Please read these instructions before operating your set and retain them for future reference.
**Dear Panasonic Customer**

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new Plasma Display.

To obtain maximum benefit from your set, please read these Instructions before making any adjustments, and retain them for future reference.

Retain your purchase receipt also, and note down the model number and serial number of your set in the space provided on the rear cover of these instructions.

Visit our Panasonic Web Site http://panasonic.net

**Trademark Credits**

- VGA is a trademark of International Business Machines Corporation.
- Macintosh is a registered trademark of Apple Computer, USA.
- S-VGA is a registered trademark of the video Electronics Standard Association.

Even if no special notation has been made of company or product trademarks, these trademarks have been fully respected.

---

**Note:**

Do not allow a still picture to be displayed for an extended period, as this can cause a permanent image retention to remain on the Plasma Display.

Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.
Important Safety Notice

WARNING
1) To prevent damage which may result in fire or shock hazard, do not expose this appliance to dripping or splashing.
   Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set. (including on shelves above, etc.)
   No naked flame sources, such as lighted candles, should be placed on / above the set.
2) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
3) Do not remove the earthing pin on the power plug. This apparatus is equipped with a three pin earthing-type power plug. This plug will only fit an earthing-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.
   Do not defeat the purpose of the earthing plug.
4) To prevent electric shock, ensure the earthing pin on the AC cord power plug is securely connected.

CAUTION
This appliance is intended for use in environments which are relatively free of electromagnetic fields. Using this appliance near sources of strong electromagnetic fields or where electrical noise may overlap with the input signals could cause the picture and sound to wobble or cause interference such as noise to appear. To avoid the possibility of harm to this appliance, keep it away from sources of strong electromagnetic fields.

IMPORTANT: THE MOULDED PLUG

FOR YOUR SAFETY, PLEASE READ THE FOLLOWING TEXT CAREFULLY.
This appliance is supplied with a moulded three pin mains plug for your safety and convenience. A 13 amp fuse is fitted in this plug. Shall the fuse need to be replaced, please ensure that the replacement fuse has a rating of 13 amps and that it is approved by ASTA or BSI to BS1362.
Check for the ASTA mark in or the BSI mark on the body of the fuse.
If the plug contains a removable fuse cover, you must ensure that it is refitted when the fuse is replaced.
If you lose the fuse cover the plug must not be used until a replacement cover is obtained.
A replacement fuse cover can be purchased from your local Panasonic Dealer.

If the fitted moulded plug is unsuitable for the socket outlet in your home, then the fuse shall be removed and the plug cut off and disposed of safely. There is a danger of severe electrical shock if the cut off plug is inserted into any 13 amp socket.

If a new plug is to be fitted, please observe the wiring code as shown below.
If in any doubt, please consult a qualified electrician.

WARNING : — THIS APPARATUS MUST BE EARTHED.

IMPORTANT : — The wires in this mains lead are coloured in accordance with the following code: —
   Green-and-Yellow : Earth Blue: Neutral Brown: Live

As the colours of the wire in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows.
   The wire which is coloured GREEN-AND-YELLOW must be connected to the terminal in the plug which is marked with the letter E or by the Earth symbol or coloured GREEN or GREEN-AND-YELLOW.
   The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.
   The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

How to replace the fuse. Open the fuse compartment with a screwdriver and replace the fuse.
WARNING

Setup

This Plasma Display is for use only with the following optional accessories. Use with any other type of optional accessories may cause instability which could result in the possibility of injury.

(All of the following accessories are manufactured by Matsushita Electric Industrial Co., Ltd.)

- Pedestal ................................................................. TY-ST103PF9
- Wall-hanging bracket (vertical) ............................... TY-WK103PV9
- BNC Component Video Terminal Board .................. TY-42TM6A
- BNC Composite Video Terminal Board ...................... TY-42TM6B
- BNC Dual Video Terminal Board .............................. TY-FB9BD
- DVI-D Terminal Board for PF Series ....................... TY-FB9FDD
- RCA Component Video Terminal Board .................... TY-42TM6Z
- RCA Composite Video Terminal Board ..................... TY-42TM6V
- RGB Active Through Terminal Board ........................ TY-42TM6G
- PC Input Terminal Board ........................................... TY-42TM6P
- Composite / Component Video Terminal Board ............. TY-42TM6Y
- SDI Terminal Board ................................................. TY-FB7SD
- HD-SDI Terminal Board ........................................... TY-FB9HD
- HDMI Terminal Board .............................................. TY-FB8HM
- Scart Terminal Board ............................................... TY-FB8SC
- Ir Through Terminal Board ........................................ TY-FB9RT
- HD-SDI Terminal Board with audio .......................... TY-FB10HD
- Dual HDMI Terminal Board ....................................... TY-FB10HMD
- Wireless Presentation Board .................................... TY-FB10WPE
- AV Terminal Box ..................................................... TY-TB10AV

Always be sure to ask a qualified technician to carry out set-up.

Small parts can present choking hazard if accidentally swallowed. Keep small parts away from young children. Discard unneeded small parts and other objects, including packaging materials and plastic bags/sheets to prevent them from being played with by young children, creating the potential risk of suffocation.

Do not place the Plasma Display on sloped or unstable surfaces.
- The Plasma Display may fall off or tip over.

Do not place any objects on top of the Plasma Display.
- If water is spills onto the Plasma Display or foreign objects get inside it, a short-circuit may occur which could result in fire or electric shock. If any foreign objects get inside the Plasma Display, please consult your local Panasonic dealer.

Transport only in upright position!
- Transporting the unit with its display panel facing upright or downward may cause damage to the internal circuitry.

Ventilation should not be impeded by covering the ventilation openings with items such as newspapers, table cloths and curtains.

For sufficient ventilation;
If using the Plasma Display, leave a space of at least 30 cm at the top, left and right, at least 15 cm at the bottom, and at least 20 cm at the rear.
Safety Precautions

When using the Plasma Display

The Plasma Display is designed to operate on 220 - 240 V AC, 50/60 Hz.

Do not cover the ventilation holes.
• Doing so may cause the Plasma Display to overheat, which can cause fire or damage to the Plasma Display.

Do not stick any foreign objects into the Plasma Display.
• Do not insert any metal or flammable objects into the ventilations holes or drop them onto the Plasma Display, as doing so can cause fire or electric shock.

Do not remove the cover or modify it in any way.
• High voltages which can cause severe electric shocks are present inside the Plasma Display. For any inspection, adjustment and repair work, please contact your local Panasonic dealer.

Ensure that the mains plug is easily accessible.

Do not use any power supply cord other than that provided with this unit.
• Doing so may cause fire or electric shocks.

Securely insert the power supply plug as far as it will go.
• If the plug is not fully inserted, heat may be generated which could cause fire. If the plug is damaged or the wall socket is loose, they shall not be used.

Do not handle the power supply plug with wet hands.
• Doing so may cause electric shocks.

Do not do anything that may damage the power cable. When disconnecting the power cable, pull on the plug body, not the cable.
• Do not damage the cable, make any modifications to it, place heavy objects on top of it, heat it, place it near any hot objects, twist it, bend it excessively or pull it. To do so may cause fire and electric shock. If the power cable is damaged, have it repaired at your local Panasonic dealer.

If the Plasma Display is not going to be used for any prolonged length of time, unplug the power supply plug from the wall outlet.

If problems occur during use

If a problem occurs (such as no picture or no sound), or if smoke or an abnormal odour starts to come out from the Plasma Display, immediately unplug the power supply plug from the wall outlet.
• If you continue to use the Plasma Display in this condition, fire or electric shock could result. After checking that the smoke has stopped, contact your local Panasonic dealer so that the necessary repairs can be made. Repairing the Plasma Display yourself is extremely dangerous, and shall never be done.

