AG-HMX100
Digital AV Mixer

HD/SD and 3D Compatible Digital AV Mixer
Live Relays with a Com Versatile HD
The AG-HMX100 is a compact, all-in-one, digital AV mixer with a built-in HD/SD multi-format*1 video switcher, audio mixer, frame synchronizer and digital effector. It serves as an audio/video switcher, adds a variety of effects, and transmits signals - all by itself.

A Multi-View function displays all source images on a single monitor, while keeping the system configuration simple and clean. Users benefit from easy delivery, set-up and removal at event sites, as well as low-cost operation. Wide-ranging SDI (HD/SD), PC (DVI-I) and HDMI (HD only) inputs, versatile digital effects, and comfortable Matrix Menu operation join with advanced functions, such as control of Panasonic professional projectors,*2 to configure a low-cost system that supports a wide variety of applications, from live relays and broadcasting to production. The AG-HMX100 can also operate as a 3D video switcher with dual SDI inputs.*3 By combining it with several 3D cameras and 3D projectors, it can serve as a 3D live switching system for low-cost, easy-to-use, 3D image broadcasting and production systems.

- HD/SD multi video format compatibility.*1
- Digital interfaces of SDI (HD/SD) input/output and HDMI (HD) input.
- DVI-I input accommodates both motion and still images from a PC.
- Multi-View function displays Preview (PVW), Program (PGM), and all source images on a single monitor.
- A waveform monitor (WFM) is built-in, and source names and audio levels are superimposed on the monitor.
- Remote control of power on/off and shutter on/off for the Panasonic projectors.*2
- Supports switching of 3D images, using dual SDI inputs.*3

*1: Mixed operation of different video formats (1080i/720p, HD/SD and 50Hz/59.94Hz) is not possible.
*2: Limited to models with an RS-232C interface. *3: Effects are not supported.
HD/SD Multi-Format
High-Quality Image Processing
The AG-HMX100 supports 1080i/720p HD and SD images (see table below). A wipe pattern lets you switch between 16:9 and 4:3 aspect ratios. Full 4:2:2:4 digital component and 12bit internal process ensure broadcast-grade images.

**Supported Video Format**

<table>
<thead>
<tr>
<th>Video Input</th>
<th>Video Format</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>HD</strong> (SDI/HDMI)</td>
<td>1080/59.94i</td>
</tr>
<tr>
<td></td>
<td>1080/50i</td>
</tr>
<tr>
<td></td>
<td>720/59.94p</td>
</tr>
<tr>

</tr>
</tbody>
</table>

* Mixed operation of different video formats (1080i/720p, HD/SD and 50Hz/59.94Hz) is not possible. PC (DVI-I) can be input to any system format, but it would be resized to match and displayed.

HD/SD Digital AV Mixer Functions

7 Video Inputs with PC Image Support and 6 Video Outputs
- 7 video inputs: SDI (HD/SD switchable) x 4 channels, HDMI (HD only/HDCP and VIERA Link not supported) or video (composite) x 2 channels, and a DVI-I input capable of inputting motion or still images from a PC. This provides up to 7 channels of video input.
- 6 video outputs: 4 SDI outputs (Program (PGM), Preview (PVW), Multipurpose (AUX), and Multi-View), and 2 DVI-D outputs (Program (PGM) and Multi-View).

Transitions and Digital Effects
- Transitions: Over 100 wipe patterns and mixes combine with effects like chroma keying, luminance keying, DSK, and fading. M/E preview and DSK preview are also supported.
- Digital Effects: Built-in digital effects include mosaic, defocus, monochrome, still, strobe, multi-strobe, decay, paint, negative and mirror. Still, strobe and multi-strobe effects allow selection of field or frame displays.
Embedded Digital Audio and Analog Audio Mixing

- **10 audio inputs**: Select up to 8 audio inputs from 4 SDI embedded audio inputs (L/R), 2 HDMI embedded audio inputs (L/R), and 4 XLR audio inputs (L/R). You can mix the 10 audio sources, including AUX input and MIC input, using a fader control.
- **Audio output**: SDI embedded audio is output from PGM, PVW, and AUX terminals, and has XLR (L/R) and pin terminal (L/R) analog outputs.
- **Audio effects**: Pan, 3 band equalizer, voice changer (pitch/level), and mute.
- **Level meter**: Displayed as a Multi-View overlay on the LCD screen.

