Washing Machine & Refrigerator Catalogue

ABAYA WASH TECHNOLOGY

PROTECTS WHAT YOU EXPRESS

Protect Fabric

The softness of the fabric signifies exceptional quality when it comes to Abayas. With ABAYA WASH technology, you can rest assured that your Abayas always feel silky smooth.

Protect Details

The more embellished or bedazzled an Abaya, the more you stand out. With ABAYA WASH, washing them will never damage to the detailed work done.

Protect Embroidery

Embroidery brings out the beauty of any Abaya. With ABAYA WASH, keep these hand-crafted additions always protected.

More Gentle Than Your Own Hands

With creative drum design, unique wash techniques and effective components, the ABAYA WASH series handles your delicate items even more gently than you do when you hand-wash them.

* Photo features NA-S178

ABAYA WASH by GENTLE HANDWASH

Extra Protection

The Gentle Handwash course*1 cleans delicate items such as Abaya which traditionally are washed by hand or sent out for dry cleaning to avoid damage.

- * 1 Loads of upto 1.5 kg
- Use liquid detergents for delicate clothes
- Do not use bleaches
- Images are for illustration purposes only

*If is shown, you cannot wash by washing machine.

AMAZINGLY GENTLE^{*1}
WITH STYLISH,
USER-FRIENDLY DESIGN
& TILTED DRUM.

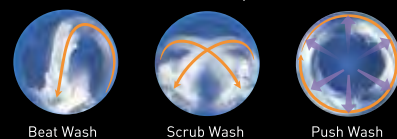

ActiveFoam SYSTEM

Highly concentrated fine foam & 7 Jet Showers from multiple directions.

Dancing Wash System

3 distinct motions help eliminate dirt more effectively.

7 Jet Showers

7 Jet showers helps foam to rapidly penetrate into clothes for effective wash and stubborn stains removal.

3D Sensor

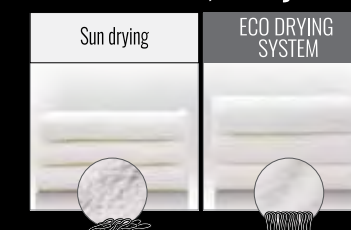

The 3D Sensor detects unbalanced clothes in the tub and adjusts the tub rotation speed accordingly, for providing the optimal tumbling wash.

DRYING CONVENIENCE

Powerful Dry And Fluffy Finish

New drying system with powerful, large-capacity, low-temperature airflow with Dry Lint Filter.

Fabulous Soft, Fluffy Finish

Less Wrinkles

Dry Lint Filter

ENERGY SAVING

Saves energy and time automatically.

Advanced technology ensures quiet operation and energy saving.

^{*1} Loads of up to 1.5kg and use liquid detergent for delicate clothes and don't use bleaches.

• The level of foaming depends on conditions such as load size, degree of soiling, detergent type and water hardness. However, a satisfactory level of washing performance is maintained.

• All photos feature NA-S178

SUPERIOR FAST WASH

Lifts Stains Away **FAST**
with Fine Foam

ActiveFoam SYSTEM

What is ActiveFoam System?

Panasonic Front Loading and Top Loading Washing Machines are equipped with the ActiveFoam System.

A large amount of fine foam is generated in detergent case before the wash cycle starts, and then sprayed vigorously onto clothes.

The high-density foam attaches to cloth, penetrates it, and lifts dirt so that it can be washed away.

Faster, Cleaner Wash Providing More Precious Time

Fine, high-density foam delivers optimum washing performance even in a shorter time. It gives you more time for the important things in life.

Benefits of Washing with Foam

1. Clean Result

Rich foam maximizes surfactant performance for powerful washing.

2. Fast Penetration

Fine and dense foam penetrates clothes more easily to quickly remove dirt.

3. Less Undissolved Detergent

Detergent is turned into foam before washing, so less undissolved detergent is attached on clothes.

StainMaster+

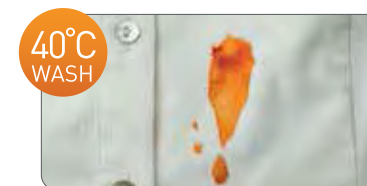

No More Pre-care & Hand Wash

Removes multiple stains automatically and efficiently by soaking clothes in a 40°C warm detergent solution with the optimal washing sequence.

