the standard time
Region Select

Adjust for Summer Time
Daylight Saving Time

Select region offset from the standard time for Summer Time.

Normally select “Auto”.

If there is a gap between displayed time and actual time, set this function.

Region | Standard time | Daylight Saving Time: Auto (During Summer Time)
--- | --- | ---
NSW / ACT | +10:00 | +11:00
Victoria | | |
Queensland | +10:00 | |
South Australia | +9:30 | +10:30
Western Australia | +8:00 | +9:00
Northern Territory | +9:30 | |
Tasmania | +10:00 | +11:00

These items can be set from “Other settings” in Setup Menu. (p. 23, 25)
Watching TV

Other useful functions

Display the selectable settings for the current programme

- Option: Check or change the current programme status instantly
- Audio selection (Digital TV mode): Allows you to select between alternative language for sound tracks (if available)
- MPX (Analogue TV mode): SOUND MENU (p. 24)
- Note: Also possible to change the settings in Menu list (p. 24 and p. 25).

Change aspect ratio

- ASPECT: Change the aspect ratio
- Enjoy viewing the picture at its optimum size and aspect.
- To change the mode using the ASPECT button only
  - Press repeatedly until you reach the desired mode

- 16:9: Directly displays the image at “16:9” without distortion (anamorphic).
- 14:9: Displays the image at the standard “14:9” without distortion.
- Just: Displays a “4:3” image full-screen without distortion.
  - HD signal only
- 4:3: Displays the image at the standard “4:3” without distortion.
- 4:3 Full: Displays a “4:3” image enlarged horizontally to fit the screen.
  - HD signal only
- Zoom1: Displays a “16:9” letterbox (anamorphic) image full-screen without distortion.
- Zoom2: Displays a “2.35:1” letterbox (anamorphic) image full-screen without distortion.
  - At “16:9”, displays the image at its maximum (with slight enlargement).

Note:
- Only “16:9” and “4:3 Full” are available in Digital TV mode.
- Only “16:9” and “4:3” are available in PC mode.
- Only “16:9” is available when “Viewing Mode” is set to “Game”.
- Not available in teletext mode.
- Aspect mode can be memorized separately for SD (Standard definition) and HD (High definition) signals (except Digital TV mode).
Using TV Guide

Using TV Guide enables you to select programme easily, view programme informations, etc. TV Guide—Electronic Programme Guide (EPG) provides an on-screen listing of the programmes currently broadcast and the future broadcasts over the next seven days (depending on the broadcasters).

View TV Guide

Each time pressed, the layout will be changed. (Landscape / Portrait)

**INDEX**

**Return to the main index page**

**Call up Subtitles**

**Display subtitles**
- Call up P801 (subtitle page) if available.
- If you press this button during P801 is displayed, teletext mode will be cancelled and return to TV.

**View in multiwindow**

**Watch TV and Teletext in two windows at once**
- Operations can be made only in Teletext screen.
- Select Picture and text On or Off

**FULL / TOP / BOTTOM**

**Store frequently viewed pages**

**Store frequently viewed pages in the colour bar** (List mode only)

Corresponding colour button
(As page is displayed)

To change stored pages

- Colour button you want to change
- Enter new page number
- The number changes to white.

**View sub page**

*View sub page* (Only when teletext is more than one page)

To view specific sub page

- Sub pages:
  - The number of sub pages varies depending on the broadcasters.
  - It may take some time for searching, during which time you can watch TV.

**Watch TV while waiting for update**

**View the TV picture while searching for a teletext page**

Teletext automatically updates itself when new information becomes available.

The news page provides a function that indicates arrival of latest news (“News Flash”).
Watching Videos and DVDs

Connect the external equipment (VCRs, DVD equipment, etc.) and you can watch the input.

To connect the equipment ➔ p. 11

You can operate some functions of selected Panasonic external equipment with this remote control.

1. **Display the input select menu**
   - Press the AV button on the remote control.
   - Press the button repeatedly until the desired input is selected.
   - You can also select the using the AV button on the remote control or the side panel of the TV.

2. **Select the input mode of the connected equipment**
   - Input Selection
     - AV1
     - AV2
     - AV3
     - D1
     - D2
     - HDMI1
     - HDMI2
     - HDMI3
     - HDMI4
     - PC
     - TV
   - You can label or skip each input mode ➔ “Input Labels” (p. 26)

3. **View**
   - Displays the selected mode

**Note**

- If the external equipment has an aspect adjustment function, set to “16:9”.
- For details, see the manual of the equipment or ask your local dealer.

To return to TV ➔ TV
Panasonic equipment connected to the TV can be directly operated with the remote control.

| VIERA Link compatible equipments  
*"VIERA Link Control" (p. 38) | 73 |

**Note**

- Confirm if the remote control works correctly after changing the code.
- The codes will be reset to default values if batteries are replaced.
- Some operations may not be possible on some equipment models.
How to Use Menu Functions

Various menus allow you to make settings for the picture, sound, and other functions.

