The illustration shown is an image.
Before connecting, operating or adjusting this product, please read these instructions completely.
Please keep this manual for future reference.
Important Safety Instructions

WARNING
1) To prevent damage which may result in fire or shock hazard, do not expose this appliance to dripping or splashing.
   Do not place containers with water (flower vase, cups, or cosmetics, etc.) above the set. (including on shelves above, etc.)
   No naked flame sources, such as lighted candles, should be placed on / above the set.
2) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.

CAUTION
This appliance is intended for use in environments which are relatively free of electromagnetic fields. Using this appliance near sources of strong electromagnetic fields or where electrical noise may overlap with the input signals could cause the picture and sound to wobble or cause interference such as noise to appear.
To avoid the possibility of harm to this appliance, keep it away from sources of strong electromagnetic fields.

IMPORTANT INFORMATION
If a display is not positioned in a sufficiently stable location, it can be potentially hazardous due to falling. Many injuries, particularly to children, can be avoided by taking simple precautions such as:
• Using cabinets or stands recommended by the manufacturer of the display.
• Only using furniture that can safely support the display.
• Ensuring the display is not overhanging the edge of the supporting furniture.
• Not placing the display on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the display to a suitable support.
• Not standing the displays on cloth or other materials places between the display and supporting furniture.
• Educating children about the dangers of climbing on furniture to reach the display or its controls.
Such information should also be provided as a label on the apparatus.

Trademark Credits
• VGA is a trademark of International Business Machines Corporation.
• Macintosh is a registered trademark of Apple Computer, USA.
• VGA, SVGA, and XGA are registered trademarks of the video Electronics Standard Association.
   Even if no special notation has been made of company or product trademarks, these trademarks have been fully respected.

Note:
Do not allow a still picture to be displayed for an extended period, as this can cause a permanent image retention to remain on the LCD Display.
Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.
Where the MAINS plug or an appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable.
Dear Panasonic Customer

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new LCD Display.

To obtain maximum benefit from your set, please read these Instructions before making any adjustments, and retain them for future reference.

Retain your purchase receipt also, and note down the model number and serial number of your set in the space provided on the rear cover of these instructions.

Visit our Panasonic Web Site http://panasonic.net

Safety Precautions

⚠️ CAUTION

This LCD Display is for use only with the following optional accessories. Use with any other type of optional accessories may cause instability which could result in the possibility of injury.

(All of the following accessories are manufactured by Panasonic Corporation.)

- Wall-hanging bracket (angled) ..........................................................TY-WK32TM1
- Wall-hanging bracket ................................................................TY-WK32TM2

Always be sure to ask a qualified technician to carry out set-up.

Small parts can present choking hazard if accidentally swallowed. Keep small parts away from young children. Discard unneeded small parts and other objects, including packaging materials and plastic bags/sheets to prevent them from being played with by young children, creating the potential risk of suffocation.

**Do not place the LCD Display on sloped or unstable surfaces.**

- The LCD Display may fall off or tip over.

**Do not place any object on top of the LCD Display.**

- If water spills onto the LCD Display or foreign objects get inside it, a short-circuit may occur which could result in fire or electric shock. If any foreign objects get inside the LCD Display, please consult your local Panasonic dealer.

**Transport only in upright position!**

- Transporting the unit with its display panel facing upright or downward may cause damage to the internal circuitry.

### To Prevent the Display From Falling

**Required accessories:**

- **A** Holding Strip (1)
- **B** Assembly screw (1) size: 4 mm x 10
- **C** Wood screw (1)

1. Use the wood screw to attach the holding strip to the base table (C).

   **Note:**
   - If the base table has no hole, align with the hole on the holding strip and dig one on the base table.

2. Screw the holding strip to the pedestal (B).

   **Note:**
   - Make sure that the holes on the holding strip are properly aligned with the pedestal and the base table to ensure stability and prevent the Display from falling down.
Ventilation should not be impeded by covering the ventilation openings with items such as newspapers, table cloths and curtains.