Mud

Mud and dirt stains resulting from playing in sand, sports, etc.

Oily Sauce

Sauce and cooking oil stains

Collar & Sleeves

Yellowing and darkening of collars and sleeves due to sebum

ENERGY SAVING

Advanced Eco Technology for Saving

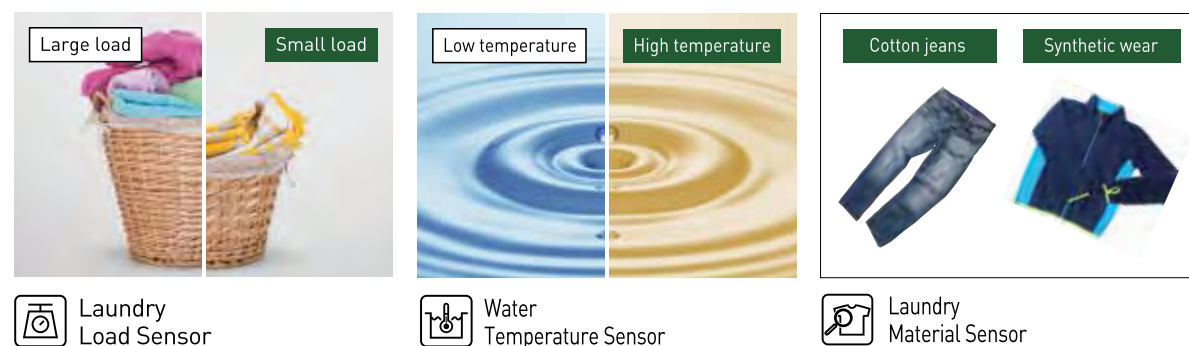

OUTSTANDING FEATURES

INTELLIGENT ECO SENSORS

Three intelligent ECONAVI sensors detect conditions of your laundry to automatically choose the optimum operation for more electricity saving, water saving and time saving.

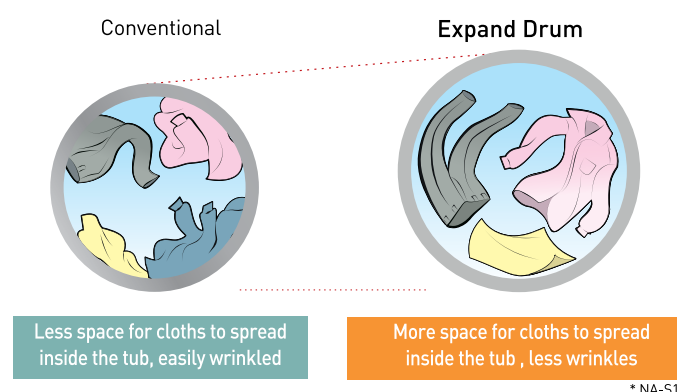

Fully Automatic Wash & Dry

Just select a course and washing and drying are performed fully automatically.

Wrinkle Care Drying

The drum is wider and bigger, making it easier for clothes to spread inside the drum during drying for a finish with less wrinkles.

* NA-S178

Less Noise

Noise during regular operation has been reduced by smoother control of the motor compared with non-inverter washing machines.

Electricity Saving

Continuously adjusts the power level as necessary to maximize energy savings.

The images are for illustrative purposes only.

Easy to Use

Drum Light

It's bright inside the drum, so laundry is easy to see.

Gentle to Clothes

SAZANAMI Drum

The Panasonic Dimple Drum design with smaller and fewer holes prevents clothes from catching

ABAYA WASH by
**GENTLE
HANDWASH**

Gentle Yet Thorough - The Optimum Wash for Delicate Clothes

The special net protects clothes during washing, so now you can easily wash delicate items at home instead of having them dry-cleaned.

- 1 Loads of upto 2.5 kg
- Use liquid detergents for delicate clothes
- Do not use bleaches
- Images are for illustration purposes only.

*If  is shown, you cannot wash by washing machine.

SUPERIOR WASH PERFORMANCE WITH EXCEPTIONAL EASE OF USE

Powerful and Optimum Flow

Superior Wash

ActiveFoam with **TURBOMIXER**
SYSTEM

Makes fine foam first for superb washing results.

Intelligent & Energy Saving

ECONAVI

Saves energy and time automatically.

StainMaster

Intensive stain removal course.

INVERTER

Advanced technology ensures quiet operation and energy saving.

