Before operating this product, please read the instructions carefully and save this manual for future use.

TQB0234
Dear Panasonic Customer:

This instruction booklet provides all the necessary operating information that you might require. We hope it will help you to get the most out of your new product, and that you will be pleased with your Panasonic LCD projector. The serial number of your product may be found on its bottom. You should note it in the space provided below and retain this booklet in case service is required.

---

**Model number:** PT-AE2000E

---

**WARNING:** THIS APPARATUS MUST BE EARTHED.

**WARNING:** To prevent damage which may result in fire or shock hazard, do not expose this appliance to rain or moisture.

Machine Noise Information Ordinance 3. GSGV, January 18, 1991: The sound pressure level at the operator position is equal or less than 70 dB (A) according to ISO 7779.

**WARNING:**
1. Remove the plug from the mains socket when this unit is not in use for a prolonged period of time.
2. To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
3. Do not remove the earthing pin on the mains plug. This apparatus is equipped with a three prong earthing-type mains plug. This plug will only fit an earthing-type mains socket. This is a safety feature. If you are unable to insert the plug into the mains socket, contact an electrician. Do not defeat the purpose of the earthing plug.

**CAUTION:** To assure continued compliance, follow the attached installation instructions, which includes using the provided power cord and shielded interface cables when connecting to computer or peripheral device. If you use serial port to connect PC for external control of projector, you must use optional RS-232C serial interface cable with ferrite core. Any unauthorized changes or modifications to this equipment will void the user’s authority to operate.

---

Pursuant to at the directive 2004/108/EC, article 9(2)

Information on Disposal for Users of Waste Electrical & Electronic Equipment (private households)

This symbol on the products and/or accompanying documents means that used electrical and electronic products should not be mixed with general household waste. For proper treatment, recovery and recycling, please take these products to designated collection points, where they will be accepted on a free of charge basis. Alternatively, in some countries you may be able to return your products to your local retailer upon the purchase of an equivalent new product. Disposing of this product correctly will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling. Please contact your local authority for further details of your nearest designated collection point. Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

For business users in the European Union
If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

Information on Disposal in other Countries outside the European Union
This symbol is only valid in the European Union.
If you wish to discard this product, please contact your local authorities or dealer and ask for the correct method of disposal.
IMPORTANT: THE MOULDED PLUG (U.K. only)

FOR YOUR SAFETY, PLEASE READ THE FOLLOWING TEXT CAREFULLY.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience. A 13 amp fuse is fitted in this plug. Should the fuse need to be replaced, please ensure that the replacement fuse has a rating of 13 amps and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover, you must ensure that it is refitted when the fuse is replaced. If you lose the fuse cover, the plug must not be used until a replacement cover is obtained. A replacement fuse cover can be purchased from an Authorised Service Centre.

If the fitted moulded plug is unsuitable for the mains socket in your home, then the fuse should be removed and the plug cut off and disposed of safely. There is a danger of severe electrical shock if the cut off plug is inserted into any 13 amp socket.

If a new plug is to be fitted, please observe the wiring code as shown below. If in any doubt, please consult a qualified electrician.

**WARNING:** THIS APPLIANCE MUST BE EARTHED.

**IMPORTANT:** The wires in this mains lead are coloured in accordance with the following code:

- Green - and - Yellow: Earth
- Blue: Neutral
- Brown: Live

As the colours of the wire in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows.

- The wire which is coloured GREEN - AND - YELLOW must be connected to the terminal in the plug which is marked with the letter E or by the Earth symbol  or coloured GREEN or GREEN - AND - YELLOW.

- The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.

- The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

**How to replace the fuse:** Open the fuse compartment with a screwdriver and replace the fuse.

Precautions with regard to safety

**WARNINGS**

If you notice smoke, strange smells or noise coming from the projector, disconnect the mains plug from the mains socket.
- Do not continue to use the projector in such cases, otherwise fire or electric shocks could result.
- Check that no more smoke is coming out, and then contact an Authorised Service Centre for repairs.
- Do not attempt to repair the projector yourself, as this can be dangerous.

Do not install this projector in a place which is not strong enough to take the full weight of the projector.
- If the installation location is not strong enough, it may fall down or tip over, and severe injury or damage could result.

Installation work (such as ceiling suspension) should only be carried out by a qualified technician.
- If installation is not carried out correctly, there is the danger that injury or electric shocks may occur.
- Do not use other than an authorised ceiling mount bracket.

If foreign objects or water get inside the projector, or if the projector is dropped or the cabinet is broken, disconnect the mains plug from the mains socket.
- Continued use of the projector in this condition may result in fire or electric shocks.
- Contact an Authorised Service Centre for repairs.

Do not overload the mains socket.
- If the power supply is overloaded (for example, by using too many adapters), overheating may occur and fire may result.

Never attempt to modify or disassemble the projector.
- High voltages can cause fire or electric shocks.
- For any inspection, adjustment and repair work, please contact an Authorised Service Centre.

Clean the mains plug regularly to prevent it from becoming covered in dust.
- If dust builds up on the mains plug, the resulting humidity can damage the insulation, which could result in fire. Pull the mains plug out from the mains socket and wipe it with a dry cloth.
- If not using the projector for an extended period of time, pull the mains plug out from the mains socket.

Do not handle the mains plug with wet hands.
- Failure to observe this may result in electric shocks.

Insert the mains plug securely into the mains socket.
- If the plug is not inserted correctly, electric shocks or overheating could result.
- Do not use plugs which are damaged or mains sockets which are coming loose from the wall.

Do not place the projector on top of surfaces which are unstable.
- If the projector is placed on top of a surface which is sloped or unstable, it may fall down or tip over, and injury or damage could result.

Do not place the projector into water or let it become wet.
- Failure to observe this may result in fire or electric shocks.

Do not do anything that might damage the mains lead or the mains plug.
- Do not damage the mains lead, make any modifications to it, place it near any hot objects, bend it excessively, twist it, pull it, place heavy objects on top of it or wrap it into a bundle.
- If the mains lead is used while damaged, electric shocks, short-circuits or fire may result.
- Ask an Authorised Service Centre to carry out any repairs to the mains lead that might be necessary.

Do not place the projector on soft materials such as carpets or sponge mats.
- Doing so may cause the projector to overheat, which can cause burns, fire or damage to the projector.

Do not place liquid containers on top of the projector.
- If water spills onto the projector or gets inside it, fire or electric shocks could result.
- If any water gets inside the projector, contact an Authorised Service Centre.

Do not insert any foreign objects into the projector.
- Do not insert any metal objects or flammable objects into the projector or drop them onto the projector, as doing so can result in fire or electric shocks.

Do not allow the + and - terminals of the batteries to come into contact with metallic objects such as necklaces or hairpins.
- Failure to observe this may cause the batteries to leak, overheat, explode or catch fire.
- Store the batteries in a plastic bag and keep them away from metallic objects.

Do not touch the leaked liquid from the batteries.
- If you touch the leaked liquid, it may hurt your skin. Immediately wash away the liquid with water and seek medical advice.
- If you get the leaked liquid in your eye, it may cause blindness or damage. Never rub your eye, and immediately wash away the liquid with water and seek medical advice.

During a thunderstorm, do not touch the projector or the cable.
- Electric shocks can result.
Precautions with regard to safety

Do not use the projector in a bath or shower.
- Fire or electric shocks can result.

Do not place your skin into the light beam while the projector is being used.
- Strong light is emitted from the projector’s lens. If you place directly into this light, it can hurt or damage your skin.

Do not look into the lens while the projector is being used.
- Strong light is emitted from the projector’s lens. If you look directly into this light, it can hurt and damage your eyes.
- Be especially careful not to let young children look into the lens. In addition, turn off the power and disconnect the mains plug when you are away from the projector.

Do not place your hands or other objects close to the air outlet port.
- Heated air comes out of the air outlet port. Do not place your hands or face, or objects which cannot withstand heat close to this port [allow at least 50 cm (20") of space], otherwise burns or damage could result.

Replacement of the lamp is recommended to be carried out by a qualified technician.
- The lamp has high internal pressure. If improperly handled, explosion might result.
- The lamp can easily become damaged if struck against hard objects or dropped, and injury or malfunctions may result.

