Panasonic

Building Passion, Building Solutions.

We face a time in which "quality air" differentiates business. It's a time for Panasonic to fully display its strengths. Our ability to assemble and build superior systems isn't just due to the rich resources we have as a comprehensive electronics manufacturer, but also to Panasonic's 100 years of tradition, where each person thinks and acts on their own initiative while working in a team to reachfurther heights. We do not compromise. Each of our independent selves is a one stop solution. We face our customers' challenges together with our customers and do all that we can to build effective systems. As a true partner for our customers, we strive to always be at the forefront of business.

- Please read the Installation Instructions carefully before installing the unit, and the Operating Instructions before using it.
- Specifications are subject to change without prior notice.
- The contents of this catalogue are accurate as of February 2023.
- Due to printing considerations, actual colours may vary slightly from those shown.
- All graphics are provided solely for the purpose of illustrating a point.

Do not add or replace refrigerant other than the specified type. Manufacturer is not responsible for damage or deterioration in safety due to usage of other refrigerant.

Authorised Dealer

FSV MALAYSIA_FEBRUARY_2023

FSV VRF SYSTEMS 2023/2024

Panasonic Air-Conditioning Malaysia (PACMY)

Care Line: +603-7932 4189 Address: Lot 10, Jalan 13/2, 46200 Petaling Jaya, Selangor Darul Ehsan.

FSV-EX Advantages

The most efficient, powerful and quiet system in Panasonic's history. There has never been a VRF system like it. It's the story of a true game changer.

Extraordinary energy-saving performance

The FSV-EX marks a revolutionary step forward in VRF efficiency. A look at the incredible EER value clearly indicates that. What's more, this high EER value is achieved even during part load operation.

This shows the extraordinary energy-saving performance the FSV-EX is capable of providing.

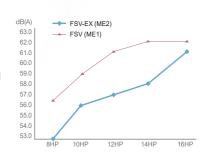

Low-noise operation

Numerous technological innovations, including an improved compressor and a newly designed bell mouth and larger fan, have dramatically reduced the outdoor noise level. The result is an even more comfortable building environment.

Multiple large-capacity all inverter twin rotary compressor

(more than 14HP)

Two independently controlled inverter compressors achieve high efficiency. Redesigned components in the body provide performance improvement especially in the rated cooling condition and EER performance.

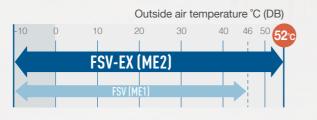

Extended operation range up to 52°C

The FSV-EX can provide cooling even when the outside temperature reaches a maximum of about 52°C. And amazingly, it can still operate at 100% capacity when

the outside temperature is as high as 43°C.

This high power capability enables reliable operation even under extremely high temperature conditions.

Enlarged heat exchanger surface area with triple surface*

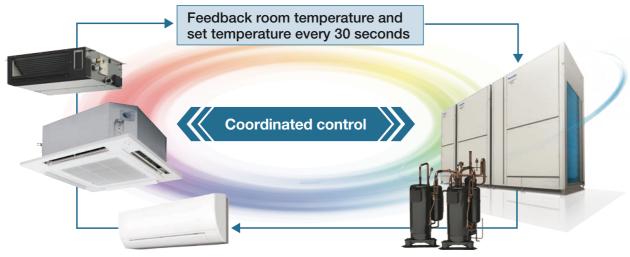

The new heat exchanger features a triple-surface construction. Compared to the divided dual-surface construction in current models, there is no division of space and the area for heat exchange is larger. Also, highly efficient piping pattern increases heat exchange performance by 5%.

^{*} For 8 & 10HP unit, the heat exchanger is 2 row design

FSV-EX Advantages

Energy savings × Comfortable air conditioning ~Variable Evaporation Temperature (VET)~

Since 2006, all Panasonic VRF systems have included special VET technology, with variable refrigerant temperature, as standard. Our 'smart logic' system checks the temperature every 30 seconds, automatically adjusting the refrigerant temperature according to actual demand and outdoor conditions.

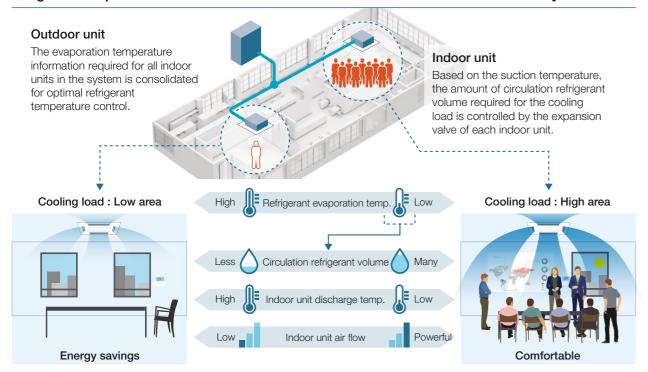

Calculate indoor refrigerant temperature and control the airflow automatically based on the difference between the setting temperature and actual indoor temperature.

* When fan speed is Auto.

Determine system refrigerant temperature and control compressor speed.

Achieves room-by-room comfort and overall system energy savings by controlling optimal refrigerant temperature and circulation volume based on all information of the entire system.

Increased piping length for greater design flexibility

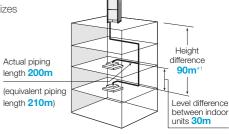

*1: 40 m if the outdoor unit is below the indoor unit. Elevation difference of Max. 90m in case of ODU is higher than IDU may be allowed following certain

Please consult with Panasonic sales engineers about the certain conditions in case of piping elevation of over 50m is required.

Adaptable to various building types and sizes Actual piping length: 200m

(equivalent piping length: 210m)

Max. total piping length:1,000m

Connectable indoor/outdoor unit capacity ratio up to 130% *

FSV systems attain maximum indoor unit connection capacity of up to 130 %* of the unit's connection range, depending on the outdoor and indoor models selected. So for a reasonable investment, FSV systems provide an ideal air conditioning solution for locations where full cooling/heating are not always required.

SYSTEM / HP	8	10	12	14	16	18	20	22	24	26	28	30	32	34	36	38	40	42	44	46	48	50	52	54	56	58	60	62	64	66	68	70	72	74	76	78	80

MNcIU: Maximum Number of Connectable Indoor Unit

Note: If more than 100% indoor units are operated with a high load, the units may not perform at the rated capacity. For the details, please consult with an authorised Panasonic deale

- If the following conditions are satisfied, the effective range is above 130 % up to 200 %.
 i) Obey the limited number of connectable indoor units.
 ii) The lower limit of operating range for heating outdoor temperature is limited to -10°CWB (standard -25°CWB).
 iii) Simultaneous operation is limited to less than 130 % of connectable indoor units.

Hi-durability outdoor unit

Corrosion-resistance treated for high resistance to rust and salty air to assure long-lasting performance.

Note: Selecting this unit does not

completely eliminate the possibility of rust developing.