If water or foreign objects get inside the Plasma Display, if the Plasma Display is dropped, or if the cabinet becomes damages, disconnect the power supply plug immediately.
• A short circuit may occur, which could cause fire. Contact your local Panasonic dealer for any repairs that need to be made.
CAUTION

When using the Plasma Display

Do not bring your hands, face or objects close to the ventilation holes of the Plasma Display.
- Heated air comes out from the ventilation holes at the top of Plasma Display will be hot. Do not bring your hands or face, or objects which cannot withstand heat, close to this port, otherwise burns or deformation could result.

Be sure to disconnect all cables before moving the Plasma Display.
- If the Plasma Display is moved while some of the cables are still connected, the cables may become damaged, and fire or electric shock could result.

Disconnect the power supply plug from the wall socket as a safety precaution before carrying out any cleaning.
- Electric shocks can result if this is not done.

Clean the power cable regularly to prevent it becoming dusty.
- If dust built up on the power cord plug, the resultant humidity can damage the insulation, which could result in fire. Pull the power cord plug out from the wall outlet and wipe the mains lead with a dry cloth.

This Plasma Display radiates infrared rays, therefore it may affect other infrared communication equipment. Install your infrared sensor in a place away from direct or reflected light from your Plasma Display.

Do not sit or stand on display or display base or play around those.

Please keep an appropriate distance* from the screen.
Viewing the screen of this product at close distance may cause video-induced nausea depending on the video.
* Distance of about three times the height of the screen.

The display panel is made of glass. Do not apply strong force or impact to it.
- This may lead to injury.

Take steps to prevent toppling.
- Earthquakes or children climbing up or onto the display may cause the display to topple over, possibly resulting in injury.

Cleaning and maintenance

The front of the display panel has been specially treated. Wipe the panel surface gently using only a cleaning cloth or a soft, lint-free cloth.
- If the surface is particularly dirty, wipe with a soft, lint-free cloth which has been soaked in pure water or water in which neutral detergent has been diluted 100 times, and then wipe it evenly with a dry cloth of the same type until the surface is dry.
- Do not scratch or hit the surface of the panel with fingernails or other hard objects, otherwise the surface may become damaged. Furthermore, avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the surface may be adversely affected.

If the cabinet becomes dirty, wipe it with a soft, dry cloth.
- If the cabinet is particularly dirty, soak the cloth in water to which a small amount of neutral detergent has been added and then wring the cloth dry. Use this cloth to wipe the cabinet, and then wipe it dry with a dry cloth.
- Do not allow any detergent to come into direct contact with the surface of the Plasma Display. If water droplets get inside the unit, operating problems may result.
- Avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the cabinet surface may be adversely affected or the coating may peel off. Furthermore, do not leave it for long periods in contact with articles made from rubber or PVC.
Accessories

Accessories Supply

Check that you have the accessories and items shown.

- Operating Instruction book
- Remote Control Transmitter EUR7636090R
- Batteries for the Remote Control Transmitter (2 × R6 (UM3) Size)
- Power supply cord × 2
- Fixing bands × 2
- Eyebolt cap × 3

Remote Control Batteries

Requires two R6 batteries.
1. Pull and hold the hook, then open the battery cover.
2. Insert batteries - note correct polarity ( + and -).
3. Replace the cover.

Helpful Hint:
For frequent remote control users, replace old batteries with Alkaline batteries for longer life.

⚠️ Precaution on battery use
Incorrect installation can cause battery leakage and corrosion that will damage the remote control transmitter. Disposal of batteries should be in an environment-friendly manner.

Observe the following precaution:
1. Batteries shall always be replaced as a pair. Always use new batteries when replacing the old set.
2. Do not combine a used battery with a new one.
3. Do not mix battery types (example: “Zinc Carbon” with “Alkaline”).
4. Do not attempt to charge, short-circuit, disassemble, heat or burn used batteries.
5. Battery replacement is necessary when remote control acts sporadically or stops operating the Plasma Display set.
Connections

AUDIOUT Terminals connection

AC cord connection (see page 12)

– AC cord fixing

1. Plug the AC cord into the display unit. Plug the AC cord until it clicks.
2. Fix the AC cord with the clamper.

Note: Make sure that the AC cord is locked on both the left and right sides.

– Cable fixing bands Secure any excess cables with bands as required.

Pass the attached cable fixing band through the clip as shown in the figure.

To secure cables connected to Terminals, wrap the cable fixing band around them then pass the pointed end through the locking block, as shown in the figure. While ensuring there is sufficient slack in cables to minimize stress (especially in the power cord), firmly bind all cables with the supplied fixing band.

Note: At factory shipment, Terminal boards are installed in SLOT 2 and SLOT 3.
Notes:

• Due to space limitations, occasionally you may have trouble connecting Mini D-sub 15P cable with ferrite core to PC input Terminal.
• Computer signals which can be input are those with a horizontal scanning frequency of 15 to 110 kHz and vertical scanning frequency of 48 to 120 Hz. (However, the image will not be displayed properly if the signals exceed 1,200 lines.)
• The display resolution is a maximum of 1,440 × 1,080 dots when the aspect mode is set to “4:3”, and 1,920 × 1,080 dots when the aspect mode is set to “16:9”. If the display resolution exceeds these maximums, it may not be possible to show fine detail with sufficient clarity.
• The PC input terminals are DDC2B-compatible. If the computer being connected is not DDC2B-compatible, you will need to make setting changes to the computer at the time of connection.
• Some PC models cannot be connected to the set.
• There is no need to use an adapter for computers with DOS/V compatible Mini D-sub 15P terminal.
• The computer shown in the illustration is for example purposes only.
• Additional equipment and cables shown are not supplied with this set.
• Do not set the horizontal and vertical scanning frequencies for PC signals which are above or below the specified frequency range.
• Component Input is possible with the pin 1, 2, 3 of the Mini D-sub 15P Connector.
• To use sync input VBS signals, use the connector which incorporates a 75-ohm termination resistance and which is available on the market, for the connection of the HD connector where the VBS signals are to be input.
• Change the “Component/RGB-in select” setting in the “Setup” menu to “Component” (when Component signal connection) or “RGB” (when RGB signal connection). (see page 39)

SERIAL Terminals connection

The SERIAL terminal is used when the Plasma Display is controlled by a computer.

Notes:
• Use the RS-232C cable to connect the computer to the Plasma Display.
• The computer shown is for example purposes only.
• Additional equipment and cables shown are not supplied with this set.

The SERIAL terminal conforms to the RS-232C interface specification, so that the Plasma Display can be controlled by a computer which is connected to this terminal. The computer will require software which allows the sending and receiving of control data which satisfies the conditions given below. Use a computer application such as programming language software. Refer to the documentation for the computer application for details.

Communication parameters

<table>
<thead>
<tr>

Basic format for control data

The transmission of control data from the computer starts with a STX signal, followed by the command, the parameters, and lastly an ETX signal in that order. If there are no parameters, then the parameter signal does not need to be sent.

Notes:
• If multiple commands are transmitted, be sure to wait for the response for the first command to come from this unit before sending the next command.
• If an incorrect command is sent by mistake, this unit will send an “ER401” command back to the computer.
• SL1A, SL1B, SL2A and SL2B of Command IMS are available only when a dual input terminal board is attached.

**Notes:**
- Additional equipment, cables and adapter plugs shown are not supplied with this set.
- Refer to page 51 for applicable input signal.
- Use the DVI-D cable complying with the DVI standard. Image deterioration may occur depending on the length or the quality of the cable.

**COMPONENT / RGB connection**

![COMPONENT / RGB connection diagram](image)

**Notes:**
- Change the “Component/RGB-in select” setting in the “Setup” menu to “Component” (when Component signal connection) or “RGB” (when RGB signal connection). (see page 39)
- Additional equipment, cables and adapter plugs shown are not supplied with this set.
- Sync on G signal is needed. (see page 42)
Connecting the AC cord plug to the Plasma Display.

