Please read these instructions before operating your set and retain them for future reference.

The illustration shown is an image.
CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

WARNING: To reduce the risk of electric shock, do not remove cover or back. No user-serviceable parts inside. Refer servicing to qualified service personnel.

The lightning flash with arrow-head within a triangle is intended to tell the user that parts inside the product are a risk of electric shock to persons.

The exclamation point within a triangle is intended to tell the user that important operating and servicing instructions are in the papers with the appliance.

WARNING : To prevent damage which may result in fire or shock hazard, do not expose this apparatus to rain or moisture.

Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set. (including on shelves above, etc.)

WARNING : 1) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.

2) Do not remove the grounding pin on the power plug. This apparatus is equipped with a three pin grounding-type power plug. This plug will only fit a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.

Do not defeat the purpose of the grounding plug.
Important Safety Instructions

1) Read these instructions.

2) Keep these instructions.

3) Heed all warnings.

4) Follow all instructions.

5) Do not use this apparatus near water.

6) Clean only with dry cloth.

7) Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.

8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.

9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.

11) Only use attachments / accessories specified by the manufacturer.

12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart / apparatus combination to avoid injury from tip-over.

13) Unplug this apparatus during lightning storms or when unused for long periods of time.

14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

15) To prevent electric shock, ensure the grounding pin on the AC cord power plug is securely connected.
Important Safety Notice

WARNING
1) To prevent damage which may result in fire or shock hazard, do not expose this appliance to dripping or splashing.
   Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set. (including on shelves above, etc.)
   No naked flame sources, such as lighted candles, should be placed on / above the set.
2) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
3) Do not remove the earthing pin on the power plug. This apparatus is equipped with a three pin earthing-type power plug. This plug will only fit an earthing-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.
   Do not defeat the purpose of the earthing plug.
4) To prevent electric shock, ensure the earthing pin on the AC cord power plug is securely connected.

CAUTION
This appliance is intended for use in environments which are relatively free of electromagnetic fields. Using this appliance near sources of strong electromagnetic fields or where electrical noise may overlap with the input signals could cause the picture and sound to wobble or cause interference such as noise to appear.
To avoid the possibility of harm to this appliance, keep it away from sources of strong electromagnetic fields.

IMPORTANT INFORMATION
If a display is not positioned in a sufficiently stable location, it can be potentially hazardous due to falling. Many injuries, particularly to children, can be avoided by taking simple precautions such as:
• Using cabinets or stands recommended by the manufacturer of the display.
• Only using furniture that can safely support the display.
• Ensuring the display is not overhanging the edge of the supporting furniture.
• Not placing the display on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the display to a suitable support.
• Not standing the displays on cloth or other materials placed between the display and supporting furniture.
• Educating children about the dangers of climbing on furniture to reach the display or its controls.

Trademark Credits
• VGA is a trademark of International Business Machines Corporation.
• Macintosh is a registered trademark of Apple Inc., USA.
• SVGA, XGA, SXGA and UXGA are registered trademarks of the video Electronics Standard Association.
   Even if no special notation has been made of company or product trademarks, these trademarks have been fully respected.
• HDMI, the HDMI logo and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC.

Note:
Do not allow a still picture to be displayed for an extended period, as this can cause a permanent image retention to remain on the Plasma Display.
Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.
**Dear Panasonic Customer**

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new Plasma Display.

To obtain maximum benefit from your set, please read these Instructions before making any adjustments, and retain them for future reference.

Retain your purchase receipt also, and note down the model number and serial number of your set in the space provided on the rear cover of these instructions.

Visit our Panasonic Web Site  http://panasonic.net

CAUTION

This Plasma Display is for use only with the following optional accessories. Use with any other type of optional accessories may cause instability which could result in the possibility of injury.

(All of the following accessories are manufactured by Panasonic Corporation.)

- Pedestal ................................................................. TY-ST85P12
- Floor stand ............................................................ TY-ST85PF12
- Wall-hanging bracket (vertical) ................................ TY-WK85PV12
- Ceiling-hanging bracket .......................................... TY-CE85PS12
- BNC Component Video Terminal Board ....................... TY-42TM6A
- BNC Composite Video Terminal Board ......................... TY-42TM6B
- BNC Dual Video Terminal Board ................................. TY-FB9BD
- RCA Component Video Terminal Board ....................... TY-42TM6Z
- RCA Composite Video Terminal Board ....................... TY-42TM6V
- RGB Active Through Terminal Board ........................ TY-42TM6G
- PC Input Terminal Board .......................................... TY-42TM6P
- Composite / Component Video Terminal Board ............. TY-42TM6Y
- BNC SDI Terminal Board .......................................... TY-FB7SD
- HD-SDI Terminal Board ........................................... TY-FB9HD
- HD-SDI Terminal Board with audio .......................... TY-FB10HD
- Dual Link HD-SDI Terminal Board ............................ TY-FB11HD
- HDMI Terminal Board ............................................. TY-FB8HM
- Dual HDMI Terminal Board ....................................... TY-FB10HMD
- Scart Terminal Board .............................................. TY-FB8SC
- Ir Through Terminal Board ....................................... TY-FB9RT
- DMB-T PAL Tuner Board ....................................... TY-FB12DTH*¹
- DVB-T Tuner Board ................................................. TY-FB11DTA*²
- Wireless Presentation Board ................................... TY-FB10WPE*³
- DVI-D Terminal Board ............................................. TY-FB11DD
- AV Terminal Box .................................................... TY-TB10AV
*¹ Only for Hong Kong.
*² Only for Australia.
*³ Except for CIS region (Russia, Ukraine, Belarus, Kazakhstan, Uzbekistan)

Always be sure to ask a qualified technician to carry out set-up.

Small parts can present choking hazard if accidentally swallowed. Keep small parts away from young children. Discard unneeded small parts and other objects, including packaging materials and plastic bags/sheets to prevent them from being played with by young children, creating the potential risk of suffocation.

When using the Plasma Display

Do not bring your hands, face or objects close to the ventilation holes of the Plasma Display.
- Top of the Plasma Display is usually very hot due to the high temperature of exhaust air being released through the ventilation holes. Burns or personal injuries can happen if any body parts are brought too close. Placing any object near the top of the display could also result in heat damages to the object as well as to the Display if its ventilation holes are blocked.

Be sure to disconnect all cables before moving the Plasma Display.
- Moving the Display with its cables attached might damage the cables which, in turn, can cause fire or electric shock.

Disconnect the power plug from the wall outlet as a safety precaution before carrying out any cleaning.
- Electric shocks can result if this is not done.

Clean the power cable regularly to prevent it from becoming dusty.
- Built-up dust on the power cord plug can increase humidity which might damage the insulation and cause fire. Unplug the cord from the wall outlet and clean it with a dry cloth.
Safety Precautions

Do not burn or breakup batteries.
- Batteries must not be exposed to excessive heat such as sunshine, fire or the like.

This Plasma Display radiates infrared rays, therefore it may affect other infrared communication equipment. Install your infrared sensor in a place away from direct or reflected light from your Plasma Display.

Note:
Do not allow a still picture to be displayed for an extended period, as this can cause a permanent image retention to remain on the Plasma Display.
Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.

WARNING

Setup
Do not place the Plasma Display on sloped or unstable surfaces.
- The Plasma Display may fall off or tip over.

Do not place any objects on top of the Plasma Display.
- If water spills onto the Plasma Display or foreign objects get inside it, a short-circuit may occur which could result in fire or electric shock. If any foreign objects get inside the Plasma Display, please consult an Authorized Service Center.

Do not cover the ventilation holes.
- Doing so may cause the Plasma Display to overheat, which can cause fire or damage to the Plasma Display.

Transport only in upright position!
- Transporting the unit with its display panel facing upright or downward may cause damage to the internal circuitry.

If using the pedestal (optional accessory), leave a space of 3 15/16” / 10 cm or more at the top, left and right, and 6.0” / 15 cm or more at the rear, and also keep the space between the bottom of the display and the floor surface. If using some other setting-up method, follow the manual of it. (If there is no specific indication of installation dimension in the installation manual, leave a space of 3 15/16” / 10 cm or more at the top, bottom, left and right, and 6.0” / 15 cm or more at the rear.)

An apparatus with CLASS I construction shall be connected to a mains socket outlet with a protective earthing connection.

AC Power Supply Cord
The Plasma Display is designed to operate on 200-240 V AC, 50/60 Hz.

Ensure that the mains plug is easily accessible.

Do not use any power supply cord other than that provided with this unit.
- Doing so may cause fire or electric shocks.

Securely insert the power cord plug as far as it will go.
- If the plug is not fully inserted, heat may be generated which could cause fire. If the plug is damaged or the wall socket plate is loose, they should not be used.

Do not handle the power cord plug with wet hands.
- Doing so may cause electric shocks.

Do not do anything that might damage the power cable. When disconnecting the power cable, hold the plug, not the cable.
- Do not make any modifications, place heavy objects on, place near hot objects, heat, bend, twist or forcefully pull the power cable. Doing so may cause damage to the power cable which can cause fire or electric shock. If damage to the cable is suspected, have it repaired at an Authorized Service Center.

If the Plasma Display will not be used for a long period of time, unplug the power cord from the wall outlet.
Safety Precautions

If problems occur during use
If a problem occurs (such as no picture or no sound), or if smoke or an abnormal odor is detected from the Plasma Display, unplug the power cord immediately.
• Continuous use of the Display under these conditions might cause fire or permanent damage to the unit. Have the Display evaluated at an Authorized Service Center. Services to the Display by any unauthorized personnel are strongly discouraged due to its high voltage dangerous nature.

If water or foreign objects get inside the Plasma Display, if the Plasma Display is dropped, or if the cabinet becomes damaged, disconnect the power cord plug immediately.
• A short may occur, which could cause fire. Contact an Authorized Service Center for any repairs that need to be made.

Cleaning and maintenance

The front of the display panel has been specially treated. Wipe the panel surface gently using only a cleaning cloth or a soft, lint-free cloth.
• If the surface is particularly dirty, wipe with a soft, lint-free cloth which has been soaked in pure water or water in which neutral detergent has been diluted 100 times, and then wipe it evenly with a dry cloth of the same type until the surface is dry.
• Do not scratch or hit the surface of the panel with fingernails or other hard objects, otherwise the surface may become damaged. Furthermore, avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the surface may be adversely affected.