For details concerning unit installation and maintenance, please consult an

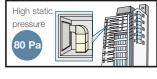

* Specific model with suffix "E" has this treatment.

High external static pressure on condensers

With a newly designed fan, fan guard, motor, and casing, new models can be custom-installed on-site to provide up to 80 Pa of external static pressure. An air discharge duct prevents shortages of air circulation, allowing outdoor units to be installed on every floor of a building.

Air Handling Unit Kit

AHU Kit connects FSV-EX and FSV outdoor units to Air Handling Units System

If you require this fresh air solution, please contact an authorized Panasonic distributor.

Connect Air Handling Unit to your FSV-EX and FSV systems for a high efficiency operation.

Application: Hotels, offices, server rooms or all large buildings where air quality control such as humidity control and fresh air are needed.

CAC Design Support Software

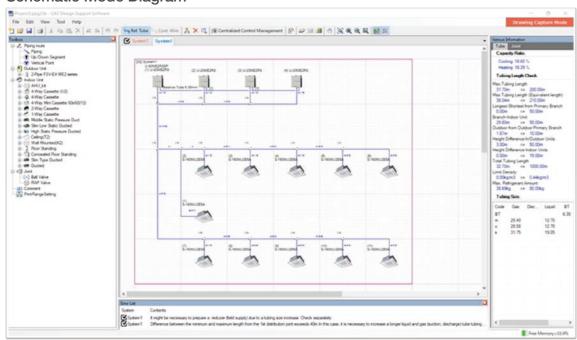

Features the unique Drawing Capture Mode function providing More thorough spec-in and tender quotation support for easier, Faster completion of work.

Drawing Capture Mode Diagram

Schematic Mode Diagram

The Panasonic CAC Design Support software can be used for all Panasonic FSV

Panasonic has identified the importance of ever-increasing demands for fast and accurate responses to customer requests in our industry. More and more emphasis is being placed upon energy-efficiency in our marketplace. The ability to calculate cooling/heating loads and produce information of actual design conditions is a major advantage to any architect, consultant, contractor or end user. Panasonic understands the time-poor and demanding industry we are in and we are pleased to announce the launch of the next generation of our system design software program. The Panasonic CAC Design Support Software has been customized to make the selection and design process as quick and easy as possible. The design package utilizes system wizards and import tools to enable both simple and complex systems to be created. In addition, the system will allow outdoor and indoor units to be dragged on an interactive desktop. This allows users to create everything from realistic floor plans with detailed piping and wiring schematics to send out with quotations, through to installation guidance drawings.

Features

- Drawing Capture mode
 Design selection from building floor drawing.
- Any kind of drawing format. (.pdf, .dxf, .dwg, etc.)
- · Conventional Schematic diagram.
- Easy to use system wizards.

- Converted duties for conditions and pipework.
- Auto(CAD) [.dxf/.dwg], Excel and PDF export.
- Detailed wiring and pipework diagrams with advising terminal number.

2-WAY FSV-EX ME2 Series

Extraordinary energy-saving performance and powerful operation

Space-saving Combination Model

Cooling or Heating Type Hi-Durability Model

- Wide range of systems from 8HP to 80HP
- Class-leading EER of 5.3 (for 8HP model)
- Industry-leading low noise of 53.0 DB (8HP model)
- Cooling operation possible with outdoor temperature as high as 52°C (DB)
- Long maximum pipe length (up to 1,000 m)
- Up to 64 indoor units connectable
- External static pressure of 80 Pa
- Extended operating range allows heating with outdoor temperatures as low as -25°C (WB)

High Efficiency Combination Model

Cooling or Heating Type Hi-Durability Model

- Wide range of systems from 8HP to 64HP
- Class-leading EER of 5.3 (for 8HP model)
- Higher EER than the Space-saving Combination Model e.g., a combination of two 10HP units delivering 20HP reduces compressor load.

For small-scale commercial and residential use

Cooling or Heating Type 1/3-phase

- High external static pressure 35Pa
- Wide operation range: Cooling: -10°C to 46°C DB, Heating at: -20°C to 18°C WB
- Refrigerant chargeless up to 50m
- Extraordinary energy saving: 5.08 EER for 4HP model
- Demand response (Peak cut) by optional parts.
 Maximum number of connectable indoor units: 9*
- Diversity ratio 50-130%
- DC inverter technology combined with R410A for excellent efficiency
- Demand response (Peak cut) by optional parts.
- One ampere starting current
- Full range of indoor units and control options
- Auto restart from outdoor unit
- Hi-durability outdoor unit model is available.
- Suitable for R22 renewal projects RENEWAL

2-WAY Mini-FSV LE1 Series

For small-scale commercial and residential use

Cooling or Heating Type 3-phase

- High external static pressure 35Pa
- \bullet Wide operation range: Cooling: -10°C to 46°C DB, Heating at: -20°C to 18°C DB
- Maximum number of connectable indoor units : 13
- Diversity ratio 50-130%
- DC inverter technology combined with R410A for excellent efficiency
- Actual piping length: 150m (Total piping length: 300m)
- System difference of elevation:50m /40m (outdoor above/below)
- Difference in elevation between indoor units:15m
- Demand response (Peak cut) by optional parts.
- One ampere starting current
- Full range of indoor units and control options
- Auto restart from outdoor unit
- Hi-durability outdoor unit model is available.
- Suitable for R22 renewal project

Global remarks

Rated conditions:	Cooling	Heating
Indoor air temperature	27°C DB / 19°C WB	20°C DB
Outdoor air temperature	35°C DB	7°C DB / 6°C WB

These specifications are subject to change without notice.

Mini-FSV LE Series Mini-FSV LE Series

Long piping design length for greater design flexibility LE1 LE2 building types and sizes Heiaht Actual piping length 150m Actual piping length 150m 50m* (equivalent piping length 175m) (equivalent piping length 175m) Level difference Level difference between indoor units 15m between indoor Max. total piping length:180m Max. total piping length:300m units 15m

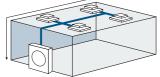

*1: 40m if the outdoor unit is below the indoor unit.

Refrigerant chargeless up to 50m

Up to 50m of piping without additional gas charging makes installation flexible, easy and hassle-free.

A 50m pipe length is sufficient for most residential and small business buildings. When total piping length exceeds 50m, additional refrigerant charge is required.

[Sample piping lay-out]

LE1 LE2

High external static pressure 35Pa

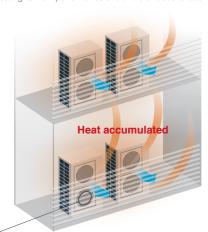

When unit is installed on a narrow balcony and exposed to the sun, the fence at the front side would restrict hot air from being discharged. Heat accumulated in an enclosure can cause over-heating. This could potentially result in damage or shorten the product's life span. A high external static pressure sends the air further away from the outdoor unit and through the fence. This provides better air circulation and distribution.

