CHANGING PHOTOGRAPHY

Cinematic Performance, Boundless Creativity.

The full-frame camera unlocking creative possibilities for cinematographers.

The LUMIX S1H is a full-frame mirrorless camera for film production, scaled to a hand-held design without compromising professional-level standards.

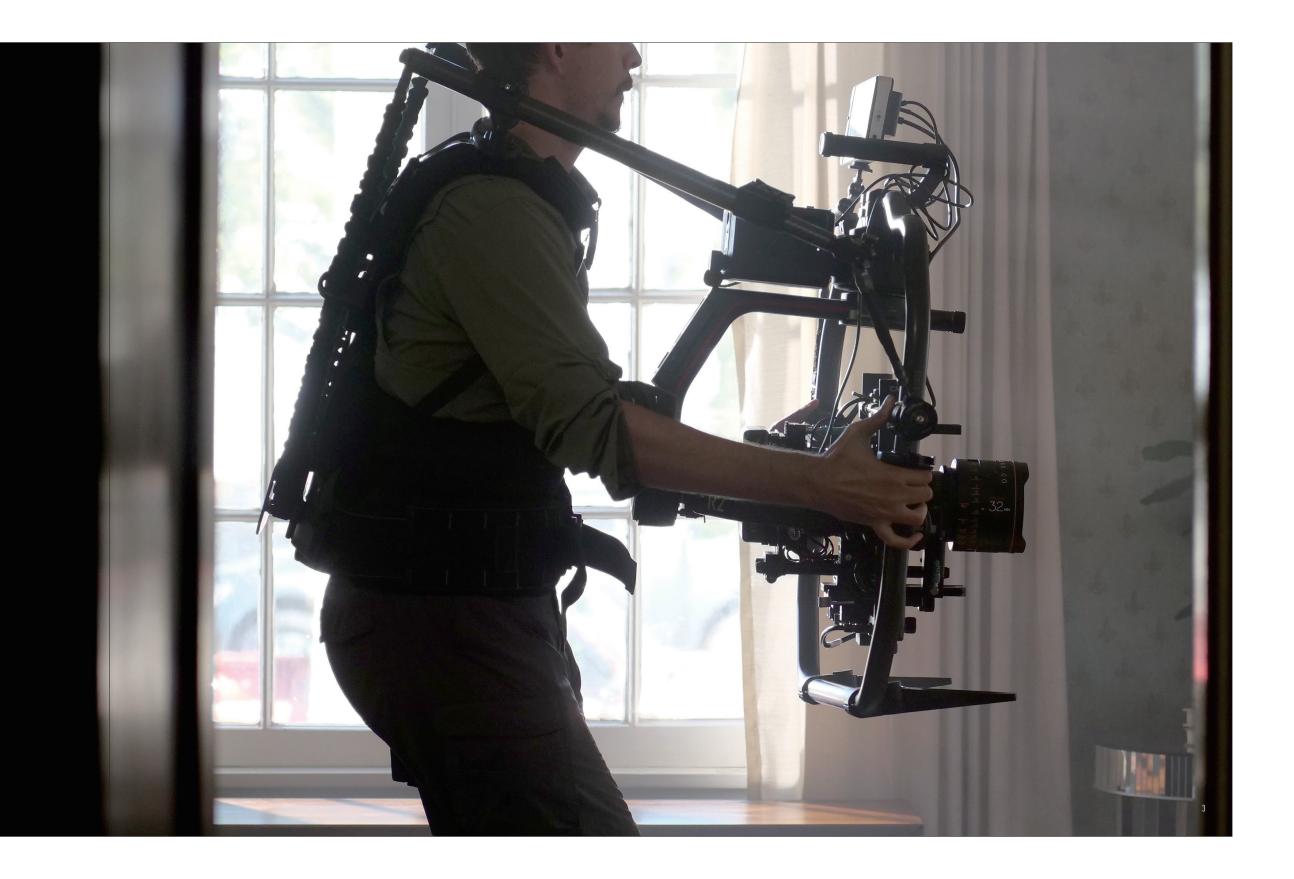

It offers extensive recording modes and cinematic image quality to meet the high demands of today's creators.