If the cabinet becomes dirty, wipe it with a soft, dry cloth.
• If the cabinet is particularly dirty, soak the cloth in water to which a small amount of neutral detergent has been added and then wring the cloth dry. Use this cloth to wipe the cabinet, and then wipe it dry with a dry cloth.
• Do not allow any detergent to come into direct contact with the surface of the Plasma Display. If water droplets get inside the unit, operating problems may result.
• Avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the cabinet surface may be adversely affected or the coating may peel off. Furthermore, do not leave it for long periods in contact with articles made from rubber or PVC.
Accessories

Accessories Supply

Check that you have the accessories and items shown

- Operating Instruction book
- Remote Control Transmitter EUR7636070R
- Batteries for the Remote Control Transmitter (R6 Size × 2)
- Power supply cord
- Fixing band × 2
- Ferrite core × 2
- Noise cut filter
- Clamper × 1
- Eyebolt cap × 1
- Eyebolt × 1 (M12)
- Blind sheet × 1
- Allen wrench

Use the Ferrite cores and Noise cut filter to comply with the EMC standard. (see page 61)

Use the clamper when connecting a LAN cable. (see page 61)

Remote Control Batteries

Requires two R6 batteries.

1. Pull and hold the hook, then open the battery cover.
2. Insert batteries - note correct polarity (+ and -).
3. Replace the cover.

Helpful Hint:
For frequent remote control users, replace old batteries with Alkaline batteries for longer life.

⚠️ Precaution on battery use
Incorrect installation can cause battery leakage and corrosion that will damage the remote control transmitter. Disposal of batteries should be in an environment-friendly manner.

Observe the following precaution:
1. Batteries shall always be replaced as a pair. Always use new batteries when replacing the old set.
2. Do not combine a used battery with a new one.
3. Do not mix battery types (example: “Zinc Carbon” with “Alkaline”).
4. Do not attempt to charge, short-circuit, disassemble, heat or burn used batteries.
5. Battery replacement is necessary when remote control acts sporadically or stops operating the Plasma Display set.
6. Do not burn or breakup batteries.
   Batteries must not be exposed to excessive heat such as sunshine, fire or the like.
## Connections

### AUDIO OUT Terminals connection

![Connections Diagram]

### AC cord fixing

1. **Plug the AC cord into the display unit.**
   Plug the AC cord until it clicks.
2. **Fix the AC cord with the clamper.**

**Note:**
Make sure that the AC cord is locked on both the left and right sides.

### Cable fixing band

Secure any excess cables with band as required.

**Note:**
Two fixing bands are supplied with this unit. In case of securing cables at three positions, please purchase it separately.

Pass the attached cable fixing band through the clip as shown in the figure.

To secure cables connected to Terminals, wrap the cable fixing band around them then pass the pointed end through the locking block, as shown in the figure.

**While ensuring there is sufficient slack in cables to minimize stress (especially in the power cord), firmly bind all cables with the supplied fixing band.**

To tighten:  
Pull

To loosen:  
Push the catch

1. **Plug the AC cord into the display unit.**
2. **Fix the AC cord with the clamper.**

**Note:**
When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.

---

**Note:**
Terminal board is installed in SLOT 2 and SLOT 3 at factory shipment.

**Connections**

**PC Input Terminals connection**

**Notes:**
- With regard to the typical PC input signals that are described in the applicable input signals list (see page 65), adjustment values such as for the standard picture positions and sizes have already been stored in this unit. You can add up to eight PC input signal types that are not included in the list.
- Computer signals which can be input are those with a horizontal scanning frequency of 15 to 110 kHz and vertical scanning frequency of 48 to 120 Hz. (However, the image will not be displayed properly if the signals exceed 1,200 lines.)
- The display resolution is a maximum of 1,440 × 1,080 dots when the aspect mode is set to “4:3”, and 1,920 × 1,080 dots when the aspect mode is set to “16:9”. If the display resolution exceeds these maxima, it may not be possible to show fine detail with sufficient clarity.
- The PC input terminals are DDC2B-compatible. If the computer being connected is not DDC2B-compatible, you will need to make setting changes to the computer at the time of connection.
- Some PC models cannot be connected to the set.
- There is no need to use an adapter for computers with DOS/V compatible Mini D-sub 15P terminal.
- The computer shown in the illustration is for example purposes only.
- Additional equipment and cables shown are not supplied with this set.
- Do not set the horizontal and vertical scanning frequencies for PC signals which are above or below the specified frequency range.
- Component Input is possible with the pin 1, 2, 3 of the Mini D-sub 15P Connector.
- Change the “Component/RGB-in select” setting in the “Setup” menu to “Component” (when Component signal connection) or “RGB” (when RGB signal connection). (see page 50)

SERIAL Terminals connection

The SERIAL terminal is used when the Plasma Display is controlled by a computer.

**Note:** To use serial control for this unit, make sure to set the “Control I/F Select” in the “Network Setup” menu to “RS-232C”. (see page 55)

- Use the RS-232C straight cable to connect the computer to the Plasma Display.
- The computer shown is for example purposes only.
- Additional equipment and cables shown are not supplied with this set.

The SERIAL terminal conforms to the RS-232C interface specification, so that the Plasma Display can be controlled by a computer which is connected to this terminal. The computer will require software which allows the sending and receiving of control data which satisfies the conditions given below. Use a computer application such as programming language software. Refer to the documentation for the computer application for details.

### Communication parameters

<table>
<thead>
<tr>
<th>Signal level</th>

</tr>
</tbody>
</table>

### Basic format for control data

The transmission of control data from the computer starts with a STX signal, followed by the command, the parameters, and lastly an ETX signal in that order. If there are no parameters, then the parameter signal does not need to be sent.

**Examples:**

- **PON**
- **POF**

**Notes:**

- If multiple commands are transmitted, be sure to wait for the response for the first command to come from this unit before sending the next command.
- If an incorrect command is sent by mistake, this unit will send an “ER401” command back to the computer.
- SL1A, SL1B, SL2A and SL2B of Command IMS are available only when a dual input terminal board is attached.

Note:
Additional equipment and HDMI cables shown are not supplied with this set.

COMPONENT / RGB connection

Example of input signal source

DVD
Digital TV-SET-TOP-BOX (DTV-STB)

Notes:
- Change the “Component/RGB-in select” setting in the “Setup” menu to “Component” (when Component signal connection) or “RGB” (when RGB signal connection). (see page 50)
- Additional equipment, cables and adapter plugs shown are not supplied with this set.
- Sync on G signal is needed. (see page 54)
Power On / Off

Connecting the AC cord plug to the Plasma Display.

Fix the AC cord plug securely to the Plasma Display with the clamper. (see page 10)

Connecting the plug to the Wall Outlet

Notes:
- Main plug types vary between countries. The power plug shown at right may, therefore, not be the type fitted to your set.
- When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.

Press the Power switch on the Plasma Display to turn the set on: Power-On.

Power Indicator: Green

Press the off button on the remote control to turn the Plasma Display off.

Power Indicator: Red (standby)

Press the on button on the remote control to turn the Plasma Display on.

Power Indicator: Green

Turn the power to the Plasma Display off by pressing the  switch on the unit, when the Plasma Display is on or in standby mode.

Note:
During operation of the power management function, the power indicator turns orange in the power off state.
When first switching on the unit

Following screen will be displayed when the unit is turned on for the first time. Select the items with the remote control. Unit buttons are invalid.

**OSD Language**

1. Select the language.
2. Set.

**PRESENT TIME Setup**

1. Select “DAY” or “PRESENT TIME”.
2. Setup “DAY” or “PRESENT TIME”.

1. Select “Set”.
2. Set.

**Display orientation**

1. For vertical installation, select “Portrait”.
2. Set.

**Notes:**

- Once the items are set, the screens won’t be displayed when switching on the unit next time.
- After the setting, the items can be changed in the following menus.
  - OSD Language (see page 43)
  - PRESENT TIME Setup (see page 38)
  - Display orientation (see page 44)

From the second time on, the below screen is displayed for a while (setting condition is an example).
Selecting the input signal

Select the input signals to be connected by installing the optional Terminal Boards.

INPUT Press to select the input signal to be played back from the equipment which has been connected to the Plasma Display.

Input signals will change as follows:

INPUT1 → INPUT2A → INPUT2B → INPUT3 → PC

SLOT2 is for dual input so that you can select INPUT2A or INPUT2B for INPUT2.
INPUT2A: HDMI signal terminal in SLOT2
INPUT2B: HDMI signal terminal in SLOT2

Press the INPUT “1”, “2”, “3” or “PC” input mode selection button to select the INPUT mode.
Press 2 to switch the input mode between INPUT2A and INPUT2B.

Notes:
• Selecting is also possible by pressing the INPUT button on the unit.
• Input terminal will not be selected if the terminal board is not installed into the SLOT.
• Select to match the signals from the source connected to the component/RGB input terminals. (see page 50)
• In 2 screen display, the same input mode cannot be selected for the main picture and sub picture.
• Image retention (image lag) may occur on the plasma display panel when a still picture is kept on the panel for an extended period. The function that darkens the screen slightly is activated to prevent image retention (see page 63), but this function is not the perfect solution to image retention.
Basic Controls

Main Unit

Remote control sensor

Power Indicator
The Power Indicator will light.

- Power-OFF .... Indicator not illuminated (The unit will still consume some power as long as the power cord is still inserted into the wall outlet.)
- Standby ........ Red
  Orange (When “Slot power” is set to “On”. See page 58)
  Orange (Depending on the type of the function board installed, when the power is supplied to the slot)
  Orange (When “Control I/F Select” is set to “LAN”. See page 55)
- Power-ON....... Green
- DPMS (Power management)
  Orange (With PC input signal. See page 42)

Volume Adjustment
Volume Up “+” Down “–”
When the menu screen is displayed:
“+”: press to move the cursor up
“–”: press to move the cursor down
(see page 23)

MENU Screen ON / OFF
Each time the MENU button is pressed, the menu screen will switch. (see page 23)

INPUT button
(INPUT signal selection)
(see page 16)

Main Power On / Off Switch
Remote Control Transmitter

R button (see page 23)
Press the R button to return to previous menu screen.