When replacing the lamp, allow it to cool for at least one hour before handling it.
- The lamp cover gets very hot, and touching it can cause burns.

Before replacing the lamp, be sure to disconnect the mains plug from the mains socket.
- Electric shocks or explosions can result if this is not done.

Do not allow infants or pets to touch the remote control unit.
- The accessory remote control unit can be used to operate not only the projector but also other appliances such as air conditioners and electrical device by programming them using the learning function. If the remote control unit operated inappropriately, fire or injury may result.
- Keep the remote control unit out of the reach of infants and pets after using it.
Precautions with regard to safety

CAUTIONS

Do not cover the air inlet port or the air outlet port.
- Doing so may cause the projector to overheat, which can cause fire or damage to the projector.
- Do not place the projector in narrow, badly ventilated places such as closets or bookshelves.
- Do not place the projector on cloth or papers, as these materials could be drawn into the air inlet port.

Do not set up the projector in humid or dusty places or in places where the projector may come into contact with oily smoke or steam.
- Using the projector under such conditions may result in fire, electric shocks or plastic deterioration. The plastic deterioration may cause the falling down of the projector which is mounted in the ceiling.

Do not set up the projector in a high temperature environment, such as near a heater or in direct sunlight.
- Failure to observe this may result in fire, malfunction or plastic deterioration.

Do not set up the projector outdoors.
- The projector is designed for indoor use only.

When disconnecting the mains lead, hold the plug, not the lead.
- If the mains lead itself is pulled, the lead will become damaged, and fire, short-circuits or serious electric shocks may result.

Always disconnect all cables before moving the projector.
- Moving the projector with cables still attached can damage the cables, which could cause fire or electric shocks to occur.

Do not place any heavy objects on top of the projector.
- Failure to observe this may cause the projector to become unbalanced and fall, which could result in damage or injury.

Do not short-circuit, heat or disassemble the batteries or place them into water or fire.
- Failure to observe this may cause the batteries to overheat, leak, explode or catch fire, and burns or other injury may result.

When inserting the batteries, make sure the polarities (+ and -) are correct.
- If the batteries are inserted incorrectly, they may explode or leak, and fire, injury or contamination of the battery compartment and surrounding area may result.

Use only the specified batteries.
- If incorrect or different kind of batteries are used, they may explode or leak, and fire, injury or contamination of the battery compartment and surrounding area may result.

Do not mix old and new batteries.
- If the batteries are inserted incorrectly, they may explode or leak, and fire, injury or contamination of the battery compartment and surrounding area may result.

Remove the used batteries from the remote control promptly.
- If you leave used batteries in the remote control for an extended period of time, it may cause liquid leaking, abnormal internal temperature rising or explosion.

If not using the projector for an extended period of time, disconnect the mains plug from the mains socket and remove the batteries from the remote control.
- If dust builds up on the mains plug, the resulting humidity may damage the insulation, which could result in fire.
- Keeping or leaving the remote control with batteries inside may cause insulation deterioration, electrical leakage or explosion which could result in fire.

Do not put your weight on this projector.
- You could fall or the projector could break, and injury may result.
- Be especially careful not to let young children stand or sit on the projector.

Disconnect the mains plug from the mains socket as a safety precaution before carrying out any cleaning.
- Electric shocks can result if this is not done.

If the lamp has broken, ventilate the room immediately. Do not touch or bring your face close to the broken pieces.
- Failure to observe this may cause the user to absorb the gas which was released when the lamp broke and which contains nearly the same amount of mercury as fluorescent lamps, and the broken pieces may cause injury.
- If you believe that you have absorbed the gas or that the gas has got into your eyes or mouth, seek medical advice immediately.
- Ask your dealer about the replacement of the lamp unit and check the inside of the projector.
Precautions with regard to safety

Ask an Authorised Service Centre to clean inside the projector at least once a year.
- If dust is left to build up inside the projector without being cleaned out, it can result in fire or problems with operation.
- It is a good idea to clean the inside of the projector before the season for humid weather arrives. Ask your nearest Authorised Service Centre to clean the projector when required. Please discuss with the Authorised Service Centre regarding cleaning costs.

We are constantly making efforts to preserve and maintain a clean environment. Please take non repairable units back to your dealer or a recycling company.

Cautions when transporting

Do not subject the projector to excessive vibration or shocks.
- The projector lens need to be handled with care.
- Cover the lens with the lens cover when transporting the projector.

When transporting the projector, hold the body at the bottom securely.
- Do not hold the adjuster legs or the top cover to move the projector, as this may damage the projector.

Cautions when installing

Avoid setting up in places which are subject to vibration or shocks.
- The internal parts can be damaged, which may cause malfunctions or accidents.

Avoid setting up in places which are subject to sudden temperature changes, such as near an air conditioner or lighting equipment.
- The life of the lamp may be shortened or the projector may be turned off. See “TEMP indicator” on page 42.

Do not set up the projector near high-voltage power lines or near motors.
- The projector may be subject to electromagnetic interference.

If installing the projector to the ceiling, ask a qualified technician or an Authorised Service Centre to carry out all installation work.
- You will need to purchase the separate installation kit (Model No. ET-PKE2000, ET-PKE1000S).
- Furthermore, all installation work is should only be carried out by a qualified technician.
- See “Ceiling mount bracket safeguards” on page 51 for the safety cable installation.

If using this projector at high elevations (above 1 400 m), set the HIGHLAND to ON. See “ALTITUDE” on page 41.
- Failure to observe this may result in malfunctions or the life of the lamp or the other components may be shortened.
Precautions with regard to safety

Cautions on use

In order to get the best picture quality

- Draw curtains or blinds over any windows and turn off any lights near the screen to prevent outside light or light from indoor lamps from shining onto the screen.

Do not touch the surfaces of the lens with your bare hands.

- If the surface of the lens becomes dirty from fingerprints or anything else, this will be magnified and projected onto the screen. Moreover, when not using the projector, attach the lens cover.

Liquid crystal panel

- Do not project the same image for long periods of time, as this may remain as an afterimage on the liquid crystal panel.

- The liquid crystal panel of the projector is built with very high precision technology to provide fine picture details. Occasionally, a few stuck pixels may appear on the screen as fixed points of blue, green or red. It is recommended to switch off the projector once and try after 1 hour later again. Please note that this does not affect the performance of your LCD.

The projector has a high pressure mercury lamp and that is characterised as follows.

- The brightness of the lamp depends on the duration of use.
- The lamp may explode or shorten the lamp life by shocks or chipping damage.
- The lamp may explode only occasionally after using the projector.
- The lamp may explode if using the projector after the instructed lamp replacement timing.
- The lamp life is depends on individual lamp characteristics, usage condition and the installation environment. Especially the consecutive use of the projector for more than 10 hours, or the frequent switching on or off may greatly affect on the lamp life.

Screen

- Do not apply any volatile substances which may cause discolouration to the screen, and do not let it become dirty or damaged.

Optical components

- If you use the projector consecutively 6 hours every day, the optical components may need to be replaced in less than 1 year.

Accessories

Make sure the following accessories are provided with your projector.

About Your Projector

Remote control

**POWER** button
While the **MAIN POWER** button is on, switch between stand-by mode and projection mode. (page 19)

Display the main menu or return to the previous menu. (page 30)

Navigate through the menus with ▲▼◄►, and activate the menu item with **ENTER**. (page 30)

Reset some of the settings to the factory default settings. (page 22)

Battery compartment
1. Press the tab and lift up the cover.
2. Insert the batteries according to the polarity diagram indicated inside.

**FUNCTION** buttons
Assign the frequently used functions from the options for shortcut. (page 39)

**LEARNING** remote control buttons and **LCD**
Programme and operate other devices. See “Remote Control Operating Guide” which is provided with the projector.