With superior functionality that slots effortlessly into the professional workflow, the S1H is also designed for active filming in the field when attached to a gimbal or drone.

The LUMIX S1H combines cinema industry performance, refined by Panasonic, with the high mobility and functionality of LUMIX mirrorless cameras.

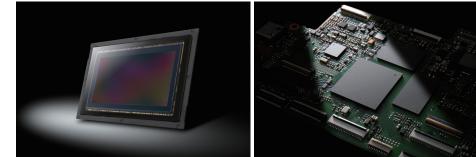

CINEMATOGRAPHY ESSENTIALS

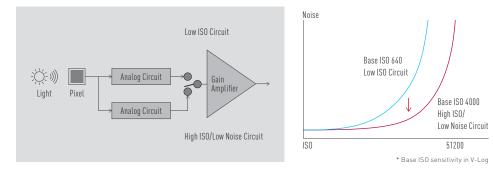

Best Combination of 24.2MP CMOS Sensor and Venus Engine

The LUMIX S1H gives you breathtaking image quality without compromise. By delivering ample light condensation per pixel, the 24.2-megapixel CMOS sensor offers a wide dynamic range and sharp, natural expression even at high sensitivity settings. Together with the low-pass filter, the sensor delivers high resolution with minimal moire. Leveraging the power of the Venus Engine, the camera offers an impressive maximum sensitivity of ISO51200.

Newly-developed Dual Native ISO

The S1H is equipped with Dual Native ISO sensitivity, a revolutionary technology that first featured on Panasonic's professional video cameras, notably the flagship VariCam. Through a process that reads the sensor more efficiently, Dual Native ISO offers the advantages of very high sensitivity for low-light shoots while suppressing noise levels. As such, the camera can switch from a standard sensitivity to this higher sensitivity with almost no discernible noise degradation. With 640 and 4000 base ISOs in V-Log, the S1H allows today's cinematographers phenomenal flexibility on set when they wish to capture more extreme lighting scenarios.

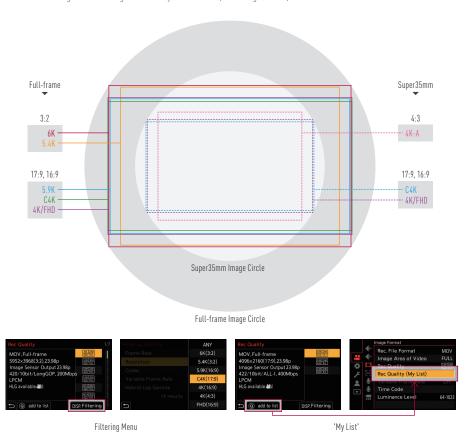

Two dedicated circuits are provided for each pixel. Sensitivity is set prior to the gain amplifier. \longrightarrow High sensitivity noise is reduced.

Multiple Formats and Aspect Ratios with Full Range of Video Recording Modes

Notably, these include full-area 3:2 6K24p, C4K (4,096 x 2,160) and anamorphic modes. The 35 mm full-frame CMOS sensor built into the S1H offers 6,024 x 4,016 effective pixels at stunning 6K resolution across its entire area. This is therefore a full-frame digital camera that, for the first time in the world, achieves video recording at 6K/24p and 5.9K/30p (3:2 or 16:9 aspect ratios respectively).* Even when down-sampling images to C4K (or less) the S1H delivers superior quality resolution. The various formats above can be encoded with superior HEVC compression or the rich tones of 4:2:2 10-bit. High quality data up to 4:2:2 10-bit can also be output via HDMI onto an external video recorder when set to 10-bit recording mode. The HDMI output is enabled simultaneously with the internal recording. The S1H covers every recording mode and option to fully satisfy professional requirements. And as the filtering menu has been streamlined, it is now much easier and faster to find and select the precise mode you want. For quick recall, use the 'My List' feature to register those you use most frequently.