New Multi-View Function, Built-in Waveform Monitor

The Multi-View function and Multi-View output terminal (SDI/DVI-D) provide a split display of the PVW, PGM, and all source images on a single screen. Displays of the input signal names and audio level meters can also be overlaid. The built-in Waveform Monitor (WFM) function displays the waveforms of video Y signals, allowing multi-channel systems to be operated with a single monitor.

Matrix Menu and Rotary Switch

The large LCD panel allows easy monitoring of system status. The 5 column, 3 row matrix menu automatically displays setting items according to the operating status, so the relevant settings can be quickly checked or changed. Settings that have a large number of selections can also be quickly and intuitively displayed and set by using the rotary switch. This provides easy, comfortable settings control for the AG-HMX100’s many diverse functions.

![AG-HMX100 Rear](image)

Projector Control Function

The power switch and shutter for Panasonic professional projectors can be turned on and off by RS-232C remote control. This allows convenient projector use during live events.

Functions for More Comfortable Operation

- **Pattern preset**: Up to 7 transition patterns and 6 key patterns can be directly registered, for retrieval with a single touch.
- **Event memory**: Records the setting conditions of the effects. Over 100 settings can be stored in memory, and instantly retrieved with pattern numbers.
- **Key learn**: Records and retrieves the key frame settings (positions/levels/modifiers) and reproduces animation effects. Up to 20 patterns can be stored in memory, with a maximum of 20 frames per pattern.
- **Joystick controller**: Enables intuitive operation of effect position setting and color correction/color selection.
- **Numerical keypad**: For setting numbers, such as pattern numbers.

Versatile Interfaces

- **Tally**: Outputs support up to eight input sources. Ideal for live relays.
- **GPI**: Visual effects including key/transition, downstream key, and fading can be externally controlled with GPI trigger signal inputs.
- **AUX output**: Selects from PGM/PVW/Multiview output signals, or an SDI/HDMI input through-out signal.

Power-Saving Eco Design

- **Power-saving design**: HD images are supported, while power consumption is decreased by 15% compared to our previous SD-Type AG-MX70 model.
- **Power management**: This function automatically switches the power off when there is no input or operation for a preset period of time. Can be powered on with a secondary switch on the control panel.
A Professional HD 3D Production System

The AG-HMX100 Digital AV Mixer fully supports the Panasonic shift toward 3D world. Combined with the Panasonic AG-3DA1 Integrated Twin-Lens 3D Camera Recorder, and the 3D-compatible BT-3DL2550 Professional LCD Video Monitor, which lets you view 3D footage on-site, this professional HD 3D production system makes it easy to produce and transmit high-quality 3D images.

Supports Switched Transmission of 3D Camera Images

The AG-HMX100 can operate as a 3D video switcher with dual SDI signal inputs from 3D cameras. It comes with two pairs of inputs and one pair of outputs for 3D video signals. It is possible to configure a 3D live switching system by combining it with several 3D cameras and 3D projection systems. Both Simul and Side-by-Side 3D output methods are supported. When two AG-HMX100 units are connected, they can serve as a 3D video switcher for up to four 3D cameras.

*Only the switcher function operates. Effects such as ME cannot be used. Other functions, such as Multi-View, WFM, and title mix, are not supported. For details, visit the 3D special site. ([http://pro-av.panasonic.net/en/3d/](http://pro-av.panasonic.net/en/3d/))

### Switching specifications in 3D mode

#### specification 1: Simultaneous

3D Camera (A) (AG-3DA1 etc.)