Capture the projected image as a still image. (page 22)

**INPUT**
Switch to cycle through the input method. (page 23)

**LENS**
Display the **LENS CONTROL** menu and adjust the focus and size of the image. (page 25)

**SLEEP**
Turn off the power automatically by setting the duration. (page 25)

**ASPECT**
Switch to cycle through the aspect ratio. (page 23)

**PIC.MODE**
Switch to cycle through the **PICTURE MODE**. (page 25)

Turning on/off the **LIGHT**
Turn the button backlight of the remote control on/off. (page 22)

**MEM.LOAD**
Display the **MEMORY LOAD** menu. (page 23)

**COLOR.M.**
Display the **COLOUR MANAGEMENT** menu. (page 26)

**FREEZE**
Return to the previous menu. (page 30)

NOTE:
- Do not drop the remote control.
- Avoid contact with liquids or moisture.
- Use manganese batteries or alkaline batteries with the remote control.
- Do not attempt to modify or disassemble the remote control. Contact an Authorised Service Centre for repairs.
- Do not keep pressing the remote control buttons as this may shorten battery life.
- Do not point the laser in other people’s eyes or stare into beam.
- See “Remote control operation” on page 22.
About Your Projector

Projector body

Power filter
(page 43)

MAIN POWER
Switch the projector on/off
(page 20)

INPUT SELECT
Switch to cycle through the input method. (page 21)

Navigate through the menus with ▲ ▼ ◄ ►, and activate the menu item with ENTER. (page 30)

POWER
While the MAIN POWER is on, switch between stand-by mode and project mode. (page 19)

MENU
Display the main menu. Return to the previous menu. (page 30)

RETURN
Return to the previous menu. (page 30)

FOCUS and ZOOM
Adjust the focus and size of the image. (page 21)

NOTE:
• Do not cover the ventilation openings or place anything within 50 cm (20") of them as this may cause damage or injury.
• While the projector is not in use, keep the lens cover to protect the lens.
Back and bottom view

**Security lock**
Attach the commercial shackle lock which is provided with the projector. Compatible with the Kensington MicroSaver Security System. (page 51)

**Top cover**
Hold at the back corner of the top cover and slightly push up to open. (page 44)

**Air intake port**

**AC IN**
Connect the mains lead to supply electronic power to the projector. (page 19)

**Safety cable attachment point**
Attach the safety cable when mounted in the ceiling. (page 51)

**Front leg adjusters**
Screw up/down to adjust the projection angle. (page 15)

**Lens cover attachment hole**

**COMPUTER IN**
Connect an RGB signal cable from your PC.

**COMPONENT IN**
Connect YPBPR signal cables.

**S-VIDEO IN**
Connect a S-VIDEO signal cable.

**VIDEO IN**
Connect an RCA composite video cable.

**SERIAL**
Connect a compatible cable for controlling the projector remotely via your computer. (page 48)

**HDMI IN**
Connect HDMI signal cables.

**Connecting terminals**
(page 18)

**NOTE:**
- Do not cover the ventilation openings or place anything within 50 cm (20") of them as this may cause damage or injury.
- The projector should only be used with the attached mains lead to ensure optimum performance and avoid damage to the projector.
- Do not open the top cover other than replacing the lamp unit.
Getting Started

Screen size and throw distance

You can adjust the projection size with 2.0x zoom lens. Calculate and define the throw distance as follows.

Calculation methods for screen dimensions

You can calculate more detailed screen dimension from the screen diagonal.

\[
\begin{align*}
SW (m) &= SD (m) \times 0.872 \\
SH (m) &= SD (m) \times 0.490 \\
LW (m) &= 1.189 \times SD (m) - 0.04 \\
LT (m) &= 2.378 \times SD (m) - 0.05
\end{align*}
\]

* The results above are approximate and may differ slightly from the actual measurements.

NOTE:

- Do not use the projector at a raised or a horizontally tilted position as it may cause malfunction of the projector.
- Make sure the projector lens surface is parallel with the screen. You can tilt the projector body less than approximately ± 30° vertically. Overtilting may result in shortening the component’s life.
- For the best quality of the projection image, install a screen where sun light or room light does not shine directly onto the screen. Close window shades or curtains to block the lights.
You can use the projector with any of the following 4 projection methods. To set the desired method in the projector, see "INSTALLATION" on page 41.

- **Setting on a desk/floor and projecting from front**
- **Setting on a desk/floor and projecting from rear**
- **Mounting in the ceiling and projecting from front**
- **Mounting in the ceiling and projecting from rear**

**NOTE:**
- A translucent screen is required for rear projection.
- When mounting the projector in the ceiling, the optional ceiling mount bracket (ET-PKE2000, ET-PKE1000S) is required.
- See “Ceiling mount bracket safeguards” on page 51.

**Front leg adjusters and throwing angle**

You can screw up/down the front leg adjusters to control the angle of the projector for adjusting the throwing angle. See “Positioning the image” on page 21.

**NOTE:**
- Heated air comes out of the air exhaust port. Do not touch the air exhaust port directly.
- If keystone distortion occurs, see “KEYSTONE” on page 38.
- Screw up the adjuster legs, and an audible click will be heard as the limit.
**Getting Started**

**Lens shift and positioning**

If the projector is not positioned right in front of the centre of the screen, you can adjust the projected image position by moving the lens shift dials within the shift range of the lens.

### Adjusting the lens shift dials

#### Horizontal shift

You can place the projector where the projector lens is up to 40% horizontally off-centre from the screen and then adjust the image position with the **Lens shift dial • Horizontal**.

- **Up to about 40% of the projection**
- **Up to about 40% of the projection**

Turn the dial clockwise:
- Moving to screen’s right
- Up to about 40% of the projection

Turning the dial counterclockwise:
- Moving to screen’s left
- Up to about 100% of the projection

#### Vertical shift

You can place the projector where the projector lens is up to 100% vertically off-centre from the screen and adjust the image position with the **Lens shift dial • Vertical**.

- **Up to about 100% of the projection**
- **Up to about 100% of the projection**

Shifting the lever down:
- Moving to screen’s bottom.

Shifting the lever up:
- Moving to screen’s top.
Projector location range

You can determine where to locate the screen and the projector by considering the lens shift possibilities. See “Positioning the image” on page 21.

- When the screen position is fixed

- When the projector position is fixed

**NOTE:**
- When the projector is located right in front of the screen and the lens shift dials is centred, you will get the best quality of the projection image.
- When the Lens shift dial • *Vertical* is at the vertical limit of the shift range, you cannot turn the dial to the horizontal limit, likewise when the Lens shift dial • *Horizontal* is at the horizontal limit of the shift range, you cannot turn the dial to the horizontal limit.
- When the projector is tilted and you adjust KEYSTONE, the centre of the screen and the lens need to be realigned.
- Do not force the lens shift dials to turn as this may damage the projector. Turning the dials maximum limit is 4 or 5 times from the default position.
Connections

Before connecting to the projector

- Read and follow the operating and connecting instructions of each peripheral device.
- The peripheral devices must be turned off.
- Use cables that match each peripheral device to be connected.
- Confirm the type of video signals. See “List of compatible signals” on page 47.
- Audio cables must be connected from each peripheral device directly to the audio reproduction system.

Connecting to COMPONENT IN/VIDEO IN/S-VIDEO IN

NOTE:
- Make sure the HDMI cable is adapted to your HDMI device for proper performance.
- A compatible cable is required for an HDMI 1080p signal.
- It is possible to connect with DVI devices via a HDMI/DVI conversion adapter, but some equipment may not project the image properly or other problems could be encountered. “Serial terminal” on page 48
Switching the projector on/off

Mains lead

Connecting
1. Make sure the shape of the mains plug and the AC IN connector on the back of the projector match, then push the plug all the way in.
2. Connect the mains lead to a mains socket.

Disconnecting
1. Make sure the MAIN POWER is switched off and unplug the mains lead from the mains socket.
2. Hold the plug and unplug the mains lead from the AC IN connector on the side of the projector.

NOTE:
• Do not use other than the provided mains lead.
• Ensure all the input devices are connected and turned off before connecting the mains lead.
• Do not force the connector as this may damage the projector and/or the mains lead.
• Dirt or dust build-up around plugs may cause fire or electrical hazards.
• Switch off the power to the projector when not in use.

