Thank you for purchasing a Panasonic Pure IP-PBX.
Please read this manual carefully before using this product and save this manual for future use.

KX-TDE100/KX-TDE200: PMMPR Software File Version 1.0000 or later
Feature Highlights

**IP Communication**
This PBX supports IP communication using a variety of IP telephones, such as the KX-NT300 series with Self Labelling and/or Bluetooth wireless headsets, and SIP Extensions (SIP Hardphone/SIP Softphone).

Consult your dealer

**IP Softphone**
You can install a software-based telephone (Panasonic IP Softphone) on your computer to make and receive calls using Internet Protocol (IP) and access PBX features without a wired IP Proprietary Telephone.

Consult your dealer

**Cellular Phone Features**
This PBX supports the use of cellular phones with the PBX. Cellular phones can make and receive calls as if they were registered extensions.

Consult your dealer

**Wireless System**
This PBX optionally supports a Portable Station (PS) system. PSs can be used in the PBX with other wired telephones.

1.8.12 Using Your PS in Parallel with a Wired Telephone (Wireless XDP Parallel Mode) (Page 139)

**Easy Operation**
If you are using a certain Panasonic telephone that is equipped with a Navigator Key/Jog Dial and a display, it helps you to access the desired feature easily. Also, you will be informed of the arrival of an incoming call or a message waiting by the lamp if it is equipped.

1.1 Before Operating the Telephones (Page 16)

**Built-in Simplified Voice Message**
You can set incoming calls to be redirected to your message box to let callers leave voice messages when you are unable to answer the phone.

1.6.2 Using Voice Messaging (Built-in Simplified Voice Message [SVM]) (Page 104)
This PBX supports Voice Processing Systems (VPS) with an ACD Report Server. In addition to VPS features, the ACD Report Server provides you with a variety of features, such as monitoring, reporting, and creating performance graphs, to manage call information efficiently.

ACD Report Server (KX-NCA200)

Consult your dealer

This application allows you to use your computer to access PBX features, providing advanced call handling capabilities to ensure that each call is handled efficiently.

Phone Assistant (PA)

Consult your dealer

This PBX offers a built-in Call Centre feature called Incoming Call Distribution (ICD) Group. Incoming calls to an ICD Group can be queued or redirected to a preprogrammed destination, answered in order of priority and monitored by a supervisor extension.

Call Centre

1.9 Utilising the Call Centre (Page 141)
In This Manual,

- The following abbreviations are used:
  - APT → Analogue Proprietary Telephone
  - Display PT → Proprietary Telephone with a Display
  - DPT → Digital Proprietary Telephone
  - IP-PT → IP Proprietary Telephone
  - PS → Portable Station
  - PT → Proprietary Telephone
  - SIP Extension → Session Initiation Protocol Extension
  - SLT → Single Line Telephone

- The suffix of each model number is omitted.
- The illustrations of the PBX are based on the KX-TDE200.
- The following icons are used frequently.

!!! Hints

**Important Notice**

Prior to connection of this product, please verify that the intended operating environment is supported. Satisfactory performance cannot be guaranteed for the following:

- interoperability and compatibility with all devices and systems connected to this product
- proper operation and compatibility with services provided by telecommunications companies over connected networks

**NOTES**

- This manual provides basic information on how you can access commonly used PBX functions with proprietary telephones (PTs), single line telephones (SLTs), portable stations (PSs), and DSS Consoles. For detailed information about each feature or setting, consult your dealer.

- In this manual, several kinds of PTs appear, as follows:
  - IP Proprietary Telephone (IP-PT)
  - Digital Proprietary Telephone (DPT)
  - Analogue Proprietary Telephone (APT)
  - Proprietary Telephone with a Display (Display PT)

"PT" is used as a generic term to represent all of these PTs. If a PBX feature only supports specific PTs, such as IP-PTs, the available telephone types are clearly indicated.

- This PBX supports SIP (Session Initiation Protocol) Extensions. However, some PBX features may not be available for SIP Extensions, depending on your telephone type.

- IP-PTs/SIP Extensions may become busy and you may not be able to make or receive calls, depending on the network status.

- The contents of this manual apply to PBXs with a certain software version, as indicated on the cover of this manual. To confirm the software version of your PBX, consult your dealer.

- Product specifications are subject to change without notice.
Notes for SIP Extension Users
Before using a SIP Extension, please read the following notes.

a. The following features are available for SIP Extension users:
   – Making calls
   – Answering calls
   – Holding calls
   – Transferring calls (You cannot go on-hook before the transferred party answers.)

b. The available operations using feature numbers are limited. Refer to the telephone types displayed at the top left of each operation.

c. The operations for Call Forwarding (FWD)/Do Not Disturb (DND)/Personal Speed Dialling using the feature number, are not available. However, it is possible to enable these features at SIP Extensions if set through system programming.

d. The tones listed in "4.3.1 What is This Tone?" are not available for SIP Extension users. Tones or the tone types may vary depending on the type of telephone being used. For example, when you put a call on hold, a specific tone for the SIP Extension may be heard, or no tone may be heard.

e. Any number pressed while hearing a Busy/DND/Reorder tone, such as the feature number to activate Automatic Callback Busy, will be ignored.

f. The operations for SIP Extensions may differ from the steps in this manual, and may vary depending on the type of telephone being used.

Trademarks

- The Bluetooth word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Matsushita Electric Industrial Co., Ltd. is under licence.
- All other trademarks identified herein are the property of their respective owners.
Important Information

**WARNING**

- THIS UNIT MAY ONLY BE INSTALLED AND SERVICED BY QUALIFIED SERVICE PERSONNEL.
- IF DAMAGE TO THE UNIT EXPOSES ANY INTERNAL PARTS, DISCONNECT THE POWER SUPPLY CORD IMMEDIATELY AND RETURN THE UNIT TO YOUR DEALER.
- UNPLUG THIS UNIT FROM THE AC OUTLET IF IT EMITS SMOKE, AN ABNORMAL SMELL OR MAKES UNUSUAL NOISE. THESE CONDITIONS CAN CAUSE FIRE OR ELECTRIC SHOCK. CONFIRM THAT SMOKE HAS STOPPED AND CONTACT AN AUTHORISED PANASONIC FACTORY SERVICE CENTRE.
- WHEN RELOCATING THE EQUIPMENT, FIRST DISCONNECT THE TELECOM CONNECTION BEFORE DISCONNECTING THE POWER CONNECTION. WHEN THE UNIT IS INSTALLED IN THE NEW LOCATION, RECONNECT THE POWER FIRST, AND THEN RECONNECT THE TELECOM CONNECTION.
- THIS UNIT IS EQUIPPED WITH AN EARTHED PLUG. FOR SAFETY REASONS THIS PLUG MUST ONLY BE CONNECTED TO AN EARTHED OUTLET THAT HAS BEEN INSTALLED ACCORDING TO APPLICABLE REGULATIONS.
- TO PREVENT POSSIBLE FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.
- THE POWER SUPPLY CORD IS USED AS THE MAIN DISCONNECT DEVICE. ENSURE THAT THE AC OUTLET IS LOCATED NEAR THE EQUIPMENT AND IS EASILY ACCESSIBLE.
- TO PROTECT THIS UNIT FROM STATIC ELECTRICITY, DO NOT TOUCH ANY EXTERNAL CONNECTORS OF THE UNIT.

**Safety Instructions**

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

1. Do not use this product near water, for example, near a bathtub, wash bowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
2. Avoid using wired telephones during an electrical storm. There is a remote risk of electric shock from lightning.
3. Do not use a telephone in the vicinity of a gas leak to report the leak.
4. Use only the power cord and batteries indicated in this manual. Do not dispose of batteries in a fire, as they may explode. Dispose according to local regulations.

SAVE THESE INSTRUCTIONS
The KX-TDE100UK/KX-TDE200UK, KX-TDE100NE/KX-TDE200NE, KX-TDE100GR/KX-TDE200GR, and KX-TDE100CE/KX-TDE200CE are designed to interwork with the:
- Analogue Public Switched Telephone Network (PSTN) of European countries
- Pan-European Integrated Services Digital Network (ISDN) using ISDN basic rate access
- Pan-European Integrated Services Digital Network (ISDN) using ISDN primary rate access
- ONP 2048 kbit/s digital structured leased lines (D2048S)

Panasonic Communications Co., Ltd./Panasonic Communications Company (U.K.) Ltd. declares that this equipment is in compliance with the essential requirements and other relevant provisions of Radio & Telecommunications Terminal Equipment (R&TTE) Directive 1999/5/EC. Declarations of Conformity for the relevant Panasonic products described in this manual are available for download by visiting:

http://www.doc.panasonic.de

Panasonic Testing Centre
Winsbergring 15, 22525 Hamburg, Germany
Attention

- Keep the unit away from heating appliances and devices that generate electrical noise such as fluorescent lamps, motors, and televisions. These noise sources can interfere with the performance of the PBX.
- This unit should be kept free of dust, moisture, high temperature (more than 40 °C), and vibration, and should not be exposed to direct sunlight.
- If you are having problems making calls to outside destinations, follow this procedure to test the outside lines:
  1. Disconnect the PBX from all outside lines.
  2. Connect known working single line telephones (SLTs) to those outside lines.
  3. Make a call to an external destination using those SLTs.
     If a call cannot be carried out correctly, there may be a problem with the outside line that the SLT is connected to. Contact your telephone company.
     If all SLTs operate properly, there may be a problem with your PBX. Do not reconnect the PBX to the outside lines until it has been serviced by an authorised Panasonic Factory Service Centre.
- Never attempt to insert wires, pins, etc. into the vents or holes of this unit.
- Wipe the unit with a soft cloth. Do not clean the unit with abrasive powders or with chemical agents such as benzene or thinner.
- When using a Panasonic proprietary telephone (PT), use only the correct Panasonic handset.
- For users of PC Phone (Free Licence Version) shipped with KX-T7601 USB Module:
  All features of the PC Phone software are available for 90 days from the date of installation. After this period expires, the following buttons on the Operation Screen will become unavailable:
  - Recording
  - TAM
  - Voice Memo
  - Text Memo
  - Speed
  To continue using any of the corresponding features after the trial period, please purchase KX-TDA0350 (PC Phone, 5 licences).
For users in the European Union only

- **Information on Disposal for Users of Waste Electrical & Electronic Equipment (private households)**
  This symbol on the products and/or accompanying documents means that used electrical and electronic products should not be mixed with general household waste. For proper treatment, recovery and recycling, please take these products to designated collection points, where they will be accepted on a free of charge basis. Alternatively, in some countries you may be able to return your products to your local retailer upon the purchase of an equivalent new product. Disposing of this product correctly will help to save valuable resources and prevent any potential negative effects on human health and the environment which could otherwise arise from inappropriate waste handling. Please contact your local authority for further details of your nearest designated collection point. Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

- **For business users in the European Union**
  If you wish to discard electrical and electronic equipment, please contact your dealer or supplier for further information.

- **Information on Disposal in other Countries outside the European Union**
  This symbol is only valid in the European Union. If you wish to discard this product, please contact your local authorities or dealer and ask for the correct method of disposal.

---

For users in New Zealand only

- This equipment shall not be set to make automatic calls to the Telecom '111' Emergency Service.
- The grant of a Telepermit for any item of terminal equipment indicates only that Telecom has accepted that the item complies with minimum conditions for connection to its network. It indicates no endorsement of the product by Telecom, nor does it provide any sort of warranty. Above all, it provides no assurance that any item will work correctly in all respects with another item of Telepermitted equipment of a different make or model, nor does it imply that any product is compatible with all of Telecom's network services.
- **IMPORTANT NOTICE**
  Under power failure conditions, the connected telephones may not operate. Please ensure that a separate telephone, not dependent on local power, is available for emergency use.
- **APPLICABLE ONLY TO TELECOM CUSTOMERS WHO HAVE AUTOMATIC ACCESS TO OTHER CARRIERS FOR TOLL CALLS**
  When calling back a number from the Caller ID list, all numbers prefixed with "0 + AREA CODE" will be automatically forwarded to your toll carrier. This includes numbers in your local calling area. The zero + area code should either be removed when calling back local numbers, or check with your toll carrier that a charge will not be levied.
- All persons using this device for recording telephone conversations shall comply with New Zealand law. This requires that at least one party to the conversation is to be aware that it is being recorded. In addition, the principles enumerated in the Privacy Act 1993 shall be complied with in respect to the nature of the personal information collected, the purpose for its collection, how it is used, and what is disclosed to any other party.
For Future Reference

Please print, record, and retain the following information for future reference.

Note

The serial number of this product can be found on the label affixed to the unit. You should record the model number and the serial number of this unit as a permanent record of your purchase to aid in identification in the event of theft.

Operation

This chapter shows you step by step how to use each feature. Read this chapter to become familiar with the many useful features of this PBX.
1.1 Before Operating the Telephones

1.1.1 Before Operating the Telephones

What Kind of Telephone Can Be Used?

You can use the following types of telephone with this PBX:

- Panasonic IP Proprietary Telephone (IP-PT) (e.g., KX-NT346 or KX-NT366)
- SIP Extension (SIP Hardphone/SIP Softphone)
- Panasonic Proprietary Telephone (PT) (e.g., KX-T7636)
- Panasonic Portable Station (PS) (e.g., KX-TCA255 or KX-TD7690)
- Single Line Telephone (SLT) (e.g., rotary pulse telephone)

Which features are available depend on the type of telephone being used. If you are using a Panasonic proprietary telephone with a special feature button such as or a display (Display PT) or both, you can follow the operation with the button or display messages for easy programming.

If you use a large display telephone (e.g., KX-NT346 or KX-T7636), you can follow the displayed messages to use the features. If your telephone does not have feature buttons and/or a display, you may operate the PBX by entering a feature number instead. Follow the operation for your type of telephone.

If you use a Console, you can use the buttons on the Console as the buttons on the connected proprietary telephone.

If you use a Panasonic proprietary telephone which does not have feature buttons, you may change one of the unused flexible buttons to a feature button. Refer to "3.1.3 Customising the Buttons".

Registration for your Portable Station (PS)/SIP Extension

Your PS/SIP Extension must be registered with the PBX and assigned an extension number before initial use, through system programming.

To confirm the extension number of your PS, refer to "Your extension information" in "3.1.2 Settings on the Programming Mode". For SIP Extension users, follow the instructions for your SIP Extension.
Feature Numbers

To use certain features, you need to enter specified feature numbers (and an additional parameter, if required). There are two types of feature numbers as follows:

- Flexible feature number
- Fixed feature number

Fixed feature numbers cannot be changed. However, you can change the flexible numbers to other numbers for easier use. In this manual, the default numbers (factory installed) are used for operations.

A flexible number is shown as (half-shaded key). Use the new programmed number if you have changed the feature number. Write the new number in "4.2.1 Feature Number Table" (Appendix).

Notice

The default value of a flexible feature number may vary depending on country/area.

If you use a single line telephone which does not have the "*" or "#" keys; it is not possible to access features that have "*" or "#" in their feature numbers.

Tone

You will hear various tones, during or after an operation, for confirmation. Refer to "4.3.1 What is This Tone?" (Appendix).

Display

In this manual, you will see "the display ...". This refers to the display of a Panasonic proprietary telephone. If your telephone is not a Panasonic display proprietary telephone, the message will not be displayed. If you use a Panasonic display proprietary telephone, the display helps you confirm the settings. Some proprietary telephones also give you easy access to features. A message is displayed depending on the feature. By pressing the corresponding button on the side or at the bottom of the display, or pressing the Navigator Key, you can access the desired feature. Furthermore, depending on the display proprietary telephone, you can operate features or make calls using the display message. Refer to "1.13 Using a Display Proprietary Telephone".

Notice

In this manual, the display messages are described in English.

Your Extension Number

If you use a Panasonic display proprietary telephone, you can check your own extension number on the display. Press the TRANSFER button or Soft (S1) button while on-hook.
1.1 Before Operating the Telephones

◆ Using a Navigator Key/Jog Dial/Volume Key

The Navigator Key can be used for the display contrast and the volume control or you can search for desired items on the display. Press the Navigator Key/Volume Key or rotate the Jog Dial in the desired direction. The contrast or the volume level and the items will change as follows:

<table>
<thead>
<tr>
<th>Navigator Key</th>
<th>Jog Dial</th>
<th>Volume Key</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up</td>
<td>Left</td>
<td>Up</td>
</tr>
<tr>
<td>(Level increases)</td>
<td>(anti-clockwise)</td>
<td>(Level increases)</td>
</tr>
<tr>
<td>Left</td>
<td>Right</td>
<td>Down</td>
</tr>
<tr>
<td>(Level decreases)</td>
<td>(clockwise)</td>
<td>(Level decreases)</td>
</tr>
</tbody>
</table>

◆ Examples

The displays and the illustrations shown as examples are from a telephone connected to the KX-TDE200.

◆ Restrictions

Some features may be restricted at your extension depending on system programming and the type of telephone being used.
## Icon Descriptions

The following icons show you the feature availability, notes and action to use the features.

<table>
<thead>

### Seize an outside line (One of the following).
- Press the CO button.
- Dial automatic line access number 0 or 9.
- Dial outside line group access number and outside line group number.

### Off-hook (One of the following).
- Lift the handset.
- Press the SP-PHONE button.
- Press the MONITOR button. (To start talking, lift the handset.)
- Press TALK button.

### Press the Call button on the Doorphone.

### On-hook (One of the following).
- Hang up.
- Press the SP-PHONE button.
- Press the MONITOR button.
- Press CANCEL button.

### Press the hookswitch lightly.

### Press Talk.

### Enter the required number.
**Example**
- **Account Code**
  - Enter the account code.

### You will hear a busy, confirmation, dial, ring or ringback tone.
- **B. Tone:** Busy Tone
- **C. Tone:** Confirmation Tone
- **D. Tone:** Dial Tone
- **R. Tone:** Ring Tone
- **R. B. Tone:** Ringback Tone

### Dial an extension number.
### Dial outside phone number.
### Press any dial key (0–9, *, #).
When You Use a Panasonic Proprietary Telephone

If you use a Panasonic proprietary telephone and the Console, they may have some of the useful feature buttons described below. For a PS user, refer to "Operating Instructions" for PS. These buttons make operations simple. The illustrations may differ from the buttons on your telephone.

Buttons on the PT

<table>

How to Follow the Steps

An example of system operation is shown below.

**Calling Another Extension**

To call an extension (Intercom Call)

![](image)

- The DSS button light shows the current status as follows:
  - **Off**: The extension is idle.
  - **Red on**: Your or another extension is using the line.

- To call using a directory, refer to "1.13.2 Using the Directories".
- For quick operation
  - If you are an operator or dial some extensions frequently, DSS buttons are useful.
- Hands-free Operation
  - You can make an intercom call and have a conversation in hands-free mode using the SP-PHONE button.

Customising Your Phone

- 3.1.2 Settings on the Programming Mode—Preferred Line Assignment—Outgoing
  - Select the seized line when going off-hook.

- 3.1.3 Customising the Buttons
  - Create or edit a Direct Station Selection (DSS) button.

**Programming References**: The related or required programming is noted.
1.1 Before Operating the Telephones

Connection Example
This diagram shows you a connection example.
1.2 Making Calls

1.2.1 Basic Calling

- Calling Another Extension
- Calling an Outside Party
- Making a Call to a Private Network (TIE Line Access)
- Using an Account Code (Account Code Entry)

 önemli Calling Another Extension

To call an extension (Intercom Call)

The DSS button light shows the current status as follows:

**Off**: The extension is idle.

**Red on**: Your or another extension is using the line.

* You have to press the SDN button once or twice depending on the mode of the SDN button. For details, refer to "1.5.1 Primary Directory Number (PDN)/Secondary Directory Number (SDN) Extension".

To call using a directory, refer to "1.13.2 Using the Directories".

For quick operation

If you are an operator or dial some extensions frequently, DSS buttons are useful.

Hands-free Operation

You can make an intercom call and have a conversation in hands-free mode using the SP-PHONE button.

Customising Your Phone

- 3.1.2 Settings on the Programming Mode—Preferred Line Assignment—Outgoing
  Select the seized line when going off-hook.
- 3.1.3 Customising the Buttons
  Create or edit a Direct Station Selection (DSS) button.
1.2 Making Calls

To call an operator (Operator Call)
You can call an extension or a group assigned as the operator.

PT/SLT/PS/SIP Extn.

- The operator call number (default) varies depending on country/area.

Calling an Outside Party
You have to seize an outside line before dialling an outside phone number because external calls are made via your PBX.
Select one of the following methods:

To select an idle outside line automatically (Automatic Line Access)

PT/SLT/PS/SIP Extn.

- The automatic line access number (default) varies depending on country/area.