1. Display the menu
   - Displays the functions that can be set (varies according to the input signal)

2. Select the menu
   - Access the menu
   - Select the menu

3. Select the item
   - Choose from among alternatives
   - Adjust using the slide bar
   - Go to the next screen

4. Adjust or select
   - Adjust or select

To return to TV at any time
   - EXIT
To return to the previous screen
   - RETURN
To change menu pages
   - up
   - down

Choose from among alternatives
   - Number and positions of alternatives
   - Adjust using the slide bar
   - Go to the next screen

Enter characters by free input menu

To reset the settings
   - To reset the picture settings only
     - "Reset Picture Defaults" in Picture Menu (p. 24)
   - To reset the sound settings only
     - "Reset Sound Defaults" in Sound Menu (p. 25)
   - To reset all settings
     - "Shipping Condition" (p. 32) in Setup Menu

Every press changes the character by one. Leave it for a second to set the character, or press OK or any numeric button within a second.

See the table below for the corresponding characters for each numeric button.

</table>

* A different menu will be displayed while PC, DVI to HDMI adapter cable or SD Card is used. (p. 33 - 37)
* Only available items can be selected.
Input Labels

For easier identification and selection of the input mode, you can label each input terminals or skip terminal that is not connected to any equipment.

1. To select the input mode  p. 20

Display the menu
MENU

Select “Setup”

Select “Display Settings”

Select “Input Labels”

Select an input terminal and set

The labels you set will be displayed in “Input Selection” menu (p. 20) or banner.

If “Skip” is selected, you cannot select the mode.

User input
You can name each input terminals freely.

(maximum: ten characters)
You can set characters by using numeric buttons.

p. 22
Digital TV Settings

Digital TV Settings provide access to various advanced features.

1. If in Analogue TV mode
   Select Digital TV mode

2. Display the menu
   MENU

3. Select “Setup”

4. Select “System Menu”

5. Select “System Update”

6. Set

To return to TV

---

Update TV's software system  System Update

Download new software to TV.

● For details  p. 46

If System Update is performed, the software will be updated. It may change TV functions. If you do not wish to do so, set “Auto Update Search in Standby” to Off.

Select “Auto Update Search in Standby” and then set “On” or “Off”

Note

● When the TV is switched to standby, there will be a clicking sound after a short delay. Similar clicking sounds will also occur at 3:00 AM and 5:00 AM (p. 46) when “Auto update Search in Standby” is set to “On”. These sounds are normal.

To update immediately
Select “System Update Search Now”

Note

● During downloading, the TV will display a blank screen for 40 to 50 seconds. Do not interrupt the TV during this procedure.

Download may take for about 1 hour.
Editing Channels

You can make your favourite channel lists, skip unwanted channels, etc.

1. Select Digital TV or Analogue TV
2. Display the menu
3. Select “Setup”
4. Select “Digital TV Tuning Menu” or “Analogue TV Tuning Menu”
5. Select “Favourites Edit” or “Channel List”
6. Set

To return to TV ☞
List favourite channels (Digital TV mode) **Digital TV Favourites Edit**

Create your favourite channel list (Favourites) from various broadcasters (up to 4: Favourites1 to 4). The list is added to “Favourites” list in TV Guide (p. 17) and information banner (p. 15) and then easily accessed.

**Select a channel and add it to the list**

You can set characters by using numeric buttons. ⇒ p. 22

**To edit List**

- Select the field of List to edit and:
  - To name the Favourites ⇒ Set characters
  - To move the channel ⇒ Select the new position ⇒ Confirm
  - To delete the channel ⇒ To delete all channels

**Note**

- Channel numbers are defined by the broadcaster and cannot be changed.
- Hidden channels (see below) can be selected but not viewed.

Skip unwanted channels / Edit channels (Change name, Move) **Channel List**

You can hide unwanted channels. The hidden channels cannot be displayed except in this function. Use this function to skip unwanted channels.

**Select a channel and add / delete**

You can edit channels.
- If a VCR is connected only with the RF cable, edit “VCR”. (Analogue TV mode)

1. **Select a channel to edit**

2. **Edit**

   To change the displayed name when selecting channels (Only in Analogue TV mode)

   You can set characters by using numeric buttons. ⇒ p. 22

   (maximum: five characters)

   **To move channel position**

   For Analogue TV channels

   **To swap channels**

   For Digital TV channels
Tuning Channels

You can retune all the TV channels when moving house or search for new channels which may have recently started broadcasting.

1. Select Digital TV or Analogue TV
2. Display the menu
3. Select “Setup”
4. Select “Digital TV Tuning Menu” or “Analogue TV Tuning Menu”
5. Select a function
6. Set

For Auto Tuning, using the buttons on the side panel of the TV (p. 9)

1. Press repeatedly until “Auto Tuning” appears
2. Access “Auto Tuning”
3. Start “Auto Tuning”

● To return to TV

Set all Digital TV or Analogue TV channels automatically

Digital TV Auto Tuning or Analogue TV Auto Tuning

Automatically retune all Digital TV or Analogue TV channels received in the area.
- Only Digital TV channels are retuned in Digital TV mode.
- Only Analogue TV channels are retuned in Analogue TV mode.