LE1 LE2

Previous model - Low pressure

When the pressure is low, hot air will accumulate in the unit thus affecting its work performance and of the unit above it as well.

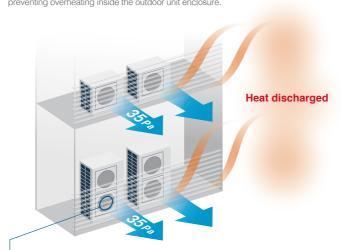

Previous fan

High electrostatic pressure disrupted the airflow of the previous fan, lowering the air pressure and preventing hot air from being discharged far

LE series - High pressure

But with a high pressure of 35Pa, hot air is sent further away preventing overheating inside the outdoor unit enclosure.

LE series fan

The new LE Series fan has ribs extending near the blade tips, in a structure that resist deformation. During high electrostatic pressure, this blade shape suppresses disruptions in the airflow, and a high air pressure of 35 Pa discharges the hot air a sufficient distance.

Compact design

Also, since Mini VRF LE Series is a single unit, it is possible to install the unit in more various places compared to the Single Split system.

Short height of 996mm

In addition to raising efficiency, we have made the outdoor unit more compact. It can now be installed in places that were previously too small.

Single Split

Max. total piping length: 50m

Max. total piping length: 180n (Actual length: 150m)

996mm

Can be installed in the small space

Mini-FSV [LE1] 1330mm

Up to 13 indoor units connectable

LE1 LE2

17

An expansion from Panasonic VRF line up, the Mini FSV is compatible with the same indoor units and controls as the rest of the FSV range.

- * Use any of the 22 type indoor models. Depending on the size or type of indoor unit, tubing size shall be changed. Please refer manuals for details.
- * 6 HP only; 4 HP for 7 units, 5 HP for 8 units.

Mini-FSV LE Series

LE1 LE2

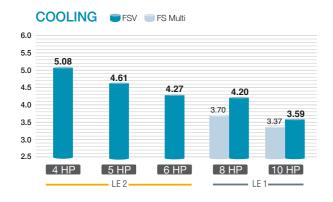

LE1 LE2

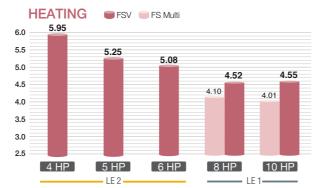

LE1 LE2

2-WAY Mini-FSV LE Series

LE1 LE2 High efficiency

The operation efficiency has been improved using highly efficient R410A refrigerant, a DC Inverter compressor, DC motor and a heat exchanger design.

Energy savings design

LE1 LE2

reduce refrigerant pressure loss.

Flexible demand response with the optional terminal block

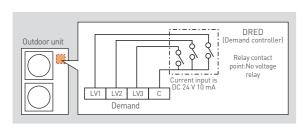

Oil Separator

LE1 LE2

Demand Response

Featuring inverter control technology, all Panasonic Mini FSV systems are Demand Response Management (DRM) ready. With this control, power consumption at times of peak load can be set in three steps to deliver optimum performance. This helps to reduce annual power consumption with minimal loss in comfort.

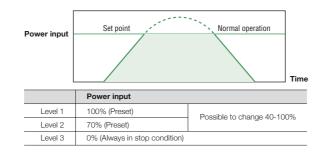

*Terminal block supplied as optional kit. (CZ-CAPDC3) Please ask you dealer.

Flexible Demand Response with the CZ-CAPDC2*1

Setting is possible as 0% or in the range from 40 to 100% (in steps of 5%). At the time of shipping, setting has been done to the three steps of 0%, 70% and 100%.

*1 An outdoor Seri-Para I/O unit (CZ-CAPDC2) is required for demand input signal. * Demand timer setting for high spec remote controller is available.

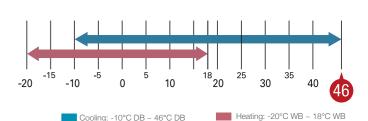

Wide operating range

• Cooling operation is possible even when outdoor temperature is as low as -10°C DB.

- Cooling operation is possible even when outdoor temperature is as high as 46°C DB.
- Heating operation is possible even when outdoor temperature is as low as -20°C WB.

The remote controller temperature can be set from 18°C up to 30°C (Cooling), 16°C up to 30°C (Heating)*1.

*1 Depending on the type of remote controller.

* For further information please refer to the capacity tables in the Technical Data Book.

Blue fin condenser

The anti-corrosion Blue Fin treatment of the heat exchanger provides greater resistance against corrosion. All models are equipped with Blue Fin condenser.

High durability outdoor unit

Corrosion-resistance treated for high resistance to rust and salty air to assure long-lasting performance.

Note: Selecting this unit does not completely eliminate the possibility of rust developing. For details concerning unit installation and maintenance, please consult an authorised dealer.

* Specific model with suffix "E" has this treatment

Quiet operation mode

• Quiet operation mode reduces outdoor unit operating sound down to 7dB than rating.

- 3-step set point is available.
- External input signal is also available.
- * Timer setting of quiet operation mode is available in High-spec Remote Controller (CZ-RTC5B/CZ-RTC6 series).

Dimensions

U-8LE1H7 / U-10LE1H7

For U-10EH7 The tubing of the gas main has a diameter of ø22.22, but the connection to the service valve of the outdoor unit has a diameter of ø19.05, so a flare has to be used. Consequently, be sure to use the enclosed joint tube B and joint tube A in making connections (braze).

nanoe™ X nanoe™ X

*Unit must be constantly turned on and operating in the air purification mode - nanoe™ X.

** https://www.businessinsider.com/coronavirus-lifespan-on-surfaces-graphic-2020-3

24-hour nanoe™ X air Purification, anywhere, anytime

Get 24 hr Quality Air for you and your loved ones by turning nanoe™ X on using Panasonic Comfort Cloud even when you're out. nanoe™ X functions in both cooling and heating modes and is maintenance-free, helping you keep your costs down with cleaner air.

- nanoe™ X functions in cooling as well as fan mode after business hours.
- Cleans indoor air even when the space is not in use.
- No need to consume excessive electricity to clean the air.

Please refer to the

nanoe™ X cleans indoor air while maintaining a comfortable temperature when people are present.

After business hours, nanoe TM X keeps cleaning indoor air in fan mode.

 $^{\rm t}$ In case of using 2.2 kW-7.3 kW 4 way cassette models with fan tap L, flap position 5, standard panel. Energy consumption may vary depending on models.

nanoe™ X technology inhibits novel coronavirus

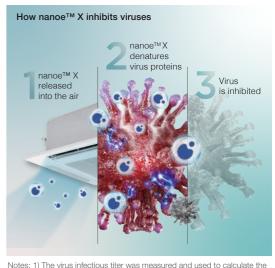

Our nanoeTM X technology has shown to suppress the activity of viurses & bacteria. Enjoy cheaner and quality air at home. Stay safer indoors with nanoeTM X.