To select an idle outside line in the specified outside line group automatically (Outside Line Group Access)
To select the specified outside line

<table>
<thead>
<tr>
<th>PT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Diagram" /></td>
</tr>
</tbody>
</table>

- Each of the S-CO button or G-CO button light shows the current status as follows:
  - **Off**: The line is idle.
  - **Red on**: The line is in use.
  - You may be restricted from making a call to the specified outside party. To make a call, refer to “1.2.7 Calling without Restrictions”.

- **To confirm number before dialling**, you can enter a phone number and confirm it on the display and then go off-hook. (Predialling)

- **Call Charge Reference**
You can confirm your total call charges by pressing the Call Charge Reference button.

- **To make a call to another party without going on-hook**, press the FLASH/RECALL button. It will re-access the outside line and provide external dial tone. Pressing the Terminate button will provide intercom dial tone. You can dial the new phone number without going on/off-hook.

- **Hands-free Operation**
You can make an outside call and have a conversation in hands-free mode using the SP-PHONE button.

**Customising Your Phone**

- **3.1.2 Settings on the Programming Mode—Preferred Line Assignment—Outgoing**
  Select the seized line when going off-hook.

- **3.1.3 Customising the Buttons**
  Create or edit a Loop-CO (L-CO) button, a Group-CO (G-CO) button, a Single-CO (S-CO) button, a Terminate button or a Call Charge Reference button.

◆ Making a Call to a Private Network (TIE Line Access)
You can access extensions connected to other PBXs in a private network.

To call

<table>
<thead>
<tr>
<th>PT/SLT/PS/SIP Extn.</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Diagram" /></td>
</tr>
<tr>
<td>Off-hook.</td>
</tr>
</tbody>
</table>

- **PT and PT/PS**
- **Off-hook.**
- **Talk.**
- **Press S-CO.**
- **Outside**
- **Dial outside phone number.**
- **Talk.**

- **PT/SLT/PS/SIP**
- **Off-hook.**
- **Private phone no.**
- **Talk.**
- **Press S-CO.**
- **Dial outside phone number or enter 7 and then dial private phone number.**
- **Talk.**
• Which type of telephone number must be entered depends on the settings of your PBX.

To call with one touch

PT/PS

Off-hook. Press NDSS. Talk.

• To start monitoring another PBX extension after customising an NDSS button, go off-hook, press the NDSS button, and go on-hook.

The NDSS button light will show the current status as follows:

Off: The extension is idle.
Red on: The extension is busy.

Customising Your Phone

• 3.1.3 Customising the Buttons
  Create or edit a Network Direct Station Selection (NDSS) button.

◆◆ Using an Account Code (Account Code Entry)

You may give a specified account code to extension users and check their telephone usage. You can specify an account code for each client and check the call duration.

PT/SLT/PS/SIP Extn.

Off-hook. Press Account or enter ✪49. Enter account code (max. 10 digits). Enter #. D.Tone

Dial outside phone number.
Seize outside line before entering outside phone number.
1.2 Making Calls

- **A Panasonic proprietary telephone extension user** can enter an account code during a conversation and when hearing reorder tone after the other party hangs up.
- Account codes may use the digits "0" through "9".
- Depending on the settings of your PBX, you may be required to enter an account code to make an outside call.
- **If you enter the wrong code**, press the "*" key and re-enter the account code.
- **For your convenience**, you can store the code with the phone number in the memory (e.g., Speed Dialling).

Customising Your Phone

- 3.1.3 Customising the Buttons
  Create or edit an Account button.
1.2 Making Calls

1.2.2 Easy Dialling

This is convenient for frequently dialled phone numbers.
- With a One-touch Button (One-touch Dialling)
- Using Numbers Stored at Your Extension (Personal Speed Dialling)
- Using Numbers Stored in the PBX (System Speed Dialling)
- To a Preset Number by Going Off-hook (Hot Line)
- Using a Preprogrammed Number (Quick Dialling)

◆ With a One-touch Button (One-touch Dialling)

You can store a phone number into the flexible button for one-touch operation.

Customising Your Phone
- A 3.1.3 Customising the Buttons
  Create or edit a One-touch Dialling button, store the desired phone number or feature number.

◆ Using Numbers Stored at Your Extension (Personal Speed Dialling)

You can store up to 100 numbers at your extension for your personal use.
This feature is also known as Station Speed Dialling.

To store a phone number
1.2 Making Calls

To dial

**PT/SLT/SIP Extn.**

- Off-hook.
- Press AUTO DIAL or enter **.
- Enter **.
- Dial personal speed dialling number (2 digits).

- A SIP Extension user cannot store personal speed dialling numbers at his/her extension. However, it is possible to use the personal speed dialling numbers that are stored in the PBX, through system programming.

- To call using a directory, refer to "1.13.2 Using the Directories".

**Using Numbers Stored in the PBX (System Speed Dialling)**

You can make calls using speed dialling numbers stored in the PBX.

**PT/SLT/PS/SIP Extn.**

- Off-hook.
- Press AUTO DIAL or enter **.
- Dial system speed dialling number (3 digits).

- To call using a directory, refer to "1.13.2 Using the Directories".
To a Preset Number by Going Off-hook (Hot Line)

You can make an outside call simply by going off-hook if you have preprogrammed your phone. This feature is also known as Pickup Dialling.

To store a phone number

```
Off-hook. Enter #740. Enter 2. Enter desired phone no. (max. 32 digits). Enter #. On-hook.
```

To set/cancel

```
Off-hook. Enter #740. Enter 1 to set or 0 to cancel. On-hook.
```

To dial

```
Off-hook.
```

- To call another party, dial the desired party's phone number before the preprogrammed number is dialled.
- You should assign the intercom line as the seized line when going off-hook. (Preferred Line Assignment—Outgoing)
- It is possible to increase the delay before Hot Line is activated through system programming. This can be useful if you require more time after going off-hook to dial another telephone number or extension number.
Using a Preprogrammed Number (Quick Dialling)

You can make a call simply by pressing the preprogrammed number for quick dialling.

1. Off-hook. Dial quick dialling number (max. 8 digits).

- This is a useful feature for hotels.
  For example, to dial Room Service, dial the digit "3", not the full extension number.
1.2 Making Calls

1.2.3 Redial

This is convenient when calling the same outside party again.
– Redialling the Last Number You Dialled (Last Number Redial)

 önemli Redialling the Last Number You Dialled (Last Number Redial)

<table>
<thead>
<tr>
<th>PT/SLT/PS/SIP Extn.</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Phone Icon]</td>
</tr>
<tr>
<td>![Redial Icon]</td>
</tr>
<tr>
<td>![Enter Icon]</td>
</tr>
<tr>
<td>Off-hook.</td>
</tr>
<tr>
<td>Press REDIAL or enter #.</td>
</tr>
</tbody>
</table>

- Up to 32 digits can be stored and redialled.
- After pressing REDIAL, if you hear a busy tone again, press REDIAL to retry.

- Automatic Redial

To redial automatically, press the SP-PHONE button and then the REDIAL button, or press the REDIAL button directly. It will keep trying the busy number until the called party answers or until a specified timeout.

You can perform other tasks during dialling. To cancel, press the FLASH/RECALL button. Some outside lines may not support this feature.

This feature is not available for the KX-T7665 and PS.
1.2 Making Calls

1.2.4 When the Dialled Line is Busy or There is No Answer

- Reserving a Busy Line (Automatic Callback Busy)
- Setting Callback on an ISDN Line (Completion of Calls to Busy Subscriber [CCBS])
- Sending a Call Waiting Notification (Call Waiting)
- Leaving a Message Waiting Indication/Calling Back the Caller Who Left an Indication (Message Waiting)
- Joining an Existing Call (Executive Busy Override)
- Monitoring Another Extension (Call Monitor)
- To an Extension Refusing the Call (DND Override)

Reserving a Busy Line (Automatic Callback Busy)

You can set the telephone to receive callback ringing:

- when a dialled extension becomes idle.
- when your desired outside line that is in use by another extension becomes idle.

You cannot set Automatic Callback Busy for a busy party outside of the PBX.

When you answer the callback ringing:

- For an outside call: The line is seized.
- For an intercom call: The called extension starts ringing automatically.

To set (for both extension and outside line)

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td>While hearing a busy tone</td>
</tr>
<tr>
<td>6 C.Tone</td>
</tr>
<tr>
<td>Enter 6. On-hook.</td>
</tr>
</tbody>
</table>

To answer the callback ringing from an idle extension

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td>While hearing a callback ringing</td>
</tr>
<tr>
<td>♦ R.B.Tone</td>
</tr>
<tr>
<td>Off-hook. Talk.</td>
</tr>
</tbody>
</table>
To answer the callback ringing from an idle outside line

**PT/SLT/PS**

While hearing a callback ringing

---

- If you do not answer the callback ringing within 10 seconds, this feature will be cancelled.

To cancel callback ringing (Automatic Callback Busy Cancel)

**PT/SLT/PS**

---

Setting Callback on an ISDN Line (Completion of Calls to Busy Subscriber [CCBS])

You can set the telephone to receive callback ringing when a busy called party on an ISDN line becomes free. When you answer the callback ringing, the called party's telephone number is automatically dialled.

**PT/SLT/PS**

While hearing a busy tone

Enter 6. On-hook.
1.2 Making Calls

To answer while hearing a callback ringing

PT/SLT/PS

Off-hook.

To cancel (CCBS Cancel)

PT/SLT/PS

Off-hook. Enter #46. On-hook.

- If you do not answer within a specified time period, this feature will be cancelled.
- Availability of this feature depends on the ISDN service of your telephone company.

‑ Sending a Call Waiting Notification (Call Waiting)

You can inform the called party that your call is waiting. This feature is also known as Busy Station Signalling (BSS).

PT/SLT/PS

While hearing a busy tone

Enter 1.

- Depending on the type of the other party's telephone, you may be able to talk to the other party using the speaker and the microphone (Off-hook Call Announcement [OHCA]), or you can send a call announcement through the handset (Whisper OHCA), if they are having another conversation using the handset. Refer to "1.8.3 Receiving Call Waiting (Call Waiting/Off-hook Call Announcement [OHCA]/Whisper OHCA)".
- Depending on system programming and the called extension's setting, a call waiting tone may be sent automatically without performing the operation above. For details, refer to "Automatic Call Waiting" in "3.1.2 Settings on the Programming Mode".
Leaving a Message Waiting Indication/Calling Back the Caller Who Left an Indication (Message Waiting)

**For a caller**
When the called extension is busy or does not answer your call, you can leave a notification so that the called party may call you back.

**For a called extension**
As a message receiver, the Message button light or Message/Ringer Lamp lets you know that a call has been received. If you receive notification, you can call the caller back by a simple operation.

**For a caller**

To leave a message waiting indication

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>When the called extension is busy or does not answer</strong></td>
</tr>
<tr>
<td>Press MESSAGE or enter 4.</td>
</tr>
<tr>

</tr>
<tr>
<td>On-hook.</td>
</tr>
</tbody>
</table>

To leave/cancel a message waiting indication

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-hook.</td>
</tr>
<tr>
<td>Enter <strong>70</strong>.</td>
</tr>
<tr>
<td>Enter 1 to leave or 0 to cancel.</td>
</tr>
<tr>
<td>C.Tone</td>
</tr>
<tr>
<td>On-hook.</td>
</tr>
</tbody>
</table>

When making a call to SIP Extensions, you cannot leave a message waiting notification. If you perform the operation to leave a message waiting notification to a SIP Extension, you will hear a reorder tone.
1.2 Making Calls

◆ For a called extension

To check the left message and call back

<table>
<thead>
<tr>
<th>PT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>While on-hook</strong></td>
</tr>
<tr>
<td>![Icon] Press MESSAGE <strong>until the desired extension appears.</strong></td>
</tr>
<tr>
<td>![Icon] Off-hook.</td>
</tr>
<tr>
<td>![Icon] Talk.</td>
</tr>
</tbody>
</table>

To call back

<table>
<thead>
<tr>

</tr>
<tr>
<td>![Icon] ![Icon] ![Icon] Enter #70.</td>
</tr>
<tr>
<td>![Icon] Enter 0.</td>
</tr>
<tr>
<td>![Icon] ![Icon] ![Icon] Dial your extension number.</td>
</tr>
<tr>
<td>![Icon] ![Icon] On-hook.</td>
</tr>
</tbody>
</table>

- The Message button light or Message/Ringer Lamp shows the current status as follows:
  - **Off**: No message
  - **Red on**: You have a message.
- The display shows the messages starting with the most recent call.
- At a called extension, the MESSAGE button allows you to clear message waiting indications if you do not want to call the callers back. To clear, press the MESSAGE button and then press the soft button.
- On your PT, you can establish one or more Message for Another Extension buttons. These buttons can accept the message waiting notification of other extensions or various incoming call distribution groups. In other words, you can monitor the message waiting notifications of other telephones.
- A single line telephone extension user will receive a special dial tone as message waiting notification when going off-hook.
- The message waiting lamp of a single line telephone can also let you know that you have a message in the same way as the Message button.
Customising Your Phone
- 3.1.3 Customising the Buttons
  Create or edit a Message button or Message for Another Extension button.

**Joining an Existing Call (Executive Busy Override)**

The preprogrammed extension can call someone who is busy on the telephone and establish a three-party conversation.

To join an intercom call

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Party joining the call</strong></td>
</tr>
<tr>
<td>![Phone Icon]</td>
</tr>
<tr>
<td>Off-hook.</td>

</tr>
</tbody>
</table>

| **Parties in the conversation** |
| ![During a conversation] |
| ![C Tone] |
| ![Talk] |
1.2 Making Calls

- To join another conversation, you must have Executive Busy Override enabled at your extension through COS programming.
- It is possible for an originating extension to leave a three-party conversation with an outside party and let the two other parties talk by simply going on-hook.
- Executive Busy Override is not available when making a call to a SIP Extension.

◆ For the originating extension

To talk to each party alternately

![Diagram]

- You can also deny others the possibility of joining your conversation (Default: Allow). Refer to "1.8.7 Preventing Other People from Joining Your Conversation (Executive Busy Override Deny)".

◆ Monitoring Another Extension (Call Monitor)

The preprogrammed extension can monitor another extension.

To monitor

![Diagram]
To an Extension Refusing the Call (DND Override)
The preprogrammed extension can call someone who has set the DND feature.

PT/SLT/PS

- Off-hook.
- Dial extension number.
- Enter 1.
- Talk.

1. Enter 1.

PT/SLT/PS

- DND Tone
- R.B.Tone
1.2 Making Calls

1.2.5 Accessing the ISDN Service (ISDN Service Access)

You can access services provided by the ISDN.

To access

- Availability of features depends on the ISDN service of your telephone company.

Customising Your Phone
- 3.1.3 Customising the Buttons
  Create or edit an ISDN Service button.
1.2 Making Calls

1.2.6 Alternating the Calling Method (Alternate Calling—Ring/Voice)

The caller can alternate the alerting method, either ring or voice, when making an intercom call. On the other hand, any extension can set the alerting method, either ring or voice, when receiving an intercom call.

Ringing (Default): You can call the other party with a ring tone.

Voice-calling: You can talk to the other party immediately after confirmation tone.

To change the method

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td>After dialling</td>
</tr>
</tbody>
</table>

![Ring](image1.png)  ![Hello](image2.png)

OR

Enter 1

PT/SLT/PS  C.Tone  Talk.

- Voice-calling from a SIP Extension is not available.
- If the called party uses a SIP Extension, single line telephone (SLT) or portable station (PS), Voice-calling is not available.
- This feature is not available when the called party’s telephone is in the Voice Call Deny mode.

Customising Your Phone

- 3.1.2 Settings on the Programming Mode—Alternate Receiving—Ring/Voice
  Select the alerting method, either ring or the other party’s voice.
1.2 Making Calls

1.2.7 Calling without Restrictions

- Using Your Calling Privileges at Another Extension (Remote COS Access)

**Using Your Calling Privileges at Another Extension (Remote COS Access)**

You can use your calling privileges (Class of Service) at another extension. You may override restrictions which have been set. To use this feature, an original extension number and an extension PIN (Personal Identification Number) are required. You can make a call by entering a verification code and verification code PIN.

**To call (Walking COS)**

<table>
<thead>
<tr>
<th>PT/SLT/PS/SIP Extn.</th>
<th>PIN: Personal Identification Number</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Diagram" /></td>
<td></td>
</tr>
</tbody>
</table>

Off-hook. Enter **47**.

Dial your extension number. Enter extension PIN (max. 10 digits).

If a wrong extension PIN is entered, you hear an alarm tone.

Dial desired phone number.

Seize outside line before entering outside phone number.

**To call with a verification code (Verification Code Entry)**

<table>
<thead>
<tr>
<th>PT/SLT/PS/SIP Extn.</th>
<th>PIN: Personal Identification Number</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Diagram" /></td>
<td></td>
</tr>
</tbody>
</table>

Off-hook. Enter **47**.

Enter verification code (max. 4 digits).

Enter verification code PIN (max. 10 digits).

If a wrong verification code PIN is entered, you hear an alarm tone.

Dial desired phone number.

Seize outside line before entering outside phone number.
1.2.8 To Access Another Party Directly from Outside (Direct Inward System Access [DISA])

Calling through DISA

When outside callers access extensions in the PBX, a prerecorded message greets the caller and gives information about how to access an extension. You do not need the operator’s assistance. You may be able to access system features or call an outside party with your password depending on the security mode.

To call an extension

**From Outside Telephone**

<table>
<thead>
<tr>
<th>PIN: Personal Identification Number</th>
</tr>
</thead>
</table>

### In No Security Mode/Trunk Security Mode

- Off-hook.
- Dial DISA phone number.
- R.B.Tone & DISA message.
- Dial desired extension number.

### In All Security Mode*

- Off-hook.
- Dial DISA phone number.
- R.B.Tone & DISA message.
- Enter 47.
- Dial your extension number, or enter * and then verification code.
- Enter extension PIN or verification code PIN (max. 10 digits).
- C.Tone & D.Tone.
- Dial desired extension number.
1.2 Making Calls

To call an outside party

**From Outside Telephone**

**In No Security Mode**

- Off-hook.
- Dial DISA phone number.
- Enter 47.
- Dial outside phone number.
- Seize outside line before dialling outside phone number.

**In Trunk Security Mode/All Security Mode**

- Off-hook.
- Dial DISA phone number.
- Enter 47.
- Dial your extension number, or enter * and then verification code.
- Enter extension PIN or verification code PIN (max. 10 digits).
- Dial outside phone number.
- Seize outside line before dialling outside phone number.

*Callers from preprogrammed outside numbers can access the PBX through DISA without a password (extension PIN/verification code PIN) (DISA Automatic Walking COS).*

To retry

**From Outside Telephone**

To dial a different number during a conversation with an outside party or while hearing the ringback, reorder, or busy tone

- Enter *. 
- Dial phone number.
- Dial a line access number as the first digit when calling an outside party.
1.2 Making Calls

• **WARNING**
  There is a risk that fraudulent telephone calls will be made using the Outside-to-Outside Call feature of DISA. The cost of such calls will be billed to the owner/renter of the PBX. To protect the PBX from this kind of fraudulent use, we strongly recommend:
  a) Enabling DISA security (Trunk Security or All Security).
  b) Keeping your passwords (verification code PIN/extension PIN) secret.
  c) Selecting complex, random PINs that cannot be easily guessed.
  d) Changing PINs regularly.

• **Time limit**
  Both parties will hear an alarm tone fifteen seconds before the specified time limit. To extend, press any dial button except *.

• **If Built-in Automated Attendant service is set**, you can access the desired extension simply by pressing a single digit (0–9) from the options given the prerecorded message.
1.2 Making Calls

1.2.9 Setting Your Telephone from Another Extension or through DISA (Remote Setting)

You can set the following features on your telephone from another extension or through DISA.

- Call Forwarding (FWD)/Do Not Disturb (DND)
- Changing the Log-in/Log-out Status of Extensions
- Absent Message
- Extension Dial Lock
- Time Service—Changing the Time Mode (Day/Night/Lunch/Break)

**From another extension**

**PT/SLT/PS**  

PIN: Personal Identification Number

1. Off-hook.  
2. Enter 

   | 4 | 7 |

3. Dial your extension number.
4. Enter extension PIN (max. 10 digits).
5. Dial desired feature number.
6. If a wrong extension PIN is entered, you hear an alarm tone.

**Through DISA**

**From Outside Telephone**  

PIN: Personal Identification Number

1. Off-hook.  
2. Dial DISA phone number.
3. Enter extension PIN (max. 10 digits).
4. Dial desired feature number.
5. If a wrong extension PIN is entered, you hear an alarm tone.
1.3 Receiving Calls

1.3.1 Answering Calls

- **Hands-free Operation**
  You can receive a call and have a conversation in hands-free mode using the SP-PHONE button.