Start Auto Tuning

All digital TV tuning data will be erased

Settings are made automatically

- All the previous tuning settings are erased.
- When the operation is completed, the channel at channel position “1” will be displayed.
- Search begins in the order from the lower channels to the higher channels. Channels received during this process are added to the list. (p. 31)
- If tuning has not been done completely ⇒ “Digital TV Manual Tuning”, “Analogue TV Manual Tuning” (p. 31)
### Tuning Channels

**Display a message** | **New Channel Message**
---|---
Selects whether to give a message when new Digital TV channels are found. **(Off / On)**

**Update channels automatically** | **Update Channel List**
---|---
You can add new channels, delete duplicated channels, update channel name and position automatically to Channel List.

**Check Digital TV signal** | **Digital TV Signal Condition**
---|---
Selects a channel and checks the Digital TV signal condition.

- **To change the channel**
- **A good Signal Strength is not an indication of suitable signal for Digital TV reception. Please use the Signal Quality indicator as follows:**

  **Signal Quality:**
  - Green bar ⇒ Good
  - Yellow bar ⇒ Poor
  - Red bar ⇒ Bad (Check the aerial)

---

**Set Digital TV channel manually** | **Digital TV Manual Tuning**
---|---
Normally use “Digital TV Auto Tuning” or “Update Channel List” to update Digital TV channels on your channel list. If tuning has not been done completely or for adjusting the direction of the aerial, use this function.

- **select physical channel**
- **adjust frequency (set where the level of “Signal Quality” becomes the maximum)**
- **search**

- **All channels found will be added to the Digital TV Channel List.**

---

**Set Analogue TV channel manually** | **Analogue TV Manual Tuning**
---|---
Set Analogue TV channel manually after Analogue TV Auto Tuning.

- If a VCR is connected only with the RF cable, select channel position “0”.

---

**Update channels automatically** | **Update Channel List**
---|---
You can add new channels, delete duplicated channels, update channel name and position automatically to Channel List.

- **The Digital TV Channel List is updated with the current settings saved as they are.**

---

**Display a message** | **New Channel Message**
---|---
Selects whether to give a message when new Digital TV channels are found. **(Off / On)**

**Check Digital TV signal** | **Digital TV Signal Condition**
---|---
Selects a channel and checks the Digital TV signal condition.

- **To change the channel**
- **A good Signal Strength is not an indication of suitable signal for Digital TV reception. Please use the Signal Quality indicator as follows:**

  **Signal Quality:**
  - Green bar ⇒ Good
  - Yellow bar ⇒ Poor
  - Red bar ⇒ Bad (Check the aerial)
Restore Settings

Resets the TV to its original condition, i.e. no channels tuned in. All settings (channels, picture, sound quality, etc.) are reset.

1. Display the menu

   MENU

2. Select “Setup”

   OK

3. Select “System Menu”

   OK

4. Select “Shipping Condition”

   OK

5. Set

To return to TV ⇒

---

Check the message and reset

Shipping Condition
All tuning data will be erased
Are you sure?
Are you sure?

Follow the on-screen instructions

"Auto Tuning" will automatically start when Mains power On / Off switch is next turned On. (p. 12)

To retune TV channels only, e.g. after moving house

"Digital TV Auto Tuning" or "Analogue TV Auto Tuning" (p. 30)
Displaying PC Screen on TV

The screen of the PC connected to the TV can be displayed on the TV. You can also listen to PC sound with the audio cable connected.

To connect PC ➔ p. 44

1. Select the external input

2. Select “PC”

PC menu setting (changed as desired)

Other items ➔ p. 24 and p. 25
HDMI Functions

HDMI (high-definition multimedia interface) allows you to enjoy high-definition digital images and high-quality sound by connecting the TV and the equipment. HDMI-compatible equipment (*1) with an HDMI or DVI output terminal, such as a set top box, a DVD player or a game equipment, can be connected to the HDMI terminal using an HDMI compliant (fully wired) cable.

About connections, see “External Equipment” (p. 44).

**Note**
- HDMI is the world's first complete digital consumer AV interface complying with a non-compression standard.
- Audio settings can be made on the "HDMI1 / 4 Input" menu screen. (p. 25)
- Applicable audio signal sampling frequencies (2ch L.PCM): 48 kHz, 44.1 kHz, 32 kHz
- HDMI2 and 3 terminals are for digital audio signal only.
- Use with a PC is not guaranteed. Only HDMI video formats in the HDMI table (p. 48) are applicable.
- If the connected equipment has an aspect adjustment function, set the aspect ratio to “16:9”.
- These HDMI connectors are “type A”.
- These HDMI connectors are compatible with HDCP (High-Bandwidth Digital Content Protection) copyright protection.
- An equipment having no digital output terminal may be connected to the input terminal of either “COMPONENT”, “S-VIDEO”, or “VIDEO” to receive analogue signals.
- The HDMI input terminal can be used only with the following image signals: 480i, 480p, 576i, 576p, 720p, 1080i and 1080p. Match the output setting of the digital equipment.
- For details of the applicable HDMI signals, see p. 48.