Overview

The objective of this test was to determine if nanoe™ X inhibit the activity of the SARS-CoV-2 virus. Gauze saturated with SARS-CoV-2 virus solution was exposed to a generator of nanoe™ X from a distance of 15 cm in a 45-liter box for 2 hours. Over 99.999%* of the activity of the SARS-CoV-2 virus was inhibited.

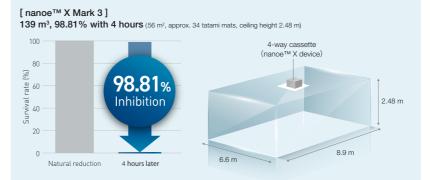

Device type: 10 x nanoe™ X (Mark 1) Subject: Novel coronavirus (SARS-CoV-2) Test Institute: TEXCELL (France) Test duration: 2 hours

Notes: 1) The virus infectious titler was measured and used to calculate the inhibition rate. 2) This verification was designed to generate basic research data on the effects of nanoe™ X on the novel coronavirus in laboratory conditions. It was not designed to evaluate product performance.

nanoe™ X Mark 3 achieves virus inhibition in a larger space in a shorter time

Mark 3 (100 x) Device: 4-Way Cassette Large-Space Test for Adherent Virus (Bacteriophage) In a large space of 139 m³ (56 m²), a 98.81% inhibition rate was achieved in 4 hours.

Please refer to the nanoe™ X website for the Mark 3 information.

Device type: nanoe ™ X Generator Mark 3 Subject: Adhesive virus (coliphage) Indoor unit: 4-way cassette
Test Institute: SGS Inc
Test duration: 4 hours
Report No.: SHES210901902584

Smart Comfort with CONEX

CONEX goes beyond simple remote control to combine sophistication with simplicity, offering IoT integration that connects directly to a variety of apps for next-generation solutions.

Simple and sophisticated design in-and-out

User friendly interface with stylish design measuring just 86 x 86 mm, CONEX is an extremely compact remote controller which perfectly matches with all kinds of modern building.

Easy control and access for end users and installers with just one remote

User-friendly day day-to-day operation for end users and simplified set up for installers.

A next-generation remote control solution optimised for usability

H&C Control App Find user > Installer

- Easy setting of timers and scheduling as well as monitoring power consumption.
- Fine tune the equipment to the environment.

■ True-comfort for end user and installer — H&C Control App

H&C Control App makes complex initial set-up visually touch and feel easy and respond swiftly to clients' requests via Bluetooth using a smartphone or tablet.

Advantages

Comfort day-to day operations

It's now simpler than ever for end users to further customize settings to meet their needs and perform operations including basic settings.

Straightforward suggestions to clients

Share a single screen with your customer and together tailor everything to meet their needs, from basic setup to weekly timers, all in real time.

Intuitive operation for easy configuration

Simplifies initial controller configuration as well as access to comprehensive settings including weekly timers and maintenance.

Quicker configuration for multiple controllers

Save time and copy templates for weekly timers and settings to multiple remote controllers.

Technical focus

- 4 installation possibilities with horizontal and vertical mounting and selectable rear or bottom air inlet
- DC fan motor for variable external static pressure control
- Industry-leading horizontal/vertical design with 250 mm height
- Powerful 150 Pa static pressure in a compact unit.
- Leading-class low sound levels from 20 dB(A)
- Improved drain pan suitable for both horizontal / vertical installation
- nanoe™ X : 100x for CAC (100 times more nanoe™ particle for wide commercial space)
- Possible to control discharge air temperature for accurate room temperature control.

Powerful 150 Pa external static pressure in an industryleading horizontal/vertical installation design

Delivering static pressure up to 150 Pa external static pressure, the industry-leading horizontal/vertical design offers the power you need in a compact form factor.

Improved drain pan design

Drain pan is shared in both cases horizontal and vertical installation. No need to alternate anymore.

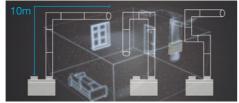

Superior Air Quality

C•nanoe X

Combined with the strong static pressure this model ensures pristine nanoe™ X air travels unaffected even through multiple duct shapes at lengths of 10 m, as well as making them ideal for use in larger spaces.

Rend

demonstrate; even with a total ductwork length of up to 10 m, effectiveness of nanoe™ X is

Space saving height of

External electrical equipment box makes maintenance easy

250 mm for all models

250 mm standardised height provides easy and uniform installation for models with different capacities, especially when ceiling heights are restricted.

Selectable air inlet position

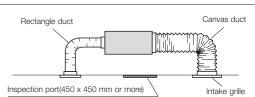

A removable panel allows air inlet position to be adjusted to enable rear or bottom entry, depending on ductwork installation.

- Built-in filter

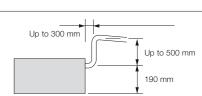

System example

An inspection port (450 mm x 450 mm or larger) is required at the lower side of the indoor unit body.

More powerful drain pump

Using a high-lift built-in drain pump, drain piping can be elevated up to 690 mm from the base of the unit.

M1_{TYPE} Slim Low Static Ducted

Concealed duct

S-22MM1E5A S-28MM1E5A S-45MM1E5A S-56MM1E5A

Technical focus

- Ultra-slim profile: 200 mm for all models
- DC fan motor greatly reduces power consumption
- Ideal for hotel application with very narrow false ceilings
- Easy maintenance and service by external electrical box
- 40 Pa static pressure enables ductwork to be fitted.
- Includes drain pump
- Includes built in filter

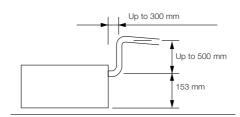

Ultra-slim profile for all models

200 mm height for all models allows installation in very narrow ceilings.

Drain pump with increased power

Using the built-in high-lift drain pump, the drain piping rise height can be increased to 653 mm from the lower surface of the body.

Indoor Unit / E2 Type Indoor Unit / E2 Type

E2 TYPE High Static Ducted

Concealed duct / Air conditioning mode Optional accessory

CZ-RWS3 CZ-RWRC3

E2 TYPE Energy Saving High Fresh Air Ducted Concealed duct high-static pressure

臣 CZ-RWS3 CZ-RWRC3

Technical focus

- Design flexibility thanks to high static pressure and large air volume
- DC motor equipped
- Power input 45% less (compared to E1 type)

- Discharge air temperature control to reduce cold drafts during heating operation
- Configurable air temperature control
- Available Fresh Air Intake mode (See page 29)

3-step static pressure set up

You can select between the three Static Pressure modes of 270 Pa/140 Pa/60 (72*) Pa for extra installation flexibility.

Max. 270 Pa static pressure setting

A maximum static pressure setting of a high 270 Pa enables the use of long ducts for installation in a wide range of spaces. Ideal for largescale offices, restaurants and other facilities.