- **Customising Your Phone**
  - 3.1.2 Settings on the Programming Mode—Preferred Line Assignment—Incoming
    Select the seized line when going off-hook.
  - Alternate Receiving—Ring/Voice
    Select the alerting method, either ring or the other party's voice.
  - 3.1.3 Customising the Buttons
    Create or edit an Incoming Call Distribution Group (ICD Group), Primary Directory Number (PDN), or Secondary Directory Number (SDN) button.
1.3 Receiving Calls

1.3.2 Answering Hands-free (Hands-free Answerback)

You can answer an incoming call without going off-hook as soon as the line is connected. When an intercom call arrives, you will hear the caller talking without the phone ringing. When an outside call arrives, you will hear the caller talking after a preprogrammed number of rings. Hands-free Answerback for outside calls requires system programming.

To set/cancel

<td>AUTO ANS.</td>
</tr>
</tbody>
</table>

- The AUTO ANS button light shows the current status as follows:
  - Off: Not set
  - Red on: Set
- PS users: Refer to "Operating Instructions" for PS.
1.3 Receiving Calls

1.3.3 Answering a Call Ringing at Another Telephone (Call Pickup)

- Answering a Call from Another Telephone (Call Pickup)
- Denying Other People the Possibility of Picking Up Your Calls (Call Pickup Deny)

Answering a Call from Another Telephone (Call Pickup)

You can answer an incoming call that is ringing at another extension or group from your phone without leaving your desk. The following types of pickup are available:

- **Group Call Pickup**: Picks up a call within your group.
- **Directed Call Pickup**: Picks up a specified extension's call.

Denying Other People the Possibility of Picking Up Your Calls (Call Pickup Deny)

You can deny or allow other people to pick up your calls.

- If you receive a call waiting tone, you can ask a third party to pick up your second call with Directed Call Pickup.

PT/SLT/PS

</tbody>
</table>
1.3 Receiving Calls

1.3.4 Answering a Call via an External Speaker (Trunk Answer From Any Station [TAFAS])

You can be notified of incoming outside calls through an external speaker. These calls can be answered from any extension.

Through an external speaker

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>While hearing a tone</strong></td>
</tr>
<tr>
<td>Off-hook.</td>
</tr>
</tbody>
</table>

- You can also receive a paging announcement via a speaker with this operation.
1.3.5 Using the ANSWER/RELEASE Button

The ANSWER and RELEASE buttons are convenient for operators using headsets. With the ANSWER button, you can answer all incoming calls. With the RELEASE button, you can disconnect the line during or after a conversation, or complete transferring a call.

To answer

Press ANSWER. Talk.

To transfer a call

During a conversation

Press TRANSFER. Press DSS or dial desired phone number. Press RELEASE.

Seize outside line before dialing outside phone number.

To talk to a waiting caller

While hearing a call waiting tone

Press ANSWER. Talk.
1.3 Receiving Calls

To transfer an outside call to an extension with a one-touch operation

<table>
<thead>
<tr>
<th>PT</th>
</tr>
</thead>
<tbody>

Customising Your Phone

- 3.1.3 Customising the Buttons
  Create or edit an Answer button or a Release button.
1.3.6 Identifying Malicious Calling Parties (Malicious Call Identification [MCID])

You can ask your telephone company to trace a malicious calling party during a conversation or after the calling party hangs up.
You will receive the information on the malicious call later on.

To request MCID

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td>During a conversation or when hearing a reorder tone after the calling party hangs up.</td>
</tr>
</tbody>
</table>

```
(mastax)  ➤  *7*3  ➤  C.Tone
```

Press TRANSFER or Recall/hookswitch. Enter *7*3. Talk or on-hook.

- Availability of this feature depends on the ISDN service of your telephone company.
1.4 During a Conversation

1.4.1 Transferring a Call (Call Transfer)

- Transferring to an Extension in the PBX
- Transferring to an Outside Party Using the PBX Service
- Transferring a Call Using the ISDN Service (Call Transfer [CT]—by ISDN)

- You can transfer a held call without talking, and go on-hook even if the transferred party does not answer the call. (Not available for SIP Extensions.)
  If a transferred call is not answered within a specified time, it will ring at a preprogrammed extension, if set, or at your extension again. If you are off-hook at that time, you will hear an alarm tone. If an outside call is not answered within a specified time, it is automatically disconnected.

- **For users of SIP Extensions:**
  - Even if your telephone has a TRANSFER button, you cannot use it to transfer calls. Please make sure to use the HOLD button.
  - The transfer operation for SIP Extension users may differ from the steps in this section, and may vary depending on the type of telephone being used.

---

Transferring to an Extension in the PBX

To transfer

![Diagram of transferring a call to an extension in the PBX](attachment://diagram.png)

**During a conversation**

Press TRANSFER.

Press DSS or dial extension number.

Talk.

On-hook.

This step can be omitted.
1.4 During a Conversation

To transfer with one touch (One-touch Transfer)

**SLT**

During a conversation

- C.Tone
- Press Recall/hookswitch.
- Dial extension number.
- Talk.
- On-hook.

* Instead of going on-hook, if you press the HOLD button once or twice (depending on the telephone being used), you can return to the held call, and the call with the transferred party will be disconnected.

**SIP Extn.**

During a conversation

- Press HOLD.
- Dial extension number.
- Talk.
- On-hook.

* For the transfer operation using an SDN button, refer to "1.5.1 Primary Directory Number (PDN)/Secondary Directory Number (SDN) Extension".

**PT/PS**

During a conversation with an outside party

- Press DSS.
- Talk.
- On-hook.

This step can be omitted.

When you are not at your desk or not in the office and receive a forwarded outside call, for example on your cellular phone, it is possible to transfer the call to an extension in the PBX by pressing # + desired extension number (if enabled through system programming).
1.4 During a Conversation

- System programming is required to use the One-touch Transfer feature during a conversation with an extension.

Transferring to an Outside Party Using the PBX Service

Some extensions may be restricted from performing this feature.

### PT/PS

**During a conversation**

- Press **TRANSFER**.
- Seize **outside line**.
- Dial **outside phone number**.
- Talk.
- On-hook.

### SLT

**During a conversation**

- Press **Recall/hookswitch**.
- Seize **outside line**.
- Dial **outside phone number**.
- Talk.
- On-hook.

### SIP Extn.

**During a conversation**

- Press **HOLD**.
- Seize **outside line**.
- Dial **outside phone number**.
- Talk.
- On-hook.
1.4 During a Conversation

- *Instead of going on-hook, if you press the HOLD button once or twice (depending on the telephone being used), you can return to the held call, and the call with the transferred party will be disconnected.
- **Time limit**
  Both the caller and the transferred party will hear an alarm tone fifteen seconds before a specified time period, and the call will be disconnected.
- **To return to the held call before the destination answers**, press the TRANSFER button, corresponding CO, ICD Group or INTERCOM button, or the hookswitch.

**Customising Your Phone**
- 3.1.3 Customising the Buttons
  Create or edit a Direct Station Selection (DSS) button.

◆ Transferring a Call Using the ISDN Service (Call Transfer [CT]—by ISDN)

### PT/PS

**During a conversation**

- Press ISDN-Hold.
- Dial phone number.
- Talk.
- On-hook.

This step can be omitted.

### PT/PS

**During a conversation**

- Press TRANSFER.
- Enter *62.
- Dial phone number.
- Talk.
- On-hook.

This step can be omitted.
1.4 During a Conversation

To retrieve the held call, press the TRANSFER button, Recall/hookswitch. Even if you go on-hook while transferring a call, it is transferred. After the call is transferred, the line becomes idle.

Customising Your Phone

- 3.1.3 Customising the Buttons
  Create or edit an ISDN-Hold button.

---

**SLT**

*During a conversation*

1. Press Recall/hookswitch.
2. Enter 62.
3. Dial phone number.
4. Talk.
5. On-hook.

This step can be omitted.
1.4.2 Holding a Call

- Holding
- Holding in a System Parking Zone (Call Park)

• For users of SIP Extensions:
The holding operation for SIP Extension users may differ from the steps in this section, and may vary depending on the type of telephone being used.

◆ Holding

There are two types of hold. The difference between them is that other people can retrieve your held call (Regular Hold) or not (Exclusive Call Hold). As they can be alternated, ask your manager what the current mode is.

To hold (Call Hold)

### PT/PS

During a conversation

![Diagram of PT/PS holding process]

Press HOLD, or press TRANSFER and then enter *50.

### SLT

During a conversation

![Diagram of SLT holding process]

Press Recall/hookswitch. Enter *50.

### SIP Extn.

During a conversation

![Diagram of SIP Extn. holding process]

Press HOLD.

On-hook.
1.4 During a Conversation

To retrieve a call (Call Hold Retrieve)

**PT/SLT/PS**

- **At the holding extension (Call Hold Retrieve)**

  ![Diagram](image)

  Off-hook. Press flashing CO or INTERCOM, or enter *50.

  Talk.

- **To retrieve an outside call from another extension—only Regular Hold (Call Hold Retrieve—Specified with a held line number)**

  ![Diagram](image)

  Off-hook. Press CO, or enter *53 and then held line number (3 digits).

  Talk.

- **To retrieve an intercom call or outside call from another extension—only Regular Hold (Call Hold Retrieve—Specified with a holding extension number)**

  ![Diagram](image)

  Off-hook. Enter *51.

  Press DSS or dial holding extension number.

  Talk.

**SIP Extn.**

![Diagram](image)

Off-hook. Press HOLD.

Talk.
1.4 During a Conversation

- You can put a call on hold in a common parking zone of the PBX so that any extension can retrieve the parked call. You can use this feature as a transferring feature.
- A call can be put into either a specified parking zone (Specified) or any idle parking zone (Auto). If a Call Park button and Call Park (Automatic Park Zone) button have been established, you can select either way to park by simply pressing the corresponding button.
- When a call is parked automatically, or more than one call has been parked at the same time, you need to specify the parking zone number to retrieve the required call.

**Holding in a System Parking Zone (Call Park)**

You can put a call on hold in a common parking zone of the PBX so that any extension can retrieve the parked call. You can use this feature as a transferring feature.

A call can be put into either a specified parking zone (Specified) or any idle parking zone (Auto). If a Call Park button and Call Park (Automatic Park Zone) button have been established, you can select either way to park by simply pressing the corresponding button.

When a call is parked automatically, or more than one call has been parked at the same time, you need to specify the parking zone number to retrieve the required call.

**To set**

<table>
<thead>
<tr>
<th>PT/PS</th>
<th>During a conversation</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(Call Park)</td>
</tr>
</tbody>
</table>

Press **Call Park**.
1.4 During a Conversation

### PT/PS

**During a conversation**

- **Press TRANSFER.**
- **Enter 52.**

Enter a specified parking zone number (2 digits) or press 5 to park at an idle parking zone automatically.

If you hear a busy tone, enter another parking zone number or press 5 again.

### SLT

**During a conversation**

- **Press Recall/hookswitch.**
- **Enter 52.**

Enter a specified parking zone number (2 digits).

If you hear a busy tone, enter another parking zone number.

### To retrieve (Call Park Retrieve)

#### PT/PS

- **Press a flashing Call Park.**

#### PT/SLT/PS

- **Off-hook.**
- **Enter 52.**
- **Dial stored parking zone number (2 digits).**
1.4 During a Conversation

- If a call is parked automatically, confirm the parking zone number on the display.
- **If a call is not retrieved within a specified time**, you will hear an alarm as a reminder (Call Park Recall).
  If an outside call is not answered within a specified time, it is automatically disconnected.

- **If you hear a reorder tone when retrieving a parked call**, there is no held call. Confirm the stored parking zone number.
- After you park a call, you can perform other operations.

Customising Your Phone
- 3.1.3 Customising the Buttons
  Create or edit a Call Park button or Call Park (Automatic Park Zone) button.
1.4 During a Conversation

1.4.3 Talking to Two Parties Alternately (Call Splitting)

When talking to one party while the other party is on hold, you can swap the calls back and forth (alternately).

To alternate between the parties leaving one party on hold temporarily

**PT/PS**

*During a conversation*

- Press `TRANSFER`.
- Press DSS or dial the other party’s extension number.
- Talk to the other party.
- Press `TRANSFER`.
- Talk to the original party.

*The other party will be on hold.*

**SLT**

*During a conversation*

- Press Recall/hookswitch.
- Dial the other party’s extension number.
- Talk to the other party.
- Press Recall/hookswitch.
- Talk to the original party.

*The other party will be on hold.*
To leave the conversation and then let the two parties talk

1.4.4 Answering Call Waiting

- Answering Call Waiting in the PBX
- Answering Call Waiting from the Telephone Company

Answering Call Waiting in the PBX

During a conversation, a call waiting tone or voice announcement through the speaker or the handset occurs when an outside call has been received or another extension is letting you know a call is waiting. You must activate this feature to use it. (Default: Disable—No call [Intercom calls]/No tone [Outside calls])

You can answer the second call by disconnecting (1) or holding (2) the current call.

1. To disconnect the current call and then talk to the new party

   PT/SLT/PS

   While hearing a tone

   ![Diagram of off-hook and on-hook positions]

   On-hook. Off-hook. Talk to the new party.

2. To hold the current call and then talk to the new party

   PT/PS

   While hearing a tone

   ![Diagram of hold and off-hook positions]

   Press HOLD.

   Press CO, ICD Group, PDN, SDN, or INTERCOM.

   Disregard this step if both parties are extensions.

   Talk to the new party.
After talking to the new party (second call), you can disconnect (2.1) or hold (2.2) it and then retrieve the first call.

2.1 To disconnect the second call and then talk to the original party

**SLT**

*While hearing a tone*

Press Recall/hookswitch. Enter \*50. Talk to the new party.

**PT/PS**

*During a conversation*

On-hook. Off-hook. Press CO, ICD Group, PDN, SDN, or INTERCOM. Talk to the original party.

**PT/S LT/PS**

*During a conversation*

On-hook. Off-hook. Enter \*50. Talk to the original party.
2.2 To hold the second call and then talk to the original party

After holding it, you can talk to the original party. Then, you can disconnect it and then talk to the new party again.

**PT/PS**

*During a conversation*

1. Press **HOLD**.
2. Talk to the original party.
3. On-hook.
4. Off-hook.
5. Press **CO, ICD Group, PDN, SDN, or INTERCOM**.
6. Talk to the new party.

*Disregard this step if both parties are extensions.*

**SLT**

*During a conversation*

1. Press **Recall/hookswitch**.
2. Enter ⑤0.
3. Talk to the original party.
4. On-hook.
5. Off-hook.
6. Enter ⑤0.
7. Talk to the new party.
1.4 During a Conversation

- Depending on the type of your telephone, you may be able to talk to the other party using the speaker and the microphone (Off-hook Call Announcement [OHCA]), or you can receive an announcement through the handset (Whisper OHCA), if you are having a conversation using the handset. Refer to "1.8.3 Receiving Call Waiting (Call Waiting/Off-hook Call Announcement [OHCA]/Whisper OHCA)".

- The caller's name or number is displayed for five seconds in fifteen second intervals while waiting to be answered.

Customising Your Phone

- 3.1.2 Settings on the Programming Mode—Call Waiting Tone Type Selection
  If you select "Tone 1", you will hear the same tone for Call Waiting from an outside party and an extension. If you select "Tone 2", you will hear different tones for Call Waiting from an outside party and an extension.

![Diagram showing call waiting tones](image)

Answering Call Waiting from the Telephone Company

This is an optional telephone company service. You can receive a call waiting tone and the caller's information. For details, consult your telephone company.

<table>
<thead>
<tr>
<th>PT/PS</th>

<td>Press FLASH/RECALL or EFA.</td>
<td>Press TRANSFER or Recall/hookswitch. Enter #60.</td>
</tr>
</tbody>
</table>

- To return to the original party, repeat the operation.
- In this case, the FLASH/RECALL button on proprietary telephones must be set to External Feature Access (EFA) mode through system programming.

Customising Your Phone

- 3.1.3 Customising the Buttons
  Create or edit an External Feature Access (EFA) button.
1.4 During a Conversation

1.4.5 Multiple Party Conversation

- Adding Other Parties during a Conversation (Conference)
- Leaving a Conference (Unattended Conference)
- Leaving a Conference (Leaving Three-party Conference)
- Letting a Third Party Join Your Call (Privacy Release)
- Adding a Third Party during a Conversation Using the ISDN Service (Three-party Conference [3PTY]—by ISDN)

Adding Other Parties during a Conversation (Conference)

You can add one or more parties to your conversation.

To establish a conference call

**PT/PS**

*During a conversation*

Press **CONF** or **TRANSFER**.

Dial *desired phone number*.

Talk to the new party.

Press **CONF**.

Talk with multiple parties.

Seize outside line before dialling outside phone number.

**PT/PS**

*During a conversation*

Press **TRANSFER**.

Dial *desired phone number*.

Talk to the new party.

Press **TRANSFER**.

Enter 3.

Seize outside line before dialling outside phone number.

Talk with multiple parties.
1.4 During a Conversation

**SLT**

During a conversation

1. Dial desired phone no.
2. Press Recall/hookswitch.
3. Talk to the new party.
5. Enter 3.
6. C.Tone

Seize outside line before dialling outside phone number.

Talk with multiple parties.

**PT/PS**

During a conversation

- Press HOLD.
- Press the flashing CO, PDN, or SDN.
- Talk to the new party.
- Press CONF or TRANSFER.
- Press the flashing CO, ICD Group, PDN, SDN, or INTERCOM corresponding to the original party.
- Talk to the original party.
- Press CONF, or press TRANSFER and then enter 3.
- C.Tone
- Talk with multiple parties.

To establish a conference call when receiving a call from an outside party during a two-party conversation
1.4 During a Conversation

To add four or more parties to a conference

**PT/PS**

During a conversation

- Press CONF.
- Dial desired phone number.
- Talk.
- Press CONF.
- Talk.

Seize outside line before dialing outside phone number.

To add another party on hold to a conference

**PT/PS**

During a 3- to 7-party conference

- Press CONF.
- Press the flashing CO, ICD Group, PDN, or SDN corresponding to the party on hold.
- Press CONF.
- C.Tone
- Talk with multiple parties.

To talk to two parties alternately in a three-party conversation

**PT/PS**

During a conversation

- Press TRANSFER.
To disconnect one party and then talk to the other in a three-party conversation

- * In this case, the FLASH/RECALL button on a proprietary telephone must be set to Flash/Recall mode through system programming.
- During a three-party conversation, pressing the TRANSFER button or Recall/hookswitch alternates between the other parties in the conversation.
- You can have a conference with a maximum of eight parties (comprising intercom or outside lines) simultaneously.
- During a conversation involving four or more parties, you cannot disconnect one party and maintain the conversation with the other parties.
- SIP Extensions cannot originate a conference call, but can be added as a member.

Customising Your Phone

- 3.1.3 Customising the Buttons
  Create or edit a Conference button.
Leaving a Conference (Unattended Conference)

The person who originated a conference can leave the conference, and allow the other parties to continue the conversation.

To leave a conference

During a Conversation

<table>
<thead>

</thead>
</table>

During a conversation using the handset

Press SP-PHONE.

- The SP-PHONE button light shows the current status as follows:
  - Off: The voice is heard through the handset.
  - On: The voice is heard through the speaker and the handset.
- This feature is only available with certain proprietary telephones, and requires system programming.

- Hands-free operation
  You can have a conversation in hands-free mode using the SP-PHONE button. You can perform other tasks simultaneously.

- Helpful hints for hands-free operation:
  - If it is difficult to hear the other party’s voice,
    Increase the volume using the Navigator Key, Jog Dial, or Volume Key.
  - If the other party has difficulty hearing you,
    Decrease the volume.
  - If the other party reports that your voice echoes,
    Use the telephone in a room that has curtains, carpeting or both.
  - If parts of the conversation cannot be heard,
    If you and the other party speak at the same time, parts of your conversation may be lost. To avoid this, try to speak alternately.
1.4.8 Using the Headset (Headset Operation)

You can have a conversation using a headset. In this case, you must select "Headset on" in programming mode or set the Headset button on (red) in advance. This feature is also known as Handset/Headset Selection.

To talk using the headset

![Diagram showing SP-PHONE button]
P: Press SP-PHONE.

To use the handset during a conversation using the headset

P: Press red Headset.

- The Headset button light shows the current status as follows:
  - **Off**: Headset mode off
  - **Red on**: Headset mode on

- This feature is not available for the KX-T7665.

- With the KX-NT300 series, you can use a Bluetooth wireless headset registered on your extension as a headset.
Customising Your Phone

- 3.1.2 Settings on the Programming Mode—Headset Operation
  Select the equipment to use.
- 3.1.3 Customising the Buttons
  Create or edit a Headset button.