For sufficient ventilation:
If using the pedestal (optional accessory), leave a space of 10 cm or more at the top, left and right, and 7 cm or more at the rear, and also keep the space between the bottom of the display and the floor surface.
If using some other setting-up method, follow the manual of it. (If there is no specific indication of installation dimension in the installation manual, leave a space of 10 cm or more at the top, bottom, left and right, and 7 cm or more at the rear.)

When using the LCD Display
The LCD Display is designed to operate on 220 - 240 V AC, 50/60 Hz.

Do not cover the ventilation holes.
• Doing so may cause the LCD Display to overheat, which can cause fire or damage to the LCD Display.

Do not stick any foreign objects into the LCD Display.
• Do not insert any metal or flammable objects into the ventilation holes or drop them onto the LCD Display, as doing so can cause fire or electric shock.

Do not remove the cover or modify it in any way.
• High voltages which can cause severe electric shocks are present inside the LCD Display. For any inspection, adjustment and repair work, please contact your local Panasonic dealer.

Ensure that the mains plug is easily accessible.

Do not use any power supply cord other than that provided with this unit.
• Doing so may cause fire or electric shocks.

Securely insert the power supply plug as far as it will go.
• If the plug is not fully inserted, heat may be generated which could cause fire. If the plug is damaged or the wall socket is loose, they shall not be used.

Do not handle the power supply plug with wet hands.
• Doing so may cause electric shocks.

Do not do anything that may damage the power cable. When disconnecting the power cable, pull on the plug body, not the cable.
• Do not damage the cable, make any modifications to it, place heavy objects on top of it, heat it, place it near any hot objects, twist it, bend it excessively or pull it. To do so may cause fire and electric shock. If the power cable is damaged, have it repaired at your local Panasonic dealer.

If the LCD Display is not going to be used for any prolonged period of time, unplug the power supply plug from the wall outlet.

If problems occur during use
If a problem occurs (such as no picture or no sound), or if smoke or an abnormal odour starts to come out from the LCD Display, immediately unplug the power supply plug from the wall outlet.
• If you continue to use the LCD Display in this condition, fire or electric shock could result. After checking that the smoke has stopped, contact your local Panasonic dealer so that the necessary repairs can be made. Repairing the LCD Display yourself is extremely dangerous, and shall never be done.

If water or foreign objects get inside the LCD Display, if the LCD Display is dropped, or if the cabinet becomes damaged, disconnect the power supply plug immediately.
• A short circuit may occur, which could cause fire. Contact your local Panasonic dealer for any repairs that need to be made.
Safety Precautions

⚠️ CAUTION

When using the LCD Display

Do not bring your hands, face or objects close to the ventilation holes of the LCD Display.
- Heated air that comes out from the ventilation holes at the top of the LCD Display will be hot. Do not bring your hands or face, or objects which cannot withstand heat, close to this port, otherwise burns or deformation could result.

Be sure to disconnect all cables before moving the LCD Display.
- If the LCD Display is moved while some of the cables are still connected, the cables may become damaged, and fire or electric shock could result.

Disconnect the power supply plug from the wall socket as a safety precaution before carrying out any cleaning.
- Electric shocks can result if this is not done.

Clean the power cable regularly to prevent it becoming dusty.
- If dust built up on the the power cord plug, the resultant humidity can damage the insulation, which could result in fire. Pull the power cord plug out from the wall outlet and wipe the mains lead with a dry cloth.

Do not burn or breakup batteries.
- Batteries must not be exposed to excessive heat such as sunshine, fire or the like.

This LCD Display radiates infrared rays, therefore it may affect other infrared communication equipment. Install your infrared sensor in a place away from direct or reflected light from your LCD Display.

Cleaning and maintenance

The front of the display panel has been specially treated. Wipe the panel surface gently using only a cleaning cloth or a soft, lint-free cloth.
- If the surface is particularly dirty, wipe with a soft, lint-free cloth which has been soaked in pure water or water in which neutral detergent has been diluted 100 times, and then wipe it evenly with a dry cloth of the same type until the surface is dry.
- Do not scratch or hit the surface of the panel with fingernails or other hard objects, otherwise the surface may become damaged. Furthermore, avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the surface may be adversely affected.