Standby (ON / OFF) button
The Plasma Display must first be plugged into the wall outlet and turned on at the power switch (see page 14). Press ON to turn the Plasma Display On, from Standby mode. Press OFF to turn the Plasma Display Off to Standby mode.

N button (see page 27, 28, 29, 35)

ACTION button
Press to make selections.

POS. /SIZE button (see page 25)

PICTURE button (see page 28)

INPUT button
Press to select INPUT1, INPUT2, INPUT3 and PC input SLOTS sequentially. (see page 16) When a dual input terminal board is attached, A or B is displayed depending on the selected input signal. (Ex. INPUT1A, INPUT1B)

Sound mute On / Off
Press this button to mute the sound. Press again to reactivate sound. Sound is also reactivated when power is turned off or volume level is changed.

Numeric buttons (see page 46)

ASPECT button
Press to adjust the aspect. (see page 19)

SURROUND button
The surround setting switches on and off each time the SURROUND button is pressed. The benefits of surround sound are enormous. You can be completely enveloped in sound; just as if you were at a concert hall or cinema.
ASPECT Controls

The Plasma Display will allow you to enjoy viewing the picture at its maximum size, including wide screen cinema format picture.

Note:
Be aware that if you put the display in a public place for commercial purposes or a public showing and then use the aspect mode select function to shrink or expand the picture, you may be violating the copyright under copyright law. It is prohibited to show or alter the copyrighted materials of other people for commercial purposes without the prior permission of the copyright holder.

Press repeatedly to move through the aspect options:
For details about the aspect mode, please see “List of Aspect Modes” (page 64).

For VIDEO (SVIDEO) signal input:

- 4:3 → Zoom1 → Zoom2 → Zoom3
- Just ← 14:9 ← 16:9 ← Panasonic Auto ←

Note:
When selecting an input slot that attaches BNC Dual Video Terminal Board (TY-FB9BD), Panasonic Auto cannot be selected.

The aspect mode changes each time the ENTER button is pressed.

For PC signal input:

- 4:3 → Zoom → 16:9

For SD signal input (525 (480) / 60i • 60p, 625 (575) / 50i • 50p):

- 4:3 → Zoom1 → Zoom2 → Zoom3 → 16:9 → 14:9 → Just

Notes:
- Panasonic Auto can be selected only during Video signal input.
- The aspect mode is memorized separately for each input terminal.
- Do not allow the picture to be displayed in 4:3 mode for an extended period, as this can cause a permanent image retention to remain on the Plasma Display Panel.

Panasonic Auto

The display will automatically become enlarged (depending on the picture source), allowing you to view the picture at its maximum size.

For VIDEO (SVIDEO) signal input:

- 4:3 → Zoom1 → Zoom2 → Zoom3 → Panasonic Auto → 16:9 → 14:9 → Just

Notes:
- Panasonic Auto mode is designed to automatically adjust the aspect ratio to handle a mix of 16:9 and 4:3 program material. Certain 4:3 program material, such as stock market data screens, may occasionally cause the image size to change unexpectedly. When viewing such programs, it is recommended that the ASPECT be set to 4:3.
- If adjusting the Picture V-Pos/V-Size in Panasonic Auto with 16:9 mode, the adjustment is not memorized. When exiting the mode, the screen will return to a former adjustment.

For HD signal input [1125 (1080) / 60i • 50i • 60p • 50p • 24p • 25p • 30p • 24sF, 1250 (1080) / 50i, 750 (720) / 60p • 50p]:

- 4:3 → Zoom1 → Zoom2 → Zoom3 → 16:9 → 14:9 → Just1 → Just2 → 4:3 (1) → 4:3 (2)

Notes:
- Panasonic Auto mode is designed to automatically adjust the aspect ratio to handle a mix of 16:9 and 4:3 program material. Certain 4:3 program material, such as stock market data screens, may occasionally cause the image size to change unexpectedly. When viewing such programs, it is recommended that the ASPECT be set to 4:3.
- If adjusting the Picture V-Pos/V-Size in Panasonic Auto with 16:9 mode, the adjustment is not memorized. When exiting the mode, the screen will return to a former adjustment.

For SD signal input (525 (480) / 60i • 60p, 625 (575) / 50i • 50p):

- 4:3 → Zoom1 → Zoom2 → Zoom3 → 16:9 → 14:9 → Just

Notes:
- Panasonic Auto can be selected only during Video signal input.
- The aspect mode is memorized separately for each input terminal.
- Do not allow the picture to be displayed in 4:3 mode for an extended period, as this can cause a permanent image retention to remain on the Plasma Display Panel.

For PC signal input:

- 4:3 → Zoom → 16:9

For SD signal input (525 (480) / 60i • 60p, 625 (575) / 50i • 50p):

- 4:3 → Zoom1 → Zoom2 → Zoom3 → 16:9 → 14:9 → Just

Notes:
- Panasonic Auto can be selected only during Video signal input.
- The aspect mode is memorized separately for each input terminal.
- Do not allow the picture to be displayed in 4:3 mode for an extended period, as this can cause a permanent image retention to remain on the Plasma Display Panel.

For HD signal input [1125 (1080) / 60i • 50i • 60p • 50p • 24p • 25p • 30p • 24sF, 1250 (1080) / 50i, 750 (720) / 60p • 50p]:

- 4:3 Full → Zoom1 → Zoom2 → Zoom3 → 16:9 → 14:9 → Just1 → Just2 → 4:3 (1) → 4:3 (2)

Notes:
- Panasonic Auto mode is designed to automatically adjust the aspect ratio to handle a mix of 16:9 and 4:3 program material. Certain 4:3 program material, such as stock market data screens, may occasionally cause the image size to change unexpectedly. When viewing such programs, it is recommended that the ASPECT be set to 4:3.
- If adjusting the Picture V-Pos/V-Size in Panasonic Auto with 16:9 mode, the adjustment is not memorized. When exiting the mode, the screen will return to a former adjustment.
MULTI PIP

You can display two pictures, such as a video image and computer image, in a two-screen display. (Use the remote control for this operation. It cannot be performed with the buttons on the main unit.)

MULTI PIP Setup

Set the functions and mode for two-screen display in “MULTI PIP Setup” in the Setup menu. (see page 47)

Selecting the Display Mode

MULTI PIP  Each time this button is pressed, the screen changes.

Note:
The screen changes in the same way when “Display Mode” in “MULTI PIP Setup” is changed. (see page 47)

During PIP:

During Advanced PIP:

During Blend PIP (Composite Screen Function):
A composite picture is displayed with the sub screen positioned over the main screen. For example, text data such as a computer image can be displayed as a caption over a movie or still image.
MULTI PIP

Transparent Function and Insertion Function:
Two functions are available for blend PIP: the transparent function and the insertion function. Set these functions with “Transparency” or “Insert” in “MULTI PIP Setup”. (see page 47)

Transparent Function:
Data such as text are displayed transparently on the background image.

Insertion Function:
The sub screen image is divided into transparent and non-transparent areas, and only the non-transparent areas are inserted and displayed on the background image.

Note:
Be aware that if you put the display in a public place for commercial purposes or a public showing and then use the blend PIP function to make a composite screen display, you may be violating the copyright under copyright law. It is prohibited to show or alter the copyrighted materials of other people for commercial purposes without the prior permission of the copyright holder.

Swapping Screens

Each time this button is pressed, the main screen and sub screen are swapped.

Operations on the main screen
Operations on the sub screen

Notes:
• When operations are performed for the sub screen, the sub screen audio is played.
• If no operations are performed, the operation target returns to the main screen after about 5 seconds*. You can also return to main screen operations by operating the remote control buttons (except for ).

* It takes more than 5 seconds if a slot mounted with a Dual HDMI Terminal Board (TY-FB10HMD) is selected.

Selecting the Target Screen for Operations

Each time this button is pressed, the target screen for operations changes.

Operations on the main screen
Operations on the sub screen

Notes:
• When operations are performed for the sub screen, the sub screen audio is played.
• If no operations are performed, the operation target returns to the main screen after about 5 seconds*. You can also return to main screen operations by operating the remote control buttons (except for ).

* It takes more than 5 seconds if a slot mounted with a Dual HDMI Terminal Board (TY-FB10HMD) is selected.

Selecting the Sub Screen Position (During P in P Display)

Each time this button is pressed, the sub screen position changes.

Notes:
• Do not use the two-screen display for a long time. It will cause a permanent image retention to remain on the screen.
• If “INPUT lock” in Options menu is set to other than “Off”, MULTI PIP function isn’t available.
• Sound output is from the picture which is selected in Audio OUT (PIP) (see page 35).
• In two-screen display, the same input mode cannot be selected for the main picture and sub picture.
• The main picture and sub picture are processed by different circuits, resulting in a slight difference in the clarity of the pictures. There may also be a difference in the picture quality of the sub picture depending on the type of signals displayed on the main picture and depending on the two-screen display mode.
• Due to the small dimensions of the sub pictures, these sub pictures cannot be shown in detail.
• Computer screen picture is displayed in a simplified format, and it may not be possible to discern details on them satisfactorily.
• Following combinations of two analog signals cannot be displayed simultaneously;
  Component - Component, Component - PC (RGB), PC (RGB) - Component, PC (RGB) - PC (RGB)
• 2k1k signals that are received with the Dual Link HD-SDI Terminal Board (TY-FB11DHD) cannot be displayed in two-screen display.
Digital Zoom

This displays an enlargement of the designated part of the displayed image.

1. Display the operation guide.
   - MOVE ZOOM
     - Press to access Digital Zoom. The operation guide will be displayed.

During Digital Zoom, only the following buttons can be operated.

   [Remote control]
   - POSITION / ACTION button
   - VOL button
   - MUTE button
   - SURROUND button
   - OFF TIMER button

   [Unit]
   - VOL button

2. Select the area of the image to be enlarged.
   - Press on the enlargement location to select.
   - The cursor will move.

3. Select the magnification required for the enlarged display.
   - Each time this is pressed, the magnification factor changes. This is shown in the image being displayed.

