## NOTE

- For normally soiled laundry at the rated capacity, we recommend using the "Cotton, 40 °C, 1000 r/min, RINSE+, 2" which is tested in accordance with IEC 60456 for the energy and water efficiency aspects.
- Actual water temperature may differ from the declared cycle temperature.
- The test results depend on water pressure, water hardness, water inlet temperature, room temperature, type and amount of load, degree of soiling, utilized detergent, fluctuations in the main electricity supply and chosen additional options.
- Pre-wash process is applied to only "Baby care" washing course.