POWER indicator

<table>
<thead>
<tr>
<th>Indicator status</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>No illumination or flashing</td>
<td>The MAIN POWER button is switched off.</td>
</tr>
<tr>
<td>Red</td>
<td>Lit</td>

<tr>
<td>Green</td>
<td>Flashing</td>
</tr>
<tr>
<td></td>
<td>Lit</td>
</tr>
<tr>
<td>Orange</td>
<td>Lit</td>
</tr>
<tr>
<td></td>
<td>Flashing</td>
</tr>
</tbody>
</table>

NOTE:
• While the projector is cooling the lamp, do not switch the MAIN POWER button off or unplug the mains lead.
• The electric consumption in standby mode is 0.08 W.
Switching the projector on/off

Switching on the projector

1. Switch the MAIN POWER button on.
   • The power indicator lights up in red.
2. Remove the lens cover from the lens.
3. Press the POWER button.
   • The power indicator lights up in green after flashing for a while.
   • The STARTUP LOGO is displayed on the screen. See “STARTUP LOGO” on page 40.

NOTE:
• When starting up the projector, some small rattling or tinkling sound may be heard, or the display may flicker for the characteristics of the lamp. Those are normal and do not affect the performance of the projector.
• Do not attempt to modify the lens cover which may cause burns, fire or damage to the projector.

Switching off the projector

1. Press the POWER button.
   • The confirmation screen is displayed. It will disappear and return to the projection after 10 seconds without any operation.
   • To return to the projection, press any button except the POWER button.
2. Press \( \downarrow \) to select OK and press the POWER or ENTER button.
   • The power indicator lights up in orange while cooling the lamp, then illuminates red when it is ready to switch off the MAIN POWER button.
3. Switch off the MAIN POWER button on the back of the projector.

NOTE:
• Press the POWER twice or for a long duration to switch the power off.
**Projecting an image**

**Selecting the input signal**

1. Switch on the connected devices.
   - Press the play button of the required device.
2. Press the **INPUT** button to select the required input method if needed. See “Switching the input signal” on page 23.
   - The image will be projected on the screen.

**Positioning the image**

3. Adjust the angle of the projector.
   - Screw down the front leg adjusters and adjust the angle vertically.
   - See “Front leg adjusters and throwing angle” on page 15.
4. Adjust the focus and the projected image size.
   - Press +/- of the **FOCUS** and **ZOOM** buttons to adjust.
   - Press the **LENS** button to adjust the focus and zoom by the remote control.

**NOTE:**

- **AUTO SEARCH** is ON as default and the signal from the connected devices is detected automatically. See “AUTO SEARCH” on page 40.
- Do not touch the air exhaust port as this may cause burns or injury.
- If keystone distortion occurs, see “KEYSTONE” on page 38.
- If you adjust the focus, you may need to adjust the size of the image by pressing the **ZOOM** button again.
Remote control operation

Operating range

You can operate the projector with the remote control within the remote range 7 m (22'11”).

- **Facing to the projector**
  Ensure the remote control emitter is facing to the remote control signal receptor on front/back of the projector and press the required buttons to operate.

- **Facing to the screen**
  Ensure the remote control emitter is facing to the screen and press the required buttons to operate the projector. The signal will be reflected off the screen. The operating range may differ due to the screen material. This function may not be effective with a translucent screen.

**NOTE:**

- Do not let strong light shine onto the signal receptor. The remote control may malfunction under strong light such as fluorescent.
- If there are any obstacles between the remote control and the remote control signal receptor, the remote control may not operate correctly.

Turning on the button backlight

In a dark room, you can turn on the button backlight to operate the remote control. Press the **LIGHT** button on the upper right corner of the unit to turn on the backlight and enter the light-on mode.

After 30 seconds without any operation, the backlight will go out and press any but the **LIGHT** button to turn on again. To escape from the light-on mode, press the **LIGHT** button.

Resetting to the factory default settings

You can reset most of the customised settings to the factory defaults by pressing the **DEFAULT** button of the remote control. Display the required sub-menu or the menu items and press the button again.

**NOTE:**

- Some menu items are not available to reset by pressing the **DEFAULT** button. Adjust each menu items manually.

Capturing an image

When projecting an image, press the **FREEZE** button to capture the projected image and display it on the screen as a still picture. Press again to escape.

You can adjust AREA SELECT of the SPLIT ADJUST menu by pressing the **ENTER** button while the frozen image is displayed. See “SPLIT ADJUST” on page 32.
Remote control operation

Switching the input signal

You can switch the input method manually by pressing the INPUT button. Press the button several times or press ▼ ▲ to cycle through the input methods as follows. The actual projected image will be changed in a while.

- The graphical guidance will be displayed on the upper right of the projected image and you can confirm the selected input method which is highlighted in yellow. See “INPUT GUIDE” on page 40.

<table>
<thead>
<tr>
<th>COMPONENT 1 IN</th>
<th>COMPONENT 2 IN</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMPUTER IN</td>
<td>S-VIDEO IN</td>
</tr>
<tr>
<td>HDMI 3 IN</td>
<td>VIDEO IN</td>
</tr>
<tr>
<td>HDMI 2 IN</td>
<td>HDMI 1 IN</td>
</tr>
</tbody>
</table>

**NOTE:**
- If you select an unplugged input method, the guidance will blink on and off several times.
- See “List of compatible signals” on page 47.
- See “Connections” on page 18.

Switching the aspect ratio

The aspect ratio will be selected automatically, or you can switch it manually by pressing the ASPECT button. Press the button several times to cycle through the different aspect type as follows. See “ASPECT” on page 36.

**VIDEO/S-VIDEO/COMPONENT (YPbPr)**

- 4:3
- 16:9
- 14:9

**COMPUTER (RGB)**

- 4:3
- 16:9

**NOTE:**
- If you project an image with an unmatched aspect ratio, the image may distort or some portions may be cropped. Select an aspect ratio which preserves the intention of the image creator.
- The order of aspect type is defined not only by the input method but also by the input signals. See “List of compatible signals” on page 47.
- If you project a copyrighted image enlarged or distorted by using ASPECT function in commercial use in a public place, such as a restaurant or hotel, you might infringe on the copyright of the creator which is protected by copyright law.

Loading a saved setting

You can access saved settings instantly. See “MEMORY LOAD” on page 34.

1. Select the required setting from MEMORY1 - 16.
   - Undefined setting will not be displayed.
2. Press ENTER to activate the selected setting.

**NOTE:**
- If you have not saved any settings, MEMORY1 - 16 will not be displayed.
## Adjusting the signal condition with a waveform

You can display the image brightness and contrast level of the input signal with a waveform. See "WAVEFORM MONITOR" on page 32.

### Displaying the waveform

1. Press the WAVEFORM button and display the waveform monitor.  
   - Press the WAVEFORM button again to escape from the waveform mode.
2. Press ENTER button until the required waveform option is displayed.  
   - In FULL SCAN mode, press ▲ ▼ ◀ ◀ to change the waveform position.
   - In SINGLE LINE SCAN mode, press ▲ ▼ to select the required line position.

### Adjustment example

Project a commercial test signal for picture adjustment on the screen and press the WAVEFORM button.

- **Adjusting with luminance options**
  1. Press the ENTER button until FULL SCAN(Y)/SINGLE LINE SCAN(Y) is displayed.
  2. Press the PIC. ADJUST to display the PICTURE MODE of the PICTURE menu.
  3. Press ▼ several times to display the BRIGHTNESS.
  4. Adjust the BRIGHTNESS by pressing ◀ ▶.  
     - Adjust the bottom line of the waveform to 0% (0 or 7.5 IRE)
     - Setting range: -32 to +32
  5. Press ▼ once to display the CONTRAST.
  6. Adjust the CONTRAST by pressing ◀ ▶.  
     - Adjust the bottom line of the waveform to 100% (100 IRE).  
     - Setting range: -64 to +64

### Note:

- In SINGLE LINE SCAN mode, the position of the waveform monitor depends on the position of the selected line.
- You can display the main menu by pressing the MENU button and adjust the menu items.
- The called up menu items displayed position depends on the position of the waveform monitor.
- You can activate AUTO ADJUST of the WAVEFORM menu by pressing the DEFAULT button.
- The signal which is lower than 0% in the waveform will be displayed as same as 0% on the projected image.
- While the waveform is displayed, the image is displayed without the COLOUR MANAGEMENT adjustment.
- When adjusting the KEYSTONE of the POSITION menu while the waveform is displayed, xvYCC will be deactivated.