Sensible cooling 5-10% improved

New heat exchanger with \$\phi\$7 mm pipe that increases the heat transfer surface to improve sensible cooling (5-10% improvement)

Discharge air temperature control

• Equipped with 4 sensors (Intake/ Discharge)

Rated conditions:

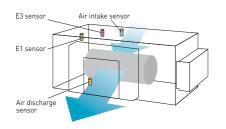

Indoor air temperature

Cooling

Outdoor air temperature 35°C DB / 24°C WB 7°C DB / 6°C WB

27°C DB / 19°C WB 20°C DB

- Able to control discharge air temperature for accurate room temperature control.
- Possible to reduce cold drafts during heating operation.

Technical focus

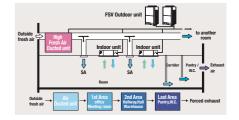

- 100% fresh air intake for ventilation purpose
- Design flexibility with high static pressure and large air volume
- DC motor equipped

- Power input 45% less (compared to H1 type)
- Discharge air temperature control to reduce cold drafts during heating operation
- Configurable air temperature control

High fresh system

High Fresh System enables delivery of fresh outside air at almost the same temperature and humidity as indoor air without putting a burden on air conditioning.

* Capable of treating outdoor air only. Indoor air conditioner units are required to adjust indoor air temperature.

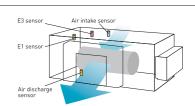

Mix operation unit with standard indoor units

Possible to combine High Fresh Air ducted indoor unit and standard air ducted indoor units. When other indoor units are connected in same circuit, keep following capacity ratio. E2 type/Outdoor unit < 30%, and Total of indoors(incl. E2)/outdoor <100%

Discharge air temperature control

- Equipped with 4 sensors (Intake/ Discharge)
- Able to control discharge air temperature for accurate room temperature control.
- Possible to reduce cold drafts during heating operation.

Indoor Unit / E1 Type Indoor Unit / H1 Type

E1 TYPE High Static Ducted

Concealed duct high-static pressure

Concealed duct

H1 TYPE High-Fresh Air Ducted

Optional accessory

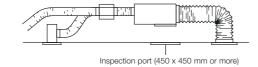

Technical focus

- Complete flexibility for ductwork design
- Can be located into a weatherproof housing for external installation
- Discharge air temperature control to reduce cold drafts during heating operation
- Configurable air temperature control

System example

An inspection port (450 x 450 mm or more) is required at the lower side of the indoor unit body (field supply).

Discharge air temperature control

- Equipped with 4 sensors (Intake/ Discharge)
- Able to control discharge air temperature for accurate room temperature control.
- Possible to reduce cold drafts during heating operation.

Technical focus

- 100% fresh Air intake for ventilation purpose
- Design flexibility thanks to high static pressure and large air volume
- Discharge air temperature control to reduce cold drafts during heating operation
- Configurable air temperature control

High fresh system

High Fresh system enables delivery of fresh outside air at almost the same temperature and humidity as indoor air without putting a burden on air conditioning.

* Capable of treating outdoor air only. Indoor air conditioner units are required to adjust indoor air temperature.

Mix operation unit with standard indoor units

Possible to combine High Fresh Air ducted indoor unit and standard air ducted indoor units.

When other indoor units are connected in same circuit, keep following capacity ratio.

H1 type/Outdoor unit < 30%, and Total of indoors(incl. H1)/outdoor <100%

Compact indoor units make the installation easy

Quiet operation

Low operating noise level makes these units ideal for hotels and hospital applications.

Smooth and durable design

The smooth cover means these units match most modern interiors.

Their compact size enables them to blend in, even in small spaces.

Piping outlet in six directions

Piping outlet is possible in the six directions of right, right rear, right bottom, left, left rear, left bottom, making installation easier.

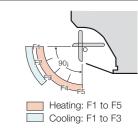

Washable front panel

The indoor unit's front panel can be easily removed and washed for trouble-free maintenance.

Air distribution is automatically adjusted depending on the operational mode of the unit

Air outlet angle is automatically adjusted for cooling and heating operation.

nanoeX Generator Mark3

the nanoe™ X website for the Mark 3

Optional accessory

CZ-RTC5B

CZ-RTC6 CZ-RTC6BL

CZ-RWS3 CZ-RWRU3

Technical focus

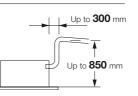

- New high performance turbo fan, new path system for heat exchanger
- Lower noise in slow fan operation
- Industry top light weight, easy piping
- Easy installation structure of the panel
- Econavi: Floor temperature and human sensor added. Activity amount detection and new circulator
- nanoe[™]X: 100x for CAC (100 times more nanoe[™] particle for wide commercial space). Inside cleaning by 100x nanoe™ + dry control

Flat horizontal design

The horizontal design of 4-way cassette achieves an elegant designed panel. Its slim design allow to protrude 33.5 mm from the ceiling.

Built in drain pump allows flexible install and design options with up to 850 mm lift. Long horizontal piping is also possible.

Easy to clean suction grille

Suction grille is able to make 90-degree

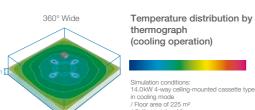

360° wide & comfortable airflow

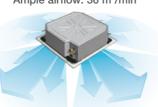

Comfort air flow control and proper energy use. Flexible Air Flow direction control by individual flap control:

-4 Flaps can be controlled individually (by standard wired remote controller*) -Versatile air flow control to cover a wide variety of demands.

*Pre-setting is required for this function at System Test-run procedure

Y3_{TYPE} 4-WAY Mini Cassette

Mini semi concealed cassette

the nanoe $^{\text{TM}}$ X website for the Mark 3

Optional accessory

ADC

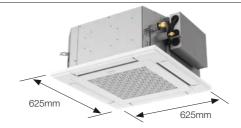

Technical focus

- Mini cassette fits into a 60 x 60 cm ceiling grid
- Powerful drain pump gives 850 mm lift
- Multi-directional air flow
- Easy installation

- DC fan motor with variable speed and a new heat exchanger ensures efficient
- nanoe™ X : 100x for CAC (100 times more nanoe™ particle for wide commercial space). Inside cleaning by 100x nanoe™ + dry control

Compact design

Thanks to advanced Panasonic design the panel is a compact 625 x 625 mm, offering elegant, unobtrusive installation even where space is limited.

Lighter and slimmer, easier installation

limited spaces and tight spots.

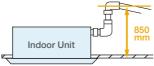

Individual flap control

Keep everyone comfortable by directing air where it's needed and away from where it isn't with individual flap control.

A drain height of up to 850 mm from the ceiling surface

The internal pump allows the drain pipe to be elevated up to 850 mm above the base of the unit.