# 1.5 Using a PDN/SDN Button

## 1.5.1 Primary Directory Number (PDN)/Secondary Directory Number (SDN) Extension

Primary Directory Number (PDN) buttons and Secondary Directory Number (SDN) buttons are useful when extension users will handle calls for other extensions. For example, a secretary or multiple secretaries can handle calls and check the call status of a boss or multiple bosses. The functions of PDN and SDN buttons are as follows:

**PDN button:** This button can be used to make and receive all calls (including both outside and intercom calls). Having multiple PDN buttons allows multiple calls to be queued at the extension. Extensions that have a PDN button are called PDN extensions.

**SDN button:** The light of an SDN button displays the current call status of the registered extension, similar to a DSS button. In addition, this button can be used to perform the following operations:

- call the PDN extension (SDN Direct Dial)
- answer calls ringing at the PDN extension
- hold calls and retrieve calls held by the PDN extension (Call Hold and Call Hold Retrieve)
- transfer calls to the PDN extension (Call Transfer Using SDN Button)

Extensions that have an SDN button are called SDN extensions.

- The extension that is registered as the destination of an SDN button must have at least one PDN button.
- One extension can have up to 8 PDN buttons.
- An extension can have only one SDN button for each PDN extension.
- The button light of each PDN/SDN button shows the current status as follows:

<table>
<thead>
<tr>
<th>Light Pattern</th>
<th>PDN Button Status</th>
<th>SDN Button Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>The PDN extension is idle.</td>
<td>The extension is on a call using an SDN button.</td>
</tr>
<tr>
<td>Green on</td>
<td>The extension is on a call using the PDN button.</td>
<td>The extension is on a call using an SDN button.</td>
</tr>
<tr>
<td>Flashing green slowly</td>
<td>A call is on hold at the PDN extension (Regular Hold).</td>
<td>A call answered with the SDN button is on hold (Regular Hold).</td>
</tr>
<tr>
<td>Flashing green moderately</td>
<td>A call is on hold temporarily or on Exclusive Call Hold.</td>
<td>A call answered with the SDN button is on hold temporarily or on Exclusive Call Hold.</td>
</tr>
<tr>
<td>Flashing green rapidly</td>
<td>The PDN extension is receiving an incoming call.</td>
<td>An SDN extension is receiving a Hold Recall or callback ringing from a call answered with the SDN button.</td>
</tr>
</tbody>
</table>
1.5 Using a PDN/SDN Button

SDN Direct Dial

Using an SDN button, you can easily call the corresponding PDN extension. SDN buttons are in one of two modes depending on system programming, and the operation procedure differs as follows:

Enhanced DSS Key Mode

<table>
<thead>
<tr>
<th>Light Pattern</th>
<th>PDN Button Status</th>
<th>SDN Button Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Red on</td>
<td>A corresponding SDN extension is using the line.</td>
<td>The corresponding PDN extension or another corresponding SDN extension is using the line.</td>
</tr>
<tr>
<td>Flashing red slowly</td>
<td>A corresponding SDN extension is holding a call.</td>
<td>Another corresponding SDN extension, or the PDN extension itself, is holding a call.</td>
</tr>
<tr>
<td>Flashing red rapidly</td>
<td>The PDN extension is receiving an incoming call to an incoming call distribution (ICD) group.</td>
<td>The corresponding PDN extension is receiving an incoming call.</td>
</tr>
</tbody>
</table>

SDN Direct Dial

When performing SDN Direct Dial to call the corresponding PDN extension, the SDN button light shows the current status of the destination extension as follows:

- **Green on**: You are using the line.
- **Red on**: The line is being used. (The PDN extension, or another SDN extension when multiple extensions have SDN buttons to a same PDN extension, is using the line.)
- **Even if a PDN extension has set Do Not Disturb (DND), you can call the extension as normal by pressing the SDN button.**
- **When an SDN button is in Standard SDN Key Mode, you can dial a telephone number while hearing a dial tone, instead of pressing the SDN button again. Depending on system programming, your call will be made using either your normal calling privileges (Class of Service) or those of the corresponding PDN extension (SDN Walking COS).**
1.5 Using a PDN/SDN Button

**Call Hold and Call Hold Retrieve**

You can put calls answered with a PDN or SDN button on hold normally (→ 1.4.2 Holding a Call).
You can also retrieve a call held at your extension/another extension with a simple operation, regardless of the call type.

**Call Hold Retrieve**

<table>
<thead>
<tr>
<th>PT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>To retrieve a call at the holding extension</strong></td>
</tr>
<tr>
<td><img src="Off-hook" alt="Off-hook" /> ➔ ![PDN or SDN](PDN or SDN) ➔ <img src="Talk" alt="Talk" /></td>
</tr>
<tr>
<td>Off-hook. Press flashing green PDN or SDN. Talk.</td>
</tr>
</tbody>
</table>

| **To retrieve a call from another extension—only Regular Hold** |
| ![Off-hook](Off-hook) ➔ ![PDN or SDN](PDN or SDN) ➔ ![Talk](Talk) |
| Off-hook. Press flashing red PDN or SDN. Talk. |

- **If a call is not retrieved within a specified time**, you will hear an alarm as a reminder (Hold Recall).
- **If an outside call is not answered within a specified time**, it is automatically disconnected.

- **If Automatic Call Hold** has been preprogrammed, you can put the current call on hold automatically by pressing another PDN button to make or answer another call.
1.5 Using a PDN/SDN Button

Call Transfer Using SDN Button

You can transfer a call to a PDN extension with a simple operation using a corresponding SDN button.

To transfer a call to a PDN extension

<table>
<thead>
<tr>
<th>PT/PS</th>
</tr>
</thead>
</table>
| During a conversation

1. Press SDN.
2. Talk.
3. On-hook.

This step can be omitted.

- System programming is required to use this feature during a conversation with an extension.
- * When an SDN button is in Standard SDN Key Mode, you have to press the SDN button twice to transfer the call, unless you used that SDN button to answer an incoming call.

Customizing Your Phone

- 3.1.2 Settings on the Programming Mode—Preferred Line Assignment—Incoming
  Select the seized line when going off-hook.
- 3.1.2 Settings on the Programming Mode—Preferred Line Assignment—Outgoing
  Select the seized line when going off-hook.
- 3.1.3 Customising the Buttons
  Create or edit a Primary Directory Number (PDN) or Secondary Directory Number (SDN) button.
1.6 Before Leaving Your Desk

1.6.1 Forwarding Calls

- Forwarding Your Calls (Call Forwarding [FWD])
- FWD/DND Settings Using Fixed FWD/DND Button
- Forwarding Your Calls Using ISDN Service (Call Forwarding [CF]—by ISDN)

◆ Forwarding Your Calls (Call Forwarding [FWD])

You can have your incoming calls forwarded to a specified destination.

**All Calls:**
All calls are forwarded. Preset extensions may also forward from their own receiving group.

**Busy:**
All calls are forwarded when your extension is busy.

**No Answer:**
All calls are forwarded when you do not answer the call within a specified time period.

**Busy/No Answer (BSY/NA):**
All calls are forwarded when you do not answer within a specified time period or when your extension is busy.

**Follow Me (From):**
If you fail to set the above-mentioned "All Calls" to forward before you leave your desk, you can set the same feature from the destination extension.

- Incoming calls can be forwarded up to four times.
- When using a SIP Extension, you cannot set/cancel the FWD feature at your extension. However, this feature is available if a forward destination is set through system programming.
- You can set the floating extension number of a voice mail group or the SVM card as a forward destination.
- You can set your cellular phone as the forward destination.
- **Boss & Secretary feature**
The extension which has been set as the destination can call the forwarding extension.

<Example>
1.6 Before Leaving Your Desk

To set/cancel

**PT/SLT/PS**

![Diagram showing how to set/cancel Follow Me](image)

- Off-hook.
- Enter #71.
- Enter 0 to 2 as you desire.
- Enter required number.
- For “Cancel”, go on-hook directly after entering 0.

Enter destination extension number. Or enter outside line access number and then outside phone number.

- Enter #.
- On-hook.

To set Follow Me from another extension

**PT/SLT/PS**

![Diagram showing how to set Follow Me from another extension](image)

- Off-hook.
- Enter #71.
- Enter 0 to 2 as you desire.
- Enter 7 or 8.

Dial your extension number.

- It is not possible to set Follow Me from a SIP Extension. However, it is possible to set it on a SIP Extension from another extension that is not a SIP Extension.

- When using a proprietary telephone, you can set or cancel Call Forwarding by pressing the FWD/DND button (fixed button) instead of “×710”.

---

96 | User Manual
To set the timer for "No Answer" and "Busy/No Answer"

**PT/SLT/PS**

- Off-hook.
- Enter 713.
- Enter time (seconds [2 digits]).
- On-hook.

**To set/cancel (Call Forwarding [FWD] for your Incoming Call Distribution Group)**

**PT/SLT/PS**

**ICD Group: Incoming Call Distribution Group**

- Off-hook.
- Enter 71.
- Enter 4 to 6 as you desire.
- Enter 1 to set or 0 to cancel.
- Enter ICD Group extension number.

- Enter destination extension number.
- Or enter outside line access number and then outside phone number.

- Enter #. On-hook.

- For "Cancel", go on-hook directly after entering ICD Group extension number.

**Notes:**

- The FWD/DND button light shows the current status as follows:
  - Off: Both features are not set.
  - Red on: FWD mode
  - Flashing red slowly: DND mode

- The Group FWD button light shows the current status as follows:
  - Off: No set
  - Red on: FWD mode
1.6 Before Leaving Your Desk

- The system has two modes: (1) FWD/DND Cycle Switch Mode and (2) FWD/DND Setting Mode. Ask your manager what mode your system is in if you are not sure.

1. When in FWD/DND Cycle Switch Mode:
Pressing the FWD/DND button (fixed button) while in idle status will cycle the setting as shown below:

   ➔ FWD ➔ DND ➔ Off

2. When in FWD/DND Setting Mode:
Pressing the FWD/DND button (fixed button) while in idle status allows you to switch the FWD/DND status and set the FWD destination (refer to "FWD/DND Settings Using Fixed FWD/DND Button").

**Note**
A FWD/DND button (customised button) is always in FWD/DND Cycle Switch Mode: the mode cannot be changed.

- Transferred outside calls are also forwarded to the destination assigned for outside calls.
- When intercom calls are set to be handled differently from outside calls (forwarding type, forward destination), we recommend establishing buttons for both FWD/DND—Outside calls and FWD/DND—Intercom calls, and/or Group FWD—Outside calls and Group FWD—Intercom calls, because:
  a) the light patterns of the FWD/DND—Both calls button (including FWD/DND button [fixed button]) and the Group FWD—Both calls button will indicate the setting for either outside calls or intercom calls, but not both.

**Note**
The FWD icon on PS display reflects the setting for outside calls only.

  b) pressing the FWD/DND—Both calls button (including FWD/DND button [fixed button]) or the Group FWD—Both calls button will not change the FWD or DND mode for intercom calls and outside calls separately.

**Customising Your Phone**

- 3.1.3 Customising the Buttons
Create or edit FWD/DND (Both calls, Outside calls, Intercom calls) buttons, or Group FWD (Both calls, Outside calls, Intercom calls) buttons.
FWD/DND Settings Using Fixed FWD/DND Button

Using a proprietary telephone (PT), you can easily switch the FWD/DND status, and set the forward destination for outside/intercom calls with the FWD/DND button (fixed button). It is also possible to set outside telephone numbers (e.g., your cellular phone) as forward destinations for up to 4 Virtual PSs* in an Incoming Call Distribution (ICD) Group, to ring together with other ICD Group members for calls to the group.

The following settings are available:

- Switching the FWD/DND status and setting FWD destination for outside/intercom calls
- Timer for "No Answer" and "Busy/No Answer"
- Forwarding status (on/off) and outside destinations to ring in parallel for outside calls for up to 4 virtual PSs in an ICD Group

* Virtual PS

A virtual PS is a dedicated extension number assigned to a non-existent portable station (PS) to allow access to outside destinations such as a cellular phone.

To switch FWD/DND status for outside calls

<table>
<thead>
<tr>
<th>PT</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>While on-hook (when in FWD/DND Setting Mode)</strong></td>
</tr>
<tr>
<td>Press the fixed FWD/DND button.</td>
</tr>
<tr>
<td>The current FWD/DND status for outside calls is displayed.</td>
</tr>
<tr>
<td>Press the fixed FWD/DND button again to switch the status.</td>
</tr>
</tbody>
</table>

To switch FWD/DND status for intercom calls

<table>
<thead>
<tr>
<th>PT</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>While on-hook (when in FWD/DND Setting Mode)</strong></td>
</tr>
<tr>
<td>Press the fixed FWD/DND button.</td>
</tr>
<tr>
<td>Enter 2.</td>
</tr>
<tr>
<td>The current FWD/DND status for intercom calls is displayed.</td>
</tr>
<tr>
<td>Press the fixed FWD/DND button again to switch the status.</td>
</tr>
</tbody>
</table>
• When you switch the FWD/DND status, any FWD destination that was set previously is not cleared.

To set and clear FWD/DND for outside/intercom calls

PT

* This step can be omitted.

To set the timer for "No Answer" and "Busy/No Answer"

PT
1.6 Before Leaving Your Desk

- You can enter the time as a 1–3 digit number. For example, 15 seconds can be entered as "15" or "015".

To set forwarding status and outside destinations to ring in parallel for outside calls to an ICD Group

PT

While on-hook (when in FWD/DND Setting Mode)

- Press the fixed FWD/DND button.
- Enter 4 to 7.
- Press STORE.

To cancel ringing

- Enter 0.

To set ringing

- Enter outside line access number and then outside phone number.

A confirmation tone will be heard.

- Only one extension assigned as member 1 in each ICD group can perform the settings for virtual PSs.
- It is possible to switch the forwarding status (on/off) of a virtual PS by entering the number (4–7) of that extension, then pressing the fixed FWD/DND button, instead of pressing the AUTO DIAL/STORE button.
Forwarding Your Calls Using ISDN Service (Call Forwarding [CF]—by ISDN)

All calls are forwarded to an outside party using ISDN. The following types of call forwarding are provided by the ISDN service.
- Unconditional (Call Forwarding Unconditional [CFU])
- When your extension is busy (Call Forwarding Busy [CFB])
- When you do not answer (Call Forwarding No Reply [CFNR])

To set

**PT/SLT/PS**

Off-hook. Enter 7 5. Enter outside line no. Enter #. Enter your MSN.

Enter #. Enter required number. Enter desired phone no. Enter #. Enter your multiple subscriber number (MSN).

On-hook.

To cancel

**PT/SLT/PS**

Off-hook. Enter 7 5. Enter outside line no. Enter #. Enter your MSN.

Enter #. Enter 0. C.Tone. On-hook.
To confirm the condition

**PT/PS**

1. **Off-hook.**
2. Enter `7` followed by `5`.
3. Enter outside line number (3 digits).
4. Enter `#`
5. Enter your multiple subscriber number (MSN).
6. The display shows the selected type.
7. Enter `#`
8. Enter `1`.
9. C.Tone
10. On-hook.

**User Manual**
1.6.2 Using Voice Messaging (Built-in Simplified Voice Message [SVM])

Your PBX can provide you with answering machine service. Your extension is assigned a message box, into which callers can leave voice messages for you. After callers reach your message box, they will hear your personal greeting message. You can record two kinds of personal greetings: a normal greeting message and a greeting message for each time mode. You can also play back and clear your greeting messages and the voice messages left by callers.

- Recording a Normal Greeting Message
- Recording a Greeting Message for Each Time Mode
- Redirecting Your Calls to Your Message Box
- Leaving Voice Messages
- Listening to Voice Messages Left by Callers
- Accessing Your Message Box from an Outside Telephone
- Accessing the Message Box of Another Extension from Your Extension

- This feature is not available for SIP Extensions.
- You may hear a busy tone when trying to access your message box if too many other users are already accessing their message boxes. In that case, wait a few minutes and try again.
- If the used recording space (including greeting messages and voice messages left by callers) for the SVM feature reaches a certain limit, the display informs you that the recording space is almost full, and you will hear dial tone 3 when going off-hook.

Dial Tone 3

Operation Reference When Accessing Your Message Box

After entering the SVM feature number (×38), the operations below are available by entering the corresponding numbers.

<table>
<thead>
<tr>
<th>Operation No.</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>To clear the normal greeting message</td>
</tr>
<tr>
<td>1</td>
<td>To record a normal greeting message</td>

<tr>
<td>2</td>
<td>To play back the normal greeting message</td>
</tr>
<tr>
<td>3</td>
<td>To listen to voice messages left by callers</td>
</tr>
<tr>
<td>8</td>
<td>To set a greeting message for each time mode</td>
</tr>
<tr>
<td># 6</td>
<td>To leave a voice message to another extension's message box</td>
</tr>
</tbody>
</table>
1.6 Before Leaving Your Desk

**Recording a Normal Greeting Message**

To record:

**PT/SLT/PS**

- Off-hook.
- Enter 38.
- Enter 1.
- Record message.

Example: "You have reached John. I am sorry I cannot take your call right now. Please leave a message."

Press STORE or any dial key (0–9, *, #).

C.Tone

The greeting message is played back.

Enter 0 or 1 while the greeting message is being played back.

On-hook.

To play back:

**PT/SLT/PS**

- Off-hook.
- Enter 38.
- Enter 2.

C.Tone

The greeting message is played back.

Enter 0 or 1 while the greeting message is being played back.

On-hook.

* This step can be omitted.
### 1.6 Before Leaving Your Desk

#### To clear

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><img src="image" alt="Off-hook." /></td>
<td><img src="image" alt="Enter 38." /></td>
<td><img src="image" alt="Enter 0." /></td>
<td><img src="image" alt="C.Tone" /></td>
<td><img src="image" alt="On-hook." /></td>
</tr>
</tbody>
</table>

#### Recording a Greeting Message for Each Time Mode

In addition to a normal greeting message, you can record a specific greeting message for each time mode (day/lunch/break/night).

#### To record

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><img src="image" alt="Off-hook." /></td>
<td><img src="image" alt="Enter 38." /></td>
<td><img src="image" alt="Enter 8." /></td>
<td><img src="image" alt="Enter the desired time mode." /></td>
<td><img src="image" alt="Enter 1." /></td>
</tr>
</tbody>
</table>

- Press **STORE** or any dial key (0–9, *, #).
- Example: "You have reached John. I am sorry I am out for lunch right now. Please leave a message."
To play back

**PT/SLT/PS**

![Diagram](image)

- Off-hook.
- Enter \*38.
- Enter 8.
- Enter the desired time mode.
- Enter 2.
- C.Tone

*The greeting message is played back.*

- Enter 0 or 1 while the greeting message is being played back.

- Enter 0.
- C.Tone
- On-hook.

*This step can be omitted.*

To clear

**PT/SLT/PS**

![Diagram](image)

- Off-hook.
- Enter \*38.
- Enter 8.
- Enter the desired time mode.
- Enter 0.
- C.Tone
- On-hook.

*If both the greeting message for a certain time mode and the normal greeting message have been recorded, callers will hear the greeting message for that time mode. However, if no greeting message has been recorded for a certain time mode, the normal greeting message will be played instead.*
Redirecting Your Calls to Your Message Box

You can set incoming calls to be redirected to your own message box so that callers can leave voice messages when you cannot answer the phone.

To set/cancel

- The default floating extension number for the SVM feature is 591.

!!
Leaving Voice Messages

If the extension user you called is not able to answer your call, and your call is redirected to the message box, you will hear the greeting message. Then, you can leave a voice message for that extension. It is also possible to leave a voice message directly in the message box of a desired extension by following the steps below:

To leave a voice message directly to another extension's message box

PT/SLT/PS

- Off-hook.
- Enter ✭38.
- Enter #6.
- Dial extension number.
- You hear the greeting message.
- Record message.
- C.Tone
- On-hook or press any dial key (0–9, *, #).

- Voice message recording will stop, you will hear a notification tone, and the call will be disconnected, in the following cases:
  a. the recording time for the voice message reaches the preprogrammed limit. (default: 120 seconds)
  b. the recording space for the SVM feature reaches the limit.

- When you are on the phone, you can transfer the call directly to the message box of a desired extension by placing the call on hold temporarily, then pressing ✭38 + #6 + the desired extension number. This allows the caller to leave a voice message in the message box of the desired extension.
Listening to Voice Messages Left by Callers

When a caller leaves a voice message, information about that caller is also recorded as the SVM Log. The SVM Log can be viewed using the display of a PT or PS by pressing the Message button.

To listen to voice messages

**PT/PS**

**While on-hook**

Press MESSAGE until desired SVM Log appears.

**PT/SLT/PS**

Off-hook.

Enter ∗38.

Enter 3.