Fix the AC cord plug securely to the Plasma Display with the clamper. (see page 8)

Connecting the plug to the Wall Outlet

Notes:
• Main plug types vary between countries. The power plug shown at right may, therefore, not be the type fitted to your set.
• When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.

Press the Power switch on the Plasma Display to turn the set on: Power-On.

Power Indicator: Green

Example: The screen below is displayed for a while after the Plasma Display is turned on (setting condition is an example).

When the Power is turned on for the first time, the Language selection screen is displayed.

From the second time on, language selection can be done from the setup menu. (see page 13)

Select the desired language using the ▲ or ▼ button and press the ACTION ( ) button.

Note: Set with the remote control. Buttons on the main unit are unavailable for this setting.

OFF  Press the OFF button on the remote control to turn the Plasma Display off.

Power Indicator: Red (standby)

ON  Press the ON button on the remote control to turn the Plasma Display on.

Power Indicator: Green

Turn the power to the Plasma Display off by pressing the Ö/1 switch on the unit, when the Plasma Display is on or in standby mode.

Note: During operation of the power management function, the power indicator turns orange in the power off state.
Initial selections

Selecting the input signal

Select the input signals to be connected by installing the optional Terminal Boards.

1. Press to select the input signal to be played back from the equipment which has been connected to the Plasma Display.

   Input signals will change as follows:
   - INPUT1 → INPUT2 → INPUT3 → PC

2. Press the INPUT "1", "2", "3" or "PC" input mode selection button to select the input mode.
   - This button is used to switch directly to INPUT mode.
   - These buttons can only display the slot which is installed. If you press the button whose slot is not installed, it automatically displays the current input signal.
   - When a dual input terminal board is attached, A or B is displayed depending on the selected input signal. (Ex. INPUT1A, INPUT1B)

Notes:
- Selecting is also possible by pressing the INPUT button on the unit.
- Input terminal will not be selected if the terminal board is not installed into the SLOT.
- Select to match the signals from the source connected to the component/RGB input terminals. (see page 39)
- In 2 screen display, the same input mode cannot be selected for the main picture and sub picture.
- Image retention (image lag) may occur on the plasma display panel when a still picture is kept on the panel for an extended period. The function that darkens the screen slightly is activated to prevent image retention (see page 50), but this function is not the perfect solution to image retention.

Selecting the On-Screen Menu Language

1. Press to display the Setup menu.
2. Press to select the OSD Language.
3. Press to select your preferred language.

Basic Controls

Main Unit

Remote control sensor

Power Indicator
The Power Indicator will light.
- Power-OFF ....... Indicator not illuminated
  (The unit will still consume some power as long as the power cord is still inserted into the wall outlet.)
- Standby .......... Red
- Power-ON......... Green
- DPMS ............... Orange (With PC input signal and during operation of PC's screensaver.)

Volume Adjustment
Volume Up "+" Down "−"
When the menu screen is displayed:
"+": press to move the cursor up
"−": press to move the cursor down
(see page 16)

Enter / Aspect button
(see page 16, 18)

MENU Screen ON / OFF
Each time the MENU button is pressed, the menu screen will switch. (see page 16)

INPUT button
(INPUT1, INPUT2, INPUT3 and PC selection)
(see page 13)

Main Power On / Off Switch
**Basic Controls**

**Remote Control Transmitter**

**Standby (ON / OFF) button**
The Plasma Display must first be plugged into the wall outlet and turned on at the power switch (see page 12). Press ON to turn the Plasma Display On, from Standby mode. Press OFF to turn the Plasma Display Off to Standby mode.

**SET UP button**
(see page 16, 17)

**SOUND button**
(see page 16, 17)

**DIRECT INPUT buttons**
Press the INPUT “1”, “2”, “3” or “PC” input mode selection button to select the INPUT mode. (see page 13)

**Channel Adjustment**
This button cannot be used for this model.

**Volume Adjustment**
Press the Volume Up “+” or Down “−” button to increase or decrease the sound volume level.

**OFF TIMER button**
The Plasma Display can be preset to switch to stand-by after a fixed period. The setting changes to 30 minutes, 60 minutes, 90 minutes and 0 minutes (off timer cancelled) each time the button is pressed. When three minutes remain, “OFF TIMER 3” will flash. The off timer is cancelled if a power interruption occurs.

**SURROUND button**
(see page 26)
The surround setting switches on and off each time the SURROUND button is pressed. The benefits of surround sound are enormous. You can be completely enveloped in sound; just as if you were at a concert hall or cinema.

**Status button**
Press the “Status” button to display the current system status.
1. Input label
2. Aspect mode (see page 18)
3. Off timer
   The off timer indicator is displayed only when the off timer has been set.

**R button**
(see page 17)
Press the R button to return to previous menu screen.

**POSITION buttons**

**ACTION button**
Press to make selections.

**POS. /SIZE button**
(see page 19)

**PICTURE button**
(see page 23)

**INPUT button**
(INPUT1, INPUT2, INPUT3 and PC selection)
Press to select INPUT1, INPUT2, INPUT3 and PC input SLOTS sequentially. (see page 13)

**Sound mute On / Off**
(see page 26)

**Numeric buttons**
(see page 36)

**ASPECT button**
Press to adjust the aspect. (see page 18)

**MULTI Window buttons**
(see page 21)

**N button**
(see page 19, 20, 24, 25)

**Digital Zoom**
(see page 27)

**Remote ID lock**
(see page 36)
On-Screen Menu Displays

To Picture adjust menu (see page 23)

The MENU button on the unit can also be pressed.

Press to select “On”.

Press to enter Advanced settings.

To Advanced settings (see page 23, 24)

To Pos. /Size adjust menu (see page 19)

During “Video (S Video)”, “Digital”, “SDI” and “HDMI” input signal.

During “Component”, “RGB” and “PC” input signal.

To Sound adjust menu (see page 25)

When HD-SDI Terminal Board with audio (TY-FB10HD) is installed
### On-Screen Menu Displays

**Note:** Menu that cannot be adjusted is grayout. Adjustable menu changes depending on signal, input and menu setting.

---

**Press to access each adjust screen.**

Press to return to next menu screen.

Press the R button to return to previous menu screen.

Press to select Start Time / Finish Time (When Time Designation is selected).

Press to select Periodic Time / Operating Time (When Interval is selected).

Press to select POWER ON Time / POWER OFF Time.

Press to set up Screensaver (see page 30-32).

Press to return to “Setup” menu.

Press the R button to return to “Setup” menu.
**ASPECT Controls**

The Plasma Display will allow you to enjoy viewing the picture at its maximum size, including wide screen cinema format picture.

**Press repeatedly to move through the aspect options:**

- 4:3 → Zoom → 16:9

**Panasonic Auto ← Just →**

**Notes:**
- When selecting an input slot that attaches BNC Dual Video Terminal Board (TY-FB9BD), Panasonic Auto cannot be selected.
- The aspect mode changes each time the ENTER button is pressed.
- For PC signal input, the mode switches between “4:3”, “Zoom” and “16:9” only.
- For a 1125 (1080) / 60i · 50i · 60p · 24p · 25p · 30p · 24sF, 1250 (1080) / 50i, 750 (720) / 60p · 50p signal input, the mode is set to “16:9” mode, and switching is not possible.
- Panasonic Auto can be selected only during Video signal input.
- The aspect mode is memorized separately for each input terminal.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Picture</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>4:3</td>
<td><img src="https://example.com/43.png" alt="4:3.jpg" /></td>
<td>4:3 will display a 4:3 picture at its standard 4:3 size.</td>
</tr>
<tr>
<td>Zoom</td>
<td><img src="https://example.com/zoom.png" alt="Zoom.jpg" /></td>
<td>Zoom mode magnifies the central section of the picture.</td>
</tr>
<tr>
<td>16:9</td>
<td><img src="https://example.com/169.png" alt="16:9.jpg" /></td>
<td>16:9 will display the picture at its maximum size but with slight elongation.</td>
</tr>
<tr>
<td>Just</td>
<td><img src="https://example.com/just.png" alt="Just.jpg" /></td>
<td>Just mode will display a 4:3 picture at its maximum size but with aspect correction applied to the center of the screen so that elongation is only apparent at the left and right edges of the screen. The size of the picture will depend on the original signal.</td>
</tr>
</tbody>
</table>
| Panasonic Auto | ![Panasonic Auto.jpg](https://example.com/auto.png) | The display will automatically become enlarged (depending on the picture source), allowing you to view the picture at its maximum size. **Notes:**
- Panasonic Auto mode is designed to automatically adjust the aspect ratio to handle a mix of 16:9 and 4:3 program material. Certain 4:3 program material, such as stock market data screens, may occasionally cause the image size to change unexpectedly. When viewing such programs, it is recommended that the ASPECT be set to 4:3.
- If adjusting the Picture V-Pos/V-Size in Panasonic Auto with 16:9 mode, the adjustment is not memorized. When exiting the mode, the screen will return to a former adjustment.
- Panasonic Auto can not be selected while BNC Dual Video Terminal Board (TY-FB9BD) is installed. |