<table>

### Waveform Options

- FULL SCAN(Y)/SINGLE LINE SCAN(Y)
  - BRIGHTNESS: Adjust the bottom line of the waveform to 0% (0 IRE or 7.5 IRE)
  - CONTRAST: Adjust the top line of the waveform to 100% (100 IRE)
Adjusting with RGB options

1. Press the ENTER button until the required option is displayed.
2. Press the PIC. ADJUST twice to display the GAMMA of the ADVANCED MENU menu.
3. Press ▼ several times to display the required brightness option.
4. Adjust the brightness option by pressing ◀ ▶.
   - Adjust the bottom line of the waveform to 0% (0 IRE or 7.5 IRE).
   - Setting range: -16 to +16
5. Press ▼ once to display the required contrast option.
6. Adjust the contrast option by pressing ◀ ▶.
   - Adjust the top line of the waveform to 100% (100 IRE).
   - Setting range: -32 to +32

Adjusting the focus and zoom

You can adjust the focus and zoom of the projected image. Press the LENS button to display the LENS CONTROL menu. See “LENS CONTROL” on page 39.

Switching the picture mode

You can switch the preset picture mode settings by pressing the PIC. MODE button. Press the button until the required setting is selected. See “PICTURE MODE” on page 31.

Adjusting the image

You can display the PICTURE and ADVANCED MENU menu items with called up style by pressing the PIC. ADJUST button. Press the button to switch between PICTURE and ADVANCED MENU menu. Press ▲ ▼ to select the required menu item and ◀ ▶ to adjust.

● PICTURE menu items
  PICTURE MODE, CONTRAST, BRIGHTNESS, COLOUR, TINT, SHARPNESS, COLOUR TEMPERATURE and DYNAMIC IRIS

● ADVANCED MENU items
  GAMMA, CONTRAST, BRIGHTNESS, xvYCC, DETAIL CLARITY, NR, MPEG NR, CINEMA REALITY and TV-SYSTEM

NOTE:
  • For each menu items description, see “PICTURE menu” on page 31.
  • The screen will be cleared after 7 seconds without any operation.

Switching off the projector automatically

You can switch off the POWER automatically by setting the SLEEP feature. Press the SLEEP button several times to cycle through the duration of time. See “SLEEP” on page 41.
Setting your own colour profile

You can adjust a selected colour individually and save and retrieve under the PICTURE MODE setting. Press the COLOR M. button to open the menu.

Create a new profile

Adjusting the selected colour
Select a colour and adjust COLOUR, TINT and BRIGHTNESS.
1. Select the CURSOR menu and press ENTER.
   - The projected image is captured, and the target cursor is displayed.
   - When the LOG is fully stored, the target cursor will not be displayed. See “Managing stored logs” on page 26.
   - Move the cursor with ▲▼◄► to the required place to select a colour and press ENTER.
     - The colour at the centre of the target cursor is sampled and the sample box is displayed on the left of the cursor. The menu items are displayed on the upper part of the screen.
2. Press ENTER to store the adjusted result.
   - "PROCESSING" is displayed for a few seconds and the result is stored in LOG.
   - You can store up to 8 logs under LOG for each PICTURE MODE setting.
3. Select a menu item and the ◄► to adjust each item level.
   - The result box is displayed on the right of the cursor and shows the adjusted colour.

Managing stored logs

You can edit or delete the stored logs of the selected PICTURE MODE.
1. Select LOG and press ENTER.
   - The LOG menu is displayed.
   - Select CHANGE to edit the log.
     - The cursor menu is displayed and you can readjust the colour.
   - Select DELETE to delete the log.
     - The confirmation screen will be displayed. Select OK to delete.
   - When you select ALL DELETE, the "DELETE ALL LOG." screen is displayed. Select OK to delete all logs. The PROFILE setting will be set to NORMAL.
Saving a log setting as a profile
Return to the COLOUR MANAGEMENT menu and save the stored log as a profile. Make sure that the PICTURE MODE is not switched.
1. Select the PROFILE SAVE menu and press ENTER.
   - The PROFILE SAVE menu is displayed. You can save the profile as USER1, USER2 and USER3.
2. Press ENTER to save the profile.
   - The confirmation screen is displayed. Press ENTER again to save.
3. Use ▲ ▼ ◀ ▶ to specify the location of the required character to enter and press the ENTER button.
   - You can enter up to 14 characters.
4. Repeat step 3 until you finish the text line.
   - Move cursor to ALL DELETE and press the ENTER button to delete all the entered text line.
   - Press the DEFAULT button to delete the last entered character or indicated with cursor in the text box.
   - To insert a character in the entered text line, move the cursor to the text box to select the required place and press ▼ then perform step 4.
5. Select OK and press the ENTER button to set the entered text as a name.
   - Press the ENTER button without entering any text to keep the default name.

Changing the profile names
You can change the name of the profiles from the PROFILE NAME CHANGE menu.
1. Select PROFILE NAME CHANGE and press the ENTER button.
2. Select the required profile and press the ENTER button.
3. Use ▲ ▼ ◀ ▶ to specify the location of the required character to enter and press the ENTER button.
4. Select OK and press the ENTER button to set the entered text as a name.

Deleting the saved profiles
You can delete the profiles from PROFILE DELETE menu.
1. Select PROFILE DELETE and press the ENTER button.
2. Select the required profile or ALL DELETE and press the ENTER button.
   - The confirmation screen will be displayed and select OK.
3. Press the ENTER button.

Loading saved profiles
When profiles are loaded under the PICTURE MODE setting, you can keep them as you defined until the PROFILE is set to NORMAL.
1. Select the required PICTURE MODE and press ENTER.
2. Press the COLOR MANAGEMENT button and select the PROFILE menu.
   - The profile settings of the selected PICTURE MODE will be displayed.
3. Select the required profile and press ENTER.

NOTE:
- LOG and PROFILE SAVE are not displayed before you apply COLOUR MANAGEMENT.
- If you load a profile with a different attribute mode of the profile, the CURSOR and PROFILE SAVE menus will not be displayed.
- The approximate colours will be adjusted at the same time. If you adjust the exact same colour differently, both colours will affect each other and you might get unexpected results.
- White, Black and Grey are not adjustable.
- If you escape the COLOUR MANAGEMENT menu or attempt to perform another menu action before you save the adjusted profile, the confirmation screen will be displayed.
- If you switch the input signal before you save the profile, the setting will be cancelled without notice.
Menu Navigation

The menu system allows you to access functions which do not have their own dedicated buttons on the remote control. The menu options are structured and categorised. You can navigate through the menu with ▲ ▼ ◀ ◀ buttons.

### Main menu and sub-menu

**NOTE:**
- Some default settings vary by the selected input signal.
- Sub-menu items vary according to the selected input signal.
- Some settings are adjustable without any signals.

Navigating through the MENU

Displaying the main menu

Press the MENU button to display the main menu and the operating guidance.

Operating procedure

1. Press ▲▼ to scroll to the required main menu item and press ENTER to select.
   - The selected item is highlighted in orange and the sub-menu is displayed on the right.
   - See “Main menu and sub-menu” on page 28.

2. Press ▲▼ to scroll to the required sub-menu item and press ◄► or ENTER to adjust.
   - The selected item is called up and the other menu items disappear from the screen. Called up item will disappear after 5 seconds and return to the menu mode.
   - If there is a lower level, the next level will be displayed.

3. Press ◄► to adjust or set the selected item.
   - For items using a bar scale, the current settings are displayed on the left of the bar scale.
   - You can cycle through the options of an item by pressing ◄►.

4. Press MENU or RETURN to return to the previous menu.

NOTE:
- See “Resetting to the factory default settings” on page 22 to reset each menu items.
PICTURE menu

Depending on the projection environment, you can use these preset parameter settings to optimise image projection. Press \( \uparrow \downarrow \) to cycle through the options.

**PICTURE MODE**

  3. 125 (1 080)/60p
  4. 125 (1 080)/50p

**TINT**

You can adjust the skin tone in the projected image.

- More reddish \( \uparrow \downarrow \) More greenish

- Setting range: -32 to +32

- When COMPUTER signal is connected, only available with the following signals.
  1. 125 (1 080)/60i
  2. 125 (1 080)/50i
  3. 125 (1 080)/60p
  4. 125 (1 080)/50p

**SHARPNESS**

You can adjust the sharpness of the projected image.

- Less sharp \( \downarrow \uparrow \) More sharp

- Setting range will vary according to the selected input signal.

