Smooth Rich Taste

Uniquely Shaped Blades for a Smooth, Rich Flavor.

The downward curving blades assure even mixing by scooping food ingredients from the bottom of the jug when rotating. Easily make smooth juice free of clumps every time! The four blades are made of stainless steel to resist rust and wear and maintain their sharpnesss even with regular long-term use,

User Friendly

Easy. One-dial Operation.

Simply turn the dial to operate. Select from two speeds: fast (speed 2) or slow (speed 1). Fast mode is good for blending fruits and vegetables until smooth, while slow is ideal for soft ingredients. With the pulse function the blades rotate only when turning the dial, which is great for light mixing or adding the finishing touches to a blend.

Safe To Use

Built for Safe, Long-term Use by the Entire Family.

A safety lock prevents the blender from being switched on if the jug or the mill is not properly positioned. The blades will not rotate unless the blade base is securely set in place. Operation stops automatically if the motor is overloaded* , preventing possible damage to the blender.

* Too many ingredients ,not enough liquid, etc.

Speed controls for various menu options

Normal | Operates at a constant speed for a smooth finish.

Speed 1

Ice Crushing | Pudding | Baby Food

Speed 2

Soup | Juice /Smoothie | Brownie

Pulse | Operates while button is pressed for blending hard ingredients.

Pulse 1

Cookie Crushing

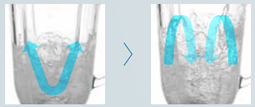
Pulse 2

Cleaning

Smooth Blending Technology

Power Circulation by V&M Technology

The narrow walls at the bottom of the jug coupled with the original shape of the ribs lift the rotating ingredients for a dynamically mixed flow that thoroughly blends them.



Lifts the ingredients

Strikes the ingredients against the jug wall, then lets them drop for a thorough blending

Easy to clean with the removable base

The jug is designed to separate from the base and for good hygiene. You don't need to put your hand in the jug carefully.

Ice Crushing With Ease

More than 30 cubes can be crushed evenly at once.

*With a piece of ice cube size approx. 8–10 g.
*The number of ice cubes is subject to certain condition.

Powerful Cutting Technology

Ultimate Power Blade

The unique blades are designed to prepare the variety of ingredients efficiently, via combination of powerful crushing and fine cutting.

Upper Blades for Powerful Crushing

A curved sawtooth blade powerfully crushes hard ingredients.

Lower Blades for Finer Cutting

A sharp blade finely cuts ingredients once roughly crushed.

JAPAN QUALITY

Capacity 2L (Working Capacity 1.5 L)

Two Dry Mills

It comes with two dry mill attachment.
You can separate Mill for Coffee and Mill for spices.