**DVI connection**
- If the external equipment has only a DVI output, connect to the HDMI1 / 4 terminal via a DVI to HDMI adapter cable (*2).
- When the DVI to HDMI adapter cable is used, connect the audio cable to the audio input terminal (HDMI1: use AV2 IN AUDIO terminals / HDMI4: use AV3 IN AUDIO terminals).

**DVI Position Settings**
If the picture position is not fit to the screen during the DVI connection, adjust the position on “DVI Position Settings” in Setup Menu. The settings are memorized for each HDMI terminals and input signals.
- To make settings ⇒ “How to Use Menu Functions” 1 to 4 (p. 22)

PCM: Digital output signal is fixed to PCM. |
Enjoy additional HDMI interoperability with Panasonic products which have “HDAVI Control” function. This TV supports “HDAVI Control 4” function.

Connections to the equipment (DIGA Recorder, HD Video Camera, Player theatre, Amplifier, etc.) with HDMI cable allow you to interface them automatically. These features are limited to models incorporating “HDAVI Control” and “VIERA Link”.

Some functions are not available depending on the equipment’s version of HDAVI Control. Please confirm the connected equipment’s version of HDAVI Control.

VIERA Link “HDAVI Control”, based on the control functions provided by HDMI which is an industry standard known as HDMI CEC (Consumer Electronics Control), is a unique function that we have developed and added. As such, its operation with other manufacturers’ equipment that supports HDMI CEC cannot be guaranteed.

Please refer to individual manuals for the equipments. About applicable Panasonic equipment, consult your local Panasonic dealer.

Speaker control

- ○: available with the equipment which has “HDAVI Control 2 or later” function
- ○: available with the equipment which has “HDAVI Control 3 or later” function
- ○: available with the equipment which has “HDAVI Control 4” function
- ○: available with DIGA Recorder which has HDD
- ○: except for watching a disc

### Connection

- To use DIGA Recorder / DVD Player / Blu-ray Disc Player / HD Video Camera / LUMIX Camera
  - HDMI cable
  - DIGA Recorder / DVD Player / Blu-ray Disc Player / HD Video Camera / LUMIX Camera with VIERA Link function

- To use Player theatre / Blu-ray Disc theatre:
  - HDMI cable
  - Optical digital audio cable or RCA cable
  - Player theatre / Blu-ray Disc theatre with VIERA Link function

- To use Amplifier:
  - HDMI cable
  - Amplifier with VIERA Link function
  - HD Video Camera / LUMIX Camera with VIERA Link function
Note

This function may not work properly depending on the connected equipment.
- For DIGA Recorder / DVD Player / Blu-ray Disc Player / HD Video Camera / LUMIX Camera with VIERA function, connect to HDMI1, HDMI2, HDMI3 or HDMI4 terminal via an HDMI cable.
- For Player theatre / Blu-ray Disc theatre / Amplifier, connect to HDMI1, HDMI2, HDMI3 or HDMI4 terminal via an HDMI cable and/or either the optical digital audio cable or RCA cable for audio output from the TV.
- Use fully wired HDMI compliant cable. Non-HDMI-compliant cables cannot be utilized.

Recommended Panasonic’s HDMI cable part number:
• RP-CDHG10 (1.0 m) • RP-CDHG15 (1.5 m) • RP-CDHG20 (2.0 m) • RP-CDHG30 (3.0 m) • RP-CDHG50 (5.0 m)

Preparations

- Connect the equipment supporting VIERA Link.
- Set up the connected equipment. Read the manual of the equipment.
- For optimal recording, the settings of the recorder might be required. For details, read the manual of the recorder.
- Set VIERA Link On in Setup Menu “VIERA Link” (p. 25)
- Set up the TV ➔ After connection, turn the equipment on and then switch the TV on. Select the input mode to HDMI1, HDMI2, HDMI3 or HDMI4 (p. 20), and make sure that an image is displayed correctly.

This setup should be done each time when the following conditions occur:
• for the first time / • when adding or reconnecting equipment / • when changing setup

Features available

<table>
<thead>
<tr>
<th>Channel download</th>
<th>Easy playback</th>
</tr>
</thead>
<tbody>
<tr>
<td>Channel setting can be downloaded to the recorder.</td>
<td>Automatic input switching - When the connected equipment is operated, input mode is switched automatically.</td>
</tr>
</tbody>
</table>

Set Power on Link “On” in Setup Menu to use this function ➔ “Power on Link” (p. 25)
When the connected equipment starts playback or direct navigator / function menu for the equipment are activated, the TV is automatically turned on. (Only when the TV is in Standby mode.)