Powerful and Optimum Flow

Lifts Stains Away With Water Bazooka

SUPERIOR WASH

No More Pre-Care & Hand Wash

Deep Clean for More Hygienic Washing

The powerful water flow of the water bazooka penetrates deep into fabrics, removing stains and detergent residue effectively. This ensures fabrics are thoroughly clean during washing and rinsing.

StainMaster

3 StainMaster Courses for Multi-Stain Removal

Easily save time on pre-care and handwashing regardless of the type of stain and where it came from. The StainMaster simply breaks down a variety of stains on fabrics with a scrub wash effect

Active Scrubbing with Strong Water Flow

Powered by the TD Inverter, the Active Wave Pulsator with 8-wing design creates a powerful vertical water flow for washing with a scrubbing effect. Clothes are repeatedly moved in a scrubbing motion, removing tough stains effectively.

Transmission Gears Generate 6x More Power

By providing the necessary power for each cycle optimally, the panasonic TD Inverter can generate 6x more power for greater wash and rinse results using less energy-saves up to 40% energy. *Compared to a full load washed by the panasonic NA-F160A6 for the Asian market (internal testing)

Efficient Power for your laundry Needs

The TD Inverter with the new six-speed transmission gears provide a range of optimal rotation speeds or power needed for each cycle.

1. Clean results-stronger water flow
2. More energy savings-less energy isage
3. Less tangling-low speed rotation
4. Tub hygiene-auto tub cleaning

Fine Foam to Lift Stains Easily

The ActiveFoam System creates fine, dense foam thatpenetrates deep into fabric to thoroughly remove dirt and ensure cleaner results.

Dissolves Detergent for Effective Wash

TURBOMIXER instantly dissolves detergent with 3 powerful water jet streams and disperses it evenly before the wash cycle starts. This lets you wash with less worry about residual detergent.

EASIER DAILY WASH

Effortless Daily Washing
Even for Large Loads

OUTSTANDING FEATURES

EASY WIDE OPENING

Easy to Load / Unload

Wider Tub Opening

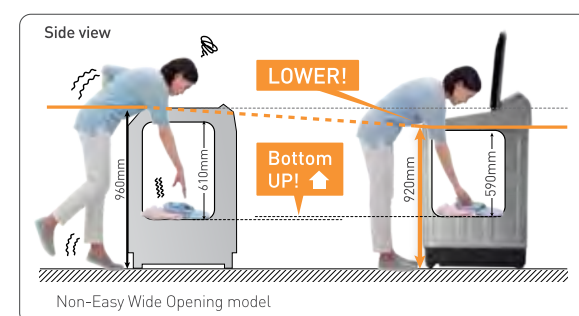

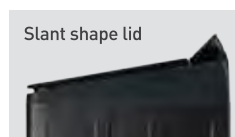

The wide opening without a control panel on the front makes it easy to load and unload even large items, and you don't miss anything left in the tub.

Easy to Reach

Lower Front Height (Bottom Up)

Having the control panel at the rear makes the front lower. And the slanted shape lets you easily reach the bottom of the tub even if you aren't tall.

Easy to Read / Easy to Operate

Rear Control Panel

Based on an ergonomic design, the control panel is positioned at the rear. It minimizes the burden on the neck and is extremely easy and more comfortable to use even in large capacity models. The electrostatic touch panel*1 also provides the intuitive operation.

Energy Saving

INTELLIGENT ECO SENSORS
ECONAVI

Saves Energy and Time Automatically

ECONAVI's two intelligent sensors automatically detect conditions of your laundry to provide optimum electricity, water and time saving operation.

MODEL: NA-FS16V5
 • TESTING INSTITUTION: TÜV Rheinland (Thailand) Co. Ltd.
 • TESTING CONDITIONS: "Normal Course" program, Comparison made with ECONAVI operation (clothes amount: 4 kg; water temperature: more than 35°C) versus operation without ECONAVI (clothes amount: 16.0 kg; water temperature: less than 25°C). Test was conducted based on IEC60456 with the exception of water temperature.

TD INVERTER

Ensures Efficient, Quiet Operation

The inverter changes drum rotation smoothly to ensure efficient, quiet operation.

Convenient

< Applicable for all models >

Soft Closing Lid

The lid slowly and quietly closes on its own.*

* Even though this design has a soft closing feature, if the lid is opened partway and then let go, it may accidentally hurt your fingers.

