Indoor Unit / E2 Type Indoor Unit / E2 Type

# E2 TYPE High Static Ducted

# Concealed duct / Air conditioning mode Optional accessory

# **Technical focus**

- Design flexibility thanks to high static pressure and large air volume
- DC motor equipped
- Power input 45% less (compared to E1 type)

- Discharge air temperature control to reduce cold drafts during heating operation
- Configurable air temperature control
- Available Fresh Air Intake mode (See page 29)

### 3-step static pressure set up

You can select between the three Static Pressure modes of 270 Pa/140 Pa/60(72\*) Pa for extra installation flexibility.

### Max. 270Pa static pressure setting

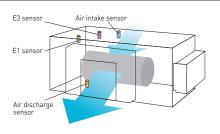

A maximum static pressure setting of a high 270Pa enables the use of long ducts for installation in a wide range of spaces. Ideal for largescale offices, restaurants and other facilities.

### Sensible cooling 5-10% improved

New heat exchanger with \$\phi\$ 7mm pipe that increases the heat transfer surface to improve sensible cooling (5-10% improvement)

# Discharge air temperature control

- Equipped with 4 sensors (Intake/ Discharge)
- Able to control discharge air temperature for accurate room temperature control.
- Possible to reduce cold drafts during heating operation.

# E2 TYPE Energy Saving High Fresh Air Ducted

# Concealed duct high-static pressure

Optional accessory

CZ-RTC6W

65

## **Technical focus**

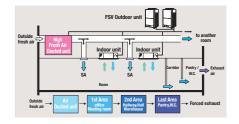

- 100% fresh air intake for ventilation purpose
- Design flexibility with high static pressure and large air volume
- DC motor equipped

- Power input 45% less (compared to H1 type)
- Discharge air temperature control to reduce cold drafts during heating operation
- Configurable air temperature control

## High fresh system

High Fresh System enables delivery of fresh outside air at almost the same temperature and humidity as indoor air without putting a burden on air conditioning.

\* Capable of treating outdoor air only. Indoor air conditioner units are required to adjust indoor air temperature.

## Mix operation unit with standard indoor units

Possible to combine High Fresh Air ducted indoor unit and standard air ducted indoor units. When other indoor units are connected in same circuit, keep following capacity ratio. E2 type/Outdoor unit < 30%, and Total of indoors(incl. E2)/outdoor <100%