3D Camera (B)

3D Camera (C)

3D Camera (D)

#### specification 2: Side-By-Side

3D Camera (A)

3D Camera (B)

#### specification 3: Simultaneous Combination

3D Camera (A)

3D Camera (B)

3D Camera (C)

3D Camera (D)

Supported signals: 1080/59.94i, 1080/50i, 720/59.94p, 720/50p, 1080/23.98PsF

*Please refer to the latest 3D Plasma Display Information at Panasonic website. <http://panasonic.net/proplasma/>
**3D x 4-Input System**

This 4-input switching system creates 3D content by using two P2 Mobile units to combine the images from three 3D cameras. When two AG-HMX100 units are connected, they can serve as a 3D video switcher for up to four 3D cameras. Dynamic 3D live videos can be displayed on a large screen for high-brightness, high-contrast 3D projection by using two professional DLP® projectors.

---

**3D Live Display System**

This system produces 3D live images by using two AG-3DA1 Integrated Twin-Lens 3D Camera Recorders and switching the image transmission for display on a professional DLP® projector. It is also possible to monitor the PGM image with the BT-3DL2550 3D-Compatible LCD Monitor.
**GENERAL**

- **Power Source:** 100 V ~ 240 V AC, 50 Hz/60 Hz
- **Power Consumption:** 60 W
- **Operating Temperature:** 5 °C to 40 °C (41 °F to 104 °F)
- **Operating Humidity:** 10% to 80% (no condensation)
- **Storage Temperature:** -20 °C to 60 °C (–4 °F to 140 °F)
- **Storage Humidity:** 10% to 80% (no condensation)
- **Dimensions:** 424 mm (W) x 197 mm (H) x 400 mm (D)

**VIDEO SPECIFICATION**

- **System Format:**
  - HD: 1080/23.98P (for 3D only)
  - 1080/59.94i, 1080/50i, 720/59.94p, 720/50p
  - SD: 480i, 480p, 576i, 576p

- **Sampling Frequency:**
  - HD: 1.23 GHz, PS/AC: 378.08 MHz
  - 1080/59.94i, 1080/50i, 720/59.94p, 720/50p
  - SD: 11.5 MHz, PS/AC: 6.75 MHz

- **Signal Processing:** 4:2:2:4, 12 bit Internal process

**AUDIO SPECIFICATION**

- **Sampling Frequency:** 48 kHz
- **Quantization:** 16 bit for HDMI Input, 24 bit for SDI Input, 20 bit for analog input
- **Frequency Response:**
  - -1.0 dB/1.0 dB at 20 Hz to 20 kHz (digital)
  - -1.0 dB/1.0 dB at 20 Hz to 20 kHz (analog)
- **Dynamic Range:**
  - THD: Less than –70 dB at 1 kHz, between any two channels (analog)
  - Cross Talk: Less than –80 dB at 1 kHz, between any two channels (digital)
- **THD:** Less than 0.05% at 1 kHz (digital), Less than 0.08% at 1 kHz (analog)
- **Dynamic Range:** More than 90 dB at 1 kHz (digital), More than 85 dB at 1 kHz (analog)
- **Frequency Response:** –1.0 dB/1.0 dB at 20 Hz to 20 kHz (digital)
- **20 bit for analog input
- **Quantization:** 16 bit for HDMI Input, 24 bit for SDI Input, 24 bit for analog audio
- **Sampling Frequency:** 48 kHz
- **Audio Input (AUDIO IN):** XLR: 4 sets (L and R), 4/0/–3 dBm switchable, balanced, 10 kΩ
- **Audio Output (AUDIO OUT):**
  - AUX input: Pin jack x 1 L and R, –10 dB, High impedance, unbalanced
  - Microphone input (MIC): M6 x 1, –40 dBV, 2 kΩ, monaural, unbalanced
  - Program input (PGM): XLR x 1 L and R, 400–3 dBm switchable, balanced, 10 kΩ
- **Audio Input (AUDIO IN):**
  - SDI (BNC) (Embedded Audio) x 4 sets
  - HDMI (Embedded Audio) x 1
  - HDMI (Embedded Audio) x 1

**Other Ports**

- **TALLY:** D-sub 9 pin, Open-Collector x 8 CH
- **Headphones:** M6 x 1, 8 Ω, stereo, unbalanced, –∞ dBu to –20 dBu
- **RS-232C:** D-sub 9 pin x 1