Big Cassette Lint Filter

Larger cassette-type filter traps lint effectively at any water level.

Tub Hygiene

You can easily keep the tub clean and hygienic. Simply add some bleach.

SAZANAMI Drum

Avoids damage to clothes while keeping high spin-drying performance.

Auto Power Off

When washing is completed the machine automatically turn OFF.

Auto Restart

After a power outage, when power resumes, the washer automatically restarts from the point in the cycle where it stopped.

Twin Tub Washing Machine

Protects What You Express

We understand that every Abaya in your collection is carefully chosen to reflect various aspects of your personality. With Panasonic's new Abaya Wash technology, you can rest assured that stay protected.

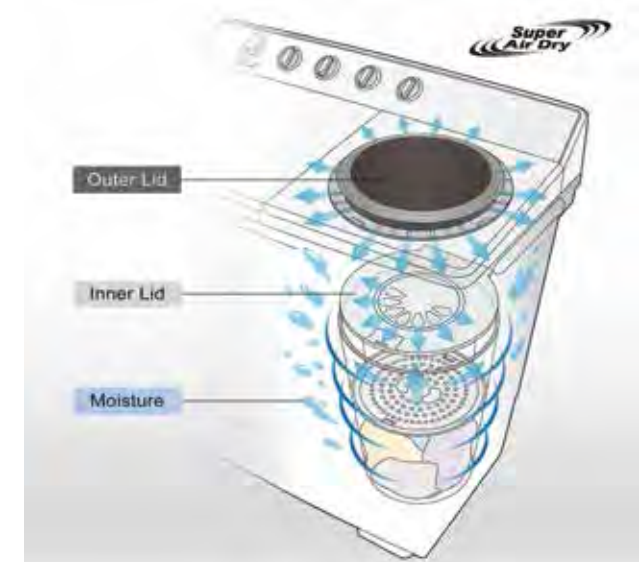

Large capacity with strong wash

Thanks to the large capacity, it is possible to wash large items such as mats and blankets. Even with the increased capacity, the high washing capability remains the same.

Long Durability

The Panasonic Twin Tub Washing Machine features a body with UV protection and rust-proof treatment. There is no need to worry about partial discoloration caused by sunlight or corrosion due to rust when using outdoors. This washing machine can be used comfortably for a long time.

Super Air Dry

Moisture is released from the spin tub through the air holes on the outer lid. This will get rid of the dampness in clothing and speed up the drying process after the spin procedure.

RELIABILITY

Applying advanced Japanese technologies that truly make life better

We live by an unparalleled commitment to product quality. Our approach to product development originates in the DNA of Japanese craftsmanship. Panasonic is building on the Japanese tradition of uncompromising quality control worldwide, developing and manufacturing fine products and delivering them to customers everywhere.

Uncompromisingly rigorous testing

To ensure that your Panasonic washing machine will serve you for many years, it undergoes a stringent battery of tests over several days. If it doesn't meet the challenge, it doesn't ship. Our testing system guarantees that you can use your washing machine with confidence.

Lid Open-Close Durability Test

To confirm that the latches and hinges will not become loose over years of use, Panasonic conducts a durability test that repeatedly and continuously opens and closes the lid over 20,000 times.

Mock-Finger Test

In order to completely eliminate the possibility of unexpected injuries while using the washing machine, Panasonic carefully checks external parts using mock fingers. This test helps prevent accidents, such as a person's finger being pinched by machine part joints, or electrical shocks caused by touching a lead wire.

Lid Strength Test

The washing machine lid is easily subject to impacts, such as having an object fall off of a shelf above it and hit the lid. We confirm that the lid panel will not crack in such a case by conducting tests in which a weight of 20 kg is dropped onto the lid three times from a height of 10 cm.

Drop Test

In addition to vertical dropping, more severe conditions in which the sides, edges, or corners hit the ground first are tested to ensure that the product's rigidity and shock-absorbing materials prevent damage.

1951

First model of our washing machine.

Reliable quality and advanced technology cultivated in over 60 years of history

Panasonic washing machines embody the essence of Japanese manufacturing. Since 1951, more than one hundred million Panasonic washing machines have been sold in Japan and around the world. Our R&D focuses on ease of use, and our history of rigorous quality control is unmatched in the industry.
