Features
This product can generate 2 levels of Alkaline Ion Water by electrolyzing the purified water.

- Clean water is provided with the Advanced ECO RO Technology.
- 7 Stage water control process
- Monitor safe water with warning function
- LED display/Board of the water
- Change the color of the light and automatic display when error occurs.
- Prevent potential hazard that could result in service injury or death.

Safety Precautions
To reduce the risk of fire, electric shock, the damage to property, always observe the following safety precautions.

Explanation of symbols
The following symbols are used to classify and describe the level of hazard, injury, and property damage caused when the equipment is damaged or improper use is performed.

- WARNING
- CAUTION
- NOTICE

- WARNING: If not observed, there is a possibility of death or severe injury.
- CAUTION: If not observed, there is a possibility of minor injury or electrical shock.
- NOTICE: If not observed, there is a possibility of damage to property or the unit will be damaged.

Safety Precautions (continued)
The following symbols are used to classify and describe the type of instructions to be observed.

- This symbol is used to denote a specific operation procedure that must not be performed.
- This symbol is used to denote a specific operation procedure that must be followed in order to operate this unit safely.

WARNING
- The unit shall be installed to the AC power supply by a registered electrician, the unit shall be installed by a professional electrician.
- The unit shall be installed to the AC power supply by a registered electrician, the unit shall be installed by a professional electrician.
- The unit shall be installed to the AC power supply by a registered electrician, the unit shall be installed by a professional electrician.
- The unit shall be installed to the AC power supply by a registered electrician, the unit shall be installed by a professional electrician.

CAUTION
- The unit shall be installed to the AC power supply by a registered electrician, the unit shall be installed by a professional electrician.
- The unit shall be installed to the AC power supply by a registered electrician, the unit shall be installed by a professional electrician.
- The unit shall be installed to the AC power supply by a registered electrician, the unit shall be installed by a professional electrician.
- The unit shall be installed to the AC power supply by a registered electrician, the unit shall be installed by a professional electrician.

NOTICE
- The unit shall be installed to the AC power supply by a registered electrician, the unit shall be installed by a professional electrician.
- The unit shall be installed to the AC power supply by a registered electrician, the unit shall be installed by a professional electrician.
- The unit shall be installed to the AC power supply by a registered electrician, the unit shall be installed by a professional electrician.

Operation
Check that there is water in the tank before use. Water will not flow if the level is below the water valve.

- Please handle the faucet tap with clean hands.
- Working parts inside may have sharp edges, so be careful.
- Roll waste gas away before use that it do not make the water carrying device,.

Producing Alkaline Ion Water
1. Open the faucet tap.
2. Close the tap when the level reaches [C].
   - The tank begins filling.
3. After approximately 15 seconds, the water stops flowing into the tank, and alkaline ion water will be poured into the tank.
4. Drain the water by necessity [B] (C).
   - The water will help prevent rust in the tank from being formed.
5. Fill the tank to [A].

Producing Purified Water
1. Remove the tank lid.
2. Pour "purified water" (C).
   - The tank begins filling.
3. After approximately 15 seconds, the water stops flowing into the tank, and purified water will be poured into the tank.
4. Drain the water by necessity [B] (C).
   - The water will help prevent rust in the tank from being formed.
5. Fill the tank to [A].