4. Return to normal display (quit Digital Zoom).
   - Press to exit from the Digital Zoom.

Notes:
- When power goes OFF (including “Off Timer” operation), Digital Zoom terminates.
- The Digital Zoom function cannot be selected while in the following operation state:
  “Multi-viewer” (P and P, P out P, P in P) operation. (see page 20)
  When MULTI DISPLAY Setup is On (see page 45).
  When Portrait Setup is On (see page 48).
  When Screensaver (except for Negative image) is running (see page 37)
- While Digital Zoom is in operation, “Adjusting Pos. / Size” cannot be used.
On-Screen Menu Displays

Remote Control | Unit
---|---
1 Display the menu screen. | Press several times.
Press to select. (Example: Picture menu) | Each time the MENU button is pressed, the menu screen will switch.
| Normal Viewing → Picture → Sound ← Pos. /Size ← Setup ←

2 Select the item. | Select.
| Press.

3 Set. | Set.
| Press.

4 Exit the menu. | Press several times.
Press to return to the previous menu.
Overview

Note:
Menu that cannot be adjusted is grayout. Adjustable menu changes depending on signal, input and menu setting.

Adjusting Pos. /Size

1. Press to display the Pos. /Size menu.
2. Press to select the menu to adjust.
3. Press to adjust the menu.
4. Press to exit from adjust mode.

Notes:
- Unadjustable items are grayed out.
- Adjustable items differ depending on the input signal and the display mode.
- Adjustment details are memorized separately for different input signal formats (Adjustments for component signals are memorized for 525 (480) / 60i · 60p, 625 (575) / 50i · 50p, 1125 (1080) / 60i · 50i · 60p · 50p · 24p · 25p · 30p · 24sF, 1250 (1080) / 50i, 750 (720) / 60p · 50p each, and RGB/PC/Digital signals are memorized for each frequency.)
- If a “Cue” or “Rew” signal from a VCR or DVD player is received, the picture position will shift up or down. This picture position movement cannot be controlled by the Picture Pos./Size function.
- If adjusting the Picture V-Pos/V-Size in Panasonic Auto with 16:9 mode, the adjustment is not memorized. When exiting the mode, the screen will return to a former adjustment.

Auto Setup
H-Pos/V-Pos, H-Size/V-Size, Dot Clock and Clock Phase are automatically adjusted when the RGB or PC signal is received.
This setting is enabled under the following conditions:
- This setting only support single screen display. Two screen display or multiple display are not supported.
- When “Component/RGB-in Select” or “YUV/RGB-in select” in the “Setup” menu (see page 50) is set to “RGB”, this setting is enabled.
- When the signal is not PC format, this setting is enabled only if “Over scan” (see page 26) is “Off” or “1:1 Pixel Mode” (see page 27) is “On”, and H-Size/V-Size is not automatically adjusted. This setting will be invalid and will not work under the following conditions:
  - Aspect is set to “Just”
  - “Display size” in the Options menu (see page 57) is set to “On”

Using Remote Control
Note:
To operate this function, please purchase remote controller sold separately.
Object model : N2QAYB000432
When on the remote control is pressed, “Auto Setup” will be executed.
When Auto Setup does not work, “Invalid” is displayed.

Auto mode
When the “Auto Setup” is set to “Auto” in the Options menu (see page 58), automatic position adjustment starts:
- When the display power is turned ON.
- When the input signal is switched.
Adjusting POS. /SIZE

Notes:
- If the dot clock frequency is 162 MHz or higher, Dot Clock and Clock Phase cannot be made.
- When digital RGB signal input, Dot Clock and Clock Phase cannot be made.
- Auto Setup may not work when a cropped or dark image is input. In such case, switch to a bright image with borders and other objects are clearly shown, and then try auto setup again.
- Depending on the signal, out of alignment may occur after Auto Setup. Carry out fine tuning for the position/size as required.
- If Auto Setup cannot set properly for vertical frequency 60Hz XGA signal (1024×768@60Hz, 1280×768@60Hz, and 1366×768@60Hz), pre-selecting the individual signal in “XGA Mode” (see page 52) may results in correct Auto Setup.
- Auto Setup does not work well when a signal such as additional information is superimposed out of valid image period or intervals between synchronizing and image signals are short, or for image signal with tri-level synchronizing signal added.
- If Auto Setup cannot adjust correctly, select “Normalise” once and press ACTION (●), then adjust Pos. /Size manually.

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>Adjust the horizontal size.</td>
<td>Adjust the vertical size.</td>
</tr>
</tbody>
</table>

**Dot Clock** *(During “Component”, “RGB” and “PC” input signal)*
Periodic striped pattern interference (noise) may occur when a striped pattern is displayed. If this happens, adjust so that any such noise is minimized.

**Clock Phase** *(During “Component”, “RGB” and “PC” input signal)*
Eliminate the flickering and distortion.

**Over scan**
Turn image over scan On/Off.
Configurable signals are as follows:
525i, 525p, 625i, 625p, 750/60p, 750/50p (Component Video, RGB, DVI, SDI, HDMI)

On [Image] Off [Image]

Notes:
- When “Off” is set, “H-Size” and “V-Size” cannot be adjusted.
- When the “Display size” is set to “On” in the Options menu, this setting will be invalid. (see page 57)
1:1 Pixel Mode  Adjusts the display size when 1125i, 1125p or 1250i signal is input.

Notes:
• Select On when you would like to replay 1920 × 1080 input signal.
• Applicable input signal;
  1125 (1080) / 50i · 60i · 24sF · 24p · 25p · 30p · 50p · 60p, 1250 (1080) / 50i
• Select Off when flickering is shown around the image.
• H-Size and V-Size cannot be adjusted when On is selected.

1:1 Pixel Mode (2k1k)
(For 2k1k signals)

When the input signal is a 2k1k signal (2048 × 1080 / 24p, 2048 × 1080 / 24sF), the display size is adjusted as follows.

Note:
2k1k signals can only be received when the Dual Link HD-SDI Terminal Board (TY-FB11DHD) is installed.

Helpful Hint (Normalise)
While the Pos. /Size display is active, if either the N button on the remote control is pressed at any time or the ACTION button is pressed during "Normalise", then all adjustment values are returned to the factory settings.
Picture Adjustments

1. Press to display the Picture menu.

2. Select to adjust each item.

   - Press to select the menu to adjust.
   - Select the desired level by looking at the picture behind the menu.

   **Note:**
   Menu that cannot be adjusted is grayout. Adjustable menu changes depending on signal, input and menu setting.

**Notes:**
- “Colour” and “Hue” settings cannot be adjusted for “RGB/PC” input signal.
- You can change the level of each function (Contrast, Brightness, Colour, Hue, Sharpness) for each Picture Mode.
- The setting details for normal, dynamic and cinema respectively are memorized separately for each input terminal.
- The “Hue” setting can be adjusted for NTSC signal only during “AV (S Video)” input signal.
- In Contrast, there is not a noticeable change even when contrast is increased with a bright picture or reduced with a dark picture.

---

**Advanced settings**

<td>Adjusts the white balance for dark green areas.</td>
</tr>
<tr>
<td>W/B Low B</td>
<td>Less More</td>
<td>Adjusts the white balance for dark blue areas.</td>
</tr>
</tbody>
</table>

**Notes:**
- Carry out “W/B” adjustment as follows.
  1. Adjust the white balance of the bright sections using the “W/B High R”, “W/B High G” and “W/B High B” settings.
  2. Adjust the white balance of the dark sections using the “W/B Low R”, “W/B Low G” and “W/B Low B” settings.
  3. Repeat steps 1 and 2 to adjust.
- Steps 1 and 2 affect each other’s settings, so repeat each step in turn to make the adjustment.
- The adjustment values are memorized separately for each input terminal.
- The adjustment range values should be used as an adjustment reference.

---

**Helpful Hint (Normalise Normalisation)**

On the remote control unit, while the “Advanced settings” menu is displayed, if either the N button is pressed at any time or the ACTION button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.
Picture Profiles

Up to 8 combinations of picture adjustment values (in the Picture menu and Advanced settings) can be stored in the display memory as profiles and applied as needed, for a convenient way to enjoy your preferred picture settings.
Saving profiles

Follow these steps to save picture adjustment values as profiles.

**Note:**
When the settings are locked in "Extended life settings", profiles cannot be saved.

1. Specify the picture quality in the Picture menu and Advanced settings. (see page 28, 29)
2. In the Picture menu, select “Memory save”.
3. Select a profile name for saving the picture adjustment values.
4. Select “Ok”.
5. Enter a name for the profile.
   **[Entering profile names]**
   Profile names can be up to 16 characters. To enter text, select characters in the on-screen keyboard. Edit the default profile name in the text box as desired.

   **Example: Specifying “MY PICTURE”**
   1. Select “All delete”.
      All text is deleted. To delete individual characters, select “Delete”.
   2. Select “M”.
      Repeat this process to enter the next character.
   3. Select “Y”.
   4. Select “Space”.
   5. When you finished entering the profile name, select “Ok”. To cancel saving the profile, select “Cancel”.
Loading profiles

Load profiles and apply the picture adjustment values to the display as follows.

Notes:
• Loaded profiles are stored in memory according to the selected input terminal (SLOT1, 2, 3 or PC IN). (see page 16)
• When the settings are locked in “Extended life settings”, profiles cannot be loaded.

1 In the Picture menu, select “Memory load”.

2 Select the profile to load.

Profiles are labeled with these icons to indicate their locked status. (see page 33)

Editing profiles

Delete or rename profiles as follows.

<Deleting profiles>
Note:
Locked profiles cannot be deleted.

1 In the Picture menu, select “Memory edit”.

2 Select “Memory delete”.

3 Select the profile to delete. To delete all profiles, select “All delete”.

4 Select “Ok”.

<Renaming profiles>
Note:
Locked profiles cannot be renamed.

1 In the Picture menu, select “Memory edit”.

2 Select “Memory name change”.

3 Select the profile to rename.

4 Enter a name for the profile. Entering profile names ➔ page 31

5 When you finished entering the profile name, select “Ok”. To cancel renaming the profile, select “Cancel”.

Locking profiles

You can lock saved profiles to restrict operations when the profiles are loaded. You can also set passwords.