See “Navigating through the MENU” on page 30.
See “Main menu and sub-menu” on page 28.
**PICTURE menu**

## COLOUR TEMPERATURE
You can adjust the white balance of the projected image.

- **Less bluish**
- **More bluish**

- Setting range: -6 to +6

## DYNAMIC IRIS
You can switch automatic adjustment of the lamp and the lens iris on/off.

- **ON**: Automatic adjustment
- **OFF**: No adjustment

## WAVEFORM MONITOR
You can monitor whether or not the luminance level of the input signal is in the recommended range by displaying it in the waveform monitor. If the waveform is not in the range, adjust it for the best quality. See “Adjusting the signal condition with a waveform” on page 24.

### AUTO ADJUST
You can switch on/off the automatic adjustment system in each items.

<table>
<thead>
<tr>
<th>Items</th>
<th>Default setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>BLACK LEVEL ADJUST</td>
<td>ON</td>
</tr>
<tr>
<td>WHITE LEVEL ADJUST</td>
<td>ON</td>
</tr>
<tr>
<td>RGB ADJUST (BLACK)</td>
<td>OFF</td>
</tr>
<tr>
<td>RGB ADJUST (WHITE)</td>
<td>OFF</td>
</tr>
</tbody>
</table>

1. Press ▲▼ and select the required item.
2. Press ◄► and switch on/off.
3. Press ▲▼ and select AUTO and press ENTER.
   - The confirmation screen will be displayed.
4. Press ◄► and select OK.
5. Press ENTER.

### NOTE:
- When the WAVEFORM MONITOR is set to OFF, the AUTO ADJUST is not displayed.

## SPLIT ADJUST
You can perform image adjustment in some PICTURE menu items while displaying a certain area of the frozen image in a split window.

### SPLIT ADJUST MODE
Select the required split style from NORMAL and REVERSE in the SPLIT ADJUST MODE menu.

- **NORMAL**

### MONITOR POSITION
When the FULL SCAN is selected, press ▲▼ ◄► to adjust the position of the monitor.
- See “Adjusting the signal condition with a waveform” on page 24.
Adjusting the image in a split window

1. Select AREA SELECT and press the ENTER button.
   - The image will be frozen and the area cursor will be displayed.

2. Press ◄► to move the area cursor to select the required area and press the ENTER button.
   - The selected frozen image will be displayed in a split window.

3. Press the MENU to display the PICTURE menu on the right.

4. Adjust the required PICTURE menu items.
   - The Other menu items are not available.
   - Sub-menu items vary according to the selected input signal. See “Main menu and sub-menu” on page 28.

5. Press MENU/RETURN button several times to escape from the menu.

6. Press the ENTER button.
   - The confirmation screen will be displayed. Select OK to finish the adjustment.

7. Press the ENTER button.
   - Press the ENTER button again to return to the AREA SELECT.
   - Press the RETURN button escape from the SPLIT ADJUST mode.

ADVANCED MENU

You can perform more detailed image adjustment manually.

GAMMA

You can adjust linear intensity at 3 levels. Press ◄► to increase/decrease 1 point.

<table>
<thead>
<tr>
<th>Levels</th>
<th>Default setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>GAMMA HIGH</td>
<td>0</td>
</tr>
<tr>
<td>GAMMA MID</td>
<td>0</td>
</tr>
<tr>
<td>GAMMA LOW</td>
<td>0</td>
</tr>
</tbody>
</table>

- Setting range: -8 to +8

CONTRAST

You can adjust the amount of contrast in RGB colours individually. Press ◄► to increase/decrease 1 point.

<table>
<thead>
<tr>
<th>RGB</th>
<th>Default setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>CONTRAST R</td>
<td>0</td>
</tr>
<tr>
<td>CONTRAST G</td>
<td>0</td>
</tr>
<tr>
<td>CONTRAST B</td>
<td>0</td>
</tr>
</tbody>
</table>

- Setting range: -32 to +32

BRIGHTNESS

You can adjust the brightness in RGB colours individually. Press ◄► to increase/decrease 1 point.

<table>
<thead>
<tr>
<th>RGB</th>

</table>

- Setting range: -16 to +16

NR (Noise Reduction)

You can switch the automatic noise reduction system on/off. Press ◄► to select the required setting.

- ON: Automatic noise reduction
- OFF: No noise reduction

MPEG NR

You can switch the automatic noise reduction system for MPEG format images on/off. The system minimise block noise and mosQUITO noise to eliminate jagged edges, providing an overall smoother image. Press ◄► to select the required setting.

- ON: Active
- OFF: Deactive

NOTE:
- MPEG NR system is not available with COMPUTER/ HDMI (VGA60) signals.
PICTURE menu

COLOUR MANAGEMENT
You can manage your own defined colour settings. See “Setting your own colour profile” on page 26.

xvYCC
You can switch on/off the automatic adjustment system for signals which complied with xvYCC.
- ON: Active
- OFF: Deactive

NOTE:
- xvYCC adjustment system is only available with HDMI signals in COLOUR1 of PICTURE MODE menu.

DETAIL CLARITY
You can switch on/off the automatic detail clarity system.
- ON: Active
- OFF: Deactive

CINEMA REALITY
You can switch the automatic image synchroniser on/off for 24 frames a second images, such as movies. Press ▲▼ to select the required setting.
- ON: Active
- OFF: Deactive

NOTE:
- CINEMA REALITY is effective only with interlace signals.

TV-SYSTEM
When the video signal is changed, the setting switches automatically. You can switch the setting manually to match the video data. Press ▲▼ to cycle through the options.

AUTO
SECAM
PAL-N
PAL-M
NTSC
NTSC 4.43
PAL

NOTE:
- AUTO setting will select from NTSC/NTSC 4.43/PAL/PAL60/PAL-M/PAL-N/SECAM.

MEMORY SAVE
You can save and name the adjusted PICTURE menu settings for instant access from MEMORY LOAD menu.
1. Adjust the items in PICTURE menu.
2. Select MEMORY SAVE and press the ENTER button.
3. Select the required memory setting and press the ENTER button.
   - The confirmation screen will be displayed. Select OK and press the ENTER button.
   - Indicated with ★ is in use, and ☆ is empty.
4. Use ▲▼ to specify the location of the required character to enter and press the ENTER button.
   - You can enter up to 16 characters.

MEMORY NAME INPUT

5. Repeat step 4 until you finish the text line.
   - Move the cursor to ALL DELETE and press the ENTER button to delete all the entered text line.
   - Press the DEFAULT button to delete the last entered character or indicated with cursor in the text box.
   - To insert a character in the entered text line, move the cursor to the text box to select the required place and press ▼ then perform step 4.
6. Select OK and press the ENTER button to set the entered text as a name.

NOTE:
- If you leave the text box empty and save, the default memory number will stay as a name.

MEMORY LOAD
You can access the saved settings instantly. See “Loading a saved setting” on page 23.
1. Select a setting from MEMORY1 - 16.
   - Undefined settings will not be selectable.
2. Press ENTER to activate.

NOTE:
- If you have not saved any settings, MEMORY1 - 16 will not be displayed.
MEMORY EDIT

You can edit the named memory settings.

- Deleting a memory setting
  1. Select MEMORY DEL and press the ENTER button.
  2. Select the required memory setting and press the ENTER button.
     - If you select ALL DELETE, you can delete all of the saved memory settings.
  3. Select OK in the confirmation screen and press the ENTER button.

- Changing the name of the memory setting
  1. Select the required memory setting and press the ENTER button.
  2. Use ▲ ▼ ◄ ► to specify the location of the required character to enter and press the ENTER button.
     - You can enter up to 16 characters.

  3. Repeat step 4 until you finish the text line.
     - Move the cursor to ALL DELETE and press the ENTER button to delete all the entered text line.
     - Press the DEFAULT button to delete the last entered character or indicated with cursor in the text box.
     - To insert a character in the entered text line, move the cursor to the text box to select the required place and press ◄ then perform step 4.
  4. Select OK and press the ENTER button to set the entered text as a name.

NOTE:
- If you have not saved any settings, MEMORY1 - 16 will not be displayed.

SIGNAL MODE

The current selected signal will be displayed. This is available with signals from COMPUTER IN/COMPONENT IN/HDMI IN only.