If the cabinet becomes dirty, wipe it with a soft, dry cloth.
- If the cabinet is particularly dirty, soak the cloth in water to which a small amount of neutral detergent has been added and then wring the cloth dry. Use this cloth to wipe the cabinet, and then wipe it dry with a dry cloth.
- Do not allow any detergent to come into direct contact with the surface of the Display. If water droplets get inside the unit, operating problems may result.
- Avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the cabinet surface may be adversely affected or the coating may peel off. Furthermore, do not leave it for long periods in contact with articles made from rubber or PVC.
Accessories

Accessories Supplied

Check that you have the Accessories and items shown

☐ Operating Instruction book
☐ Remote Control Transmitter
☐ Batteries for the Remote Control Transmitter (AA Size × 2)

Remote Control Batteries

Requires two AA batteries.

1. Push the hook to release, then open the battery cover.
2. Insert batteries - note the correct polarity (+ and -).

Helpful Hint:

For frequent remote control users, replace old batteries with Alkaline batteries for longer life.

⚠️ Precaution on battery use

Incorrect installation can cause battery leakage and corrosion that will damage the remote control transmitter. Disposal of batteries should be in an environment-friendly manner.

Observe the following precautions:

1. Batteries should always be replaced as a pair. Always use new batteries when replacing the old set.
2. Do not combine a used battery with a new one.
3. Do not mix battery types (example: “Zinc Carbon” with “Alkaline”).
4. Do not attempt to charge, short-circuit, disassemble, heat or burn used batteries.
5. Battery replacement is necessary when the remote control acts sporadically or stops operating the Plasma Display.
6. Do not burn or breakup batteries. Batteries must not be exposed to excessive heat such as sunshine, fire or the like.
Accessories

Location

Place the display at a comfortable distance for viewing. Avoid placing it where sunlight or other bright light (including reflections) will fall on the screen.
Use of some types of fluorescent lighting can reduce remote control transmitter range.
Adequate ventilation is essential to prevent an internal component failure. Keep away from areas of excessive heat or moisture.

How to use the pedestal
Adjust the stand to your desired angle.
The stand angle can be rotated 15° to the right / left.

Preparation for Wall-hanging

Before mounting the display on the wall, you must remove the pedestal from the display.
Follow the steps below:

1. Disconnect all the cables from the display.
2. Remove the pedestal.
   A. Remove the four screws.
   B. Pull out the pedestal.

WARNING
- Failure to use a Panasonic bracket or choosing to mount the unit yourself will be done at the risk of the consumer. Any damage resulting from not having a professional installer mount will void your unit’s warranty.
- Always be sure to ask a qualified technician to carry out set-up. Incorrect fitting may cause equipment to fall, resulting in injury and product damage.
- Do not mount this LCD display directly below ceiling lights (such as spotlights, floodlights, or halogen lights) which typically give off high heat. Doing so may warp or damage plastic cabinet parts.
- To prevent foreign objects from entering the Display, place the enclosed sticker label on the lower area of the Display to cover the holes.

(View from above)
Connections

Front side

Back side

AV connection (see page 10)
Component (YPbPr) connection (see page 10)
PC input terminals connection (see page 11)
Serial Terminals connection (see page 13)
HDMI connection (see page 12)
Audio out connection (see page 12)
Connections

AV connection

Example of input signal source

Notes:
• Additional equipment and cables shown are not supplied with this set.
• If S Video and Video devices are both connected, the S Video input signal is the priority source.

Component (YPbPr) connection

Example of input signal source

Note:
Additional equipment and cables shown are not supplied with this set.
PC Input Terminals connection

Connect a cable which matches the audio output terminal on the computer.

Notes:
• Computer signals which can be input are those with a horizontal scanning frequency of 15 to 79.97 kHz and vertical scanning frequency of 48 to 75 Hz. (However, the image will not be displayed properly if the signals exceed 1,200 lines.)
• The display resolution is a maximum of 1,024 × 768 dots when the aspect mode is set to “4:3”, and 1,366 × 768 dots when the aspect mode is set to “FULL”. If the display resolution exceeds these maximums, it may not be possible to show fine detail with sufficient clarity.
• The PC input terminals are DDC2B-compatible. If the computer being connected is not DDC2B-compatible, you will need to make setting changes to the computer at the time of connection.
• Some PC models cannot be connected to the set.
• There is no need to use an adapter for computers with DOS/V compatible Mini D-sub 15P terminal.
• The computer shown in the illustration is for example purposes only.
• Additional equipment and cables shown are not supplied with this set.
• Do not set the horizontal and vertical scanning frequencies for PC signals which are above or below the specified frequency range.
• Applicable input signals for Mini D-sub 15P (see page 28).