To clear the voice message that you are listening to

**PT/SLT/PS**

**While hearing the voice message**

Press MESSAGE or enter ∗702.

Enter 3.

Press STORE or enter 1 to confirm.
• Various operations are available by entering numbers while you are listening to a recorded voice message using any of the methods described above. The available options are as follows:

<table>
<thead>
<tr>
<th>Operation No.</th>
<th>Operations</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 / # *</td>
<td>To play back the voice message from the beginning</td>
</tr>
<tr>
<td>2</td>
<td>To go to the next voice message</td>
</tr>
<tr>
<td>3</td>
<td>To clear the voice message</td>
</tr>
<tr>
<td></td>
<td>(Press the AUTO DIAL/STORE button or enter 1 to confirm.)</td>
</tr>
<tr>
<td>4</td>
<td>To call back the caller who left the voice message</td>
</tr>
<tr>
<td>5</td>
<td>To go back to the previous voice message</td>
</tr>
<tr>
<td># 6</td>
<td>To leave a voice message directly in the message box of another extension (Enter desired extension number.)</td>
</tr>
<tr>
<td># 8</td>
<td>To play back your greeting message and record a voice message in your own message box</td>
</tr>
<tr>
<td># 9</td>
<td>To end the call</td>
</tr>
</tbody>
</table>

• In addition to the caller information that is recorded in the Call Log, the following SVM Log information is recorded with voice messages left by callers:
  - Caller’s Name
  - Caller’s Telephone Number
  - Time recording started
  - Voice Message Status
    - “New” is displayed for voice messages that have not previously been listened to.
    - “Old” is displayed for voice messages that have previously been listened to.

Please note that the information shown on the display may vary depending on the information that was received and the type of telephone used. Only users of a 6-line display PT can view all of the above information.

• You can lock the SVM Log display by using an extension PIN (Personal Identification Number) to prevent other users from viewing the information and from playing back your voice messages (Display Lock). Refer to "3.1.2 Settings on the Programming Mode".

• If your telephone has a Message for Another Extension button, you can access the message box of another extension and listen to voice messages for that extension.

• If a new voice message has been left in your message box, you will hear dial tone 4 after going off-hook. In addition, if your telephone has a Message button or Message/Ringer Lamp, the corresponding button or lamp will light when a voice message has been left.

Dial Tone 4

1 s
To listen to voice messages while your display is locked

**PT/SLT/PS**

**PIN: Personal Identification Number**

- **Off-hook.**
  - Enter \*47.
- **Dial your extension number.**
  - Enter your extension no.
- **Enter extension PIN.**
  - Enter extension PIN (max. 10 digits).

  If the wrong extension PIN is entered, you hear an alarm tone.

- Enter \*38.
- Enter 3.

* When you press the Message button while on-hook to play back voice messages, Display Lock is temporarily deactivated.

To clear voice messages from the SVM Log

**PT/PS**

**While on-hook**

- Press MESSAGE until desired SVM Log appears.
- Press TRANSFER.
- Press STORE.
### Accessing Your Message Box from an Outside Telephone

You can remotely access your message box and perform any operations of the SVM feature through an outside line as if you were at your own extension.

#### From Outside Telephone

<table>
<thead>
<tr>
<th>From Outside Telephone</th>
<th>PIN: Personal Identification Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-hook.</td>
<td>Dial desired phone number of a destination that has set the SVM feature.</td>
</tr>
<tr>
<td></td>
<td>Enter extension PIN (max. 10 digits).</td>
</tr>
<tr>
<td></td>
<td>Enter extension PIN for that extension (max. 10 digits).</td>
</tr>
<tr>
<td></td>
<td>Enter *38.</td>
</tr>
</tbody>
</table>

- If you hear a reorder tone when you try to leave a voice message directly in the message box of another extension, that message box is unavailable. You can enter another extension number by pressing \*47.  
- When accessing your message box from an outside telephone, you cannot call back callers who have left voice messages, by pressing 4 while hearing the voice message.

#### To listen to voice messages left in the message box of another extension

<table>
<thead>
<tr>
<th>From Outside Telephone</th>
<th>PIN: Personal Identification Number</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>While hearing voice messages in your message box</td>
</tr>
<tr>
<td></td>
<td>Enter #8.</td>
</tr>
<tr>
<td></td>
<td>Enter *38.</td>
</tr>
</tbody>
</table>
Accessing the Message Box of Another Extension from Your Extension

You can access the message box of another extension (for example, to record a greeting message for that extension) by following the steps below:

**PT/SLT/PS**

**PIN: Personal Identification Number**

- Off-hook.
- Enter 47.
- Dial desired extension number.

- Enter extension PIN for that extension (max. 10 digits).
- C.Tone & D.Tone
- Enter 38.

If the wrong extension PIN is entered, you hear an alarm tone.

For available operations, see "Operation Reference When Accessing Your Message Box".
1.6.3 Showing a Message on the Caller's Telephone Display (Absent Message)

You can show the reason you do not answer, if the caller uses a Panasonic display proprietary telephone. There are eight preprogrammed messages and one for your personal message (16 characters). The selected message is shown on the display of your telephone.

<table>
<thead>
<tr>
<th>Message no.</th>
<th>Message (Example)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Will Return Soon</td>
</tr>
<tr>
<td>2</td>
<td>Gone Home</td>
</tr>
<tr>
<td>3</td>
<td>At Ext %% (Extension number)</td>
</tr>
<tr>
<td>4</td>
<td>Back at %:% (Hour:Minute)</td>
</tr>
<tr>
<td>5</td>
<td>Out until %/% (Month/Day)</td>
</tr>
<tr>
<td>6</td>
<td>In a Meeting</td>
</tr>
<tr>
<td>7</td>
<td></td>
</tr>
<tr>
<td>8</td>
<td></td>
</tr>
<tr>
<td>9</td>
<td>A message assigned for each extension. (Personal Absent Message)</td>
</tr>
</tbody>
</table>

To set

PT/SLT/PS

Off-hook.  Enter #750.  Enter required number.
C.Tone

To cancel

PT/SLT/PS

Off-hook.  Enter #750.  Enter 0.  C.Tone

On-hook.
• Enter the desired value in the "%" positions. You must enter the correct number of characters as represented by the "%" using 0 to 9 or ⅓.
• The preprogrammed messages can be changed through system programming.
• To create your personal message (Message no. 9), refer to “3.1.2 Settings on the Programming Mode”.
1.6.4 Preventing Other People from Using Your Telephone (Extension Dial Lock)

You can lock your extension so that other users cannot make unauthorised outside calls. This feature is also known as Electronic Station Lockout.

To lock

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Phone" /> ➔ 7 7 1 C.Tone ➔ <img src="image" alt="Phone" /></td>
</tr>
<tr>
<td>Off-hook.</td>
</tr>
</tbody>
</table>

To unlock

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Phone" /> ➔ 7 7 0 extension PIN C.Tone ➔ <img src="image" alt="Phone" /></td>
</tr>
<tr>
<td>Off-hook.</td>
</tr>
</tbody>
</table>

- If you forget the extension PIN or cannot unlock your extension, consult your manager. He can clear your extension PIN. Then, you can set the new PIN and unlock your extension by entering it.
- If your extension is locked by this feature, it cannot perform features as follows:
  - Making outside calls
  - Changing the call forwarding destination
- If you do not set extension PIN, you cannot lock and unlock your extension.

To make an outside call while your extension is locked

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Phone" /> ➔ 4 7 <img src="image" alt="Phone" /> ➔ extension PIN C.Tone &amp; D.Tone ➔ desired phone no.</td>
</tr>
<tr>
<td>Off-hook.</td>
</tr>
</tbody>
</table>

If the wrong extension PIN is entered, you hear an alarm tone.
Seize outside line before entering outside phone number.
• After you make an outside call, Extension Dial Lock is automatically activated again.
1.7 Making/Answering an Announcement

1.7.1 Paging

- Group Paging
- Paging and then Transferring a Call

◆ Group Paging

You can make a voice announcement to proprietary telephones or external speakers or both in the preset group simultaneously.

To page

PT/SLT/PS/SIP Extn.

- If the group which you paged is already being used for paging, you hear a busy tone.

◆ Paging and then Transferring a Call

PT/SLT/PS

During a conversation

Press TRANSFER or Recall/hookswitch.

Enter ★33. Dial paging group number (2 digits). C.Tone Announce.

The other party is placed on hold.

Wait for an answer. Talk. On-hook.

The held party and the paged extension are connected and start a conversation.
• After you go on-hook, the caller can talk to the person who answers the page.
1.7 Making/Answering an Announcement

1.7.2 Answering/Denying a Paging Announcement

To answer

![PT diagram]

- Off-hook.
- Enter *43.
- Talk.

To allow/deny a paging announcement (Paging Deny)

![PT diagram]

- Off-hook.
- Enter *721.
- Enter 1 or 0.
- On-hook.

- The following are extensions that cannot receive a paging announcement:
  - Portable station
  - Single line telephone
  - Proprietary telephone that is ringing or busy
  - Proprietary telephone in Paging Deny mode
  - Proprietary telephone in DND mode
- System programming may be required for some IP-PT users to receive paging announcements.
- Even if the announcement is not paging your extension, you can answer it, if it is paging your group.
1.7 Making/Answering an Announcement

1.7.3 Making an Announcement and Having a Multiple Party Conversation (Broadcasting)

You can call multiple parties assigned in the group and make a voice announcement. You can also establish a multiple party conversation with called parties. This conversation will be heard by other called parties. Called parties can listen to the announcement simply by going off-hook. They can send a notification tone if they want to join the conversation.

To make/answer a broadcasting call

**PT**

- **Caller**
  - Off-hook.
  - Enter ★32.
  - Dial broadcasting group number (1 digit).
  - Wait for an answer.
  - C.Tone
  - Announce.

**Any Telephone**

- **Called Party**
  - The telephone rings.
  - Off-hook.

◆ For a caller

To make a conversation with a specific party

**PT**

*During an announcement*

- Press DSS.
1.7 Making/Answering an Announcement

To make a conversation with a party in the group's preassigned order

**PT**

*During an announcement*

![CONF]

Press CONF.

To end a conversation with a specific party

**PT**

*During a conversation*

- **To end a conversation with a specific party**
  
  ![DSS]
  
  Press DSS.

- **To end a conversation with the party who joined the conversation last**
  
  ![TRANSFER]
  
  Press TRANSFER.

- **To disconnect the party who joined the conversation last from the broadcast**
  
  ![FLASH/RECALL]
  
  Press FLASH/RECALL.

*In this case, the FLASH/RECALL button must be set to Flash/Recall mode through system programming.*
For a called extension

To send a notification tone to the caller and join a conversation

A conversation can be established with a maximum of 4 parties (including the caller).
1.8 Setting the Telephone According to Your Needs

1.8.1 Setting the Alarm (Timed Reminder)

You can receive an alarm at your telephone to remind you of a meeting, appointment or as a wake-up call. The alarm can occur either once or daily (every day until cancelled) at a preset time. When you go off-hook to answer, you will hear a special dial tone or prerecorded message.

To set

- **PT/SLT**

  - Off-hook. Enter #760.
  - Enter 0 for once or 1 for daily.
  - C.Tone
  - On-hook.

- **12 H**

  - Enter `0` AM or `1` PM

- **24 H**

  - Enter `0` for AM or `1` for PM.

- Enter **hour** (01–12) and **minute** (00–59) and then 0 for AM or 1 for PM.

- Or enter **hour** (00–23) and **minute** (00–59).

- Enter **760**.

- Enter **0**.

- C.Tone

- **PT/SLT**

- Off-hook.

- Enter #760.

- Enter 0.

- C.Tone

- On-hook.

- * Enter the time in the format assigned to your PBX (12-hour or 24-hour).
1.8 Setting the Telephone According to Your Needs

To stop or answer the ringback

<table>
<thead>
<tr>
<th>PT/SLT</th>
</tr>
</thead>
</table>

Press INTERCOM or off-hook.

To confirm

<table>
<thead>
<tr>
<th>PT</th>
</tr>
</thead>
</table>

Press TRANSFER several times.

- You can also confirm the Timed Reminder by using the soft button.
- The alarm keeps ringing for preprogrammed seconds.
- If you receive an incoming call during ringback, the ringing starts after the ringback stops.
- If you are having a conversation exceeding alarm ringing period, the ringback will start after your conversation.
1.8 Setting the Telephone According to Your Needs

1.8.2 Refusing Incoming Calls (Do Not Disturb [DND])

- Do Not Disturb (DND)
- Switching FWD/DND Status Using Fixed FWD/DND Button

◆◆ Do Not Disturb (DND)

You can set this feature to prevent incoming calls from ringing at your extension. This can be useful, for example, when you are in a meeting or busy.

To set/cancel

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-hook.</td>
</tr>
</tbody>
</table>

* When using a proprietary telephone, you can set or cancel Do Not Disturb by pressing the FWD/DND button (fixed button) instead of "*710".
• The FWD/DND button light shows the current status as follows:
  Off: Both features are not set.
  Red on: FWD mode
  Flashing red slowly: DND mode

• The system has two modes: (1) FWD/DND Cycle Switch Mode and (2) FWD/DND Setting Mode. Ask your manager what mode your system is in if you are not sure.

(1) When in FWD/DND Cycle Switch Mode:
Pressing the FWD/DND button (fixed button) while in idle status will cycle the setting as shown below:

[FWD] [DND] [Off]

(2) When in FWD/DND Setting Mode:
Pressing the FWD/DND button (fixed button) while in idle status allows you to switch the FWD/DND status and set the FWD destination (refer to “Switching FWD/DND Status Using Fixed FWD/DND Button”).

Note
A FWD/DND button (customised button) is always in FWD/DND Cycle Switch Mode: the mode cannot be changed.

• If your extension has set this feature, a calling extension will hear DND tone.
• If this feature is set, the Call Forwarding (FWD) feature does not work.
• Specified extensions can override this feature and call DND extensions (DND Override).
• When using a SIP Extension, you cannot set/cancel the DND feature at your extension. However, this feature is available if set through system programming.
• When making a call using an SDN button to a PDN extension with DND set, this feature will temporarily be deactivated.
• When intercom calls are set to be handled differently from outside calls (DND set/cancel), we recommend establishing buttons for both FWD/DND—Outside calls and FWD/DND—Intercom calls, because:
  a) the light patterns of the FWD/DND—Both calls button (including FWD/DND button [fixed button]) will indicate the setting for either outside calls or intercoms calls, but not both.

Note
The DND icon on PS display reflects the setting for outside calls only.

b) pressing the FWD/DND—Both calls button (including FWD/DND button [fixed button]) will not change the FWD or DND mode for intercom calls and outside calls separately.

Customising Your Phone
• 3.1.3 Customising the Buttons
  Create or edit FWD/DND (Both calls, Outside calls, Intercom calls) buttons.

Switching FWD/DND Status Using Fixed FWD/DND Button
Using a proprietary telephone (PT), you can easily switch the FWD/DND status for outside/intercom calls without clearing any FWD destination that was set previously.
1.8 Setting the Telephone According to Your Needs

To switch the FWD/DND status for outside calls

**PT**

*While on-hook (when in FWD/DND Setting Mode)*

- Press the fixed FWD/DND button.
- Enter 2.
- Press the fixed FWD/DND button again to switch the status.

The current FWD/DND status for outside calls is displayed.

To switch the FWD/DND status for intercom calls

**PT**

*While on-hook (when in FWD/DND Setting Mode)*

- Press the fixed FWD/DND button.
- Enter 2.
- Press the fixed FWD/DND button again to switch the status.

The current FWD/DND status for intercom calls is displayed.

To set and clear FWD/DND for outside/intercom calls

**PT**

*While on-hook (when in FWD/DND Setting Mode)*

- Press the fixed FWD/DND button.
- Enter 1 or 2.
- Press STORE.

FWD/DND off

DND on

Enter 0 or 1.

Press STORE to set.

A confirmation tone will be heard.

* This step can be omitted.
## 1.8 Setting the Telephone According to Your Needs

### 1.8.3 Receiving Call Waiting (Call Waiting/Off-hook Call Announcement [OHCA]/Whisper OHCA)

During a conversation, you can be informed of a call waiting with a tone or voice announcement through your built-in speaker or handset. (Default: Disable—No call [Intercom calls]/No tone [Outside calls])

**Call Waiting Tone:**
a waiting tone through the built-in speaker of PT/handset of SLT. To change the tone from PT, refer to "3.1.2 Settings on the Programming Mode".

**OHCA:**
a voice announcement through the built-in speaker

**Whisper OHCA:**
a voice announcement through the handset

**To set/cancel for intercom calls (Manual Call Waiting)**

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
<th>0</th>
<th>1</th>
<th>2</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-hook.</td>
<td>No call</td>
<td>Tone</td>
<td>OHCA</td>
<td>Whisper OHCA</td>
</tr>
<tr>
<td>Enter 731.</td>
<td>C.Tone</td>
<td>On-hook.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
<th>0</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-hook.</td>
<td>No tone</td>
<td>Tone</td>
</tr>
<tr>
<td>Enter 732.</td>
<td>C.Tone</td>
<td>On-hook.</td>
</tr>
</tbody>
</table>

To set/cancel for outside calls (Automatic Call Waiting)

- OHCA is only available with certain digital proprietary telephones.
- Whisper OHCA is only available with certain digital proprietary telephones and IP proprietary telephones. In addition, both you and the other party must use supported telephones.
1.8 Setting the Telephone According to Your Needs

1.8.4 Displaying Your Telephone Number on the Called Party and Caller's Telephone (Calling/Connected Line Identification Presentation [CLIP/COLP])

CLIP:
When making an outside call, you can present your preprogrammed telephone number to the called party.

COLP:
When receiving an outside call, you can present your preprogrammed telephone number to the calling party.

You can select the telephone number sent, either the number of the line used or the number assigned to your extension.
If you select "Public", the calling/called party sees the number of the line used (subscriber’s number).
If you select "Your extension", they see the telephone number assigned on your extension.

To show either the number assigned to the outside line or your extension

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>[phone]</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Off-hook.</td>
<td>Enter <strong>7</strong>2.</td>
<td>Enter 1 for public or 2 for your extension.</td>
<td>On-hook.</td>
</tr>
</tbody>
</table>

- Availability of this feature depends on the ISDN service of your telephone company.

- If you use the ICD Group button to make a call to the other party, the telephone number assigned to the ICD Group will be used.
1.8 Setting the Telephone According to Your Needs

1.8.5 Preventing Your Telephone Number Being Displayed on the Caller's Telephone (Connected Line Identification Restriction [COLR])

When receiving an outside call, you can select whether the caller can see your telephone number or not.

To show/prevent

You can change the mode by pressing a preset COLR button while on-hook. The COLR button light shows the current status as follows:

- **Off**: shows your telephone number.
- **Red on**: prevents your telephone number being displayed.

Availability of this feature depends on the ISDN service of your telephone company.

Customising Your Phone

- 3.1.3 Customising the Buttons
  Create or edit a Connected Line Identification Restriction (COLR) button.
1.8.6 Preventing Your Number Being Displayed on the Called Party's Telephone (Calling Line Identification Restriction [CLIR])

When making an outside call, you can select whether the called party can see your telephone number or not.

To show/prevent

- You can change the mode by pressing a preset CLIR button while on-hook.
  - The CLIR button light shows the current status as follows:
    - **Off**: shows your telephone number.
    - **Red on**: prevents your telephone number being displayed.
  - Availability of this feature depends on the ISDN service of your telephone company.

Customising Your Phone
- 3.1.3 Customising the Buttons
  - Create or edit a Calling Line Identification Restriction (CLIR) button.
1.8 Setting the Telephone According to Your Needs

1.8.7 Preventing Other People from Joining Your Conversation (Executive Busy Override Deny)

- Some extensions may be prohibited from performing this feature.
1.8.8 Turning on the Background Music (BGM)

You can listen to the background music through your telephone speaker while on-hook. An external music source, such as a radio, must be connected. If your extension becomes busy (off-hook, making or receiving a call etc.), the music stops temporarily. When you go back on-hook, the music starts again.

To select and set/cancel

<table>
<thead>
<tr>
<th>PT</th>
<th>BGM no.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-hook</td>
<td>Enter *751.</td>
</tr>
<tr>
<td>Enter BGM number</td>
<td>(1 digit) or 0 to cancel.</td>
</tr>
<tr>
<td>C.Tone</td>
<td>On-hook.</td>
</tr>
</tbody>
</table>

- System programming may be required for some IP-PT users to listen to background music.
1.8.9 Protecting Your Line against Notification Tones (Data Line Security)

You can protect the line against audible notification tones, such as a call waiting tone during a conversation. Set this feature if your extension has a data communication device, such as a computer or fax machine connected to ensure secure data transmission.