NOTE:
- See “List of compatible signals” on page 47.
**POSITION menu**

- See “Navigating through the MENU” on page 30.
- See “Main menu and sub-menu” on page 28.

### H-POSITION

You can move the projected image horizontally for fine adjustment.

- Move left
- Move right

### V-POSITION

You can move the projected image vertically for fine adjustment.

- Move down
- Move up

### DOT CLOCK

If you have interference patterns of the projected image, which is sometimes referred to as moire or noise, you can minimize it by pressing ▼ to adjust the clock frequency. (Available with signals from COMPUTER IN only)

#### NOTE:
- If the projecting signal’s dot clock frequency is higher than 150 MHz, the adjustment may not make a difference.
- DOT CLOCK needs to be adjusted before adjusting the CLOCK PHASE.

### CLOCK PHASE

If you require further adjustment for the same reason as the DOT CLOCK adjustment, you can fine adjust the timing of the clock. Press ▼ to adjust. (Available with signals from COMPUTER IN/COMPONENT IN only)

#### NOTE:
- If the projecting signal’s dot clock frequency is higher than 150 MHz, the adjustment may not make a difference.
- Available signals from COMPONENT IN:
  - 1 125 (1 080)/60i, 1 125 (1 080)/50i, 1 125 (1 080)/60p, 1 125 (1 080)/50p, 1 125 (1 080)/24p, 750 (720)/50p, 750 (720)/60p

### ASPECT

You can switch the aspect ratio manually when needed.

#### Aspect ratio depend on signals

Press ▼ to cycle through the aspect ratio options. The cycle pattern depends on the connected signals.

WSS

WSS (Wide Screen Signalling) detects if a PAL/625p (576p)/625i (576i) signal is input and that signal has an identification signal, and switch the aspect ratio to required setting automatically. You can switch the system off manually.

OVER SCAN

If the 4 edges of an image is partly dropped, you can use this function to adjust and project it properly.

- Setting range: 0 to +10
- OVER SCAN is not available with COMPUTER signals.

Shrink  Enlarge

KEYSTONE

If the projector is aligned non-perpendicularly to the screen, or if the projection screen has an angled surface, you can vertically correct keystone.

<table>
<thead>
<tr>
<th>Image</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1.png" alt="Image" /></td>
<td><img src="operation1.png" alt="Operation" /></td>

<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image2.png" alt="Image" /></td>
<td><img src="operation2.png" alt="Operation" /></td>
</tr>
</tbody>
</table>

- Setting range: -32 to 32

NOTE:

- You can correct the distortion ± 30 degrees from the vertical plane. For a better quality image, installing the projector with a minimum of distortion is recommended.
- Some distortion may be retained for the lens shift adjustment.
- The distortion of the main menu screen is not correctable.
- The result of the keystone correction will affect the aspect ratio and the size of the image.

AUTO SETUP

You can adjust V - POSITION, H - POSITION, DOT CLOCK and CLOCK PHASE automatically when connecting via COMPUTER IN. Press ENTER to adjust these at the same time.
LENS CONTROL

**ZOOM/FOCUS**

You can use the 2 different test patterns to adjust the focus and zoom of the image. See “Lens shift and positioning” on page 16.

1. Press ENTER to display test pattern 1.
   - Press ▲▼ to adjust the focus and ◀▶ to adjust the zoom.

2. Press ENTER to display test pattern 2.
   - Press ▲▼ to adjust the focus and ◀▶ to adjust the zoom.

3. Press ENTER to display the projected image.
   - You can confirm the adjustment is fit to the projected image.

4. Press MENU or RETURN to return to the previous menu, or press repeatedly to escape the menu mode.

**NOTE:**
- When the projector and/or the screen is tilted, adjust the focus at the centre of the image. The upper and lower edge might be out of focus.
- When the image is distorted in keystone, adjust the KEYSTONE in POSITION menu.

FUNCTION BUTTON

**FUNCTION BUTTON**

**BUTTON1/2/3**

You can assign certain menu options to the 3 function buttons for instant operation.

1. Select the required button from BUTTON1, BUTTON2 or BUTTON3 and press the ENTER button.
2. Press ▲▼◀▶ to select the required menu options and press the ENTER button.

</tr>
</tbody>
</table>

OSD DESIGN
You can change the background colour of the menu. Press << to cycle through the options.

- **TYPE1**: Semi transparent black
- **TYPE2**: Solid blue
- **TYPE3**: Semi transparent dark blue

OSD POSITION
You can change the position where to display the menu. Press << to cycle through the options.

- UPPER LEFT
- UPPER CENTRE
- UPPER RIGHT
- CENTRE
- LOWER LEFT
- LOWER CENTRE
- LOWER RIGHT

BACK COLOUR
You can choose a screen colour from **BLUE** or **BLACK** for when the projector is in idle. Press << to select.

STARTUP LOGO
You can switch the logo on/off that is displayed when starting up the projector. Press << to select the required option. STARTUP LOGO will be displayed for 30 seconds.

- **ON**: Active
- **OFF**: Deactive

AUTO SEARCH
When the projector is turned on, the input terminals are detected and an input signal is selected automatically. You can switch the system on/off. Press << to cycle through the options.

- **ON**: Active
- **OFF**: Deactive

NOTE:
- When no signal is detected, the last used input will be selected.

HDMI SIGNAL LEVEL
When an HDMI IN is selected, you can switch the HDMI signal **NORMAL** or **EXPAND** to display the image. Press << to select an option.

- **NORMAL**: For general HDMI equipment
- **EXPAND**: For HDMI equipment with expanded signals.

NOTE:
- **HDMI SIGNAL LEVEL** is not available with some equipment.

FRAME RESPONSE
You can minimise the time delay of image displaying for the interlace signals.

- **NORMAL**: Prioritise the image quality
- **FAST**: Prioritise the frame response

NOTE:
- **HDMI SIGNAL LEVEL** is not available with some equipment.
INSTALLATION

When installing the projector, select the projection method according to the projector position. Press \( \text{\( \uparrow\uparrow \)} \) to cycle through the options. See “Projection method” on page 15.

<table>
<thead>
<tr>

LAMP RUNTIME

You can check how long the lamp has been used.

NOTE:
- LAMP RUNTIME is a relevant matter for lamp replacement timing. See “Replacing the lamp unit” on page 44.
TEMP and LAMP Indicators

Managing the indicated problems

If a problem should occur with the projector, the LAMP and/or TEMP indicators will inform you. Manage the indicated problems as follow.

1. Confirm the status of all indicators and projector, and switch off the projector in proper way.
2. Find out the cause of the problem by status of the LAMP and/or TEMP indicators.
3. Follow the following instruction for each indication and solve the problem.
4. Turn on the projector in the correct way and confirm the indicator is not indicating a problem any longer.

NOTE:
- If no problem is found or the problem remains, do not turn on the projector. Instead contact an Authorised Service Centre.

## LAMP indicator

<table>

</tr>
</tbody>
</table>
Care and Replacement

Cleaning the projector

Before cleaning the projector
- Switch off the MAIN POWER switch in proper way and disconnect the mains plug from the mains socket.
- Unplug all the cables from the projector.

Cleaning the outer surface of the projector
Wipe off dirt and dust gently with a soft cloth.
- If it is difficult to remove the dirt, soak a cloth in a neutral detergent diluted with water, wring the cloth well and then wipe the projector. Dry off the projector with dry cloth.
- If you use a chemical treated wipe, follow the instructions supplied with it.

Cleaning the lens surface
Wipe off dirt and dust gently with a lint-free cloth.
- Make sure no dirt or dust remains on the surface of the lens. It will be enlarged and projected onto a screen.

Cleaning the air filter
If the air filter is excessively dirty, the internal temperature of the projector increases and may cause malfunction. Clean the air filter regularly every 100 hours of usage.
1. Place a finger at the bottom of the air filter
2. Slightly push up and pull out the air filter to remove.

3. Vacuum dirt and dust from the air filter.

- Do not wash the air filter.
4. Place and slightly slide in the air filter in the air intake port to attach.
- Make sure the air filter clicks into the place.

NOTE:
- Do not use the projector without attaching the air filter.