Set Power off Link “On” in Setup Menu to use this function ➔ “Power off Link” (p. 25)
When the TV is set to Standby mode, the connected equipment is also automatically set to Standby.

This function will work even if the TV enters standby mode automatically by Off Timer function or auto power standby function.

Reduce unnecessary power consumption in standby Standby Power Save

Set Standby Power Save “On” in the Setup Menu to use this function ➔ “Standby Power Save” (p. 25)
The power consumption in Standby mode of the connected equipment is controlled higher or lower in synchronization with the TV On / Off state to reduce the consumption.
When the TV is set to Standby mode, the connected equipment is automatically set to Standby and the power consumption in Standby mode of the connected equipment is automatically minimized.
When the TV is turned on, the connected equipment is still in Standby mode, but the power consumption is increased to make startup time early.
This function is effective if the connected equipment can change the power consumption in Standby mode and is set to higher consumption.

Auto standby for unnecessary equipment Intelligent Auto Standby

Set Intelligent Auto Standby “On (With reminder)” or “On (No reminder)” in the Setup Menu to use this function ➔ “Intelligent Auto Standby” (p. 25)
When the TV is on, the connected equipments not in use go into Standby mode automatically to reduce the power consumption.
If you select “On (With reminder)”, the on screen message will be displayed to be noticed before working this function.
VIERA Link “HDAVI Control™”

Features available (Using VIERA Link Menu)

Direct TV Recording - What you see is What you record

Recording the current programme in DIGA Recorder immediately.

- If you connect several recorders including other manufacturers’ recorders at the same time, please connect DIGA Recorder to the TV’s lower HDMI terminal number.
- If you cannot operate, check the settings and the equipment “VIERA Link features and connections” (p. 38)

<table>
<thead>
<tr>
<th>① Display “VIERA Link Menu”</th>
</tr>
</thead>
<tbody>
<tr>
<td>select</td>
</tr>
<tr>
<td>start</td>
</tr>
</tbody>
</table>

② Select “Direct TV Rec” and start recording

To stop recording
Select “Stop” in “Direct TV Rec” and access

Pause Live TV programme

You can pause the live TV programme and resume later.

- Live TV programme will be recorded on HDD of the connected DIGA Recorder.
- This function is available with DiGA Recorder which has HDD.
- If you connect several recorders including other manufacturers’ recorders at the same time, please connect DIGA Recorder which has HDD to the TV’s lower HDMI terminal number.
- If you cannot operate, check the settings and the equipment “VIERA Link features and connections” (p. 38)

Access and pause the live TV programme

① Display “VIERA Link Menu”

② Select “Pause Live TV” and pause

TV picture will be paused.

- Live TV programme is recorded on HDD from where it was paused.
- Follow the operation guide to operate Pause Live TV function.

To operate Pause Live TV

- search backward
- pause
- search forward
- playback
- stop

To return to Live TV
(stop playback of Pause Live TV / cancel pause)

Select “Yes”

① select
② stop

Stop Pause Live TV?

Yes
No

If you stop playback or cancel pause, the recorded programme will be deleted from HDD.
Features available (Using VIERA Link Menu)

You can control some functions of the connected equipment with this TV remote control by pointing at the TV's signal receiver.

If you cannot operate, check the settings and the equipment ⇒ “VIERA Link features and connections” (p. 38)
For details of the operations for the connected equipment, read the manual of the equipment.

Access and operate the menu of the equipment

1. Display “VIERA Link Menu”
2. Select “VIERA Link Control”
3. Select the equipment you want to access
   The type of the connected equipment is displayed. Select the type of the equipment and access.

Recorder / Player / Home Cinema / Video Camera / LUMIX / Other

* “Home Cinema” means Player theatre, Blu-ray Disc theatre or Recorder theatre.
* “Other” means Tuner set top box.

The menu of the accessed equipment
(Input mode will be changed automatically)

4. Operate the connected equipment
   1. Set the remote control code for TV (p. 21)
   2. Follow the operation guide

To display the operation guide ⇒ Store / set / access ⇒
Move the cursor / select the menu ⇒ Return to the previous menu ⇒
Move the cursor / access / adjust ⇒ Exit the menu ⇒

When the key words are displayed on colour bar ⇒

(continued)

* Some operations may not be available for some equipment. If so, use its own remote control.

If several recorders or players are connected
You can connect up to three recorders or players at the same time.

The number is given from the TV's lower HDMI terminal connected to the same type of equipment. For example, when two recorders are connected to HDMI2 and HDMI3, one connected to HDMI2 is displayed as Recorder1 and the other as Recorder2.