To set/cancel

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
<th>Off-hook.</th>
<th>Enter *730.</th>
<th>Enter 1 to set or 0 to cancel.</th>
<th>On-hook.</th>
</tr>
</thead>
</table>

Enter 1 to set or 0 to cancel.
1.8.10 Checking the Time Service Status

You can check the current status of the Time Service on the display.

- The Time Service (Day/Night/Lunch/Break) button light shows the current status as follows:
  - **Off**: Day mode
  - **Green on**: Lunch mode
  - **Flashing green**: Break mode
  - **Red on**: Night mode
  - **Flashing red**: Holiday mode
- Any extension user except the managers can check the current status by pressing the Time Service (Day/Night/Lunch/Break) button.

Customising Your Phone

- **3.1.3 Customising the Buttons**
  Create or edit a Time Service (Day/Night/Lunch/Break) button.
1.8.11 Setting the Parallelled Telephone to Ring (Parallelled Telephone)

In the case where a single line telephone is connected in parallel to your digital proprietary telephone, you can choose whether the parallelled single line telephone will ring to an incoming call or not. (Default: Ring)

Even if "No ring" is selected, calls can be made and answered on the single line telephone by lifting the handset.

If you go off-hook while your parallelled telephone is in use, the call will switch over to you.

This feature is not available for the KX-T7665.
1.8.12 Using Your PS in Parallel with a Wired Telephone (Wireless XDP Parallel Mode)

Your PS can be used in parallel with a PT or SLT. When in this mode, incoming calls to a wired telephone also ring the paired PS.

**To set**

<table>
<thead>
<tr>
<th>PS</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Phone icon] ➔ ⋅ 4 8 ➔ 1 ➔ ![Extension number] ➔ ⋅</td>
</tr>
<tr>
<td>Press TALK. Enter 48. Enter 1. Enter extension number of the paired telephone. Press CANCEL.</td>
</tr>
</tbody>
</table>

**To cancel**

<table>
<thead>
<tr>
<th>PS</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Phone icon] ➔ ⋅ 4 8 ➔ 0</td>
</tr>
<tr>
<td>Press TALK. Enter 48. Enter 0. Press CANCEL.</td>
</tr>
</tbody>
</table>

- Some wired telephones are prohibited from using this feature.
- If you go off-hook while your paralleled telephone is in use, the call will switch over to you.
1.8.13 Clearing Features Set at Your Extension (Extension Feature Clear)

You can reset the settings of the following features on your extension to the default settings with one operation.
This feature is also known as Station Programme Clear.

<table>
<thead>
<tr>
<th>Features</th>
<th>Default Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hot Line*</td>
<td>Off</td>
</tr>
<tr>
<td>Message Waiting—(All the messages that have been left by other extension users)</td>
<td>Off</td>
</tr>
<tr>
<td>Call Pickup Deny</td>
<td>Allow</td>
</tr>
<tr>
<td>Call Forwarding (FWD)*</td>
<td>Off</td>
</tr>
<tr>
<td>Absent Message</td>
<td>Off</td>
</tr>
<tr>
<td>Paging Deny</td>
<td>Allow</td>
</tr>
<tr>
<td>Timed Reminder</td>
<td>Cleared</td>
</tr>
<tr>
<td>Do Not Disturb (DND)*</td>
<td>Off</td>
</tr>
<tr>
<td>Call Waiting for intercom calls*</td>
<td>Disable (No call)</td>
</tr>
<tr>
<td>Call Waiting for outside calls*</td>
<td>Disable (No tone)</td>
</tr>
<tr>
<td>Executive Busy Override Deny</td>
<td>Allow</td>
</tr>
<tr>
<td>BGM</td>
<td>Off</td>
</tr>
<tr>
<td>Data Line Security</td>
<td>Off</td>
</tr>
<tr>
<td>Paralleled Telephone</td>
<td>The telephone in parallel rings.</td>
</tr>
<tr>
<td>Log-in/Log-out</td>
<td>Log-in</td>
</tr>
</tbody>
</table>

* These features may not be reset depending on the system programming.

For Users in Canada Only:
After performing Extension Feature Clear, the setting of Call Waiting becomes "Enable (Tone)". In this case, dial tone 2 will be heard when you go off-hook.
1.9 Utilising the Call Centre

1.9.1 Leaving an Incoming Call Distribution Group (Log-in/Log-out, Wrap-up)

You can control your status in an incoming call distribution group. When in the Log-out mode, incoming calls to the group will not ring at your extension. When you return, calls will again ring at your extension. (Default: Log-in)

Even if your extension is logged-in, you can have a specified time period (wrap-up time) when you will not receive calls after completing a previous call. This time can be used for you to write a report and so on.

You can also manually select "Not Ready" mode to temporarily leave a distribution group.

To set Log-in/Log-out

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
<th>ICD Group: Incoming Call Distribution Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>✈️</td>
<td>⋆736 ⋆</td>
</tr>
<tr>
<td>Off-hook.</td>
<td>Enter ⋆736.</td>
</tr>
<tr>
<td></td>
<td>Enter 0 or 1.</td>
</tr>
<tr>
<td>⋆736</td>
<td>Specified</td>
</tr>
<tr>
<td></td>
<td>C.Tone</td>
</tr>
<tr>
<td></td>
<td>ICD Group extension no.</td>

<tr>
<td></td>
<td>ICD Group extension number or ⋆.</td>
</tr>
<tr>
<td></td>
<td>On-hook.</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Enter ICD Group extension number or ⋆.
1.9 Utilising the Call Centre

**PT/PS**

**ICD Group: Incoming Call Distribution Group**

*While on-hook*

- Press Log-in/Log-out.
- Enter ICD Group extension number or *.

**PT/PS**

*While on-hook*

- Press Log-in/Log-out of a specified group.

---

**To enter/leave Not Ready mode**

**PT/SLT/PS**

*Off-hook. Enter *735. Enter 1 or 0. On-hook.*

**To set/cancel Not Ready mode or to leave Wrap-up mode (To enter Ready mode)**

**PT/PS**

*While on-hook*

- Press red or flashing red Wrap-up.*
1.9 Utilising the Call Centre

* The status will be as follows:
  Ready → Not Ready
  Not Ready → Ready
  Wrap-up → Not Ready

* The Log-in/Log-out of a specified group button light shows the current status as follows:
  Off: Log-in mode
  Red on: Log-out mode

* The Wrap-up button alternates the setting of Wrap-up mode, Not Ready mode or Ready mode.
  The Wrap-up button light shows the current status as follows:
  Off: Ready mode
  Red on: Not Ready mode
  Flashing red: Wrap-up mode

* In Wrap-up mode/Not Ready mode, your extension does not receive calls through any group, even if it belongs to multiple groups.
* The last remaining logged-in extension may not be allowed to log out, depending on system programming.
* The Supervisor extension can control the Log-in/Log-out status of other extensions.
  For more information, refer to "1.9.2 Monitoring and Controlling the Call Status of an Incoming Call Distribution Group (Incoming Call Distribution Group Monitor)".

Customising Your Phone

* 3.1.3 Customising the Buttons
  Create or edit a Log-in/Log-out button, a Log-in/Log-out of a specified group button or a Wrap-up button.
1.9 Utilising the Call Centre

1.9.2 Monitoring and Controlling the Call Status of an Incoming Call Distribution Group (Incoming Call Distribution Group Monitor)

- Monitoring the Status of Waiting Calls
- Monitoring and Changing the Log-in/Log-out Status of Extensions

The extension assigned as a Supervisor extension can monitor and control the status of other extensions in an incoming call distribution group. It should have a PT with 6-line display. The display and DSS buttons show as follows:

**Monitoring the Status of Waiting Calls**

The Supervisor extension can monitor the status of calls waiting to be answered in the queue. If an incoming call distribution group has an overflowed call, the display shows the status automatically.

The following information is displayed.

<Queuing Monitor>

- The current date/time
- The ICD Group extension number/name
- The number of waiting calls
- The longest waiting time

<Call Log History>

- The date/time when cleared at last time
- The total number of received calls
- The number of overflowed calls
- The number of unanswered calls
- The average waiting time of queuing calls
To monitor

**Display PT**

<table>
<thead>
<tr>
<th>Action</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-hook</td>
<td>Enter ★739.</td>
</tr>
<tr>
<td>Enter ICD Group extension no.</td>
<td>Enter ICD Group extension number.</td>
</tr>
<tr>
<td>On-hook</td>
<td></td>
</tr>
</tbody>
</table>

**ICD Group: Incoming Call Distribution Group**

To clear Call Log History

**Display PT**

- Press "LOG".
- Press "CLEAR".

- The accumulated data is cleared.
- "*****" shows if the number to be displayed exceeds the maximum displayable digits.

**Monitoring and Changing the Log-in/Log-out Status of Extensions**

The Supervisor extension can monitor the Log-in/Log-out status of the incoming call distribution group members by the DSS button light. It can also change their Log-in/Log-out status if needed.

To monitor

**Display PT**

- Press "SPRVS".

*After viewing the status of waiting calls*
1.9 Utilising the Call Centre

To change the Log-in /Log-out mode

<table>
<thead>
<tr>
<th>Display PT</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="DSS Button" /></td>
</tr>
</tbody>
</table>

Press desired DSS.

- The DSS button light shows the current status as follows:
  - **Off**: The extension is not in the group.
  - **Green on**: Log-in (Ready) mode
  - **Flashing green**: Log-in (Not Ready) mode
  - **Red on**: Log-out mode
1.9.3 Forwarding a Waiting Call (Manual Queue Redirection)

When your incoming call distribution group is busy and other outside calls arrive, the arriving calls are put in a waiting queue. Extensions can check the status of the queue with the Hurry-up button light, and forward the longest waiting call in the queue to a preset destination manually. This feature is also known as Hurry-up Transfer.

To forward the waiting call

- The Hurry-up button light shows the current status as follows:
  - Off: No waiting call.
  - Red on: Some calls are waiting.
  - Flashing red: The number of calls exceeds the manual queue redirection level.

Customising Your Phone
- 3.1.3 Customising the Buttons
  Create or edit a Hurry-up button.
1.10 Using User-supplied Equipment

1.10.1 If a Doorphone/Door Opener is Connected

You can talk to a person at the door through the doorphone. Preprogrammed extensions or an outside party can receive the calls from the doorphone. You can open the door.

- Doorphone Call
- Opening a Door (Door Open)

◮ Doorphone Call

To call from the doorphone

![Doorphone button](image)

- Press the doorphone button.

To answer a call from the doorphone

![Off-hook](image)

- Off-hook.

To call the doorphone

![Off-hook](image)

- Enter **31**.
- Enter the doorphone number (2 digits).

bullet If no one answers a doorphone call within a specified time period, the call is cancelled.
**Opening a Door (Door Open)**

Some extensions may be prohibited from using this feature.

**From a specified extension**

**PT/SLT/PS**

- Off-hook.
- Enter 55.
- Enter doorphone number (2 digits).
- C.Tone
- On-hook.

**From any extension while talking to the doorphone**

**PT/SLT/PS**

- Enter 5.
- C.Tone
- On-hook.

- The door open will be triggered for a specified time period.
1.10 Using User-supplied Equipment

1.10.2 If an External Relay is Connected

Preprogrammed extensions can switch on a relay (e.g., alarm) connected to the PBX.

To switch on the relay

![Diagram showing how to switch on the relay](PT/SLT/PS)

- Off-hook.
- Enter 56.
- Enter relay number (2 digits).
- On-hook.

* The relay will be switched off after a specified time period.
1.10.3 If an External Sensor is Connected

Preprogrammed extensions can receive an alert call from an external sensor (e.g., security alarm) connected to the PBX.

To answer a sensor call

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Off-hook" /></td>
</tr>
</tbody>
</table>

- If you do not answer a sensor call within a specified time period, the sensor call will stop.
1.10.4 If a Host PBX is Connected

- Accessing External Services (External Feature Access [EFA])

**Accessing External Services (External Feature Access [EFA])**

You can access special features (e.g., Call Waiting) offered by a host PBX or telephone company. This feature is only effective for an outside call.

**Example** To hold the current call and then talk to the new party

- **PT/PS**
  - **While hearing a tone**
  - Press FLASH/RECALL or EFA. Or press TRANSFER and then enter 60.
  - Enter desired service code.

- **SLT**
  - **While hearing a tone**
  - Press Recall/hookswitch.
  - Enter 60.
  - Enter desired service code.

- **Customising Your Phone**
  - 3.1.3 Customising the Buttons
    - Create or edit an External Feature Access (EFA) button.
1.10.5 If a Voice Processing System is Connected

You or an outside party can access the Voice Processing System from a telephone.
- Call Forwarding to Voice Mail (Voice Mail Integration)
If your PBX has a Panasonic Voice Processing System connected (e.g., KX-TVP/KX-TV series) using
digital integration, the following features are also available:
- Screening Calls (Live Call Screening [LCS])
- Recording a Conversation
  - Voice Processing System features are not available for SIP Extension users.

*Call Forwarding to Voice Mail (Voice Mail Integration)*
- To forward your calls to your mailbox
- To transfer a call to a mailbox
- To listen to messages
If you cannot answer calls, you can forward them to your mailbox. You can select the type of incoming calls
(Intercom Calls/Outside Calls/Both Calls) that are forwarded.
If your telephone has a Message button, the Message light turns on when a message is left in your mailbox.
You will hear an indication tone* when going off-hook, regardless of whether or not your telephone has a
Message button.
You can also create a Voice Mail Transfer button on your phone to transfer received outside calls to a mailbox
of another extension so that calling parties can leave messages (Voice Mail Transfer).
The duration for recording depends on the Voice Processing System.

To forward your calls to your mailbox

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Diagram" /></td>
</tr>
<tr>
<td>Off-hook. Enter *71. Enter 0 to 2 as you desire. Enter required number.</td>
</tr>
<tr>
<td>For &quot;Cancel&quot;, go on-hook directly after entering 0.</td>
</tr>
</tbody>
</table>

voice mail floating extension no. Enter #. On-hook.
To transfer a call to a mailbox

**PT/PS**

During a conversation

Press Voice Mail Transfer. Press DSS or dial desired extension number.

To listen to messages

**PT/SLT/PS**

Off-hook. Press MESSAGE or enter voice mail floating extension number.

- *Indication tone after going off-hook

  ![Indication tone]

  1 s

  .......¶¶...¶¶;

- You can access a voice mail with one touch.

- The default voice mail floating extension number is 500.

Customising Your Phone

- 3.1.3 Customising the Buttons
  Create or edit a Voice Mail Transfer button or a Message button.
Screening Calls (Live Call Screening [LCS])

While a caller is leaving a message in your mailbox, you can monitor the call without answering. If you so desire, you can answer the call while monitoring. There are two methods available (Default: Hands-free mode).

**Hands-free mode:**
You can monitor the message automatically, live through the telephone speaker.

**Private mode:**
You will hear an alarm tone while the caller is leaving a message.

**Before operating**
- Create a Live Call Screening (LCS) button (Personal Programming).
- Select the mode, either Hands-free or Private (Personal Programming).
- Set the extension PIN (Personal Identification Number).
- Set the Live Call Screening feature.

**To set Live Call Screening**

<table>
<thead>
<tr>
<th>PT/PS</th>
<th>PIN: Personal Identification Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Live Call Screening](Live Call Screening)</td>
<td>![extension PIN](extension PIN)</td>
</tr>
</tbody>
</table>

Press Live Call Screening.

Enter **extension PIN** (max. 10 digits).

This is required only when an extension PIN is stored.

**To cancel Live Call Screening**

<table>
<thead>
<tr>
<th>PT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Live Call Screening](Live Call Screening)</td>
</tr>
</tbody>
</table>

Press red Live Call Screening.
1.10 Using User-supplied Equipment

Operation Flowchart

The operations in the shaded areas can be done hands-free.

The Live Call Screening (LCS) button light shows the feature status as follows:

- **Off**: LCS is off.
- **Flashing green rapidly**: Alerting in the Private mode.
- **Flashing green slowly**: Monitoring.
- **Red on**: LCS is on.

- The manager extension can clear an extension PIN.
- This feature is available for a single line telephone if it is connected to a proprietary telephone in parallel. (Private mode only)
  - To answer the call while monitoring, press Recall/hookswitch.
  - Only the handset monitoring in the Private mode is available for PS users.

Customising Your Phone

- 3.1.2 Settings on the Programming Mode—Live Call Screening Mode Set
  - Select the mode, either monitoring the message through the speaker automatically or receiving, while the caller leaves a message.
- 3.1.3 Customising the Buttons
  - Create or edit a Live Call Screening (LCS) button.
Recording a Conversation

You can record a conversation into a mailbox while talking on the phone. You can select the mailbox each time you record a conversation.

To record into your mailbox (Two-way Record)

Press Two-way Record.

During a conversation

To stop recording, press this button again.

To record into another mailbox (Two-way Transfer)

Press Two-way Transfer.

During a conversation

Press DSS or enter another extension number.

To stop recording, press this button again.

To record into another mailbox with one touch (One-touch Two-way Transfer)

Press One-touch Two-way Transfer.

- The Two-way Record button light, Two-way Transfer button light or One-touch Two-way Transfer button light shows the current status as follows:
  - Off: Not recording.
  - On: Recording the conversation.
• **Note:**
  When you record your Two-way telephone conversations, you should inform the other party that the conversation is being recorded.

**Customising Your Phone**

• 3.1.3 Customising the Buttons
  Create or edit a Two-way Record button, a Two-way Transfer button and a One-touch Two-way Transfer button.
1.11 Administrative Features

1.11.1 Using the Telephones in a Hotel-type Environment (Hospitality Features)

In a hotel-type environment, an extension assigned as a hotel operator can be used to view and set the check-in/check-out status of each guest room extension. When the hotel operator presses a flexible button assigned as "Check-in" or "Check-out" on his extension, the extension will switch to Room Status Control mode, and the light of the DSS button for each room extension will show the current room status. This allows the hotel operator to manage guests and rooms with just a telephone. In addition, the hotel operator can set automatic wake-up calls for guest rooms.

- Check-in
- Check-out
- Setting a Timed Reminder to a Room Extension (Remote Wake-up Call)

- The hotel operator must be using a 6-line display PT to use the Check-in and Check-out features.
- While in Room Status Control mode:
  a. The hotel operator's extension can only check extensions in or out. All other operations will be ignored.
  b. The light of each DSS button shows the room status of the corresponding extension as follows:
     Off: Check-out
     Red on: Check-in
  c. The lights of other buttons may not show their normal display.
  d. The hotel operator's extension is considered to be busy. Callers to that extension will hear a busy tone.

**Check-in**

The hotel operator can change the room status of extensions to check-in by using the Check-in button assigned on his extension.

To check in

<table>
<thead>
<tr>
<th>Display PT</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>While on-hook</strong></td>
</tr>
<tr>
<td>Press Check-in.</td>
</tr>
<tr>
<td>Dial extension number and then press &quot;ENTER&quot;, or press desired DSS.</td>
</tr>
<tr>
<td>Press &quot;YES&quot;.</td>
</tr>
<tr>
<td>Press &quot;EXIT&quot; or Check-in.</td>
</tr>
</tbody>
</table>
After check-in, Remote Extension Dial Lock is deactivated, and the guest can make outside calls from the room extension. (Refer to "2.1.1 Extension Control").

- After check-in, all billing data previously charged to the extension will be cleared automatically.
- When the room status of extensions is changed, detailed room status information is recorded automatically. This requires system programming.

<Example>

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>Ext</th>
<th>CO</th>
<th>Dial Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>02/02/00</td>
<td>03:07PM</td>
<td>1234</td>
<td></td>
<td>Check in</td>
</tr>
</tbody>
</table>

**Check-out**

The hotel operator can change the room status of extensions to check-out by using the Check-out button assigned on his extension. Depending on the setting of the PBX, the hotel operator can do the following:

- Record/edit charges for Minibar/Others
- Print out an invoice containing charge information

**To check out a room with/without printing an invoice**

**Display PT**

**While on-hook**

- Press Check-out.
- Dial extension number and then press "ENTER", or press desired DSS.
- Press "YES".
- Press "EXIT" or Check-out.

**To check out with an invoice**

- Press "PRINT". Press "NEXT".
- Press "NEXT".

**To check out without an invoice**

- Press "NEXT".
To record/edit room charges and check out a room with/without printing an invoice

Display PT

While on-hook

Press Check-out. Dial extension number and then press “ENTER”, or press desired DSS.

Enter minibar charge. Press Down.

To check out with an invoice

Press “PRINT”. Press “NEXT”.

To check out without an invoice

Press “NEXT”.