HDMI connection

Note:
1. Additional equipment and HDMI cables shown are not supplied with this set.
2. HDMI Version 1.2.

Audio Out connection

Note:
Additional equipment and cables shown are not supplied with this set.
Serial Terminals connection

The SERIAL terminal is used when the Display is controlled by a computer.

Notes:
• Use the RS-232C straight cable to connect the computer to the Display.
• The computer shown is for example purposes only.
• Additional equipment and cables shown are not supplied with this set.

The SERIAL terminal conforms to the RS-232C interface specification, so that the Display can be controlled by a computer which is connected to this terminal. The computer will require software which allows the sending and receiving of control data which satisfies the conditions given below. Use a computer application such as programming language software. Refer to the documentation for the computer application for details.

Communication parameters

<table>
<thead>
<tr>

Basic format for control data

The transmission of control data from the computer starts with an STX signal, followed by the command, the parameters, and lastly an ETX signal in that order. If there are no parameters, then the parameter signal does not need to be sent.

- STX
- C1 C2 C3
- Colon (1-5 bytes)
- ETX

Notes
• If multiple commands are transmitted, be sure to wait for the response for the first command to come from this unit before sending the next command.
• If an incorrect command is sent by mistake, this unit will send an ER401 command back to the computer.

With the power off, this display responds to PON command only.
Power ON / OFF

Using the Power Switch

1. Connect the plug to the Wall Outlet.

2. Press the Power switch on the Display to turn the set on: Power-On

   Power Indicator: Green

   When the Display is on, press the Power switch on the Display to turn the set off.

   Power Indicator: Red (Standby)

Using the Power Button

Press the **POWER** button on the remote control to turn the Display on.

Power Indicator: Green

Press the **POWER** button on the remote control to turn the Display off.

Power Indicator: Red

Note:
The Display will still consume power as long as the AC cord is connected to the wall outlet. Unplug the AC cord to cut-off power.
Initial selections

Selecting the input signal

1. Display the menu screen.
2. Select "Setup Menu".
3. Select "Language".
4. Select your preferred language.

Note:
Selecting is also possible by pressing the INPUT button on the unit.

Selecting the On-Screen Menu Language

1. Display the menu screen.
2. Select “Setup Menu”.
3. Select “Language”.
4. Select your preferred language.

Press repeatedly until the desired input source signal is displayed on the screen.
Input signals will change as follows:

- HDMI1 → HDMI2 → HDMI3 → PC
- YPbPr ← AV3 ← AV2 ← AV1
Main Unit

Power Indicator
The Power Indicator will light.
- Power-OFF... Indicator not illuminated
- Standby ......... Red
  (The Monitor will still consume power as long as the AC cord is still connected to the wall outlet.)
- Power-ON..... Green

Power On / Off Switch
Remote control sensor

Channel Adjustment
Press to change to the next or previous channel.

Volume Adjustment
Press "+" to increase volume or press "-" to reduce volume.

MENU Screen ON (see page 19)
This button is locked by initial setting.

INPUT button (see page 15)

Volume Adjustment
Press "+" to increase volume or press "-" to reduce volume.

Channel Adjustment
Press to change to the next or previous channel.
Basic Controls

Remote Control Transmitter

**POWER button**
The Monitor must first be plugged into the wall outlet. Press this button to turn the Monitor on, from standby mode. Press it again to turn the Monitor Off to standby mode.