If you access the invalid equipment
When the equipment with “HDAVI Control” function is connected

Type of the connected equipment is displayed. You can access the menu of the equipment. But you cannot operate it. Use its own remote control to operate the equipment.
**VIERA Link “HDAVI Control™”**

**Features available (Using VIERA Link Menu)**

<table>
<thead>
<tr>
<th>Speaker control</th>
<th><strong>Speaker Selection</strong></th>

<td></td>
</tr>
</tbody>
</table>

**Access and control the speaker volume**

1. **Display “VIERA Link Menu”**

2. **Select “Speaker Selection”**

3. **Set to “Home Cinema” or “TV”**

**Home Cinema**

Player theatre, Blu-ray Disc theatre or Amplifier will be automatically turned on if it is in Standby mode and the sound is from theatre speakers connected to the equipment.

- **Volume up / down**
  - (Volume slide bar will be displayed when adjusting the volume of the equipment.)

- **Mute**
  - The sound of TV speakers is mute. When the equipment is turned off, TV speakers will be active.

**TV**

TV speakers are active.

**Note**

- If you wish to enjoy the multi-channel sound (e.g. Dolby Digital 5.1ch) via an Amplifier, connect with HDMI cable and Optical digital audio cable (p. 38), and then select “Home Cinema”.
- To enjoy the sound from the DIGA Recorder in multi-channel sound, connect an HDMI cable from the DIGA Recorder to the Amplifier (p. 38).

**Note**

- These functions may not work properly depending on the connected equipment.
- Image or sound may not be available for the first few seconds when input mode is switched.
- Easy playback may be available by using the remote control for Player theatre, Blu-ray Disc theatre or Amplifier. Read the manual of the equipment.
- “HDAVI Control 4” is the newest standard (current as of December, 2008) for HDAVI Control compatible equipment. This standard is compatible with conventional HDAVI equipment.
- To confirm this TV’s version of HDAVI Control ⇒ “System Information”
**VIERA Tools**

With VIERA Tools, you can directly access to some of the useful functions of connected equipment or SD card.

1. **Display VIERA Tools Menu**

2. **Select a feature**

3. **Follow the operation of each feature**

   - **VIERA Link Control** (p. 41)
     The connected device can be operated with the VIERA remote control. When multiple devices are connected, an indicator appears below the icon so that one device can be selected.

   - **Pause Live TV** (p. 40)
     A live TV programme can be paused and resumed later.

   - **Direct TV Rec** (p. 40)
     What is on TV can be recorded immediately.

   - **Speaker Selection** (p. 42)
     Theatre speaker can be set.

   - **SD card slideshow** (p. 36)
     Photo slideshow will start.

   - **SD card photo view** (p. 35)
     Photo folders are displayed.

   - **SD card movie view** (p. 37)
     The title list for SD movie image is displayed.

Updating the software system (Digital TV mode)

Update system software to ensure that you have latest version software.
If there is an update available, a notification banner is displayed when the channel has the update information.
To download new software, press "OK" ➔ Downloading (approx. 1 hour)
If you choose not to download, press "EXIT".

To update automatically
Set "Auto Update Search in Standby" to "On" (p. 27)
If there is a new version software being broadcast, the TV will download this automatically.
The automatic updating sequence is carried out at 3:00 AM and 5:00 AM every morning under the following condition.
Standby (TV turned Off with the remote control)
Recording is not in progress.

To update manually
Perform "System Update Search Now" (p. 27)
If there is an update available, a notification banner is displayed.

Note
During downloading, do not turn Off the TV or touch any buttons.
(The TV is automatically activated after downloading is completed.)
When the TV is switched to standby, there will be a clicking sound after a short delay. Similar clicking sounds will also occur at 3:00 AM and 5:00 AM when "Auto update Search in Standby" (p. 27) is set to "On". These sounds are normal.

Stereo / Bilingual Sound Selection (Analogue TV mode)

When you receive the stereo / bilingual sound system, sound output modes can be selected by pressing the Stereo / Bilingual Sound Selection button.

Audio Signal | STEREO | MAIN I | SUB II | MONO
--- | --- | --- | --- | ---
Mode Indicator | | I | II | ▽

NICAM ...... Used in New Zealand, Singapore, Hong Kong etc.

Type of broadcast | Regular broadcast (Standard Audio) | Regular + NICAM MONO | NICAM STEREO | NICAM DUAL MONO (MAIN I / SUB II)
--- | --- | --- | --- | ---
Mode Indicator | No Indicator | I | | |

A2 (German) ...... Used in Australia, Malaysia etc.

Type of broadcast | Regular broadcast (Standard Audio) | BILINGUAL or DUAL MONO: MAIN I / SUB II | STEREO
--- | --- | --- | ---
Mode Indicator | No Indicator | | |

If the stereo signal is poor or the receiving conditions are not optimum or if STEREO:MONO automatic switching occurs, it is recommended you switch from STEREO to MONO.
Even when the contents of the receiving signal undergo changes, selection mode is kept intact.
When the receiving conditions deteriorate, listening will be easier if the mode is set to the MONO position, using the stereo / bilingual sound selection button.
DUAL, also known as DUAL MONO or as BILINGUAL is not currently transmitted in some countries.
**SD Card**

**Cautions in handling SD Card**
- Do not remove the card while the TV is accessing data (this can damage card or TV).
- Do not touch the pins on the back of the card.
- Do not subject the card to a high pressure or impact.
- Insert the card in the correct direction (otherwise, card may be damaged).
- Electrical interference, static electricity, or erroneous operation may damage the data or card.
- Back up the recorded data at regular intervals in case of deteriorated or damaged data or erratic operation of the TV. (Panasonic is not liable for any deterioration or damage of recorded data.)