**Note:**
Do not allow the picture to be displayed in 4:3 mode for an extended period, as this can cause a permanent image retention to remain on the Plasma Display Panel.
Adjusting Pos. /Size

1. Press to display the Pos. /Size menu.

2. Press to select Auto Setup / H-Pos / H-Size / V-Pos / V-Size / Dot Clock / Clock Phase / 1:1 Pixel Mode.

3. Press to adjust Pos. / Size.

4. Press to exit from adjust mode.

Notes:
- Unadjustable items are grayed out.
- Adjustable items differ depending on the input signal and the display mode.
- Adjustment details are memorized separately for different input signal formats (Adjustments for component signals are memorized for 525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 1125 (1080) / 60i · 50i · 60p · 50p · 24p · 25p · 30p · 24sF, 1250 (1080) / 50i, 750 (720) / 60p · 50p each, and RGB/PC/Digital signals are memorized for each frequency.)
- If a “Cue” or “Rew” signal from a VCR or DVD player is received, the picture position will shift up or down. This picture position movement cannot be controlled by the Picture Pos./Size function.
- If adjusting the Picture V-Pos/V-Size in Panasonic Auto with 16:9 mode, the adjustment is not memorized. When exiting the mode, the screen will return to a former adjustment.

Helpful Hint (Normalise)
While the Pos. / Size display is active, if either the N button on the remote control is pressed at any time or the ACTION button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.
Adjusting Pos. /Size

Auto Setup  Automatically adjust H-Pos / V-Pos / Clock Phase / Dot Clock and set H-Size / V-Size the standard value when RGB signal is input.

Notes:
• If the dot clock frequency is 162 MHz or higher, Dot Clock cannot be made.
• If the image is that the edge is hardly figured out or shadowy, that cannot be adjusted automatically.
  In such case, press Auto Setup again after changing the image to the clearer one.
• When DVI-D is input, Clock Phase cannot be adjusted automatically.
• Select Normalise in Pos. /Size and press the ACTION ( ) button when appropriate adjustment cannot be made.

H-Pos  Adjust the horizontal position.

H-Size  Adjust the horizontal size.

V-Pos  Adjust the vertical position.

V-Size  Adjust the vertical size.

Dot Clock  (During “Component”, “RGB” and “PC” input signal)
Periodic striped pattern interference (noise) may occur when a striped pattern is displayed. If this happens, adjust so that any such noise is minimized.

Clock Phase  (During “Component”, “RGB” and “PC” input signal)
Eliminate the flickering and distortion.

1:1 Pixel Mode  Adjusts the display size when 1125i, 1125p or 1250i signal is input.

Notes:
• Select On when you would like to replay 1920 × 1080 input signal.
• Applicable input signal;
  1125 / 50i · 60i · 24sF · 24p · 25p · 30p · 50p · 60p , 1250 / 50i
• Select Off when flickering is shown around the image.
• H-Size, V-Size and Dot Clock cannot be adjusted when On is selected.

Helpful Hint ( Normalise Normalisation)
While the Pos. /Size display is active, if either the N button on the remote control is pressed at any time or the ACTION ( ) button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.
MULTI PIP

Press repeatedly. Each time pressing this button main picture and sub picture will be displayed as follows below.

Press to swap main picture and sub picture.

Press to select the input mode. Under main Picture and sub picture display, select the picture which you would like to change input modes.

**Notes:**
- The sub picture sound is heard while a sub picture operation is underway.
- The sub picture operation automatically returns to the main picture operation if a sub picture operation has not been performed for about 5 seconds or if any of the remote control buttons is pressed (except button).

Press to change input signal.

Press to move the sub picture. Each time the location of the sub picture will be moved.

**Notes:**
- This button is effective only in the picture in picture.
- The sub picture may be hidden by the on screen display, depending on its position.

**Notes:**
- If “INPUT lock” in Options menu is set to other than “Off”, MULTI PIP function isn’t available.
- Sound output is from the picture which is selected in Audio OUT (PIP) (see page 25).
- In 2 screen display, the same input mode cannot be selected for the main picture and sub picture.
- The main picture and sub picture are processed by different circuits, resulting in a slight difference in the clarity of the pictures. There may also be a difference in the picture quality of the sub picture depending on the type of signals displayed on the main picture and depending on the 2-picture display mode.
- Due to the small dimensions of the sub pictures, these sub pictures cannot be shown in detail.
- Computer screen picture is displayed in a simplified format, and it may not be possible to discern details on them satisfactorily.
- Following combinations of two analog signals cannot be displayed simultaneously: Component - Component, Component - PC (RGB), PC (RGB) - Component, PC (RGB) - PC (RGB)
Advanced PIP

1. SET UP Press to display the Setup menu.

2. Press to select “OSD Language”.

3. Press and hold until the Options menu is displayed.

4. Press to select Advanced PIP.

5. Press to adjust the menu.
   - Off: Sets normal two screen display mode (see page 21).
   - On: Sets Advanced PIP mode.

6. Press repeatedly.
   - (When Advanced PIP is On)
   - Each time pressing this button main picture and sub picture will be displayed as above.

7. MULTI PIP

   Notes:
   - To use buttons for the screen operations, follow the procedures in the previous page.

Notes:
- If “INPUT lock” in Options menu is set to other than “Off”, MULTI PIP function isn’t available.
- Sound output is from the picture which is selected in Audio OUT (PIP) (see page 25).
- In 2 screen display, the same input mode cannot be selected for the main picture and sub picture.
- The main picture and sub picture are processed by different circuits, resulting in a slight difference in the clarity of the pictures. There may also be a difference in the picture quality of the sub picture depending on the type of signals displayed on the main picture and depending on the 2-picture display mode.
- Due to the small dimensions of the sub pictures, these sub pictures cannot be shown in detail.
- Computer screen picture is displayed in a simplified format, and it may not be possible to discern details on them satisfactorily.
- Following combinations of two analog signals cannot be displayed simultaneously; Component - Component, Component - PC (RGB), PC (RGB) - Component, PC (RGB) - PC (RGB)
- Refer to each board’s operating instruction for DVI, SDI, HDMI’s corresponding signals.
Picture Adjustments

1. Press to display the Picture menu.

2. Select to adjust each item.

   - Press to select the menu to adjust.
   - Select the desired level by looking at the picture behind the menu.

   **Note:**
   Menu that cannot be adjusted is grayout. Adjustable menu changes depending on signal, input and menu setting.

---

**Normal**
For viewing in standard (evening lighting) environments. This menu selects the normal levels of Brightness and Contrast.

**Dynamic**
For viewing in brighter environments. This menu selects higher than normal levels of Brightness and Contrast.

**Cinema**
Ideal for movies.

**Super Cinema**
Displays velvety picture.

**Helpful Hint (Normalise Normalisation)**
While the “Picture” menu is displayed, if either the N button on the remote control is pressed at any time or the ACTION ( ) button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.