Notes:
- When the lock is set in “Extended life settings”, profile cannot be locked.
- If profile is locked, the menu operations of “Extended life settings” are restricted. (see page 40)

<Locking and unlocking profiles>

1. Display the menu screen. (see page 56)

2. Select “Memory lock”.

3. Enter a 4-digit password.
The default password is “0123”.

4. Select “Ok”.

5. Select the profile and specify the desired lock setting.

6. Exit the menu.

Once a profile is locked, the following operations are restricted when the profile is loaded.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Editing the Profile (Memory edit)</th>
<th>Editing Picture Adjustment Values via the Menu (Picture menu, Advanced settings)</th>
<th>Saving Picture Adjustment Values (Memory save)</th>
</tr>
</thead>
<tbody>

<td>Allowed</td>
</tr>
<tr>
<td>Lock2</td>
<td>Prohibited</td>
<td>Prohibited (picture adjustment values are hidden)</td>
<td>Prohibited</td>
</tr>
</tbody>
</table>

Loading locked profiles

In the Picture menu, profiles are labeled with these icons to indicate their locked status.

Picture adjustment values in the Picture menu cannot be changed, except for the “Picture Mode”. Once you edit the “Picture Mode” setting, you can edit “Contrast”, “Brightness”, and other picture adjustment values.

1 Lock1
Picture adjustment values are shown.

2 Lock2
Picture adjustment values are hidden.
Picture Profiles

<Changing passwords>

1. Follow steps 1–4 in the previous procedure, <Locking and unlocking profiles>.
2. Select “Change password”.
3. Enter a new 4-digit password.
4. Select “Ok”.
5. Exit the menu.

Note:
Make a note of the new password to remember it.

<isf Mode Setting>

Switches to “Picture Mode” mode display.

1. Follow steps 1–4 in the previous procedure, <Locking and unlocking profiles>.
2. Select “isf Mode”.
3. Specify “On” or “Off”.
4. Exit the menu.

Specifying “On” for isf Mode changes the “Picture Mode” mode display as follows.

“Picture Mode” mode display

<table>
<thead>
<tr>
<th>isf Mode: Off</th>
<th>isf Mode: On</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>Normal</td>
</tr>
<tr>

<tr>
<td>Treble</td>
<td>Adjusts high pitch sounds.</td>
</tr>
<tr>
<td>Balance</td>
<td>Adjusts left and right volumes.</td>
</tr>
<tr>
<td>Surround</td>
<td>Select On or Off.</td>
</tr>
<tr>
<td>Audio Out (PIP)</td>
<td>Main: Selects main picture sound. Sub: Selects PIP frame sound.</td>
</tr>
</tbody>
</table>

Helpful Hint (N / Normalise Normalisation)

While the “Sound” menu is displayed, if either the N button on the remote control is pressed at any time or the ACTION (●) button is pressed during “Normalise”, then all adjustment values are returned to the factory settings.

SDI Sound Output

This menu is displayed when HD-SDI Terminal Board with audio (TY-FB10HD) or Dual Link HD-SDI Terminal Board (TY-FB11DHD) is installed to the unit.

<table>
<thead>
<tr>
<th>Item</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Left Channel</td>
<td>Channel 1 to Channel 16</td>
</tr>
<tr>
<td>Right Channel</td>
<td>Channel 1 to Channel 16</td>
</tr>
<tr>
<td>Sound Out</td>
<td>On ↔ Off</td>
</tr>
<tr>
<td>Level Meter</td>
<td>Off ↔ 1-8ch ↔ 9-16ch</td>
</tr>
</tbody>
</table>

Notes:
- This menu is available only when selecting a slot that HD-SDI Terminal Board with audio (TY-FB10HD) or Dual Link HD-SDI Terminal Board (TY-FB11DHD) is installed.
- This menu is unavailable when 2-picture display mode is active.
PRESENT TIME Setup / Set up TIMER

The timer can switch the Plasma Display On or Off. Before attempting Timer Set, confirm the PRESENT TIME and adjust if necessary. Then set POWER ON Time / POWER OFF Time.

1. Press to display the Setup menu.
2. Press to select Set up TIMER or PRESENT TIME Setup.

PRESENT TIME Setup

1. Press to select DAY or PRESENT TIME.
   - Press to setup DAY or PRESENT TIME.
   - button: Forward
   - button: Back
   Notes:
   • Pressing "<" or ">") button once changes PRESENT TIME 1 minute.
   • Pressing "<" or ">") button continuously changes PRESENT TIME by 15 minutes.
2. Press to select Set.
   Press to store PRESENT TIME Setup.
   Notes:
   • Set cannot be selected unless PRESENT TIME is set.
   • Unless setting the present time other than “99:99”, DAY setting is invalid.
   • The settings of “DAY” and “PRESENT TIME” are reset when leaving the display turned off for about 7 days for the following reasons:
     • Pressing @/| switch of the unit to turn off the display.
     • Disconnecting the AC cord.
     • Interruption of power supply.

Set up TIMER

1. Press to select POWER ON Time / POWER OFF Time.
   Press to setup POWER ON Time / POWER OFF Time.
   - button: Forward
   - button: Back
   Notes:
   • Pressing “<” or “>” button once changes POWER ON Time / POWER OFF Time 1 minute.
   • Pressing “<” or “>” button continuously changes POWER ON Time / POWER OFF Time by 15 minutes.
2. Press to select POWER ON Function/POWER OFF Function.
   Press to select On.
   Note: Timer function will not work unless “PRESENT TIME” is set.
**Screensaver** *(For preventing image retention)*

Do not display a still picture, especially in 4:3 mode, for any length of time. If the display must remain on, a Screensaver should be used.

1. **SET UP**
   - Press to display the Setup menu.

2. **Press to select Screensaver.**
   - Press to display Screensaver screen.

3. **Function selection**
   - Press to select Function.
   - Press to select the desired function.
   - **Negative image ↔ Scrolling bar only ↔ White screen ↔ Overlay scrolling bar**
   - **Negative image**: Negative image will be displayed on the screen.
   - **Scrolling bar only**: A white bar will scroll from left to right. The image won’t be displayed.
   - **Overlay scrolling bar**: The brightness of the image will be decreased and a white bar will scroll on it.
   - **White screen**: The whole screen will be white.
   - **Note**: Overlay scrolling bar is not effective during two screen display.

4. **Mode selection**
   - Press to select Mode.
   - Press to select each mode items.
   - **Off**: Operates when Start is selected and the ACTION (■) button is pressed.
   - **Interval**: Operates when Periodic Time and Operating Time are setup and those times arrive.
   - **Time Designation**: Operates when Start Time and Finish Time are setup and those times arrive.
   - **Standby after SCR Saver**: Operates while Screensaver duration, and display enters standby mode.
   - **On**: Operates when Start is selected and the ACTION (■) button is pressed.

5. **Start setting**
   - When the Mode is set to On, press to select Start.
   - Press to start Screensaver.
   - The menu screen will disappear and the Screensaver will be activated. **To stop the Screensaver under On, press the R button or any buttons on the main unit.**
   - **Note**: When the display is turned off, the Screensaver will be deactivated.
Screensaver (For preventing image retention)

Setup of Screensaver Time

After selecting Time Designation, Interval or Standby after SCR Saver, the relevant Time Setup will become available for selection and the Operating Time may be set. (Time cannot be set when “Mode” is “On” or “Off”.)

Notes:
- Pressing “<” or “>” button once changes the Time 1 minute.
  [However, switching occurs every 15 minutes when Periodic Time is selected.]
- Pressing “<” or “>” button continuously changes the Time by 15 minutes.
- “Screensaver duration” of the “Standby after SCR Saver” can be set from 0:00 to 23:59. When this is set to “0:00”, “Standby after SCR Saver” will not be activated.

Note: Timer function will not work unless “PRESENT TIME” is set.
Reduces screen image retention

Extended life settings

The following settings are setup to reduce image retention:

<table>
<thead>
<tr>
<th>Setup</th>
<th>1/2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Signal</td>
<td></td>
</tr>
<tr>
<td>Screensaver</td>
<td></td>
</tr>

<td>Off</td>
</tr>
<tr>
<td>Auto power off</td>
<td>Off</td>
</tr>
<tr>
<td>OSD Language</td>
<td>English (UK)</td>
</tr>
</tbody>
</table>

Image Retention Reduction Menu

“Extended life settings” enables you to set the following 5 menus (Image Retention Reduction Menu) as recommended values or set them individually.

Picture Mode

Contrast

“Picture Mode” and “Contrast” are same as “Picture” menu items (see page 28). The settings of this menu will be reflected to the “Picture” menu.

Side panel

Do not display a picture in 4:3 mode for an extended period, as this can cause an image retention to remain on the side panels on either side of the display field.

To reduce the risk of such an image retention, illuminate the side panels.

This function may be applicable to the non-picture area.

- **Off**: Darken both ends.
- **Low**: Make it dark gray.
- **Mid**: Make it gray.
- **High**: Make it light gray.

Notes:

- To reduce the occurrence of image retention, set the Side panel to High.
- The side panel may flash (alternate black/white) depending on the picture being shown on the screen. Using Cinema mode will reduce such flashing.
Reduces screen image retention

NANODRIFT Saver
Moves the display position of the screen slightly to reduce image retention on the display panel.

Off: NANODRIFT Saver does not operate.
Min–Max: NANODRIFT Saver operates. The display position of the screen moves at set time intervals. You can set the screen movement range. Some of the screen may appear to be missing as a result of this operation. If you change the value, a mask is displayed in the range where the picture is missing as a result of position movement.

If this is set to other than “Off”, “NANODRIFT” is displayed below the aspect mode display.

Note:
This function does not work in the following cases.
When “MULTI DISPLAY Setup” is set to “On”
When “PORTRAIT Setup” is set to “On”
When in digital zoom mode

Peak limit
On: Suppresses image contrast (peak brightness).
Note: When a still picture is viewed for an extended time, the screen may become slightly darker. (see page 63)

Extended life settings when profile is locked
If profile is locked with “Memory lock” of the Options menu, the operations of this settings menu are restricted as shown below. “Locking profiles” page 33
Express settings: Cannot be set.
Custom settings: “Picture Mode”, “Contrast” and “Lock settings” cannot be set.
Reset: “Picture Mode” and “Contrast” are not reset.