**Data format for Card browsing**

**Photo:** Still images recorded with digital still cameras compatible with JPEG files of DCF* and EXIF standards
- Data format - Baseline JPEG (Sub-sampling 4:4:4, 4:2:2 or 4:2:0)
- Max. number of files - 9,999
- Image resolution - 160 × 120 to 10,000,000

**Movie:** SD-Video Standard Ver. 1.2 [MPEG-2 (PS format)] and AVCHD Standard compatible files with an audio format that is either MPEG-1/Layer-2 format or Dolby Digital format
( AVCHD files recorded with vertical frequency 50Hz are applicable. A modified data with a PC may not be displayed correctly.)
- Compliant card type (maximum capacity): SDHC Card (32 GB), SD Card (2 GB) and miniSD Card (2 GB) (requiring miniSD adapter)
- If miniSD Card is used, insert / remove it together with the adapter.
- Check the latest information on the card type at the following website. (English only)

*DCF (Design rule for camera file system): Unified standard established by Japan Electronics and Information Technology Industries Association (JEITA).*

**Note**
- Format the card with the recording equipment.
- The picture may not appear correctly on this TV depending on the recording equipment used.
- Display may take some time when there are many files and folders.
- This function cannot display Motion JPEG and still image not DCF formatted (i.e. TIFF, BMP).
- A data modified with a PC may not be displayed.
- Images imported from a PC must be compatible with EXIF (Exchangeable Image File) 2.0, 2.1, and 2.2.
- Partly degraded files might be displayed at a reduced resolution.
- All “.JPG” extension data in the card will be read in Photo View Mode.
- The folder and file names may be different depending on the digital camera used.
- Do not use two-byte characters or other special codes.
- The card may become unusable with this TV if the file or folder names are changed.

Technical Information

PC connection

A PC may be connected to this TV so that the PC screen is displayed and sound is heard from the TV.
- PC signals that can be inputted: Horizontal scanning frequency 31 to 69 kHz; vertical scanning frequency 59 to 66 Hz (more than 1,024 signal lines could result in incorrect display of the image).
- A PC adapter is not necessary for the DOS/V-compliant D-sub 15-pin connector.

Note
- Some PC models cannot be connected to this TV.
- When using PC, set the colour display quality of PC to the highest position.
- For details of the applicable PC signals, see below.
- Max. display resolution

</table>

Note
- Signals other than above may not be displayed properly.
- The above signals are reformatted for optimal viewing on your display.
- Applicable input signal for PC is basically compatible to VESA standard timing.
- PC signal is magnified or compressed for display, so that it may not be possible to show fine detail with sufficient clarity.
FAQs

Before requesting service or assistance, please follow these simple guides to resolve the problem. If the problem still persists, please contact your local Panasonic dealer for assistance.

White spots or shadow images (noise)
- Check the position, direction, and connection of the aerial.

Neither image nor sound is produced
- Is the TV in “AV mode”?
- Is the mains lead plugged into the socket outlet?
- Is the TV turned On?
- Check Picture Menu (p. 24) and volume.

An error message appears
- Follow the message’s instructions.
- If the problem persists, contact the authorized Service Centre.

The LCD panel moves slightly when it is pushed with a finger
- Clattered sound might be heard
  - There are some looseness around the panel to prevent the damage to the panel. The panel might move slightly when it is pushed with a finger, and clattered sound might be heard. This is not a malfunction.

There may be red spots, blue spots, green spots and black spots on the screen
- An image on a LCD or Plasma TV screen is created by many small groups of dots known as pixels (which is similar to the image in a newspaper). It also naturally follows that higher panel resolutions contain more pixels. To create a colour image, each pixel consists of three tiny coloured dots (known as sub-pixels), one each of red, green and blue. Each one of these dots is precisely controlled by the electronics of the TV to produce the picture. Whilst Panasonic maintains the highest standards in manufacturing technology and processes in the construction of these panels, there are a number of allowable pixel/sub-pixel failures that still allow the panel to be defined as a good panel. It is not possible to guarantee absolutely no pixel loss.

Problem | Actions
--- | ---
Chaotic image, noisy | ● Change the setting of “P-NR” in the Picture Menu (to remove noise). (p. 24)  
● Check nearby electrical products (car, motorcycle, fluorescent lamp).

No image can be displayed | ● Is “Colour” or “Contrast” in the Picture Menu set to the minimum? (p. 24)

Blurry or distorted image (no sound or low volume) | ● Reset channel. (p. 32)

Unusual image is displayed | ● Turn off the TV with Mains power On / Off switch, then turn it on again.