<td>Less More</td>
<td>Adjusts the white balance for dark blue areas.</td>
</tr>
</tbody>
</table>

Notes:
- Carry out “W/B” adjustment as follows.
  1. Adjust the white balance of the bright sections using the “W/B High R”, “W/B High G” and “W/B High B” settings.
  2. Adjust the white balance of the dark sections using the “W/B Low R”, “W/B Low G” and “W/B Low B” settings.
  3. Repeat steps 1 and 2 to adjust.
Steps 1 and 2 affect each other’s settings, so repeat each step in turn to make the adjustment.
- The adjustment values are memorized separately for each input terminal.
- The adjustment range values should be used as an adjustment reference.

Helpful Hint (N / Normalise Normalisation)
On the remote control unit, while the “Advanced settings” menu is displayed, if either the N button is pressed at any time or the ACTION (■) button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.
Sound Adjustment

1. **Press to display the Sound menu.**

2. **Select to adjust each item.**

   - **Bass** Adjusts low pitch sounds
   - **Mid** Adjusts normal sounds
   - **Treble** Adjusts high pitch sounds
   - **Balance** Adjusts left and right volumes
   - **Surround** Select On or Off

![Sound Adjustment Menu]

Press to select the menu to adjust.

Select the desired level by listening to the sound.

**Helpful Hint (Normalise)**

While the “Sound” menu is displayed, if either the N button on the remote control is pressed at any time or the ACTION button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.
Sound Adjustment

SDI Sound Output

This menu is displayed when HD-SDI Terminal Board with audio (TY-FB10HD) is installed to the unit.

<table>
<thead>
<tr>
<th>Item</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Left Channel</td>
<td>Channel 1 to Channel 16  &lt;br&gt; Selects left audio channel.</td>

</tr>
</tbody>
</table>

Notes:
• This menu is available only when selecting a slot that HD-SDI Terminal Board with audio (TY-FB10HD) is installed.
• This menu is unavailable when 2-picture display mode is active.

SURROUND

Press the SURROUND button to directly turn the surround effect On and Off. The benefits of surround sound are enormous. You can be completely enveloped in sound; just as if you were at a concert hall or cinema.

Mute

Useful when answering the phone or receiving unexpected visitors.

Press to mute the sound. Press again to reactivate sound. Sound is also reactivated when power is turned off or volume level is changed.
Digital Zoom

This displays an enlargement of the designated part of the displayed image.

1 Display the operation guide.

Press to access Digital Zoom. The operation guide will be displayed.

During Digital Zoom, only the following buttons can be operated.

[Remote control]
- POSITION / ACTION button
- VOL button
- MUTE button
- SURROUND button
- OFF TIMER button

[Unit]
- VOL button

2 Select the area of the image to be enlarged.

Press on the enlargement location to select. The cursor will move.

3 Select the magnification required for the enlarged display.

Each time this is pressed, the magnification factor changes. This is shown in the image being displayed.

4 Return to normal display (quit Digital Zoom).

Press to exit from the Digital Zoom.

Notes:
- When power goes OFF (including “Off Timer” operation), Digital Zoom terminates.
- The Digital Zoom function cannot be selected while in the following operation state:
  “Multi-viewer” (Picture in Picture, Picture out Picture, Picture and Picture) operation. (see page 21)
  When MULTI DISPLAY Setup is On (see page 34).
  When Portrait Setup is On (see page 37).
  When Screensaver (White bar scroll) is running (see page 30).
- While Digital Zoom is in operation, “Adjusting Pos. / Size” cannot be used.
PRESENT TIME Setup / Set up TIMER

The timer can switch the Plasma Display On or Off.

Before attempting Timer Set, confirm the PRESENT TIME and adjust if necessary. Then set POWER ON Time / POWER OFF Time.

1. **SET UP**
   - Press to display the Setup menu.

2. Press to select Set up TIMER or PRESENT TIME Setup.

   - Press to display the Set up TIMER screen or PRESENT TIME Setup screen.

PRESENT TIME Setup

Display the PRESENT TIME Setup screen.

To setup DAY and PRESENT TIME, follow the procedure described below.

1. **Pressure HOLD**
   - Press to select DAY or PRESENT TIME.

   - Press to setup DAY or PRESENT TIME.

   - button: Forward
   - button: Back

   **Notes:**
   - Pressing “” or “” button once changes PRESENT TIME 1 minute.
   - Pressing “” or “” button continuously changes PRESENT TIME by 15 minutes.

2. **Press to select Set.**

   - Press to store PRESENT TIME Setup.

   **Notes:**
   - Set cannot be selected unless PRESENT TIME is set.
   - Unless setting the present time other than “99:99”, DAY setting is invalid.

3. **SET UP**
   - Press to exit from PRESENT TIME Setup.
Set up TIMER

Display the Set up TIMER screen.

1. Press to select POWER ON Time / POWER OFF Time.
   Press to setup POWER ON Time / POWER OFF Time.
   ▶ button: Forward
   ◄ button: Back

   Notes:
   • Pressing “◄” or “►” button once changes POWER ON Time / POWER OFF Time 1 minute.
   • Pressing “◄” or “►” button continuously changes POWER ON Time / POWER OFF Time by 15 minutes.

2. Press to select POWER ON Function/POWER OFF Function.
   Press to select On.

3. Press twice to exit from Setup.

Note:
Timer function will not work unless “PRESENT TIME” is set.
Screensaver (For preventing image retention)

Do not display a still picture, especially in 4:3 mode, for any length of time. If the display must remain on, a Screensaver should be used.

1. Press to display the Setup menu.
2. Press to select Screensaver.
3. Press to display Screensaver screen.

3 Reversal / Scroll selection

Press to select Function.
Press to select the desired function.
White bar scroll ➝ Image Reversal
White bar scroll : The white bar will scroll from left to right.
Image Reversal : Negative image will be displayed on the screen.

4 Mode selection

Press to select Mode.
Press to select each mode items.
Interval : Operates when Periodic Time and Operating Time are setup and those times arrive.
Time Designation : Operates when Start Time and Finish Time are setup and those times arrive.
On : Operates when Start is selected and the ACTION ( ) button is pressed.

5 Start setting

When the Mode is set to On, press to select Start.
Press to start Screensaver.
The menu screen will disappear and the Screensaver will be activated. To stop the Screensaver under On, press the R button or any buttons on the main unit.
Note: When the display is turned off, the Screensaver will be deactivated.
Setup of Screensaver Time

After selecting Time Designation or Interval, the relevant Time Setup will become available for selection and the Operating Time may be set. (Time cannot be set when “Mode” is “On” or “Off”.)

Press to select Start Time / Finish Time (When Time Designation is selected).
Press to select Periodic Time / Operating Time (When Interval is selected).

Notes:
- Pressing “<” or “>” button once changes the Time 1 minute.
- Pressing “<” or “>” button continuously changes the Time by 15 minutes.

Note: Timer function will not work unless “PRESENT TIME” is set.

Reduces screen image retention

These functions prevent the occurrence of an “image retention” on the display when turned ON.

Wobbling: Automatically shifts the display image (therefore unnoticeable to the eye) to prevent image retention of sharper contour of image.
- On1: Shifts the image every 30 seconds.
- On2: Shifts the image at a dot level pitch depending on screen-detection.

Peak limit: Suppresses image contrast (peak brightness).

Note: When a still picture is viewed for an extended time, the screen may become slightly darker. (see page 50)

1. SET UP
Press to display the Setup menu.

2. Press to select “Screensaver”.
Press to display Screensaver menu.
Press to select “Wobbling” or “Peak limit”.

Press to select “On1”, “On2” or “Off” (Wobbling). “On” or “Off” (Peak limit).
**Screensaver (For preventing image retention)**

**Side Panel Adjustment**

Do not display a picture in 4:3 mode for an extended period, as this can cause an image retention to remain on the side panels either side of the display field. To reduce the risk of such an image retention, illuminate the side panels.