Replacing the air filter
The air filter should be replaced when cleaning is ineffective and when replacing the lamp unit. A replacement air filter is provided with a replacement lamp unit, ET-LAE1000. Contact an Authorised Service Centre for the optional air filter.
Care and Replacement

Replacing the lamp unit

Before replacing the lamp unit

- Switch off the MAIN POWER button in proper way and disconnect the mains plug from the mains socket.
- Make sure the lamp unit and the surroundings are cooled enough.
- Unplug all the cables from the projector.
- Prepare a Phillips-head screwdriver.
- Contact an Authorised Service Centre to purchase a replacement lamp unit (ET-LAE1000).
- When the projector is mounted in the ceiling, do not work directly under the projector or put your face closer to the projector.

NOTE:
- Prior to replacing the lamp unit, allow it to cool down to prevent the risk of burns, damage and other hazards.
- Do not attempt replacement with an unauthorised lamp unit.

When to replace the lamp unit

The lamp unit is consumable and the brightness decreases by duration of usage. The LAMP indicator will inform you of the replacement timing at 1 800 hours, and at 2 000 hours, the projector will be turned off. Those figures are rough guidance and might be shortened by the usage conditions, characteristics of the lamp unit, environmental conditions, and so on. You can check the duration of usage time using LAMP RUNTIME in the OPTION menu.

<table>
<thead>
<tr>
<th>Indication</th>
<th>On screen</th>
<th>LAMP indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 1 800 hours</td>
<td>&quot;REPLACE LAMP&quot; is displayed on the upper left of the screen for 30 seconds. To clear the screen immediately, press any button.</td>
<td>Illuminates red.</td>
</tr>
<tr>
<td>Over 2 000 hours</td>
<td>&quot;REPLACE LAMP&quot; is displayed on the upper left of the screen, and it will stay until you respond. To clear the screen, press any button.</td>
<td></td>
</tr>
</tbody>
</table>

NOTE:
- The guide times, 1 800 and 2 000 hours, are rough estimates based on certain conditions and is not a guaranteed time. The estimated condition is: LAMP POWER in OPTION menu set to NORMAL.
- To prolong the lamp life, set the LAMP POWER in OPTION menu to ECO-MODE. See "LAMP POWER" on page 41.
- For more information about the lamp unit, such as guaranteed time, see the instructions which is provided with the lamp unit.

Opening the top cover

1. Hold at the back corner of the top cover and slightly push up to open.
2. Unhook the top cover safety hook from the projector.
3. Hold the top cover up and press one of the buttons of the hinge parts each to remove.
   - When the projector is mounted in the ceiling, removing the hinge parts is not required.
4. Remove the top cover aside.

NOTE: When the projector is mounted in the ceiling;
- Place yourself at back side of the projector, then open and close the top cover.
- Do not work directly under the projector or put your face closer to the projector.
Removing and replacing the lamp unit

1. Use a Phillips screw driver to loosen the 3 lamp unit fixing screws until the screws turn freely.
2. Hold the handle of the lamp unit and release the lamp unit lock.
3. Pull out the lamp unit gently from the projector.
4. Replace the new lamp unit while making sure that the direction of insertion is correct.
   - Press the top of the lamp unit and make sure the unit is installed securely.
5. Tighten the lamp unit fixing screws securely with a Phillips screwdriver.

Attaching the top cover

1. Attach the hinge parts of the top cover to the projector and press slightly until it clicks.
   - When the projector is mounted in the ceiling, attaching the hinge parts is not required.
2. Hook the top cover safety hook to the projector.
3. Hooking the tabs of the top cover to the front of the projector and lift down slowly.
4. Press the back corner of the top cover gently until it clicks.
   - Make sure to hook the top cover safety hook to the body.

NOTE:

- Be sure to install the lamp unit and the top cover of the projector securely. If they are not securely installed, it may cause the protection circuit to operate so that the power cannot be turned on.
- Grip the handle and keep the lamp unit paralleled when you remove the lamp unit. Some parts of the lamp unit are sharpened and may cause injury.
- Do not switch the power on while the top cover is opened.
- When the projector is mounted in the ceiling, keep the lamp unit paralleled up and remove.

Resetting the LAMP RUNTIME

If the lamp usage time has passed 2 000 hours (when LAMP POWER has been set to NORMAL), the projector will switch to standby mode after approximately 10 minutes of operation. The resetting procedure should thus be completed within 10 minutes.

1. Connect the mains lead to the projector and a mains socket, and switch the MAIN POWER on.
2. Switch the POWER button.
3. Press the MENU button to display the menu.
4. Press ▲ ▼ to select OPTION and press ENTER.
5. Press ▲ ▼ to select LAMP RUNTIME.

<table>

<th>LOW</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAMP POWER</td>
<td>NORMAL</td>
</tr>
<tr>
<td>LAMP RUNTIME</td>
<td>1820H</td>
</tr>
</tbody>
</table>

6. Press and hold the ENTER button for approximately 3 seconds.
7. The confirmation screen will be displayed and select OK.
8. Switch off the POWER button to reset the duration of the LAMP RUNTIME.
9. Confirm the duration of time in LAMP RUNTIME is reset to "0".
## Troubleshooting

Should any problem persist, contact your dealer.

\(^1\) The “i” appearing after the resolution indicates an interlaced signal.

\(^2\) The following symbols are used to indicate picture quality.

- **AA** Maximum picture quality can be obtained.
- **A** Signals are converted by the image processing circuit before picture is projected.
Technical Information

Serial terminal

The serial connector which is on the connector panel of the projector conforms to the RS-232C interface specification, so that the projector can be controlled by a personal computer which is connected to this connector.

Connection

The projector can not receive any command for 10 seconds after the lamp is switched on. Wait 10 seconds before sending the command.

If sending multiple commands, check that a response has been received from the projector for one command before sending the next command.

When a command which does not require parameters to be sent, the colon (:) is not required.

If an incorrect command is sent from the personal computer, the ER401 command will be sent from the projector to the personal computer.

The projector and the ceiling mount bracket are designed sufficiently safety though, make sure the safety cable provided with the projector is installed and attached to the bottom of the projector when mounting in the ceiling for safety and security.

### Ceiling mount bracket safeguards

The projector and the ceiling mount bracket are designed sufficiently safety though, make sure the safety cable provided with the projector is installed and attached to the bottom of the projector when mounting in the ceiling for safety and security.

### NOTE:
- Even if it is guarantee period, the manufacturer is not responsible for any hazard or damage caused by using a ceiling mount bracket which is not purchased from an authorised distributors, or environmental conditions.
- Make sure to use a torque driver and do not use an electrical screwdriver or an impact screwdriver.
- Installation work of the ceiling mount bracket should only be carried by a qualified technician.
- Remove an unused ceiling mount bracket promptly.

### Installing the safety cable

1. Install the ceiling mount bracket according to the Installation Instructions.
2. Loop the security cable around the ceiling mount bracket with less slack.
   - Lace the cable of the end with a latch through the loop on the other end of the cable.
3. Attach the latch on to the bottom of the projector with a provided screw.
   - Torque: 1.25±0.2 N·m

* Indicated above is ET-PKE1000S.

</tbody>
</table>

#### Cabinet

- Moulded plastic (PC+ABS)

#### Dimensions

- Width: 460 mm (18 -3/32"
- Height: 130 mm (5 -3/32"
- Length: 300 mm (11 -25/32"

#### Weight

- 7.2 kg (15.9 lbs.)

#### Certifications

- EN60950-1
- EN55022
- EN61000-3-2
- EN61000-3-3
- EN55024

#### Remote control

- **Power supply**: 3 V DC (AA battery x 2)
- **Operating range**: Approx. 7 m (23′) (when operated directly in front of signal receptor)
- **Weight**: 170 g (6 ozs.) (including batteries)

#### Dimensions

- Width: 52 mm (2 -1/32"
- Length: 200 mm (7 -27/32"
- Height: 28.5 mm (1 -3/32"

#### Options

- **Cable cover**: ET-PCE2000
- **Ceiling bracket**: ET-PKE2000/ET-PKE1000S
- **Projection screen**: ET-SRW90CC
- **Cables**: ET-SC10CP (RCA pin jack x 3 - RCA pin jack x3) ET-SC10DT (RCA pin jack x3 - D-Terminal)