Express settings
Set the “Image Retention Reduction” menu to the recommended settings.
All menus will be locked.
Picture Mode: Normal
Contrast: 10
Side panel: High
NANODRIFT Saver: High mid
Peak limit: On

1 Select “Express settings”.

2 Select the input to apply the settings.

3 Select “Yes”.

Extended life settings when profile is locked
If profile is locked with “Memory lock” of the Options menu, the operations of this settings menu are restricted as shown below. “Locking profiles” page 33
Express settings: Cannot be set.
Custom settings: “Picture Mode”, “Contrast” and “Lock settings” cannot be set.
Reset: “Picture Mode” and “Contrast” are not reset.

PC

Reduces screen image retention

Custom settings
Set the individual “Image Retention Reduction” menu.

1 Select “Custom settings”.

2 To set each menu to the recommended setting:
Select “Recommended settings”.

3 Set each menu.

4 To lock each menu setting:
Set the “Lock settings” to “Lock”.

When a menu is locked, it is grayed out and cannot be set.
“Picture Mode” and “Contrast” will no longer be able to set in the “Picture” menu, and they are labeled with icon to indicate their locked status. Also, “Normalise”, “Memory save” and “Memory load” are not available.

5 Select the input to apply the settings.

6 Select “Yes”.

Reset
Reset the “Image Retention Reduction” menu to the factory settings. Each menu will be unlocked.

1 Select “Reset”.

2 Select the input to reset the settings.
Reduces power consumption

- **Power save**: When this function is turned On, luminous level of the Plasma Display is suppressed, so power consumption is reduced.
- **Standby save**: When this function is turned On, power consumption of the microcomputer is reduced during power supply standby (see page 14, 17, 18), so standby power of the set is reduced.
- **Power management**: When this function is set to On, it operates under the following conditions to turn the power on or off automatically.
  
  When no pictures (HD/VD sync signals) are detected for 30 or so seconds during PC signal input:
  
  → Power is turned off (standby); the power indicator lights up orange.
  
  When pictures (HD/VD sync signals) are subsequently detected:
  
  → Power is turned on; the power indicator lights up green.

  **Notes:**
  
  • This function operates only during PC signal input.
  • This function is invalid during input from PC Input Terminal Board (TY-42TM6P).
  • This function is effective when “Sync” is set to “Auto”, “Component / RGB-in select” is set to “RGB” and during normal viewing (one picture screen).

- **Auto power off**: Equipment power supply is turned Off when there is no signal.
  
  When this is set to On, the power supply of the unit goes Off 10 minutes after the input signals stop.

  **Note:**
  
  This function is effective during normal viewing (one picture screen) for input signals except PC IN terminal.

1. Press to select “Power save” “Standby save” “Power management” “Auto power off”.

2. Press to select “On” or “Off”.

   On ←→ Off

3. Press to exit from Setup.

1/2
Customizing the Input labels

This function can change the label of the Input signal to be displayed. Select the input signal which you would like to change its label before customizing the Input labels. (see page 16, 18)

Press to select Input label.
Press to change the Input label.

Note:
While selecting an Input signal through Optional Terminal Board connected to Slot1, Slot2 and Slot3, the Input label will depend on each Optional Terminal Board.

Input labels for SLOT1, 2, 3 and PC IN:

When BNC Dual Video Terminal Board (TY-FB9BD) is used, an “A” or “B” is added at the end of each input label, depending on the input selected (see below).

<table>
<thead>
<tr>

Selecting the On-Screen Menu Language

1.
Press to display the Setup menu.

2.
Press to select the OSD Language.
Press to select your preferred language.

Selectable languages:
- English(UK)
- Deutsch
- Français
- Italiano
- Español
- ENGLISH(US)
- 中文……(Chinese)
- 日本語……(Japanese)
- Русский……(Russian)
Display orientation

Sets the fan control and the display style of on-screen menu for vertical installation.

1. Press to display the Setup menu.
2. Press to select Display orientation.
   Press to select “Landscape” or “Portrait”.
3. Press to exit from adjust mode

- **Landscape**
  - Fan control for horizontal installation.

- **Portrait**
  - Fan control for vertical installation. On-screen menu will be rotated 90 degrees counterclockwise to be suitable for the setting.

**Notes:**

- If the display is installed vertically, the power switch should be located at the bottom.
- Fan control will be switched when turning on the unit next time.
Setup for MULTI DISPLAY

By lining up Plasma Displays in groups, for example, as illustrated below, an enlarged picture may be displayed across all screens. For this mode of operation, each plasma display has to be set up with a Display number to determine its location.

(Example)

- group of 4 (2 × 2)
- group of 9 (3 × 3)
- group of 16 (4 × 4)
- group of 25 (5 × 5)

How to Setup MULTI DISPLAY

1. Press to display the Setup menu.
2. Press to select the MULTI DISPLAY Setup.
3. Press to display the “MULTI DISPLAY Setup” menu.
4. Press to select the MULTI DISPLAY Setup.
5. Press to select “On” or “Off”.

<table>
<thead>
<tr>

**Note:**
If you set AI-synchronization to On, the following menus will be unavailable and these settings will be fixed to the initial values.
Picture menu: Colour, Hue, Input level (Advanced settings)

4 SET UP Press to exit from Setup.

### ID Remote Control Function

You can set the remote control ID when you want to use this remote control on one of several different displays.

1 Switch to on the right side.

2 Press the button on the remote control.

3 Press one of 1 - 9, 0 for the tens digit setting.

4 Press one of 1 - 9, 0 for the units digit setting.

**Notes:**
- The numbers in 2, 3 and 4 should be set up quickly.
- Adjustable ID number range is 0 - 99.
- If a number button is pressed more than two times, the first two numbers become the ID number for the remote control.

**ID remote control button operation**

The operation is the same as normal remote control except for the button.

### ID Cancellation

Press button on remote control. (This has the same effect as pressing the, , buttons at the same time.)

**Notes:**
- Set the Remote ID “On” to operate the ID remote control.
- If remote ID is set to “On”, you can use the remote control without identical ID number during option menu display.
  (see page 57)
- The ID remote control cannot be used when ID select is set to anything other than 0, and the remote control ID is not the same as the ID select number (see page 57).
MULTI PIP Setup

Set the two-screen display function that is activated when [MULTI PIP] is pressed.

1. Set up
   - Press to display the Setup menu.

2. Press to select the MULTI PIP Setup.
   - Press to display the “MULTI PIP Setup” menu.

3. Press to select the menu to adjust.
   - Press to adjust the menu.

MULTI PIP

Set the two-screen function.

- PIP ↔ Advanced PIP ↔ Blend PIP

Display Mode

The display mode can be changed separately for each function that was set in “MULTI PIP Setup”.

- For “PIP”: [→] (One screen) ↔ P and P ↔ P out P ↔ P in P
- For “Advanced PIP”: [→] (One screen) ↔ 1 to 8
- For “Blend PIP”: [→] (One screen) ↔ Full ↔ P in P

Note: The display mode changes in the same way when [MULTI PIP] is pressed.

Transparent Display of the Sub Screen (During Blend PIP)

1. Select “On” in “Transparency”.
2. Set the transparency level for the sub screen in “Transparency level”. (0 to 100 %)

   Setting example: Transparent image (sub screen)

<table>
<thead>
<tr>
<th>0 %: No transparency</th>
<th>100 %: Fully transparent</th>
</tr>
</thead>
<tbody>
<tr>
<td>A B C D</td>
<td>A B C D</td>
</tr>
<tr>
<td>A B C D</td>
<td>A B C D</td>
</tr>
</tbody>
</table>

Note: “Insert” cannot be set when “Transparency” is “On”.

Sub Screen Insertion (During BLEND PIP)

1. Select “On” in “Insert”.
2. Set the “Insert level”. (1 to 10 %)

   Set the brightness level threshold for discriminating between the transparent areas and non-transparent areas on the sub screen.

   Setting example: Image to insert (sub screen)

<table>
<thead>
<tr>
<th>Insert level</th>
</tr>
</thead>
<tbody>
<tr>
<td>10 %</td>
</tr>
</tbody>
</table>

   Only the areas on the overlay image that are brighter than the “Insert level” are displayed on the background image.

   Note: “Transparency” cannot be set when “Insert” is “On”.

Transparency cannot be set when “Insert” is “On”.

Insert level
Set up for Portrait

Divide an input image into 3 parts, and display one of them to a plasma display which is set vertically. The image will be enlarged 3 times and rotated 90-degree.

(Example)

Note:
When using the Portrait function with displays set vertically, “Display orientation” in Setup menu has to be set to “Portrait” (see page 44).

How to setup Portrait

1. Press to display the Setup menu.

2. Press to select the Portrait Setup.

3. Press to select the Portrait Setup.

   Press to select “On” or “Off”.

   Note: If you set Portrait Setup to On, MULTI DISPLAY Setup will be unavailable.

4. Press to select Seam hides video.

   Press to select “Off”, “On”.

   To hide joints between displays. Suitable for moving image display.
   To show joints between displays. Suitable for still image display.

   On
   Off

   Portrait Setup
   Display orientation Landscape
   Portait Setup Off
   Seam hides video Off
   Viewing Area 16 : 9
   Location 1
   AI-synchronization Off
   AI-synchronization Off
5 Viewing Area / Location

Viewing Area: Set a mode of image division for Portrait function.
Location: Set a location of image to be displayed for Portrait function.

Press to select Viewing Area or Location.
Press to select each functions.

Notes:

- For HD signal videos, the “Viewing Area” is set at “16:9”, and cannot be changed.
  - HD signal: 1125(1080) / 60i • 50i • 60p • 50p • 24p • 25p
  - 30p • 24sF, 750(720) / 60p • 50p, 1250(1080) / 50i
- When “Viewing Area” is “16:9”, the aspect mode is set to “16:9”.

Location setting

When Portrait Setup is “On”:
Display the image of the selected location.

When Portrait Setup is “Off”:
Represent an area of the selected Location at a normal brightness and darken the rest of it.

Viewing Area and Location

The mode of image division and the Location by setting of Viewing Area is as follows.