L1 TYPE 2-WAY Cassette

Optional accessory

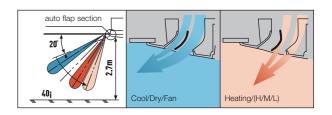

Technical focus

- Airflow and distribution is automatically altered depending on the operational mode of the unit
- Drain up is possible up to 500 mm via the built-in drain pump
- Simple maintenance

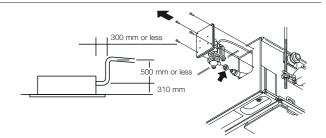

Auto flap control

Airflow and distribution is automatically altered depending on the operational mode (cooling or heating) of the unit.

Drain up is possible up to 500 mm via the built-in drain pump.

Maintenance of the drain pump is possible from both sides, from the left side (piping side) and from the inside of the unit.

Simple maintenance

The drain pan is equipped with site wiring and can be removed. The fan case has a split construction, and the fan motor can be removed easily when the lower case is removed.

- Suitable for standard and high ceilings
- Built-in drain pump provides 590 mm lift from ceiling
- Easy to install and maintain
- Hanging height can be easily adjusted
- Uses a DC fan motor to improve energy-efficiency

Drain height

A built-in drain pump provides up to 590 mm lift from ceiling height for flexible install options.

With 3 types of air-blow systems, the units can be used in various ways.

(1) One-direction "down-blow" system

Powerful one-direction "down-blow" system reaches the floor even from high ceilings (up to 4.2 m).

(2) Two-direction ceiling-mounted system

"Down-blow" and "front-blow" systems are combined in a ceiling-mounted unit to blow air over a wide area.

(3) One-direction ceiling-mounted

This powerful ceiling-mounted "frontblow" system efficiently air-conditions the space in front of the unit (Additional accessories required)

Energy-saving technology Delivering top-class efficiency

Optimization of the shape of the casing and fan assures bigger air flow and higher

Energy-saving performance is top class in the industry.

Comfortable, long-distance air flow distribution

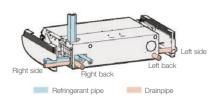

The shape of the outlet has been optimized to provide long-distance air flow distribution. Even in deep spaces, air flow reaches every corner for exceptionally comfortable air conditioning.

High Ceiling Setting	Air flow distance				
*Setting by remote control	112	140	160		
4.3 m	12 m	13 m	13 m		

*Results are based on

Multiple piping directions for flexible installation

The 5-directional drain pipe and 3-directional refrigerant pipe make installation much easier. And the neat fit with walls and ceilings assures more installation flexibility.

Smart Connectivity and Control Solutions

Panasonic offers a range of smart connectivity and control solutions for residential and

For Residential

Panasonic Comfort Cloud

Personal Control Solutions **Panasonic Comfort Cloud**

Remotely manage and monitor multiple air conditioning units in your home

> Easily control and access all features of the air conditioning units with smart centralised control.

CZ-CAPWFC1

Network adaptor. Available for all types of VRF indoor units.

For Light Commercial

Panasonic Comfort Cloud

Connectivity+

Cost effective Energy **Management Solution**

Multiple location control at your convenience with Comfort Cloud

Gain control of multiple zones and sites intuitively adjusting temperature by areas with differentiated user rights settings.

- Indoor Air Quality(IAQ) and efficient energy usage with VRF Smart Connectivity+
 - Ultimate cooling comfort with sensing technology and automatic IAQ control.
 - Simplified Plug & Play installation with BMS connection for better energy consumption.

Wide Range of Smart Control Solutions for All Needs

Whether you need to control multiple sites, a single office, or your home, we offer a range of innovative smart control solutions for a variety of needs.

Panasonic Comfort Cloud

Intuitive and scalable air conditioning control solution using a personal mobile device.

VRF Smart Connectivity+

Offers efficient energy management with high indoor air quality(IAQ) control.

Panasonic AC **Smart Cloud**

Monitor and manage energy consumption of multiple location through a cloud computing system.

For Multiple Building Management

Panasonic AC Smart Cloud

Full Control of All Installations From A Single Internet Connection **Panasonic AC Smart Cloud**

- Manage and monitor energy consumption patterns
 - Analyse energy usage, running time and optimise temperatures to reduce energy costs.
- Centralised control solution with zero downtime

Receive real-time status updates to prevent breakdowns.

Flexible and scalable solution for expanding businesses and multi sites

Adaptable solutions that can easily be upgraded for new features, meet user demand and better IT management.

Panasonic Comfort Cloud Control air conditioning units from wherever and whenever with your smartphone, by using Panasonic Comfort Cloud and WLAN smart adaptor. This scalable solution is ideal for one system, one site or multiple locations. Coupling the adapter with the already feature rich systems, makes it an ideal solution for both residential and commercial applications. Panasonic **Comfort Cloud** For Residential **For Light Commercial**

Gain control of multiple zones and sites

intuitively up to 200 indoor units.

Panasonic Comfort Cloud features

From 1 to 200 units

User can control up to 200 indoor units. 10 different sites, with up to 20 units / groups

Multiple User

The Panasonic Comfort Cloud App allows multiuser access control. Restrict user access to specific units.

Easy Scheduling

Complex weekly scheduling made simple. Not only for one units, but across multiple sites and from a smartphone.

Error Codes

Error code notification through the App, provides early notification and allows for faster repair.

Application examples

Centralised control from reception.

Multiple location control for small businesses.

System configuration

Network Adaptor

CZ-CAPWFC1

CZ-CAPWFC1: Available for all types of VRF

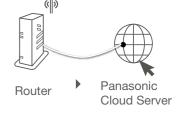

Connection Diagram

Indoor Unit

In conformity with IEEE 802.11

WLAN smart adaptor specification

CZ-CAPWFC1

	OZ-OALWIOT
Input Voltage	DC 12V (Supplied from indoor unit)
Power Consumption	Maximum 2.4W
Size [H x W x D]	120 x 70 x 25mm
Weight	190g (including communications lines)
Interface	Wireless LAN
Wireless LAN Standard	IEEE 802.11 b/g/n
Frequency range	2.4GHz band
Encryption	WPA2-PSK(TKIP/AES)
Operation range	0-55°C, 20 - 80RH%

Scan QR code to download free Panasonic Comfort Cloud App

Compatible Device and Browsers 1. IOS 9.0 or above 2. Android™ 4.4 or above

Remotely manage and monitor air conditioning units from anywhere anytime.

VRF Smart Connectivity+

Through thorough energy management, Panasonic's VRF Smart Connectivity+ is a completely new, state-of-the-art solution providing energy saving and comfort as well as simple installation, operation and running.

Dramatic reduction of OpEx with

outstanding IAQ.

3 built-in sensors: Temperature, RH and occupancy.

ZigBee wireless sensors:

CO₂ / temperature / RH%,

window / door, ceiling / wall / water leakage.

Relay Pack, Hotel Room Controller.

User-/owner-friendly.

Colour touch screen.
Simple and easy to use.
22 languages.
Easy-to-understand error description.

Ultimate customisation.

Customisable colour background.
Custom display/icons, messages.
Programmable logic (also stand alone).