This function may be applicable to the non-picture area.

Display the Screensaver screen. (Refer to the previous page, operation guide steps 1 and 2)

1. Press to select Side panel.
   Press to select Off, Low, Mid, High.
   \[\text{Off} \leftrightarrow \text{Low} \leftrightarrow \text{Mid} \leftrightarrow \text{High} \]

2. Press to exit from Screensaver.

**Notes:**
- To reduce the occurrence of image retention, set the Side panel to High.
- The side panels may flash (alternate black / white) depending on the picture being shown on the screen. Using Cinema mode will reduce such flashing.
Reduces power consumption

- **Power save**: When this function is turned On, luminous level of the Plasma Display is suppressed, so power consumption is reduced.
- **Standby save**: When this function is turned On, power consumption of the microcomputer is reduced during power supply standby (see page 12, 14-15), so standby power of the set is reduced.
- **Power management**: The unit power supply is turned On or Off depending on whether or not there is a signal during PC input mode.
  This function is enabled when it is turned On. (Only during input from PC (Mini D-sub) terminal)
- **Auto power off**: Equipment power supply is turned Off when there is no signal.
  When this is set to On, the power supply of the unit goes Off 10 minutes after the input signals stop.
  This function is effective for input signals except input from PC (Mini D-sub) terminal.

1. Press to select “Power save”
   “Standby save”
   “Power management”
   “Auto power off”.

2. Press to select “On” or “Off”.
   On ← Off

3. SET UP Press to exit from Setup.

**Note:**
“Power management” and “Auto power off” are effective during normal viewing (one picture screen) only.

Customizing the Input labels

This function can change the label of the Input signal to be displayed.
Select the input signal which you would like to change its label before customizing the Input labels. (see page 13, 15)

Press to select Input label.
Press to change the Input label.

**Note:**
While selecting an Input signal through Optional Terminal Board connected to Slot1, Slot2 and Slot3, the Input label will depend on each Optional Terminal Board.

Input labels for Slot1, Slot2, Slot3 and Mini D-sub:
- [Slot1 Input] INPUT1 / VIDEO1 / COMPONENT1 / RGB1 / DIGITAL1 / PC1 / DVD1 / CATV1 / VCR1 / STB1
- [PC (Mini D-sub) input] PC / COMPONENT / RGB / DVD / STB

When BNC Dual Video Terminal Board (TY-FB9BD) is used, an “A” or “B” is added at the end of each input label, depending on the input selected (see below).

<table>
<thead>
<tr>
<th>Addition sign</th>
<th>“A”</th>
<th>“B”</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>
Setup for MULTI DISPLAY

By lining up Plasma Displays in groups, for example, as illustrated below, an enlarged picture may be displayed across all screens. For this mode of operation, each plasma display has to be set up with a Display number to determine its location.

(Example)

<table>
<thead>
<tr>
<th>Group Size</th>
<th>Layout</th>
</tr>
</thead>
<tbody>
<tr>
<td>4 x 4</td>
<td>group of 16 (4 x 4)</td>
</tr>
<tr>
<td>3 x 3</td>
<td>group of 9 (3 x 3)</td>
</tr>
<tr>
<td>2 x 2</td>
<td>group of 4 (2 x 2)</td>
</tr>
<tr>
<td>5 x 5</td>
<td>group of 25 (5 x 5)</td>
</tr>
</tbody>
</table>

(see page 35 for more displays lineups.)

How to Setup MULTI DISPLAY

1. Press to display the Setup menu.

2. Press to select the MULTI DISPLAY Setup.

3. Press to select the MULTI DISPLAY Setup.
   - Press to select “On” or “Off”.

   **Note:**
   If you set MULTI DISPLAY Setup to On, Portrait Setup will be unavailable.
How to set the display location number for each Plasma Display

4. Press to select Horizontal Scale.
   Press to select “× 1”, “× 2”, “× 3”, “× 4”, “× 5”.

5. Press to select Vertical Scale.
   Press to select “× 1”, “× 2”, “× 3”, “× 4”, “× 5”.

6. Press to select Seam hides video.
   Press to select “Off” or “On”.

   To hide joints between displays.
   Suitable for moving image display.
   Ex: Example

   To show joints between displays.
   Suitable for still image display.
   On

7. Press to select Location.
   Press to select the required arrangement number. (A1-E5 : Refer to the following)

Display Number locations for each arrangement.
(Examples)  

(2 × 1) | (2 × 3) | (4 × 2) | (4 × 4) | (5 × 5)
--- | --- | --- | --- | ---
A1 A2 | A1 A2 A3 A4 | A1 A2 A3 A4 | A1 A2 A3 A4 A5 | B1 B2 B3 B4 B5
C1 C2 | C1 C2 C3 C4 | C1 C2 C3 C4 | C1 C2 C3 C4 | D1 D2 D3 D4 D5

Picture menu: Colour, Hue

9  ID Remote Control Function

You can set the remote control ID when you want to use this remote control on one of several different displays.

1  Switch to on the right side.

2  Press the button on the remote control.

3  Press one of 1-9, 0 for the tens digit setting.

4  Press one of 1-9, 0 for the units digit setting.

Notes:
• The numbers in 2, 3 and 4 should be set up quickly.
• Adjustable ID number range is 0 - 99.
• If a number button is pressed more than two times, the first two numbers become the ID number for the remote control.

ID remote control button operation

The operation is the same as normal remote control except for the button.

ID Cancellation

Press button on remote control. (This has the same effect as pressing the C, 0, 0 buttons at the same time.)

Notes:
• Set the Remote ID “On” to operate the ID remote control.
  If remote ID is set to “On”, you can use the remote control without identical ID number during option menu display. (see page 45)
• The ID remote control cannot be used when ID select is set to anything other than 0, and the remote control ID is not the same as the ID select number (see page 45).
**Set up for Portrait**

Divide an input image into 3 parts, and display one of them to a plasma display which is set vertically. The image will be enlarged 3 times and rotated 90-degree.

(Example)

**Note:**
When using the Portrait function with displays set vertically, “V.Installation” in Options menu has to be set to “On” (see page 46).

**How to setup Portrait**

1. Press to display the Setup menu.
2. Press to select the Portrait Setup.
3. Press to display the “Portrait Setup” menu.
4. Press to select Seam hides video.
   - **Note:** If you set Portrait Setup to On, MULTI DISPLAY Setup will be unavailable.

**Press to select “On” or “Off”**.

**Press to select Seam hides video.**
- **To hide joints between displays.**
  - Suitable for moving image display.
  - On
- **To show joints between displays.**
  - Suitable for still image display.
  - Off
Set up for Portrait

5 Viewing Area / Location

Viewing Area: Set a mode of image division for Portrait function.
Location: Set a location of image to be displayed for Portrait function.

Press to select Viewing Area or Location.
Press to select each functions.

Notes:
• When the input signal is 16:9, Viewing Area is fixed to “16:9”.
• When “Viewing Area” is “16:9”, the aspect mode is set to “16:9”.

Location setting

When Portrait Setup is “On”:
Display the image of the selected location.

When Portrait Setup is “Off”:
Represent an area of the selected Location at a normal brightness and darken the rest of it.

Viewing Area and Location

The mode of image division and the Location by setting of Viewing Area is as follows.

Viewing Area: 16:9

Suitable to display 16:9 images. 4:3 images extend transversely.
Both right and left sides of the image are cut by 48 dots.

Viewing Area: 4:3

4:3 images are displayed without changing aspect ratio.
Although the images of each Location overlap, you can adjust Pos. / Size to display the image normally. (see page 19)

6 Al-synchronization

Adjust to equalize the brightness of the 3 displays when using Portrait setting.

Press to select Al-synchronization.
Press to select “Off”, “On”.

The brightness depends on each display’s setting.
Equalize the brightness of all the displays.