Press “EXIT” or Check-out.
1.11 Administrative Features

- After check-out, Remote Extension Dial Lock is activated, and outside calls from the room extension are restricted. (Refer to "2.1.1 Extension Control").
- After check-out, wake-up call and Call Log information for the room extension are cleared automatically. In addition, features set on the room extension are reset to the default settings. For a list of features that are reset, refer to "1.8.13 Clearing Features Set at Your Extension (Extension Feature Clear)".
- When the room status of extensions is changed, detailed room status information is recorded automatically. This requires system programming.

<Example>

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>Ext</th>
<th>CO</th>
<th>Dial Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>02/03/00</td>
<td>08:08AM</td>
<td>1234</td>
<td></td>
<td>Check out</td>
</tr>
</tbody>
</table>

- To print out an invoice, a printer should be connected to the PBX. If the room extension is in use, an invoice cannot be printed out.

<Example>

```
**************************************************
*                                    Hotel    *
**************************************************
Check in     : 01.JAN.00 06:31PM
Check out   : 03.JAN.00 07:03AM

```

- The PBX can store a limited amount of room information. When this storage becomes almost full, the information of the extension that made the most calls is printed out automatically. In this case, the printout is similar to the example above, but without categorised charge information and the total. The PBX can then store new room information.

"Call amount:0012" in the example above indicates that the information of 12 phone calls has previously been printed out automatically.

Customising Your Phone

- 3.1.3 Customising the Buttons
  Create or edit a Check-in or a Check-out button.
Setting a Timed Reminder to a Room Extension (Remote Wake-up Call)

The hotel operator can remotely set or cancel a Timed Reminder to a room extension. This allows guests to request wake-up calls without having to program the extension themselves. The hotel operator can also confirm the current Timed Reminder setting for a room extension.

To set

1. Enter the time in the format assigned to your PBX (12-hour or 24-hour).
2. Enter 76.
3. Enter the extension number or press desired DSS.
4. Enter 1.
5. Enter 0 for once or 1 for daily.
6. Enter hour (01–12) and minute (00–59) and then 0 for AM or 1 for PM.
7. Or enter hour (00–23) and minute (00–59).
8. C.Tone

* Enter the time in the format assigned to your PBX (12-hour or 24-hour).

To cancel

1. Enter 76.
2. Enter 0.
3. Enter the extension number or press desired DSS.
4. C.Tone
5. On-hook.
To confirm

Timed Reminder can also be set from the room extension. (For information about setting Timed Reminder, refer to “1.8.1 Setting the Alarm (Timed Reminder)”). The most recent setting will be valid no matter which extension made the setting.

When a Timed Reminder starts, and when it is answered or not answered, detailed Timed Reminder information is recorded automatically. This requires system programming.

<Example>

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>Ext</th>
<th>CO</th>
<th>Dial Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>02/02/00</td>
<td>02:45PM</td>
<td>1234</td>
<td></td>
<td>Timed Reminder/Start</td>
</tr>
<tr>
<td>02/02/00</td>
<td>02:46PM</td>
<td>1234</td>
<td></td>
<td>Timed Reminder/No Answer</td>
</tr>
<tr>
<td>02/02/00</td>
<td>02:47PM</td>
<td>1234</td>
<td></td>
<td>Timed Reminder/Answer</td>
</tr>
</tbody>
</table>

Users of PTs without displays can confirm only whether a Timed Reminder has been set or not by following the steps shown above. If set, a confirmation tone will be heard.
1.11.2 Recording Information Using Preprogrammed Messages (Printing Message)

You can record a variety of information from your extension using up to 8 preprogrammed messages. Message information from all extensions is recorded with the PBX. For example, it is possible to use this feature as a time card by selecting preprogrammed "sign in" and "sign out" messages. In a hotel-type environment, this feature can be used to record room information from a room extension. For a list of preprogrammed messages, consult your dealer.

To record

* Depending on the content of the selected message, you may be required to enter a numeric parameter, such as a price or time. Enter the correct number of characters as required for the message. For information about required parameters, consult your dealer.

<Example>
If "Snack %%.%%" has been programmed as message number 1 (for recording charges for room snacks consumed), hotel employees would enter data as in the example below using the room extension:

```
* 761 1 0300 #
```

- message no. parameter (Snack charge)

- When a preprogrammed message is selected, detailed information is recorded automatically, as shown below:

```
Date Time Ext CO Dial Number
02/02/00 10:45AM 1234 Snack 03.00
```

- Any charges recorded here are not related to charges that the hotel operator records when checking out a room.
1.12 Exchanging the Settings between Extensions

1.12.1 Walking Extension

You can exchange the settings set at another extension with your own settings. This allows you to use your own settings, including your extension number, on another person’s extension. Settings such as extension number and One-touch Dialling memory are available at the new extension. It is also possible to exchange the DSS Console settings along with the extension settings. Walking Extension is useful, for example, when you move to a new location in the office. This feature is also known as Walking Station.

To exchange your settings with another extension

**PT/SLT**

<table>
<thead>
<tr>
<th>PIN: Personal Identification Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>✉️ 7 2 7</td>
</tr>
<tr>
<td>D.Tone extending PIN</td>
</tr>
<tr>
<td>On-hook.</td>
</tr>
</tbody>
</table>

- An extension personal identification number (PIN) is required to use this feature. Refer to “Assigning an Extension PIN to Your Extension (Extension PIN [Personal Identification Number])” in "3.1.1 Customising Your Phone (Personal Programming)".
- Your previous extension will receive the old settings of your new extension.
- Extension settings can be exchanged between SLT and SLT, PT and PT, or SLT and PT.
- If you are using a KX-NT300 series telephone with a Bluetooth wireless headset, and exchange the settings with another KX-NT300 series telephone user, you cannot use your Bluetooth wireless headset at the other extension.

Bluetooth wireless headsets are registered on extensions themselves. Therefore, you have to register a Bluetooth wireless headset on each desired extension. For details about registration, refer to "Bluetooth Registration" in "3.1.2 Settings on the Programming Mode".
1.12.2 Enhanced Walking Extension

In addition to exchanging the settings between extensions (Walking Extension), you can change the status of your extension to “Service-in” or “Service-out” (Enhanced Walking Extension).

- **Service-in**: An extension is in use (normal status).
- **Service-out**: Extension Dial Lock (→ 1.6.4 Preventing Other People from Using Your Telephone (Extension Dial Lock)) and Do Not Disturb (DND) (→ 1.8.2 Refusing Incoming Calls (Do Not Disturb [DND])) are activated on an extension, and the extension user cannot make unauthorised outside calls nor receive calls.

This feature is useful when:

- **a)** one person uses the same extension settings at different locations, such as another branch office or at home
- **b)** two or more people use the same telephone in turn

**<Example (a)> When using extension settings at a different location**

In this example, extension user A sets his/her own extension status to “Service-out” at the main office. Then, he/she can set another extension status to “Service-in” at the branch office to have his/her own extension settings available at the extension.
1.12 Exchanging the Settings between Extensions

<Example (b)> When two users share one telephone

In this example, extension users A and B work in shifts and use the same extension in turn. User A sets the extension status to "Service-out" when he/she finishes work. Then, user B can set the extension status to "Service-in" and have his/her own settings available at the extension.

To set an extension to Service-out status

PT/SLT

<table>
<thead>
<tr>
<th>Off-hook.</th>
<th>Enter *727.</th>
<th>Enter #.</th>
<th>On-hook.</th>
</tr>
</thead>
</table>

To set an extension to Service-in status and have your own settings available

PT/SLT

PIN: Personal Identification Number

<table>
<thead>
<tr>
<th>Off-hook.</th>
<th>Enter *727.</th>
<th>Enter *.</th>
<th>Dial your extension number.</th>
</tr>
</thead>
</table>

Enter extension PIN (max. 10 digits).

- An extension personal identification number (PIN) is required to use this feature. Refer to "Assigning an Extension PIN to Your Extension (Extension PIN [Personal Identification Number])" in "3.1.1 Customising Your Phone (Personal Programming)".
- Extension settings can be exchanged between SLT and SLT, PT and PT, or SLT and PT.
1.13 Using a Display Proprietary Telephone

1.13.1 Using the Call Log

This is available for display proprietary telephones and portable stations.

- Calling with the Incoming Call Log
- Calling with the Outgoing Call Log

**Calling with the Incoming Call Log**

When you receive an outside call or an external sensor call, call information is recorded automatically in the incoming call log. A preprogrammed number of calls can be logged per extension. When the call log is full and other call arrives, the oldest call is deleted. You can modify the logged telephone number. When the Call Log button light turns on, there is a call which you did not answer. The following information is logged.

- Caller's Name
- Date/Time call received
- Answered or Not Answered
- Confirmed or Not Confirmed
- Caller's Phone Number

To confirm the log information with the Call Log button

![Display PT](Image)

While on-hook

Press Call Log until desired party appears.

To confirm the log information with the Navigator Key

![NT300/T7600](Image)

While on-hook

Press Left twice. Press Up or Down until desired party appears.
1.13 Using a Display Proprietary Telephone

To clear the log information

Display PT

While confirming the log information

Press Call Log, or Up or Down until desired party appears.

To call

Display PT

While confirming the log information

Press Call Log, or Up or Down until desired party appears.

Off-hook.

To store the caller's information in personal speed dialling

Display PT

While confirming the log information

Press Call Log, or Up or Down until desired party appears.

Press STORE.
1.13 Using a Display Proprietary Telephone

- The Call Log button light shows the current status as follows:
  **Off**: No incoming call. Or you have already viewed the call log.
  **Red on**: You have missed calls to view.
- If your call is answered by another extension, the caller's information is recorded on the displays of both your extension and the answering extension.
- You can lock your call log display by using an extension PIN (Personal Identification Number), so that you can prohibit access to your logged information (Display Lock). Refer to "3.1.2 Settings on the Programming Mode".
- You can also have a Call Log button for an ICD Group (Incoming Call Distribution Group).
- If a call arrives while you are using the call log, the call log display will be replaced with the caller's information.

### Customising Your Phone

3.1.3 Customising the Buttons
Create or edit a Call Log button or Call Log for ICD Group button.

#### Calling with the Outgoing Call Log

You can redial using the outgoing call log.

**To call**

**NT300/T7600**

**While on-hook**

Press Left. Press **Up** or **Down** until desired number appears. Off-hook.

**To call with the REDIAL button**

**Display PT**

**While on-hook**

Press **REDIAL** to display the outgoing call log.* Press **REDIAL** until desired number appears. Off-hook.

- * System programming is required for this operation.
- This operation is available only for digital proprietary telephones with a display.
To store the caller's information in personal speed dialling

Display PT

When the desired party is displayed

AUTO DIAL

STORE

Press STORE.

- You can lock your call log display by using an extension PIN (Personal Identification Number), so that you can prohibit access to your logged information (Display Lock). Refer to "3.1.2 Settings on the Programming Mode".
- If a call arrives while you are using the call log, the call log display will be replaced with the caller's information.
1.13.2 Using the Directories

You can call using the directories (Personal Speed Dialling Directory, System Speed Dialling Directory and Extension Number Directory).

Only personal directories can be stored, edited or deleted on your extension.

If a call arrives while you are using a directory, the display will be replaced with the caller’s information.

- Calling with the Directory
- Storing Names and Numbers
- Entering Characters

<tr>
<td>Press Right until desired directory appears.*</td>
</tr>
<tr>
<td>Press Up or Down until desired party appears.</td>
</tr>
<tr>
<td>Off-hook.</td>
</tr>
</tbody>
</table>

- * The display order is as follows:
  One time: Personal Speed Dialling Directory
  Two times: System Speed Dialling Directory
  Three times: Extension Number Directory

- To cancel or exit, press the CANCEL or FLASH/RECALL button.

- You can lock your personal speed dialling directory by using an extension PIN (Personal Identification Number), so that you can prohibit access to it (Display Lock). Refer to “3.1.2 Settings on the Programming Mode”.

- Directory entries generally should include name and number. If the name is not registered, an entry cannot be displayed.

- The System Speed Dialling Directory can be displayed simply by pressing the AUTO DIAL/STORE button while on-hook.
Storing Names and Numbers

To store a Personal Speed Dialling Directory item

Telephone numbers and names displayed are stored using the first spare Personal Speed Dialling memory available.

PS user: Refer to "Operating Instructions" for PS.

For more details, refer to "To store the names and numbers in personal speed dialling" in "3.1.2 Settings on the Programming Mode".
### Entering Characters

You can enter the following characters. The tables show you the characters available for each button. Table 1 or Table 2 can be programmed.

1.14 Using an IP Proprietary Telephone

1.14.1 Self Labelling (KX-NT366 only)

The KX-NT366 IP-PT has 12 flexible buttons, and a display for each button to show what feature, telephone number or extension number is assigned to it. The display can also be switched to show 3 other sets (Pages) of 12 flexible buttons assignment by pressing the PAGE key. Different features, telephone numbers or extension numbers can be assigned to each button in every set. This means that 48 flexible buttons are available to an extension user.

To switch display

- When you answer an incoming call or when you seize an outside line, the display automatically changes to the page that contains the green lit button.
- After customising each button, you can set the displayed text for the button. For details about customising buttons, refer to "3.1.3 Customising the Buttons".
Section 2

Manager Operation

This chapter shows the manager how to control the other extensions or the PBX.
2.1 Control Features

2.1.1 Extension Control

The manager extension can control the settings of other extensions.

- Changing the Settings of Other Extensions

**Changing the Settings of Other Extensions**

To lock/unlock other extensions (Remote Extension Dial Lock)

This feature is also known as Remote Station Lock Control.

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Phone Icon" /> <img src="image2" alt="Star Icon" /> 7 8 <img src="image3" alt="Unlock Icon" /> 2 <img src="image4" alt="Lock Icon" /> 3 <img src="image5" alt="Extension No. Icon" /> <img src="image6" alt="C.Tone Icon" /> <img src="image7" alt="Phone Icon" /></td>
</tr>
</tbody>
</table>

- Off-hook. Enter **78**. Enter 2 to unlock or 3 to lock. Enter extension number. On-hook.

- The manager can use Remote Extension Dial Lock to unlock any extension, whether that extension was locked remotely (Remote Extension Dial Lock) or from the extension itself (Extension Dial Lock).
2.1.2 Time Service Mode Control

The manager extension or the preprogrammed extension can change the time mode (Day, Lunch, Break or Night).

There are two methods (Automatic or Manual) of changing the time modes.

**Automatic:** enables the time mode for each day of the week to change automatically. You may also change it manually.

**Manual:** enables to change a mode in manual as follows.

---

**To change the time mode (Day/Night/Lunch/Break)**

**PT/PS**

While on-hook

- Press **Time Service (Day/Night/Lunch/Break)**

Press **Time Service (Day/Night/Lunch/Break)** until the desired mode appears.

**PT/SLT/PS**

Off-hook.

Enter **#780**.

Enter 0 to 3 as you desire.

On-hook.

**To select the time service switching mode (Automatic/Manual)**

**PT/PS**

While on-hook

- Press **Time Service Switching Mode (Automatic/Manual)**

Press **Time Service Switching Mode (Automatic/Manual)**.
2.1 Control Features

• Besides the time mode, there is Holiday mode. It can change mode once on a specified date.
• The Time Service (Day/Night/Lunch/Break) button light shows the current status as follows:
  **Off:** Day mode
  **Green on:** Lunch mode
  **Flashing green:** Break mode
  **Red on:** Night mode
  **Flashing red:** Holiday mode
• The Time Service Switching Mode (Automatic/Manual) button light shows the current status as follows:
  **Off:** Automatic
  **Red on:** Manual

Customising Your Phone
• 3.1.3 Customising the Buttons
  Create or edit a Time Service (Day/Night/Lunch/Break) button or a Time Service Switching Mode (Automatic/Manual) button.
2.1.3 Restriction Level Control (Dial Tone Transfer)

The manager extension can change the restriction level, permitting an extension to make a call.

The restriction level is changed to the preprogrammed level of Toll Restriction/Call Barring button.

Customising Your Phone

- 3.1.3 Customising the Buttons
  Create or edit a Toll Restriction/Call Barring button.
2.1 Control Features

2.1.4 Turning on the External Background Music (BGM)

The manager extension can select and broadcast background music in the office through external speakers.

To select and start/stop the background music

<table>
<thead>
<tr>
<th>Off-hook</th>
<th>Enter *35.</th>
<th>Enter external pager number (1 digit) or * for all.</th>
<th>Enter BGM number (1 digit) or 0 to stop.</th>
<th>C.Tone</th>
<th>On-hook</th>
</tr>
</thead>
</table>

PT/SLT/PS
2.1 Control Features

2.1.5 Recording Outgoing Messages (OGM)

The manager extension can record three kinds of greeting messages (OGM) as follows:

1. **DISA message**: Used to greet and guide callers so that they access an extension user group or outside party without operator assistance.
2. **Incoming Call Distribution Group message**: Used to greet and guide callers to an incoming call distribution group.
3. **Timed Reminder message**: Used for a wake-up call message when the extension answers the Timed Reminder.

All messages have their own extension numbers. You can select the desired message. You have two methods for recording a message. One is recorded using the handset, and the other is recorded from an external BGM (MOH) port.

**To record**

1. **OFF-HOOK**
2. **Enter** 36.
3. **Enter 1.**
4. **Enter OGM floating extension no.**
5. **Enter** OGM floating extension number.
6. **Record message.**
7. **Press** STORE.

The message is played back.

When the time limit passes, it stops automatically.

**To play back**

1. **OFF-HOOK**
2. **Enter** 36.
3. **Enter 2.**
4. **Enter OGM floating extension no.**
5. **Enter OGM floating extension number.**
6. **On-hook.**
7. **The message is played back.**
2.1 Control Features

To record from an external BGM (MOH) port

**PT**

- Off-hook.
- Enter \*36.
- Enter 3.
- Enter BGM port number (1 digit).
- Enter OGM floating extension number.
- Press CONF.
- You hear the message.
- C.Tone
- The message is recorded.
- Press STORE.
- The message is played back.
- When the time limit passes, it stops automatically.
- On-hook.

To clear the message

**PT**

- Off-hook.
- Enter \*36.
- Enter 0.
- Enter OGM floating extension number.
- Press CONF.
- On-hook.

- Record voice messages only; avoid the recording of music.

- The default of OGM floating extension numbers is 5xx (xx: two-digit number of message).
2.1.6 Allowing Users to Seize an Unavailable Outside Line (Trunk Busy Out)

When a problem is found on a certain outside line, the PBX automatically makes it unavailable for use temporarily. The manager can manually enable the outside line and allow users to use it again.

To re-enable an outside line

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
</tr>
</thead>
</table>

- Off-hook.
- Enter *785.
- Enter outside line number (3 digits).

- In some countries/areas, the PBX may not be able to automatically make a faulty outside line unavailable for use.
2.1 Control Features

2.1.7 Releasing Network Direct Station Selection (NDSS) Monitor

NDSS buttons can be customised on any extension connected to your PBX. An NDSS button allows an extension user to monitor another extension connected to another PBX in a private network. The NDSS button light shows the current status of the monitored extension in the same way as a DSS button. When it becomes unnecessary to monitor an extension connected to another PBX, the manager can stop the PBX from monitoring it. Any NDSS buttons set to monitor that extension will also stop monitoring.

To restart monitoring of an extension after performing this operation, go off-hook, press the corresponding NDSS button, and go on-hook.

Customising Your Phone

- 3.1.3 Customising the Buttons
  Create or edit a Network Direct Station Selection (NDSS) button.
Section 3

Customising Your Phone & System

This chapter shows you how to customise your individual telephone or PBX according to your needs. Find the desired setting and program as necessary.
3.1 Customising Your Phone (Personal Programming)

3.1.1 Customising Your Phone (Personal Programming)

You can customise your telephone features. For example, you can change the initial settings or button features according to your needs.

- **Assigning an Extension PIN to Your Extension (Extension PIN [Personal Identification Number])**
  
  If you change your desk and extension, refer to "1.12.1 Walking Extension".

**Assigning an Extension PIN to Your Extension (Extension PIN [Personal Identification Number])**

You can assign a password to each extension. The following features require an extension PIN.

1. Screening calls (Live Call Screening [LCS])
2. Prohibiting other people from seeing your personal speed diailling directory, call log, SVM log, and from playing back the voice messages in your message box (Display Lock)
3. Using the same settings as your extension at other extensions (Walking Extension)
4. Remote Control Operation (Walking COS)
5. Extension Dial Lock Clear

To set

<table>
<thead>
<tr>
<th>PT/SLT/PS</th>
<th>PIN: Personal Identification Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>🔷 Enter 799. 🔷 Enter 1. 🔷 Enter extension PIN (max. 10 digits).</td>
<td></td>
</tr>
<tr>
<td>Enter #. 🔷 Enter same extension PIN (max. 10 digits). Enter #. C:Tone</td>
<td>On-hook.</td>
</tr>
</tbody>
</table>
To cancel

**WARNING**
There is a risk that fraudulent telephone calls will be made if a third party discovers your password (extension PIN).
The cost of such calls will be billed to the owner/renter of the PBX.
To protect the PBX from this kind of fraudulent use, we strongly recommend:

a) Keeping your PIN secret.

b) Selecting a complex, random PIN that cannot be easily guessed.

c) Changing your PIN regularly.