Viewing Area : 16:9

Location 1
Location 2
Location 3

Undisplayed area (48 dots)

Viewing Area : 4:3

Location 1
Location 2
Location 3

6 Al-synchronization

Adjust to equalize the brightness of the 3 displays when using Portrait setting.

Press to select Al-synchronization.
Press to select “Off”, “On”.

The brightness depends on each display’s setting.
Equalize the brightness of all the displays.

Off
On

Note:
If you set Al-synchronization to On, the following menus will be unavailable and these settings will be fixed to the initial values.
Picture menu: Colour, Hue, Input level (Advanced settings)

7 SET UP Press to exit from adjust mode.
Setup for Input Signals

Component / RGB-in select

Select to match the signals from the source connected to the Component / RGB input terminals.
Y, Pb, Pr signals ↔ "Component"
RGB signals ↔ “RGB”

1 Press to display the Setup menu.

2 Press to select the “Component / RGB-in select”.

3 Press to exit from adjust mode.

Notes:
• Selection may not be possible, depending on which optional board is installed.
• Make setting of the selected input terminal (SLOT1, SLOT2, SLOT3 or PC IN).

YUV / RGB-in select

Select to match the signals from the source connected to the DVI input terminals.
YUV signals ↔ “YUV”
RGB signals ↔ “RGB”

1 Press to display the Setup menu.

2 Press to select the “YUV / RGB-in select”.

3 Press to exit from adjust mode.

Notes:
• Selection may not be possible, depending on which optional board is installed.
• Make setting of the selected input terminal (SLOT1 or SLOT2).
Signal menu

Note:
“Signal” setup menu displays a different setting condition for each input signal.

1. SET UP Press to display the Setup menu.
   
2. Press to select the “Signal”.
   
3. Press to display the Signal menu.
   
4. Press to select the menu to adjust.
   
   Press to adjust the menu.

5. SET UP Press to exit from adjust mode.

---

3D Y/C Filter – For NTSC AV images

Select “Signal” from the “Setup” menu during AV(S Video) input signal. (“Signal [AV]” menu is displayed.)

Press to select the “3D Y/C Filter (NTSC)”

Press to set On / Off.

Note:
When On, this setting only affects NTSC input signals.
Setup for Input Signals

Colour system / Panasonic Auto

Select Signal from the “Setup” menu during AV (S Video) input signal. (“Signal [AV]” menu is displayed.)

Press to select the “Colour system” or “Panasonic Auto (4:3)”. Press to select each functions.

If the picture image becomes unstable:
With the system set on Auto, under conditions of low level or noisy input signals the image may in rare cases become unstable. Should this occur, set the system to match the format of the input signal.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colour system</td>
<td>Set the colour system to match the input signal. When selecting “Auto”, the Colour system is automatically selected from NTSC/PAL/SECAM, however, M.NTSC signal is not displayed properly depending on the attached terminal board. To display M.NTSC signal, select “M.NTSC” in Colour system. To display PAL60 signal, select “PAL” when BNC Dual Video Terminal Board (TY-FB9BD) is used. For other Video Terminal Boards, select “M.NTSC”.</td>
</tr>
<tr>
<td>Panasonic Auto</td>
<td>Set to “4 : 3” to view 4:3 images from an unchanged format when Panasonic Auto is selected. If you would like to view 4:3 images in Just format, set to “Just”.</td>
</tr>
</tbody>
</table>

Note:
Panasonic Auto does not function when BNC Dual Video Terminal Board (TY-FB9BD) is used.

Cinema reality

Cinema reality:
When on, the display attempts to reproduce a more natural interpretation of sources such as movie pictures, which are recorded at 24 frames per second. If the picture is not stable, turn the setting to off.

Note:
When On, this setting only affects the following signal input:
• NTSC / PAL signal input during “AV (S Video)” input signal.
• 525i (480i), 625i (575i), 1125 (1080) / 60i signal input during “Component” input signal.

XGA Mode

This menu is displayed when the input signal is analog (Component/PC). This unit supports three types of XGA signals with 60Hz vertical frequency having different aspect ratios and sampling rates (1,024 × 768 @ 60Hz, 1,280 × 768 @ 60Hz and 1,366 × 768 @ 60Hz).

Press to select “XGA Mode”.

Press to select “Auto”, “1024×768”, “1280×768”, “1366×768”.

Auto: Automatically selected from 1024×768/1280×768/1366×768.

Switch the setting to suit the input signal for better display depends on the angle of view or display resolution condition.

Note:
After making this setting, be sure to make each adjustment (such as “Auto Setup”) on the “Pos. /Size” menu as necessary. (see page 25)
### Refresh Rate

This function sets the refresh rate of the display. This menu is displayed when the input signal is 50 Hz system (50i, 50p, 25p, 24p, 24sF) of vertical scan rate.

- **100 Hz**: Reduce screen flicker.
- **50 Hz**: Enhance the resolution of moving images.

**Note:**
It is recommended to set to 100 Hz normally.

- Press to select “Refresh Rate”.
- Press to adjust.

### Noise reduction

Sets the following three NR (Noise Reduction) functions together.
- **P-NR**,
- **Mosquito NR**,
- **Block NR**

- Press to select “Noise reduction”.
- Press to select “Off”, “Min”, “Mid”, “Max”, “Advanced”.

### Advanced NR

Sets the three NR functions separately.

1. Press to select “Advanced”.
   - Press to enter Advanced NR.

2. Press to select P-NR, Mosquito NR or Block NR.
   - Press to select “Off”, “Min”, “Mid”, “Max”.

<table>
<thead>
<tr>
<th>P-NR:</th>
<th>Automatically reduces unwanted picture noise.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mosquito NR:</td>
<td>Reduces mosquito noise around subtitles on MPEG videos.</td>
</tr>
<tr>
<td>Block NR:</td>
<td>Reduces block noise when playing MPEG videos.</td>
</tr>
</tbody>
</table>

**Note:**
Noise reduction cannot be adjusted while a PC signal is being applied.
## Sync

Select Signal from the “Setup” menu during RGB input signal.

Press to select the “Sync”.
Press to adjust.

### Setting RGB sync signal:

Confirm that the input is set to RGB input (this setting is valid only for RGB input signal).

- **Auto**: The H and V sync or synchronized signal are automatically selected. If both input, it is selected the H and V sync.
- **on G**: Uses a synchronized signal on the Video G signal, which is input from the G connector.
- **VBS**: Uses a synchronized signal of Composite Sync input, which is input from the HD connector.

## SDI Through

Set the active through function of the Dual Link HD-SDI Terminal Board (TY-FB11DHD).

**Note:**
Settings can only be performed for this menu when a slot mounted with a Dual Link HD-SDI Terminal Board (TY-FB11DHD) is selected.

Press to select the “SDI Through”.
Press to select “On” or “Off”.

- **On**: Enables active through.
- **Off**: Disables active through.

## Input signal display

Displays the frequency and the type of the current input signal.

This display is valid only for Component / RGB / PC and Digital input signal.

Display range:
- Horizontal 15 - 110 kHz
- Vertical 48 - 120 Hz

The dot clock frequency is displayed during digital signal input.
Network Setup

Make the various settings to use the network function.

DHCP, IP address, Subnet mask, and Gateway settings

1 Set DHCP. When “Off” is selected, IP address and other settings can be set manually.

2 Select the item and press □.

3 Enter an address.

   ① Use ▲▼ to select a digit.
   ② Use ←→ to change a number.
   ③ Press .

   Pressing R will cancel the address change.

4 Select “Save” and press □.

Port setting

1 Select “Port” and press □.

2 Enter a port number.

   ① Use ▲▼ to select a digit.
   ② Use ←→ to change a number.
   ③ Press .

   Pressing R will cancel the port number change.

Save

Save the current network Setup. Each value set for DHCP, IP address, Subnet mask, and Gateway will be saved. If “NG” is displayed, check the same IP address is not used within the same network.

DHCP (DHCP client function)

To obtain an IP address automatically using a DHCP server, set this to “On”. If DHCP server is not used, set this to “Off”.

IP address (IP address display and setting)

Enter an IP address if DHCP server is not used.

Subnet mask (Subnet mask display and setting)

Enter a subnet mask if DHCP server is not used.

Gateway (Gateway address display and setting)

Enter a gateway address if DHCP server is not used.

Port

Set the port number used for command control.
The available setting range is 1024 – 65535. When the PJLink™ protocol is used, the port setting is not necessary.

LAN Speed

Set the connection speed of the LAN environment.
Select the value from Auto, 10 Half, 10 Full, 100 Half or 100 Full.

Network ID

Set the ID to identify this unit.
The available setting range is 0 – 99.

Control I/F Select

Set whether to control with RS-232C (serial) or LAN.
When “LAN” is set, the slot power is turned on, and power indicator is lit orange under the condition of power “Off” with remote control (stand-by state), regardless of the “Slot power” setting. (see page 58)

MAC address

Display the MAC address of this unit. However, the MAC address is not displayed when the “Control I/F Select” is set to “RS-232C”.

Notes:

• To use a DHCP server, make sure the DHCP server is started.
• Contact your network administrator for details on settings.
## Options Adjustments

1. **SET UP**
   - Press to display the Setup menu.

2. **SET UP**
   - Press to select “OSD Language”.
   - Press for more than 3 seconds.

3. **SET UP**
   - Press to display the Options menu.

4. **SET UP**
   - Press to select your preferred menu.
   - Press to adjust the menu.

5. **SET UP**
   - Press to exit from Options menu.

### Adjustments

|                    | **Auto:** Other than remote control or menu operation, automatic position adjustment starts:  
|                    | When the display power is turned ON.  
|                    | When the input signal is switched. |
| Rotate             | **Off:** Does not rotate the image.  
|                    | **On:** Rotates the image 180 degrees. |
| Serial Slot Select | **Slot1 ↔️ Slot2 ↔️ Slot3**  
|                    | Selects the slot which communicates serial.  
|                    | **Note:** The setting of an external command can be set only from the fixed serial terminal. (see page 12) |

Normalization
When both main unit buttons and remote control are disabled due to the “Button lock”, “Remocon User level” or “Remote ID” adjustments, set all the values “Off” so that all the buttons are enabled again.