Various controls and various external connection devices.

Easy design and Plug & Play to reduce CapEx.

Simple Plug & Play VRF connection to Building Energy Management System (BEMS).

Stand alone or BEMS connected. Easy installation of ZigBee sensors.

VRF Smart Connectivity+ offers efficient energy management and a new air conditioning control solution with high IAQ (indoor air quality).

Panasonic

Energy management system for rooms.

Each room is monitored by high-precision sensors, making it possible to make every room's temperature comfortable without wasting energy.

Management system for the entire building.

A Building Energy Management System (BEMS) can also be connected for Plug & Play centralised control of the building's entire energy consumption.

1 Quality air control

Optimum IAQ is realized using the CO_2 and humidity sensors. The interior environment remains comfortable, while heating and cooling costs are minimized. The CO_2 sensor can control ventilation systems, which contribute to improving the room's air quality.

2 Easy installation and integration

A remote controller is all that's required for occupancy control and optimum automatic indoor air quality (IAQ) control. Simple operation with a rented interface further contributes to increased energy efficiency and productivity for reduced capital expenditure (CapEx) and operating expense (OpEx).

3 Other equipment control

One room controller manages various devices including lighting and the blinds. A ventilation system and other external connection devices can be connected by using HRC or SE8350 so that various control is possible with this controller alone, even without BMS.

Door/window sensor.

Door and window contact detection sensor to monitor opening and closing.

Wall/ceiling motion/temperature/humidity sensor.

Wall and ceiling sensor to detect the presence or absence of occupants.

 ${\rm CO_2}$ /temperature/humidity sensor.

Monitor indoor air quality, review data on interfacing devices, and control fresh air inside customisable zones.

Water leakage sensor.

Two sensing pads under the body activate when water is present between the two pads Detecting the water, the sensor reports the event to the controller (and BEMS).

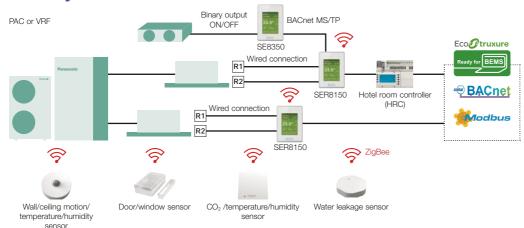

Hotel Room Controller (HRC).

The Hotel Room Controller controls connected guest room devices and aggregates data, making it visible to guest room and property management systems.

VRF Smart Connectivity+

Energy management system for rooms

By installing a wall/ceiling motion temperature sensor, window/door sensor, and CO₂ sensor in the room, ideal, waste-free air conditioning is achieved.

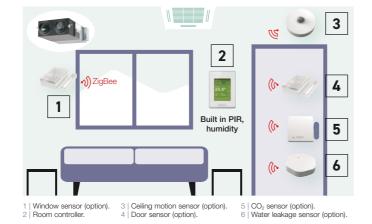

Sensing and control technology

Using sensors from Schneider Electric, high-quality occupancy control and automatic IAQ control are realised. The sensors detect the presence or absence of occupants, and the opening and closing of doors and windows to achieve the most efficient energy management for exceptional air-conditioned comfort.

Flexible installation is possible to match different applications and building features such as walls, ceilings and proximity to doors and windows. No wiring means extra installation versatility.

Batteries last for up to five years (10-year battery for CO₂ sensor) and are easy to install and replace.

Up to 5 year battery life (batteries included). Battery life of CO₂ sensor up to 10 years. Battery level data point.

Smart management solutions

1 Hotels

Room key card or key cardless solutions for hotels. The SER8150 and ZigBee sensor automatic detection function offer optimal air conditioning regardless of whether there is a hotel room key or not. Sensors detect the presence or absence of occupants and the opening and closing of doors and windows for the optimum air-conditioned environment guests expect. Automatic control ensures the most efficient operation when guests are away or when windows are open. This contributes to an appreciable reduction in operation costs.

2 Small and medium offices

CO₂ sensors (option) and humidity sensors. CO₂ sensors (option) take measurements in units of ppm, and humidity sensors enable fine air quality control. This creates the most comfortable space for occupants while contributing to improved employee satisfaction.

3 Super markets

Humidity sensors.

Humidity sensors enable automatic dehumidification for the optimum IAQ regardless of climatic conditions. This creates an even more comfortable environment for customers, employees, and products themselves.

Innovative and unrivalled advantages

Colour and design to match office interiors.

Colour combinations and design can be set to match different facilities.

Easy-to-understand error description.

Error description during an emergency is easy to understand, enabling staff to respond quickly.

Customisation in 22 languages possible.

The display can be customised to match the native languages of guests to enable smooth, stress-free communication for hospitality at its finest.

Programmable logic.
Full customisation of remote controller logic possible, and updating to match conditions.

Panasonic AC Smart Cloud

Key functions and uniqueness

Multi site monitoring.

• It doesn't matter how many sites you have, easy to manage, operate, compare sites, locations, rooms,

Schedule setting.

• Yearly / weekly / holiday timer setting as you want

Powerful statistics for energy savings.

· Power consumption, capacity, efficiency level can be compared with different parameters (Yearly / monthly / weekly / daily bases)

Maintenance notification.

- · Error notification by email and with floor layout
- · Maintenance notification of PAC / VRF outdoor units
- · Remote service checker function

User customisation1.

Site administrator can create users as desired and assign customised profiles.

Energy optimisation Administrator has a full acc

Owner of Hotels

Facility manager: B Energy optimisation

Facility manager: 0

Flexible and scalable solution

- · Energy saving
- · Zero downtime
- · Site(s) management

Centralise control of your business premises, from wherever you are, 24/7/365. It doesn't matter how many sites you have, or where they are! The AC Smart Cloud system from Panasonic allows you to have complete control of all your installations, from your tablet or from your computer. In a simple click, all your units from several locations, receive status updates in real-time of all your installations, preventing breakdowns and optimising costs.

Flexible solution for your business.

Scalable solution for your business.

Small to large 1 to multi sites Upgrade features

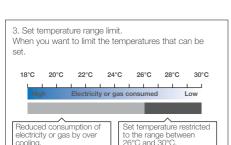

* Customised to meet user demand / Continuous upgrades: new functions and product introductions / IT smart management

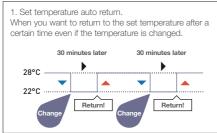

Panasonic AC Smart Cloud offers continuous improvement always thinking about users

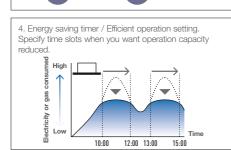

New e-CUT function

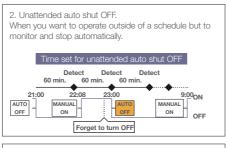

E-CUT functions are newly available in Panasonic AC Smart Cloud.

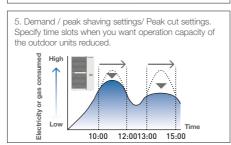

5 energy saving settings reduces automatically its energy consumption.