- Valid numbers for an extension PIN are "0" through "9".
- If the wrong extension PIN is entered a preprogrammed number of times, the PIN is locked.
- If you forget your extension PIN or your extension PIN is locked, your manager can clear the extension PIN and extension PIN lock.
3.1 Customising Your Phone (Personal Programming)

3.1.2 Settings on the Programming Mode

You can programme features using the programming mode.

- Setting Features
- Clearing Features

- To exit at any time, lift the handset.
- To enter the programming mode when using a PS, refer to "Operating Instructions" for PS.

**Setting Features**

The default settings are shown in bold letters. For later reference, place a check mark in the boxes below to indicate your customised setting.

**Notice**

The default value may vary depending on country/area.

<table>
<thead>

<tr>
<td></td>
<td><strong>1</strong></td>
<td>□ <strong>Yes</strong>—Only One-touch dialling buttons can be modified. However, to modify them, there is no need to enter &quot;2&quot; before the number.</td>
</tr>
</tbody>
</table>

*1: Not available for a PS  
*2: CO button numbers (25–36) are available only when the Add-on Key Module is set up to your telephone.  
*3: CO button numbers (25–84) are available only when the Add-on 60 Key Module (KX-NT305) is set up on the KX-NT300 series telephone (not available for the KX-NT366).  
*4: Not available for the KX-T7665  
*5: This setting applies to both outside and intercom calls. For intercom calls, this feature must be enabled through system programming.  
*6: Only available for certain digital proprietary telephones.  
*7: Registering and cancelling a Bluetooth wireless headset may take time. Please avoid any interruption during that time by, for example, going off-hook.

---

**WARNING**

There is a risk that fraudulent telephone calls will be made if a third party discovers your password (extension PIN). The cost of such calls will be billed to the owner/renter of the PBX. To protect the PBX from this kind of fraudulent use, we strongly recommend:

a) Keeping your PIN secret.
b) Selecting a complex, random PIN that cannot be easily guessed.
c) Changing your PIN regularly.

- After the programme number is entered, the programme title is displayed. The programming screen can be changed with the Navigator Key (Up or Down).
- You can select the parameter with the Navigator Key (Up or Down) instead of entering a number.
3.1 Customising Your Phone (Personal Programming)

To store the names and numbers in personal speed dialling

- Press **PROGRAM** or **PAUSE**.
- Enter **10** and then press **ENTER**. Or press **STORE**.
- Enter personal speed dialling number (2 digits).

- Enter phone number (max. 32 digits).
- Press **ENTER** or **STORE**.

- Enter name* (max. 20 characters).
- Press **ENTER** or **STORE**.

- Press **PROGRAM** or **PAUSE**.

* To enter characters, refer to “Entering Characters”.

![Diagram showing the process of storing names and numbers in personal speed dialling](image-url)
To edit the names and numbers of personal speed dialling

<table>
<thead>
<tr>
<th>Press PROGRAM or PAUSE.</th>
<th>Enter 10 and then press ENTER. Or press STORE.</th>
<th>Enter personal speed dialling number (2 digits).</th>
</tr>
</thead>
</table>

- **To erase a number or character:**
  - Press Left or Right to select a desired part.
  - Press "CLEAR".

- **To insert a number or character:**
  - Press Left or Right to select a desired part.
  - Enter a number or character.
  - It will be inserted in front of the selected part.

Press ENTER or STORE.
### Clearing Features

3.1 Customising Your Phone (Personal Programming)

To set

- If you do not desire that the Call Waiting, FWD/DND or Hot Line to be cleared by this feature, please ask your dealer.
3.1 Customising Your Phone (Personal Programming)

3.1.3 Customising the Buttons

You can customise the flexible buttons and/or programmable feature (PF) buttons on PTs, Add-on Key Modules, and PSs. They can then be used to make or receive outside calls or as feature buttons.

- To enter the programming mode when using a PS, refer to "Operating Instructions" for PS.
- The buttons in the table below can only be set on certain flexible buttons, as follows:
  - Flexible buttons on PTs/Add-on Key Modules/PSs: all buttons can be set.
  - Flexible buttons on DSS Consoles: all buttons except CTI and Primary Directory Number (PDN) buttons can be set.
  - Programmable feature (PF) buttons: only the One-touch Dialling button can be set.

<td>1234567</td>
</tr>
</tbody>
</table>

• *2 For a PF button, "2" is not required to enter before the desired number.
• *3 Depending on the settings of your PBX, you may be required to enter delayed ringing time (0: Immediate, 1: 1 ring, 2: 2 rings, 3: 3 rings, 4: 4 rings, 5: 5 rings, 6: 6 rings, 7: No ring). In this case, you can automatically join a new ICD Group by creating a button for that group.
• *4 This button is not available for a PS.
• *5 0: Day/Night/Lunch/Break, 1: Day/Night/Break, 2: Day/Night/Lunch, 3: Day/Night
• *6 Availability of this button depends on the ISDN service of your telephone company. Refer to "1.2.5 Accessing the ISDN Service (ISDN Service Access)".
• *7 This button is not available for the KX-T7665.
• *8 The button may not be available depending on the networking method in use or the settings of the PBX.
• *9 It is possible to set delayed ringing for each SDN button.
• *10 This button is used for the integrated voice mail features.
• *11 The default voice mail floating extension number is 500.

To exit at any time, lift the handset.
For KX-NT366 users: After customising a flexible button, you can set the displayed text for Self Labelling. To enter characters, refer to "Entering Characters".

You can select the parameter with the Navigator Key (Up or Down) instead of entering a number.
3.1 Customising Your Phone (Personal Programming)

To distinguish the ringing tones for each CO, INTERCOM, ICD Group, PDN, or SDN button (Digital proprietary telephone only)

- Available tone types vary depending on the telephone you are using:
  - KX-NT300 series/KX-NT136/KX-T7600 series (except KX-T7665): Tone types "01" to "30" (01–20: tone, 21–30: melody) are available.
  - KX-NT265/KX-T7665: Only tone types "01" to "08" are available. It is possible to enter a tone type number from "09" to "30", but you will hear tone type "01".
  - Other telephones: Only tone types "01" to "08" are available. It is possible to enter a tone type number from "09" to "30", but you will hear tone type "02".

- Only one ringing tone can be selected for all PDN buttons on your extension.

**To clear the button**

- **Available tone types vary depending on the telephone you are using:**
  - KX-NT300 series/KX-NT136/KX-T7600 series (except KX-T7665): Tone types "01" to "30" (01–20: tone, 21–30: melody) are available.
  - KX-NT265/KX-T7665: Only tone types "01" to "08" are available. It is possible to enter a tone type number from "09" to "30", but you will hear tone type "01".
  - Other telephones: Only tone types "01" to "08" are available. It is possible to enter a tone type number from "09" to "30", but you will hear tone type "02".

- Only one ringing tone can be selected for all PDN buttons on your extension.
3.2 Manager Programming

3.2.1 Programming Information

The manager can programme the following items.

- Call Charges
- Other Extensions Control

Available Extension
The extension assigned as a manager

Required Telephone
A Panasonic Proprietary Telephone with display (over 2 lines)
(e.g., KX-NT343, KX-NT346, KX-T7636)

Manager Password
To enter programming mode, the manager password (max. 10 digits) is required. (Default: 1234)

**WARNING**
- The PBX has a default password preset. For security, change the password the first time that you programme the PBX.
- It is strongly recommended that a password of 10 numbers or characters be used for maximum protection against unauthorised access. For a list of numbers and characters that can be used in the password, refer to "Entering Characters".
- To avoid unauthorised access to the PBX, keep the password secret. If it becomes known to others, the PBX may be misused.
- Change the password periodically.

Conditions
The programming extension must be idle, on-hook and holding no calls.
3.2.2 Manager Programming

◆ Changing Call Charges and Extension Control

To enter the programming mode

To programme

To exit

Press PROGRAM or PAUSE.
Enter 1.
Enter manager password.
Follow programming input.
Press HOLD.
Press PROGRAM or PAUSE.

<table>
<thead>
<tr>

<td><strong>9</strong> <strong>3</strong> + Verification code + PIN (max. 10 digits) + <strong>0</strong></td>
</tr>
</tbody>
</table>

- **WARNING**
  
  There is a risk that fraudulent telephone calls will be made if a third party discovers your password (verification code PIN). The cost of such calls will be billed to the owner/renter of the PBX. To protect the PBX from this kind of fraudulent use, we strongly recommend:
  
  a) Keeping your PIN secret.
  
  b) Selecting a complex, random PIN that cannot be easily guessed.
  
  c) Changing your PIN regularly.
  
  * To enter a decimal point, press *.
3.3 Customising Your System (System Programming)

3.3.1 Programming Information

You can customise your system according to your requirements. [Your system already has default settings (factory installed).]

The programming is shown below. (Programme number)

- The date and time [000]
- System speed dialling numbers and names [001]/[002]
- Extension number and name [003]/[004]

Available Extension
The extension allowed through COS programming

Required Telephone
A Panasonic Proprietary Telephone with display (over 2 lines) (e.g., KX-NT343, KX-NT346, KX-T7636)

System Password
To enter programming mode, the system password (max. 10 digits) is required. (Default: 1234)

**WARNING**

- The PBX has a default password preset. For security, change the password the first time that you programme the PBX.
- It is strongly recommended that a password of 10 numbers or characters be used for maximum protection against unauthorised access. For a list of numbers and characters that can be used in the password, refer to "Entering Characters".
- To avoid unauthorised access to the PBX, keep the password secret. If it becomes known to others, the PBX may be misused.
- Change the password periodically.

Conditions
The programming extension must be idle, on-hook and holding no calls.

List
Before programming, decide the settings and write them down. Your notes will provide a useful record of the programming for future reference. Your dealer also has programming records which contain all of the system programming. You may ask for photocopies of these tables to be aware of the facilities and features available.

*: The buttons shown in this column are from the KX-T7400 series.
Procedure

The basic steps are shown below.

1. **Entering the programming mode**

   ![Diagram of entering programming mode]

   - Press PROGRAM or PAUSE.
   - Enter **.**
   - Enter **system password**.

2. **Programming**

   You can enter each programme number (3 digits).
   
   - To exit the programming mode at any time, lift the handset.

3. **Exiting the mode**

   ![Diagram of exiting programming mode]

   - Press PROGRAM or PAUSE.
   - To exit the programming mode at any time, lift the handset.
3.3 Customising Your System (System Programming)

3.3.2 System Programming

Date & Time [000]
The proprietary telephones display the current date and time while on-hook.

[In 12-hour Format]

Enter 000.
Press ENTER.
Press SELECT for month.
Enter date (01–31).
Enter year (00–99).
Enter hour (01–12).
Enter minute (00–59).
Press NEXT.
Press RIGHT.
Press SELECT to choose AM or PM.
Press ENTER.
Press END.

[In 24-hour Format]

Enter 000.
Press ENTER.
Press SELECT for month.
Enter date (01–31).
Enter year (00–99).
Enter hour (00–23).
Enter minute (00–59).
Press NEXT.
Press RIGHT.
Press SELECT (AUTO ANS/MUTE, MESSAGE).
Press ENTER.
Press END. (HOLD)
3.3 Customising Your System (System Programming)

- **After changing the desired values**, you can press the ENTER button. You do not have to perform the rest of the steps.
- The clock starts immediately after the ENTER button is pressed.
- You cannot leave a value empty.
- You can clear the entry by pressing the CLEAR button.
- **To confirm your entry after storing data:**
  - The STORE button light: Lights red
  - Confirmation Tone:
    One beep: Your entry is accepted.
    Three beeps: Your entry is rejected.

🔴 System Speed Dialling Number [001]

You can store the phone numbers of frequently dialled destinations.

- If the desired number is more than 32 digits, divide the number and store it into more than one speed dialling number.
- "*", ",#", FLASH/RECALL, PAUSE, and Secret (INTERCOM) can also be stored.

If you do not want to display the stored number when making a call, press the Secret (INTERCOM) button before and after the numbers you wish to conceal.

If you store an outside party's number, you should first store a line access number.

If you need to enter an account code, you can enter the specified account code before the line access number.

<Example>

<table>
<thead>
<tr>
<th>49</th>
<th>1234</th>
<th>#</th>
<th>0/9</th>
</tr>
</thead>
<tbody>
<tr>
<td>Account code feature no.</td>
<td>Account code</td>
<td>Account code delimiter</td>
<td>Automatic line access number</td>
</tr>
</tbody>
</table>

Phone number

[Diagram of System Speed Dialling Number [001]]

Press ENTER.
Enter system speed dialling number (3 digits).
Enter phone number (max. 32 digits).
Press ENTER.
Press END.
Press NEXT.
Press PREV.
Press CANCEL.

To end

To continue
3.3 Customising Your System (System Programming)

❖ **System Speed Dialling Name [002]**

You can store the name associated with the speed dialling number. These names are displayed when making calls using the display operation. To enter characters, refer to “Entering Characters”.

![Diagram showing the steps to enter a System Speed Dialling Name]

- Enter 002.
- Press ENTER.
- Enter system speed dialling number (3 digits).
- Press ENTER.
- Enter name (max. 20 characters).
- Press END.
- Press NEXT. Press PREV.
- Press CANCEL.

❖ **Extension Number [003]**

You can assign an extension number to each extension.

![Diagram showing the steps to enter an Extension Number]

- Enter 003.
- Press ENTER.
- Enter extension number.
- Press ENTER.
- Enter new extension number.
- Press END.
- Press NEXT. Press PREV.
- Press CANCEL.

- The leading number(s) should be the same as the number(s) assigned for Flexible Numbering.
- A duplicate entry is invalid.
**Extension Name [004]**

You can store the name of an extension user. This is useful if you want to know who is calling, or who you are calling when making an intercom call using the directory. To enter characters, refer to "Entering Characters".

Enter 004. Press ENTER. Enter extension number. Enter name (max. 20 characters). Press ENTER. Press END. Press CANCEL.
Section 4
Appendix

This chapter provides the Troubleshooting, the Feature Number Table and Tone List. Check the Troubleshooting section before consulting your dealer.

### Problem Remedy

<table>
<thead>
<tr>
<th>Problem</th>
<th>Remedy</th>
</tr>
</thead>
</table>
| My proprietary telephone does not have a feature button.               | - Some models do not have the feature button.  
  ➤ Change a flexible button to the desired button. (3.1.3 Customising the Buttons)  
  ➤ Enter the specified feature number instead of the feature button. (1.1.1 Before Operating the Telephones) |
| A reorder tone is audible or "Restricted" is displayed.                 | - The telephone is locked.  
  ➤ Unlock your telephone. (1.6.4 Preventing Other People from Using Your Telephone (Extension Dial Lock), 2.1.1 Extension Control)  
  ➤ Toll restriction is activated.  
  ➤ Consult your manager or dealer.  
  ➤ An account code is required. (1.2.7 Calling without Restrictions, Using an Account Code (Account Code Entry) in 1.2.1 Basic Calling) |
| I cannot make an outside call using the One-touch Dialling button or speed dialling. | - A line access number was not stored.  
  ➤ A line access number is required for outside calls. (1.2.1 Basic Calling, 3.1.3 Customising the Buttons) |
| I cannot remember the feature numbers.                                  | - If the feature numbers have been changed from the default values, write the new feature numbers in the table in "4.2.1 Feature Number Table".  
  ➤ Ask your dealer to change the feature numbers for easier use. |
| While talking to an outside party, the line is disconnected.            | - The time limit has run out. (1.4.1 Transferring a Call (Call Transfer), 1.4.5 Multiple Party Conversation)  
  ➤ Consult your dealer to extend the time limit, if necessary. |
| Redialling does not function.                                           | - The stored number was more than 32 digits or an extension number. (1.2.3 Redial)  
  ➤ An indication tone may have interrupted communication. (1.8.9 Protecting Your Line against Notification Tones (Data Line Security)) |
| The personal computer and fax machine communication failed.            | - 1.8.5 Preventing Your Telephone Number Being Displayed on the Caller's Telephone (Connected Line Identification Restriction [COLR]), 1.8.6 Preventing Your Number Being Displayed on the Called Party's Telephone (Calling Line Identification Restriction [CLIR])  
  ➤ 1.8.4 Displaying Your Telephone Number on the Called Party and Caller's Telephone (Calling/Connected Line Identification Presentation [CLIP/COLP]) |
## 4.1 Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Remedy</th>
</tr>
</thead>
</table>
| I cannot send a call waiting tone to the dialled extension.            | • The other party has not set the Call Waiting feature.  
(§ Sending a Call Waiting Notification (Call Waiting), 1.4.4 Answering Call Waiting, 1.8.3 Receiving Call Waiting (Call Waiting/Off-hook Call Announcement [OHCA]/Whisper OHCA))  
• The other party has set Data Line Security.  
(§ 1.8.9 Protecting Your Line against Notification Tones (Data Line Security)) |
| I forgot the password.                                                 | • Ask the manager to assist you.  
(§ 2.1.1 Extension Control)                                                                                                                                                                             |
| The background music started suddenly.                                 | • ➤ Turn off the music.  
(§ 1.8.8 Turning on the Background Music (BGM), 2.1.4 Turning on the External Background Music (BGM))                                                                                              |
| I do not want to display a number which is stored in memory.           | • ➤ Conceal the number.  
(§ Storing Names and Numbers, 3.1.3 Customising the Buttons)                                                                                                                                           |
| I want to confirm my extension number.                                 | • (§ Your Extension Number in 1.1.1 Before Operating the Telephones)                                                                                                                                 |
| The date and time are not correct.                                     | • Set the date and time by system programming.  
(§ Date & Time [000] in 3.3.2 System Programming)                                                                                                                                                       |
| The display is not shown well.                                         | • ➤ Change the Display contrast level.  
(§ 3.1.2 Settings on the Programming Mode)                                                                                                                                                                |
| I want to distinguish the tones.                                       | • (§ To distinguish the ringing tones for each CO, INTERCOM, ICD Group, PDN, or SDN button (Digital proprietary telephone only), 3.1.3 Customising the Buttons)                                               |
| The MESSAGE button light lit.                                          | • Another extension left you a message waiting indication while you were on the phone or away from your desk.                                                                                              |
| An SDN button on my extension does not work.                          | • A PDN button is not assigned on the extension corresponding to your SDN button.  
➤ Create a PDN button on the desired extension.  
(§ 3.1.3 Customising the Buttons)                                                                                                           |

4.3 What is This Tone?

4.3.1 What is This Tone?

**While on-hook**

**Ring Tones**

The following tones are programmable allowing recognition of call type (Outside, Intercom or Doorphone).

**Tone 1**

**Tone 2**

**Tone 3**

**Tone 4**

**When going off-hook**

**Dial Tones**

**Tone 1**

Normal
4.3 What is This Tone?

**Tone 2**
- When there are messages that have previously been listened to and no new messages recorded by the SVM feature
- When any of the following features are set:
  - Absent Message
  - Background Music
  - Call Forwarding
  - Call Pickup Deny
  - Call Waiting
  - Do Not Disturb
  - Extension Dial Lock
  - Executive Busy Override Deny
  - Hot Line
  - Timed Reminder

**Tone 3**
- After pressing TRANSFER or Recall/hookswitch to hold a call temporarily (e.g., Call Splitting)
- When the recording space of the Built-in Simplified Voice Message feature becomes almost full
- While a called PS is being searched
- When Account Code Entry is performed
- When answering a Timed Reminder call with no message
- When answering an external sensor call

**Tone 4**
Message waiting indication was received.
4.3 What is This Tone?

**When you make calls**

**Busy Tone**

**Reorder Tone**
The outside line you tried to seize is not assigned or denied.

**Ringback Tones**
**Tone 1**

**Tone 2**

**Do Not Disturb (DND) Tone**
The dialled extension is refusing incoming calls.

**While off-hook**

**Indication Tones**
**Tone 1**
Call waiting tone

**Tone 2**
A call is on hold longer than the specified time

**When talking to an outside party**

**Warning Tone**
This tone is sent 15, 10 and 5 seconds before the specified time for disconnection.

**When setting the features or programming**

**Confirmation Tones**
**Tone 1**
The feature setting was set successfully.
4.3 What is This Tone?

**Tone 2**
Before receiving a page through an external speaker

**Tone 3**
Before the following features activate:
- Retrieving a held call
- Picking up another call
- Paging/Answering a paging announcement
- Answering the call through a speaker

**Tone 4**
Establishing or leaving a conference

**Tone 5**
A call has been put on hold.