“Shop” appears on screen at switch on | ● “Shop” was selected in “Auto Tuning” (p. 12).  
● Reset settings in “Shipping Condition” (p. 32), then select “Home” in “Auto Tuning” (p. 12).

No sound is produced | ● Is “Sound Mute” active? (p. 10)  
● Is the volume set to the minimum?

Sound level is low or sound is distorted | ● Sound signal reception may be deteriorated.  
● Set “MPX” (p. 24) in the Sound Menu to “Mono”.

### FAQs

<table>
<thead>
<tr>
<th>Problem</th>
<th>Actions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Sound is unusual</strong></td>
<td>°Set the sound setting of the connected equipment to “2ch L.PCM”.&lt;br&gt;°Check the “HDMI1 / 4 Input” setting in the Sound Menu. (p. 25)&lt;br&gt;°If digital sound connection has a problem, select analogue sound connection. (p. 34)</td>
</tr>
<tr>
<td><strong>Pictures from external equipment are unusual when the equipment is connected via HDMI</strong></td>
<td>°Is the HDMI cable connected properly? (p. 44)&lt;br&gt;°Turn Off the TV and equipment, then turn them On again.&lt;br&gt;°Check an input signal from the equipment. (p. 48)&lt;br&gt;°Use an equipment compliant with EIA/CEA-861/861B.</td>
</tr>
<tr>
<td><strong>Digital TV reception technology requires high quality, robust DTV signals which in some domestic aerial installations, may be relatively poor despite good analogue reception.</strong></td>
<td>°To maintain optimum signal quality from TV aerial, use a TV aerial splitter (as illustrated) when connecting two or more equipments to the same aerial.</td>
</tr>
<tr>
<td><strong>Aerial connection when using DTV and VCR / DVD Recorder</strong></td>
<td>°Check to ensure your area is covered by DVB transmisions.&lt;br&gt;°Check that the aerial and antenna cable are designed for DVB. For your safety, the aerial and cable should be inspected / installed by a licenced installer that should comply with Australian Standard AS1417.1. Note: If you live within 5-10 Km of DVB transmission towers, a combined VHF / UHF aerial should be adequate. Outside this area, separate VHF and UHF aerials provide superior reception performance.&lt;br&gt;°If you live in a unit or apartment, check to ensure the Master Antenna TV (MATV) system is designed for analogue and DVB-T reception. Please consult your body corporate.</td>
</tr>
<tr>
<td><strong>After Digital TV Auto Tuning only some or no services are found</strong></td>
<td>°Check “Signal Condition”. (p. 31) If “Signal Quality” or “Signal Strength” are displayed in red or constantly changing, check aerial. If problem persists consult your local TV aerial installer.&lt;br&gt;°Check that the aerial and antenna cable are designed for DVB. For your safety, the aerial and cable should be inspected / installed by a licenced installer that should comply with Australian Standard AS1417.1.&lt;br&gt;°Interference (known as impulse noise) from household appliances such as light switches, fridges etc may cause picture break up and / or audio distortion. Use high quality quad shielded coaxial cable fly lead between TV and antenna wall socket to minimise impulse noise pickup. If problem persists consult your local TV aerial installer.&lt;br&gt;°When “No Signal” message is displayed check TV aerial connection.&lt;br&gt;°The received signal may be too weak to allow the TV to reliably lock to the desired “No Signal” programme to generate a stable picture. Repeat the tuning procedure (p. 31). If problem persists consult your local TV aerial installer.</td>
</tr>
<tr>
<td><strong>Picture regularly breaks up on some programmes, or “No Signal” message</strong></td>
<td>°Electrical atmospheric interference caused by local or distant lighting storms or heavy rain with wind in “leafy” locations may cause pictures to break up and audio to mute or distort momentarily.&lt;br&gt;°Impulse noise interference from an infrequently used electrical appliance, or a passing vehicle or lawn mower with a “noisy” ignition system.</td>
</tr>
<tr>
<td><strong>Picture very infrequently breaks up on some or all programmes</strong></td>
<td>°Like your computer, the TV has to run a number of diagnostic and software checks before it can display any programmes.</td>
</tr>
<tr>
<td><strong>TV takes so long to turn on</strong></td>
<td>°Is the TV in Teletext mode? (p. 18)</td>
</tr>
<tr>
<td><strong>The programme cannot be changed</strong></td>
<td>°Is the TV in Teletext mode? (p. 18)</td>
</tr>
<tr>
<td><strong>The programme cannot be selected</strong></td>
<td>°Is the programme skipped? (p. 29)</td>
</tr>
<tr>
<td><strong>TV goes into “Standby mode”</strong></td>
<td>°Off Timer function is activated.&lt;br&gt;The TV enters “Standby mode” about 30 mins. after analogue broadcasting ends.</td>
</tr>
<tr>
<td><strong>The remote control does not work</strong></td>
<td>°Are the batteries installed correctly? (p. 7)&lt;br&gt;°Has the TV been switched On?</td>
</tr>
