4MP Fixed Dome True Colour IP Camera

Panasonic's latest AI-powered security cameras deliver twice the computing power compared to conventional models, unlocking superior performance across surveillance and image processing. At the heart of this innovation is the AI-ISP (Image Signal Processor), which dramatically enhances picture quality through advanced real-time optimization. Combined with an ultra-large F1.0 aperture and a stacked large-format CMOS sensor, the camera excels in capturing vivid, full-color images - even in near- total darkness, down to 0.0001 Lux. These cameras are engineered for intelligent efficiencies