Press the $\text{pos}$ and $\text{up}$ button on main unit together with $\text{pos}$ button on the remote control and hold for more than 5 seconds. The “Shipping” menu is displayed and the lock is released when it disappears.
Weekly Command Timer

You can set 7-day timer programming by setting time and command.

**Note:**
Before setting Weekly Command Timer, set PRESENT TIME Setup. (see page 36)

1. Press to select Function.
2. Press to select “On”.
   **Note:**
   - When Function is set to On, Set up TIMER (see page 36) is unavailable and Interval / Time Designation in Mode of Screensaver (see page 37) cannot be selected.
3. Press to select Program Edit.
4. Press to show the Program Edit screen.
5. Press to select Program.
6. Press to change the program numbers (1-7).
7. Press to select a command number.
8. Press to show the previous / next command pages (1-8) of the selected program.
9. Press to show the command setting screen.

Press ACTION (■) button
Options Adjustments

Press to select Command No.
Press to select a command number.

Press to select Time / Command.
Press to set each item.

Time: Set the time to execute a command program.
Pressing "<" or ">") button once changes “Time” 1 minute.
Pressing "<" or ">") button continuously changes “Time” by 15 minutes.
Command: Select a command to execute at the set time. This unit has 64 commands to set.

Notes:
- Command is performed in order of execution time, regardless of the command number.
- If a command execution time overlaps with that of other commands, these commands are performed in number order.
- Pressing , Time becomes --:-- and Command becomes ---.

Note:
Press R to return to the previous screen.

Shipping condition

This function allows you to reset the unit to the factory setting.

1. SET UP
Press to display the Setup menu.
Press to select “OSD Language”.
Press for more than 3 seconds.
Press to select “Shipping”.
Press to display the Shipping menu.
Press to select “YES”.
Press to confirm.

[from the unit]
1. Press the MENU button till the Setup menu is displayed.
2. Press the Volume Up “+” or Down “−” button to select “OSD Language”.
3. Press and hold the ENTER button till the Shipping menu is displayed.
4. Press the Volume Up “+” or Down “−” button to select “YES”.
5. Press the ENTER button and wait for 10 sec.
Using Network Function

This unit has a network function to control the network connected display with your computer.

**Note:**
To use the network function, set each “Network Setup” setting and make sure to set the “Control I/F Select” to “LAN”. (see page 55)
When “LAN” is set, the slot power is turned on, and power indicator is lit orange under the condition of power “Off” with remote control (stand-by state), regardless of the “Slot power” setting. (see page 58)

Example of Network Connection

![Diagram of network connection](image)

**Notes:**
- Lay the LAN cable away from other connection cables (excluding the power cord).
- Make sure the broadband router or hub supports 10BASE-T/100BASE-TX.
- To connect a device using 100BASE-TX, use “category 5” LAN cable.
- Touching the LAN terminal with a statically charged hand (body) may cause damage due to its discharge.
- Do not touch the LAN terminal or a metal part of the LAN cable.
- For instructions on how to connect, consult your network administrator.

Securing the LAN cable

When using a pedestal (TY-ST85P12) for the installation of the display, use a clamper supplied with the display to secure the LAN cable. For use with another method of installation, refer to the corresponding Installation Instructions.

**Note:** In accordance with the Installation Instructions, secure the LAN cable so that it will not become near the display unit.

Command Control

Network function of the unit can control the unit in the same way as serial control from a network.

**Supported commands**
Commands used in the serial control are supported. (see page 12)

**Note:**
Consult your local Panasonic dealer for detail instructions on command usage.
Using Network Function

**PJLink™ Protocol**

The network function of the unit conforms with PJLink™ class 1 and you can operate the following actions from your computer using PJLink™ protocol.

- Display setup
- Display status query

**Supported commands**

Commands to control the unit with PJLink™ protocol are shown in the table below.

<table>
<thead>
<tr>
<th>Command</th>
<th>Control</th>
<th>Parameter</th>
</tr>
</thead>
<tbody>
<tr>
<td>POWER</td>
<td>Power control</td>
<td>0 = Standby 1 = Power “On”</td>
</tr>
<tr>
<td>POWER?</td>
<td>Power status query</td>
<td>Parameter</td>
</tr>
<tr>
<td>INPT</td>
<td>Input switch</td>
<td>Parameter</td>
</tr>
<tr>
<td>INPT?</td>
<td>Input switch query</td>
<td>First byte: 1 (RGB) fixed  Second byte: Input position (from 1)</td>
</tr>
<tr>
<td>AVMT</td>
<td>Shutter control</td>
<td>Parameter</td>
</tr>
<tr>
<td>AVMT?</td>
<td>Shutter control query</td>
<td>Parameter</td>
</tr>
<tr>
<td>ERST?</td>
<td>Error status query</td>
<td>Parameter</td>
</tr>
<tr>
<td>LAMP?</td>
<td>Lamp status query</td>
<td>Not supported</td>
</tr>
<tr>
<td>INST?</td>
<td>Input switch list query</td>
<td>Parameter</td>
</tr>
<tr>
<td>NAME?</td>
<td>Projector name query</td>
<td>Returns empty character (no name information)</td>
</tr>
<tr>
<td>INF1?</td>
<td>Manufacturer name query</td>
<td>Returns “Panasonic”</td>
</tr>
<tr>
<td>INF2?</td>
<td>Model name query</td>
<td>Returns “TH-85PF12” (for 85-inch model)</td>
</tr>
<tr>
<td>INFO?</td>
<td>Other information query</td>
<td>Returns version number</td>
</tr>
<tr>
<td>CLSS?</td>
<td>Class information query</td>
<td>Returns “1”</td>
</tr>
</tbody>
</table>

**PJLink™ security authentication**

Set “Panasonic” for the PJLink™ password.

- PJLink™ is a pending trademark in Japan, the United States, and other countries or areas.
Troubleshooting

Before you call for service, determine the symptoms and make a few simple checks as shown below.

<table>
<thead>
<tr>
<th>Symptoms</th>
<th>Sound</th>
<th>Checks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interference</td>
<td>Noisy Sound</td>
<td>Noises from: Electrical Appliances, Cars / Motorcycles, Fluorescent light</td>
</tr>
<tr>
<td>Normal Picture</td>
<td>No Sound</td>
<td>Volume (Check whether mute function has been activated on the remote control.)</td>
</tr>
<tr>
<td>No Picture</td>
<td>No Sound</td>
<td>Not plugged into AC outlet, Not switched on, Picture and Brightness/Volume setting (Check by pressing the power switch or stand-by button on the remote control.)</td>
</tr>
<tr>
<td>No Picture</td>
<td>Normal Sound</td>
<td>If a signal with a non-applicable colour system format, or frequency is input, only the input terminal indication is displayed.</td>
</tr>
<tr>
<td>No Colour</td>
<td>Normal Sound</td>
<td>Colour controls set at minimum level (see page 28, 29), Colour system (see page 52)</td>
</tr>
<tr>
<td>No remote control operations can be performed.</td>
<td></td>
<td>Check whether the batteries have discharged completely and, if they have not, whether they were inserted properly. Check whether the remote control sensor is exposed to an outdoor light or a strong fluorescent light. Check whether the remote control designed specifically for use with the unit is being used. (The unit cannot be operated by any other remote control.)</td>
</tr>
<tr>
<td>A cracking sound is sometimes heard from the unit.</td>
<td></td>
<td>If there is nothing wrong with the picture or sound, this is the sound of the cabinet undergoing very slight contractions in response to changes in the room temperature. There are no adverse effects on the performance or other aspects.</td>
</tr>
<tr>
<td>The top or bottom of the picture on the screen is cut off when I use the zoom function.</td>
<td></td>
<td>Adjust the position of the picture on the screen.</td>
</tr>
<tr>
<td>Areas at the top and bottom of the screen where the image is missing appear when I use the zoom function.</td>
<td></td>
<td>When using a video software program (such as a cinema size program) with a screen wider than one in the 16:9 mode, blank areas separate from the images are formed at the top and bottom of the screen.</td>
</tr>
<tr>
<td>I can hear sounds coming from inside the unit.</td>
<td></td>
<td>When the power is turned on, a sound of the display panel being driven may be heard: This is normal and not indicative of malfunctioning.</td>
</tr>
</tbody>
</table>

This Plasma Display uses special image processing. Hence a slight time lag may occur between image and audio, depending on the type of input signal. However, this is not a malfunction.

Plasma Display panel

<table>
<thead>
<tr>
<th>Symptoms</th>
<th>Check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The screen darkens slightly when bright pictures with minimal movements are shown.</td>
<td>The screen will darken slightly when photos, still images of a computer or other pictures with minimal movements are shown for an extended period. This is done to reduce image retention on the screen and the shortening of the screen's service life: It is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>It takes a while for the picture to appear.</td>
<td>The unit digitally processes the various signals in order to reproduce esthetically pleasing images. As such, it sometimes takes a few moments for the picture to appear when the power has been turned on, when the input has been switched or when the images for the main picture and sub picture on the two screens are swapped.</td>
</tr>
<tr>
<td>The edges of the images flicker.</td>
<td>Due to the characteristics of the system used to drive the panel, the edges may appear to flicker in the fast-moving parts of the images: This is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>The brightness on both sides of images in the 4:3 mode changes.</td>
<td>When viewing the side panels at the “High” or “Mid” setting, the brightness on both sides may change depending on the kind of program shown: This is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>Some parts of the screen do not light up.</td>
<td>The plasma display panel is manufactured using an extremely high level of precision technology, however, sometimes some parts of the screen may be missing picture elements or have luminous spots. This is not a malfunction.</td>
</tr>
</tbody>
</table>

Image retention appears 

Do not allow a still picture to be displayed for an extended period, as this can cause a permanent image retention to remain on the Plasma Display. Examples of still pictures include logos, video games, computer images, teletext and images displayed in 4:3 mode.

Note: The permanent image retention on the Plasma Display resulting from fixed image use is not an operating defect and as such is not covered by the Warranty.

This product is not designed to display fixed images for extended periods of time.

Whirring sounds can be heard from the display unit. The display unit is fitted with a cooling fan to dissipate heat generated during normal use. The whirring sound is caused by rotation of the fan and is not a malfunction.
### List of Aspect Modes