**INPUT button**
(see page 15)

**MENU button**
Displays the menu screen.
(see page 19)

**OK button**
Press to make selections.

**POSITION buttons**

**RECALL button**
Press to display the current input signal mode.

**ASPECT button**
Press to adjust the aspect. This button can be used only in AV input signal. (see page 18)

**Channel buttons**
Press the buttons to adjust the channel. These buttons are also used for adjusting digital channel when a tuner pack is installed. For more information, please refer to the tuner pack’s manual.

**Sound mute On / Off**
Press this button to mute the sound. Press again to reactivate sound. Sound is also reactivated when power is turned off or volume level is changed.

**RETURN button**
Press the RETURN button to return to previous menu screen.

**OFF TIMER button**
The Monitor can be preset to switch to standby mode after a fixed period. Each time the button is pressed, the timer is changed with an interval of 10 minutes.

When the timer is set, the Monitor will display a notification countdown 3 minutes before it switches to standby mode.

**Volume Adjustment**
Press the Volume Up “+” or Down “−” button to increase or decrease the sound volume level.
ASPECT Controls

The Display will allow you to enjoy viewing the picture at its maximum size, including wide screen cinema format picture.

Press repeatedly to change the aspect.

For “AV” signal input:

16:9 → JUST → 4:3

For “YPbPr”, “HDMI” and “PC” signal input:
The aspect ratio is fixed at 16:9.

<table>
<thead>
<tr>

</tbody>
</table>

Press the \( \leftarrow \) or \( \rightarrow \) buttons to switch between modes.

- Dynamic
  - Accentuates sharp sounds.
- Music
  - Stresses the sense of sharp sounds.
- Normal
  - Emits the original sound.

Press the \( \leftarrow \) or \( \rightarrow \) buttons to switch between modes.

- Mono \( \leftrightarrow \) Stereo
- M1 \( \leftrightarrow \) M2

Note: Adjustable only in RF mode (when a tuner pack is installed)

Sound AI (Off / On)
- Select On to equalize overall volume levels across all external inputs.

Standard (Off / On)
- Select On to reset Bass, Treble, and Balance settings to factory defaults.

Press the \( \leftarrow \) or \( \rightarrow \) buttons to adjust settings.

Bass
- Adjusts low pitch sounds.

Treble
- Adjusts pitch sounds.

Balance
- Adjusts the left and right volumes.
Setup Menu

1. Press \( \text{MENU} \) \( \circ \) to display the menu screen.

2. Select Setup Menu. Press to select the menu to adjust. Press to enter menu.

3. Select to adjust each item. Press to select the menu to adjust. Press to select the desired setting.

4. Press \( \text{RETURN} \) \( \circ \) repeatedly to exit the menu.

During "AV", "YPbPr", and "HDMI" input signal.

<table>
<thead>
<tr>
<th>Setup Menu</th>
</tr>
</thead>
<tbody>
<tr>
<td>Language</td>
</tr>
<tr>
<td>Movie Mode</td>
</tr>
</tbody>
</table>

Press the \( \downarrow \) or \( \uparrow \) buttons to switch between menu languages.

\[\rightarrow\text{English} \leftrightarrow \text{Français} \leftrightarrow \text{Español}\]

**Movie Mode (Off / On)**

When On, the display attempts to reproduce a more natural interpretation of sources such as movie pictures, which are recorded at 24 frames per second. If the picture is not stable, turn this setting to Off.
Setup Menu

PC Setup

1 Press \( \text{MENU} \) to display the menu screen.

2 Select Setup Menu.

3 Select to adjust each item.

4 Adjust the setting.

5 Press \( \text{RETURN} \) repeatedly to exit the menu.

During "PC" input signal.

Notes:
- If the PC is not connected, some items are unadjustable.
- Unadjustable items are grayed out.
- As you scroll through the settings, the TV display changes synchronously.

<table>
<thead>
<tr>
<th>Setup Menu</th>

</tr>
</tbody>
</table>

On / Off
Select On to automatically adjust H-Pos, V-Pos, Dot_Clock, and Clock_Phase.

Press the \( \downarrow \) or \( \uparrow \) buttons to adjust settings.

H-Pos
Adjust the horizontal position.

V-Pos
Adjust the vertical position.

Dot_Clock
Periodic striped pattern interference (noise) may occur when a striped pattern is displayed. If this happens, adjust Dot_Clock to minimize such noise.