Off
On

Note:
If you set Al-synchronization to On, the following menus will be unavailable and these settings will be fixed to the initial values.
Picture menu: Colour, Hue

7

Press twice to exit from Setup.
Setup for Input Signals

Component / RGB-in select

Select to match the signals from the source connected to the Component / RGB input terminals.
Y, Pb, Pr signals => “Component”
R, G, B, HD, VD signals => “RGB”

1. Press to display the Setup menu.

2. Press to select the “Component / RGB-in select”.
Press to select the desired input signal.
Component <--> RGB

3. Press to exit from adjust mode.

Note:
Selection may not be possible, depending on which optional board is installed.

3D Y/C Filter – For NTSC AV images

Select “Signal” from the “Setup” menu during AV(S Video) input signal. (“Signal [AV]” menu is displayed.)

1. Press to select the “3D Y/C Filter (NTSC)”
Press to set On / Off.

2. Press to exit from adjust mode.

Note:
When On, this setting only affects NTSC input signals.
Setup for Input Signals

P-NR / Block NR / Mosquito NR

**P-NR:** Automatically reduces unwanted picture noise.

**Block NR:** Reduces block noise when playing MPEG videos.

**Mosquito NR:** Reduces mosquito noise around subtitles on MPEG videos.

*Note:* P-NR cannot be adjusted while a PC signal is being applied.

1. **Press to select P-NR, Block NR or Mosquito NR.**
   - Press to select “Off”, “Min”, “Mid”, “Max”.

2. **Press to exit from adjust mode.**

**Press ACTION button**

---

**P-NR / Block NR / Mosquito NR**

  - V-Freq.: 60.0 Hz
Colour system / Panasonic Auto

Select Signal from the “Setup” menu during AV(S Video) input signal. (“Signal [AV]” menu is displayed.)

Press to select each functions.

If the picture image becomes unstable:
With the system set on Auto, under conditions of low level or noisy input signals the image may in rare cases become unstable. Should this occur, set the system to match the format of the input signal.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colour system</td>
<td>Set the colour system to match the input signal. When selecting “Auto”, the colour system is automatically selected from NTSC/PAL/SECAM, however, M.NTSC signal is not displayed properly depending on the attached terminal board. To display M.NTSC signal, select “M.NTSC” in Colour system.</td>
</tr>
<tr>
<td>Panasonic Auto (4 : 3)</td>
<td>Set to “4 : 3” to view 4:3 images in an unchanged format when Panasonic Auto is selected. If you would like to view 4:3 images in Just format, set to “Just”.</td>
</tr>
</tbody>
</table>

Note:
Panasonic Auto does not function when BNC Dual Video Terminal Board (TY-FB9BD) is used.

Cinema reality

Cinema reality:
When on, the display attempts to reproduce a more natural interpretation of sources such as movie pictures, which are recorded at 24 frames per second. If the picture is not stable, turn the setting to off.

Note:
When On, this setting only affects the following signal input:
• NTSC / PAL signal input during “AV(S Video)” input signal.
• 525i(480i), 625i(575i), 1125(1080) / 60i signal input during “Component” input signal.

Press to select Cinema reality.
Press to set On / Off.

Press to exit from adjust mode.
Sync

Select Signal from the “Setup” menu during RGB input signal.

1

Press to adjust.

2

Press to exit from adjust mode.

Setting RGB sync signal:

Confirm that the input is set to RGB input (this setting is valid only for RGB input signal).

Auto: The H and V sync or synchronized signal are automatically selected. If both input, it is selected the H and V sync.

on G: Uses a synchronized signal on the Video G signal, which is input from the G connector.

VBS: Uses a synchronized signal of Composite Sync input, which is input from the HD connector.

H-Freq. (kHz) / V-Freq. (Hz)

Displays the H (Horizontal) / V (Vertical) frequencies.

This display is valid only for RGB / PC and Digital input signal.

Display range:

<p>| | |</p>

| **Off-timer function** | Enable/Disable | **Enable:** Enables the “Off-timer function”.  
**Disable:** Disables the “Off-timer function”.  
**Note:** When “Disable” is set, the Off-timer is cancelled. |
| **Initial Power Mode** | Normal/Standby/On | **Normal:** Sets the power mode of the unit for when the power recovers from failure or after plugging off and in again.  
**Standby:** Power returns in standby mode. (Power Indicator: red/orange)  
**On:** Power returns in power on. (Power Indicator: green)  
**Note:** When using multiple displays, “Standby” is preferred to be set in order to reduce a power load. |
| **ID select** | &nbsp; | Sets panel ID number when panel is used in “Remote ID” or “Serial ID”.  
**Set value range:** 0 - 100  
(Standard value: 0) |
| **Remote ID** | Off/On | **Off:** Disables ID remote control functions. You can use normal remote control operations.  
**On:** Enable ID remote control functions. |
| **Serial ID** | Off/On | **Off:** Disables external control by the ID.  
**On:** Enables the external control by the ID. |
| **Display size** | Off/On | Adjusts the image display size on screen.  
**Off:** Sets the normal image display size on screen.  
**On:** Sets the image display size approximately 95% of the normal image display.  
**Notes:**  
• This setting is valid only when the input signals are as follows:  
NTSC, PAL, SECAM, M,NTSC, PAL60, PAL-M, PAL-N (BNC Dual Video Terminal Board (TY-FB9BD))  
525i, 525p, 625i, 625p, 750/60p, 750/50p, 1125/60i, 1125/50i, 1125/24sf, 1125/25p, 1125/24p, 1125/30p, 1125/60p, 1250/50i (Component Video, RGB, DVI, SDI, HDMI)  
• This setting is invalid when two screen display, digital zoom, Multi display or Portrait display is selected.  
• When “Display size” is set to “On”, “H-Pos” and “V-Pos” in “Pos./Size” can be adjusted.  
• Refer to each board’s operating instruction for DVI, SDI, HDMI’s corresponding signals. |
| **Studio W/B** | Off/On | **Off:** Nullify all the settings adjusted.  
**On:** Sets the colour temperature for TV studio.  
**Note:** Valid only when the low is set as colour temperature on screen adjustment. |
| **Studio Gain** | Off/On | Sharpens the contrast for a better view when a part of the image is too light to see.  
**Off:** Disables “Studio Gain”.  
**On:** Enables “Studio Gain”.  
**Note:** This setting is valid only when the input signals are as follows:  
Component Video, RGB (analog), SDI, HDMI |
## Options Adjustments

<table>
<thead>
<tr>
<th>Item</th>
<th>Effect</th>
<th>Adjustments</th>
</tr>
</thead>
</table>
| Slot Power       | Off → Auto → On | **Off:** Power is not transmitted to the slot power.  
**Auto:** Power is transmitted to the slot power only when main power is on.  
**On:** Power is transmitted to the slot power when main power is on or in the standby state.  
**Note:** In some cases, power is transmitted to the slot power when main power is on or in the standby state regardless of the slot power setting. |
| Power On Screen Delay | Off → 1 → 2 → 3... → 30 | **Off:** The display will be turned on at the same time as the power button is pressed.  
**1 to 30 (sec.)** Set the power-on delay time (second).  
**Note:** During this function is working, the power indicator is blinking green.  
This function also works when the power recovers from failure or after plugging off and in again the power cord.  
After you unplug and plug the power cord in while the unit is in standby mode and also the power is being supplied to a terminal board, the unit will start supplying the power to the board with time delay according to the setting.  
The power indicator lights up red first and it turns orange when the power starts being supplied to the board. |
| V. Installation  | Off → On | **Off:** Sets fan to the horizontal installation mode.  
**On:** Sets fan to the vertical installation mode.  
**Note:** If the display is installed vertically, the power switch should be located at the bottom. |
| Rotate           | Off → On | **Off:** Does not rotate the image.  
**On:** Rotates the image 180 degrees. |
| Serial Slot Select | Off → Slot 1 → Slot 2 → Slot 3 | **Slot 1** ↔ **Slot 2** ↔ **Slot 3**  
Selects the slot which communicates serial.  
**Note:** The setting of an external command can be set only from the fixed serial terminal. (see page 10) |

### Normalization

When both main unit buttons and remote control are disabled due to the “Button lock”, “Remocon User level” or “Remote ID” adjustments, set all the values “Off” so that all the buttons are enabled again.