Main functions per user type

FSV Controllers FSV Controllers

FSV Controllers

A wide variety of control options to meet the requirements of different applications.

ECONAVI ECONAVI Sensor

Providing outstanding energy-saving performance, Panasonic's inverter VRF System can be connected to ECONAVI to detect when energy is being wasted. ECONAVI senses the presence or absence of people and the level of activity in each area of an office. When unnecessary heating or cooling is detected, indoor units are individually controlled to match office conditions for energy-saving operation.

Detection of the level of activity enables optimum power saving

Activity or absence of people at their desks and the level of activity in the office are detected in real time. Cooling or heating is automatically adjusted for optimum operation required to lower power consumption.

57

Sensor is remotely located to maximize the energy saving effect

Pillars, walls, cabinets and other fittings obstruct the sensors, reducing the area of detection and lowering the energy-saving effect. Taking into consideration blind spots, Panasonic enables the optimum layout for sensors in any office.

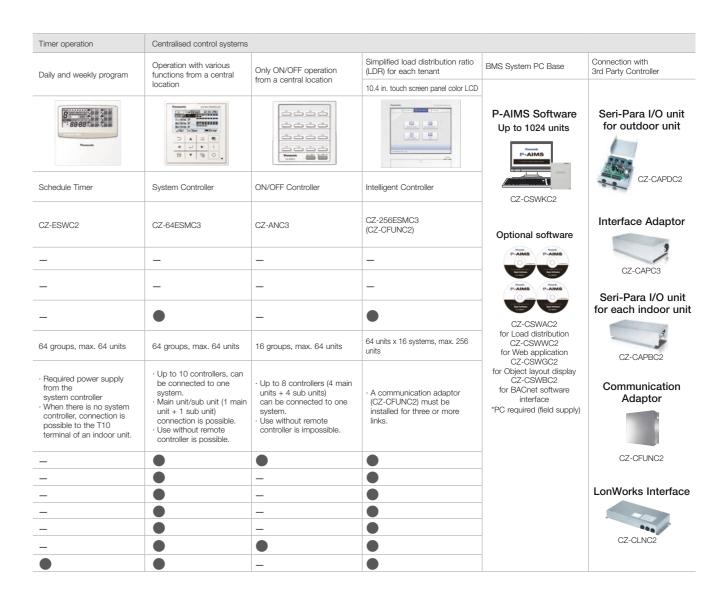

Remote temperature sensor

- This is a remote sensor which can be used with indoor units. Use it to detect the room temperature when no remote
- controller sensor or body sensor is used (connection to a system without a remote controller is possible).
- For joint use with a remote control switch, use the remote control switch as main remote controller.

Panasonic Total Air Conditioning Management System P-AIMS

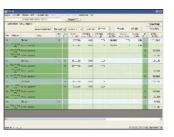

P-AIMS basic software / CZ-CSWKC2

Up to 1024 indoor units can be controlled by one PC

Functions of basic software

- Standard remote control for all indoor units
- Many timer schedule programs can be set on the calender
- Detailed information display for alarms
- CSV file output with alarm history, operating status.
- Automatic data backup to HDD

Panasonic

P-AIMS

With 4 upgrade packages the suit individual requirements. For Load Distribution software, digital power meter c/w pulse require (field supply)

The P-AIMS is ideal for large areas/buildings such as shopping centers, universities and office

CZ-CFUNC2

Each line can have max.8 communication adaptors units, and control max.512 units. In total, 1024 indoor units can be controlled by 1 "P-AIMS" PC.

Recommended computer specs (Desktop type) Operating system

Intel Core™ i5-6500 3.20GHz or higher (Recommended computer)
Intel Core™ i7-7700 3.60GHz or higher
(When installing Layout Display Software or using 512 or more indoor units)

Memory

SSD (Solid State Drive) 250GB or larger 1920 × 1080 (full HD) Recommended (1280 × 1024 (SXGA) minimum) Monitor 1920 × 1080 (full HD) Required (when installing Layout Display Software

500GB or larger (An external power supply type is preferable because the HDD will be used for backing up data.) External HDD

(when Web Software or BACnet Communication Software installed)

UPS (Field Supply) Select a UPS with a sine output wave form

Intelligent Controller (CZ-256ESMC3)

Touch panel

H 240 x W 280 x D 85 mm Power supply AC 100 to 240 V (50/60 Hz) LCD: 10.4 in. TFT, XGA(1024 x 768), LED backlight UPS (Field Supply):select UPS with a sine output

Product features

- 10.4 in., large, easy-to-use color LCD
- With smartphone like operations, such as swiping and flicking
- Enhanced energy-saving control functions
- Packed with demand functions
- Set temperature auto return settings, Auto shutoff, Set temperature range limit settings
- Energy visualization
- Displays electricity & gas usage distribution
- Supports energy-saving plans with graph display function

New features

- Max 256 indoor unit [4 links x 64 units] can be controlled. In case of three or more links Imore than 128 unitsl.
- a communication adaptor CZ-CFUNC2 must be installed for three or more links.
- Operation is possible as batch, in zone units, and in group units.
- ON/OFF, operation mode setting, temperature setting, for fan speed setting,

air flow direction setting (when used without a remote controller) and remote controller local operation prohibition [prohibition

- 1,2,3,4] can be done
- Graph display [trends, comparisons]
- ECONAVI ON/OFF
- Outdoor unit quiet operation ON/OFF
- Energy-saving functions
- Event control [such as equipment linkage]
- Limitation contents for prohibited operation

Prohibition means limitation of the operation contents from the remote controller. It is also possible to change the prohibition items.

Limitation contents (Limitations can be user defined)

There is no limitation for the operation of the remote controller. However, the contents will be changed to the contents of the controller operated last. (Lastpressed priority.)

The remote controller cannot be used for ON/OFF. (All other operations are possible from the remote

Prohibition 2 The remote controller cannot be used for ON/OFF, operation mode change and temperature setting. (All other operations are possible from the remote controller.)

Prohibition 3 The remote controller cannot be used for operation mode change and temperature setting. (All other operations are possible from the remote controller.)

Prohibition 4 The remote controller cannot be used for operation mode change. (All other operations are possible from

Remote control

The LAN terminal on this unit enables you to connectit to a network. Connecting to internet will enable you to operate the unit and check the status using a PC from remote location.

Power Distribution function

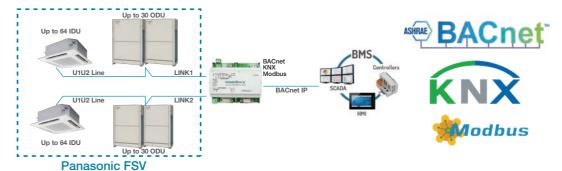

You can view cumulative electrical consumption per indoor unit or in a area.

Digital power meter with pulse require (Field Supply) for this function