Clock_Phase
Eliminate the flickering and distortion.
The Hotel Mode is a special function which allows users to configure settings to suit certain locations or applications.

1 Press MENU to display the menu screen.

2 Select Setup Menu.

3 Select Movie Mode.

4 Press and hold MUTE for more than 3 seconds.

5 Select the item and set desired settings.

6 Press RETURN repeatedly to exit the menu.
## HOTEL MODE Setup

**Troubleshooting**

Before you call for service, determine the symptoms and make a few simple checks as shown below.

<table>
<thead>
<tr>
<th>Symptoms</th>
<th>Sound</th>
<th>Checks</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Interference</strong></td>
<td>Noisy Sound</td>
<td>Electrical Appliances, Cars / Motorcycles, Fluorescent light</td>
</tr>
<tr>
<td><strong>Normal Picture</strong></td>
<td>No Sound</td>
<td>Volume (Check whether the mute function has been activated on the remote control.)</td>
</tr>
<tr>
<td><strong>No Picture</strong></td>
<td>No Sound</td>
<td>Not plugged into AC outlet, Not switched on PICTURE and BRIGHTNESS/Volume setting (Check by pressing the power switch or stand-by button on the remote control.)</td>
</tr>
<tr>
<td><strong>No Picture</strong></td>
<td>Normal Sound</td>
<td>If a signal with a non-applicable color system format, or frequency is input, only the input terminal indication is displayed.</td>
</tr>
<tr>
<td><strong>No Color</strong></td>
<td>Normal Sound</td>
<td>Color controls set at minimum level. (see page 21)</td>
</tr>
</tbody>
</table>

No remote control operations can be performed. Check whether the batteries have discharged completely and, if they have not, whether they were inserted properly. Check whether the remote control sensor is exposed to an outdoor light or a strong fluorescent light. Check whether the remote control designed specifically for use with the unit is being used. (The unit cannot be operated by any other remote control.)

A cracking sound is sometimes heard from the unit. If there is nothing wrong with the picture or sound, this is the sound of the cabinet undergoing very slight contractions in response to changes in the room temperature. There are no adverse effects on the performance or other aspects.

The top or bottom of the picture on the screen is cut off when I use the zoom function. Adjust the position of the picture on the screen.

Areas at the top and bottom of the screen where the image is missing appear when I use the zoom function. When using a video software program (such as a cinema size program) with a screen wider than one in the 16:9 mode, blank areas separate from the images are formed at the top and bottom of the screen.

This LCD Display uses special image processing. Hence a slight time lag may occur between image and audio, depending on the type of input signal. However, this is not a malfunction.

**LCD Display panel**

<table>
<thead>
<tr>
<th>Symptoms</th>
<th>Check</th>
</tr>
</thead>
<tbody>
<tr>
<td>It takes a while for the picture to appear.</td>
<td>The unit digitally processes the various signals in order to reproduce esthetically pleasing images. As such, it sometimes takes a few moments for the picture to appear when the power has been turned on, when the input has been switched or when the images for the main picture and sub picture on the two screens are swapped.</td>
</tr>
<tr>
<td>The edges of the images flicker.</td>
<td>Due to the characteristics of the system used to drive the panel, the edges may appear to flicker in the fast-moving parts of the images: This is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>The brightness on both sides of images in 4:3 mode changes.</td>
<td>When viewing the side panels at the “BRIGHT” or “MID” setting, the brightness on both sides may change depending on the kind of program shown: This is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>There may be red spots, blue spots, green spots and black spots on the screen.</td>
<td>This is a characteristic of liquid crystal panels and is not a problem. The liquid crystal panel is built with very high precision technology giving you fine picture details. Occasionally, a few non-active pixels may appear on the screen as fixed points of red, blue, green, or black. Please note this does not affect the performance of your LCD.</td>
</tr>
</tbody>
</table>

Image retention may occur. If you display a still picture for an extended period, the image might remain on the screen. However, it will disappear after a while. This is not considered as malfunction.
### Applicable Input Signals

#### Applicable input signals for Mini D-sub 15P

<table>