Press the ▼ button on main unit together with R button on the remote control and hold for more than 5 seconds.  
The “SHIPPING” menu is displayed and the lock is released when it disappears.
**Weekly Command Timer**

You can set 7-day timer programming by setting time and command.

**Note:**
Before setting Weekly Command Timer, set PRESENT TIME Setup. (see page 28)

1. Press to select Function.
   - Press to select “On”.
   **Note:**
   - When Function is set to On, Set up TIMER (see page 29) is unavailable and Interval / Time Designation in Mode of Screensaver (see page 30) cannot be selected.

2. Press to select a day.
   - Press to select a program number.
   **Note:**
   - You can set the program from 1 to 7.
   --- indicates unset.

3. Press to select Program Edit.
   - Press to show the Program Edit screen.

4. Press to select Program.
   - Press to change the program numbers (1-7).

7

Press to select Time / Command.
Press to set each item.
Time: Set the time to execute a command program.
Pressing “<” or “>” button once changes “Time” 1 minute.
Pressing “<” or “>” button continuously changes “Time” by 15 minutes.
Command: Select a command to execute at the set time. This unit has 64 commands to set. (see page 52)

Notes:
- Command is performed in order of execution time, regardless of the command number.
- If a command execution time overlaps with that of other commands, these commands are performed in number order.
- Pressing Time becomes --:-- and Command becomes ---.

Note:
- Press to return to the previous screen.
Shipping condition

This function allows you to reset the unit to the factory setting.

1. Press to display the Setup menu.

2. Press to select “OSD Language”.

3. Press and hold till the SHIPPING menu is displayed.

4. Press to select “YES”.

[from the unit]

1. Press the MENU button till the Setup menu is displayed.
2. Press the Volume Up “+” or Down “–” button to select “OSD Language”.
3. Press and hold the ENTER button till the SHIPPING menu is displayed.
4. Press the Volume Up “+” or Down “–” button to select “YES”.
5. Press the ENTER button and wait for 10 sec.

Note:
Press the R button to return to Setup menu when SHIPPING menu is displayed.
## Troubleshooting

Before you call for service, determine the symptoms and make a few simple checks as shown below.

<table>
<thead>
<tr>
<th>Symptoms</th>
<th>Sound</th>
<th>Checks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interference</td>
<td>Noisy Sound</td>
<td>Electrical Appliances, Cars / Motorcycles, Fluorescent light (Check whether the mute function has been activated on the remote control.)</td>
</tr>
<tr>
<td>Normal Picture</td>
<td>No Sound</td>
<td>Volume (Check whether the mute function has been activated on the remote control.)</td>
</tr>
<tr>
<td>?</td>
<td>No Sound</td>
<td>Not plugged into AC outlet, Not switched on Picture and Brightness/Volume setting (Check by pressing the power switch or stand-by button on the remote control.)</td>
</tr>
<tr>
<td>?</td>
<td>Normal Sound</td>
<td>If a signal with a non-applicable colour system format, or frequency is input, only the input terminal indication is displayed.</td>
</tr>
<tr>
<td>No Colour</td>
<td>Normal Sound</td>
<td>Colour controls set at minimum level (see page 23, 24) Colour system (see page 41)</td>
</tr>
<tr>
<td>No remote control operations can be performed.</td>
<td></td>
<td>Check whether the batteries have discharged completely and, if they have not, whether they were inserted properly. Check whether the remote control sensor is exposed to an outdoor light or a strong fluorescent light. Check whether the remote control designed specifically for use with the unit is being used. (The unit cannot be operated by any other remote control.)</td>
</tr>
<tr>
<td>A cracking sound is sometimes heard from the unit.</td>
<td></td>
<td>If there is nothing wrong with the picture or sound, this is the sound of the cabinet undergoing very slight contractions in response to changes in the room temperature. There are no adverse effects on the performance or other aspects.</td>
</tr>
<tr>
<td>The top or bottom of the picture on the screen is cut off when I use the zoom function.</td>
<td></td>
<td>Adjust the position of the picture on the screen.</td>
</tr>
<tr>
<td>Areas at the top and bottom of the screen where the image is missing appear when I use the zoom function.</td>
<td></td>
<td>When using a video software program (such as a cinema size program) with a screen wider than one in the 16:9 mode, blank areas separate from the images are formed at the top and bottom of the screen.</td>
</tr>
<tr>
<td>I can hear sounds coming from inside the unit.</td>
<td></td>
<td>When the power is turned on, a sound of the display panel being driven may be heard: This is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>This Plasma Display uses special image processing. Hence a slight time lag may occur between image and audio, depending on the type of input signal. However, this is not a malfunction.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Plasma Display panel

<table>
<thead>
<tr>
<th>Symptoms</th>
<th>Check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The screen darkens slightly when bright pictures with minimal movements are shown.</td>
<td>The screen will darken slightly when photos, still images of a computer or other pictures with minimal movements are shown for an extended period. This is done to reduce image retention on the screen and the shortening of the screen’s service life: It is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>It takes a while for the picture to appear.</td>
<td>The unit digitally processes the various signals in order to reproduce esthetically pleasing images. As such, it sometimes takes a few moments for the picture to appear when the power has been turned on, when the input has been switched or when the images for the main picture and sub picture on the two screens are swapped.</td>
</tr>
<tr>
<td>The edges of the images flicker.</td>
<td>Due to the characteristics of the system used to drive the panel, the edges may appear to flicker in the fast-moving parts of the images: This is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>The brightness on both sides of images in the 4:3 mode changes.</td>
<td>When viewing the side panels at the “High” or “Mid” setting, the brightness on both sides may change depending on the kind of program shown: This is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>Some parts of the screen do not light up.</td>
<td>The plasma display panel is manufactured using an extremely high level of precision technology, however, sometimes some parts of the screen may be missing picture elements or have luminous spots. This is not a malfunction.</td>
</tr>
</tbody>
</table>

**Image retention appears**

Do not allow a still picture to be displayed for an extended period, as this can cause a permanent image retention to remain on the Plasma Display. Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.

**Note:**

The permanent after-image on the Plasma Display resulting from fixed image use is not an operating defect and as such is not covered by the Warranty. This product is not designed to display fixed images for extended periods of time.

**Whirring sounds can be heard from the display unit.**

The display unit is fitted with a cooling fan to dissipate heat generated during normal use. The whirring sound is caused by rotation of the fan and is not a malfunction.
### DVI-D/COMPONENT/RGB/PC input signals

**Notes:**
- Design and specifications are subject to change without notice. Mass and dimensions shown are approximate.
- This equipment complies with the EMC standards listed below.
- EN55022, EN55024, EN61000-3-2, EN61000-3-3.
Information on Disposal for Users of Waste Electrical & Electronic Equipment (private households)

This symbol on the products and/or accompanying documents means that used electrical and electronic products should not be mixed with general household waste.

For proper treatment, recovery and recycling, please take these products to designated collection points, where they will be accepted on a free of charge basis. Alternatively, in some countries you may be able to return your products to your local retailer upon the purchase of an equivalent new product.

Disposing of this product correctly will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling. Please contact your local authority for further details of your nearest designated collection point.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

For business users in the European Union

If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union

This symbol is only valid in the European Union.

If you wish to discard this product, please contact your local authorities or dealer and ask for the correct method of disposal.

Customer’s Record

The model number and serial number of this product can be found on its rear panel. You should note this serial number in the space provided below and retain this book, plus your purchase receipt, as a permanent record of your purchase to aid in identification in the event of theft or loss, and for Warranty Service purposes.