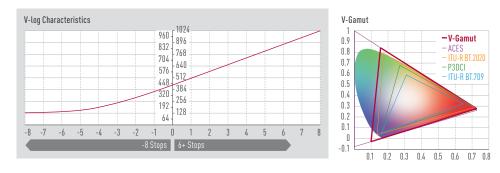

* For a full-frame digital interchangeable lens system camera, as of August 27th, 2019. Panasonic research.

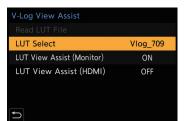

V-Log / V-Gamut

The S1H features V-Log / V-Gamut with a wider 14+ stops of dynamic range. This is compatible with the Cinema VariCam Look and precisely captures everything from shadows to highlights, as well as faithfully reproducing the color and texture subtleties of human skin. Designed also for color management consistency, S1H-recorded footage is compatible with V-Log footage recorded on VariCam/AU-EVA1 or S series cameras as well as V-Log L footage shot on the LUMIX GH5/GH5S. The V-Log View Assist enables you to view a simulation of the final look (hue, saturation and brightness) of your video image in camera using the Look Up Table (LUT) while you are shooting. With Look Up Table (LUT) installed on the camera, the video you record with V-Log can be modified to match the characteristics of your monitor display. The VariCam IDT for ACES can also be applied to footage shot on the S1H. 35 conversion LUTs and artistic looks for VariCam® cinema cameras and the AU-EVA1 can be downloaded from Panasonic's official web site.

https://pro-av.panasonic.net/en/cinema_camera_varicam_eva/support/lut/index.html

V-Log View Assist

Robust Video Expression Features (VFR. HFR)

From basic functionality to advanced technology, the S1H is designed to offer outstanding, multifaceted video performance. VFR (Variable Frame Rate) functionality supports both overcranking and undercranking. Users have access to 2.5x slow (24p/60 fps) in C4K/4K and 7.5x super-slow (24p/180 fps) in FHD.* HFR (High Frame Rate) videography now includes autofocus and audio recording, allowing users to create slow-motion video in post-production thanks to 48p/47.95p recording in Cinema4K/4K and 120p/100p in FHD.

* The degree of effect varies depending on the recording format and frequency, and the angle of view narrows if a frame rate over

HDR Video & HLG View Assist

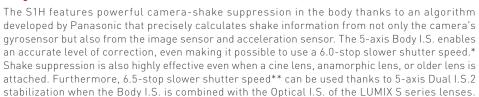

HDR (High Dynamic Range) video recording is available, processing both the brighter and darker parts of an image together, just as the human eye naturally perceives them. The camera also records video with a designated gamma curve compatible with ITU-R BT.2100, as well as offering the option of Hybrid Log Gamma (HLG) in Like2100.

The HLG View Assist output mode allows you to visually confirm the gradation and exposure of video shot in HLG mode, depending on the monitor or viewfinder installed in the camera. It can also be used for stills shot in HLG (HLG Photo mode).

Standard Dynamic Range (SDR) High Dynamic Range (HDR)

This compensates for even larger movements that were conventionally uncontrollable. * Based on the CIPA standard [Yaw/Pitch direction: focusing distance f=50mm, when S-X50 is used.]

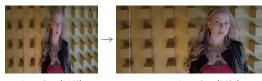

** Based on the CIPA standard [Yaw/Pitch direction: focusing distance f=105mm when S-R24105 is used or focusing distance

f=200mm when S-R70200 is used]. Firmware must be updated to the latest version.

Anamorphic Desqueeze Display

If you are shooting with an anamorphic lens that compresses the image width to an almost unrecognizable extreme, the S1H camera allows you to view a simulation of the final 'desqueezed' CinemaScope format (2.39:1 or 2.35:1), in one of five magnification options, 1.3x, 1.3x, 1.5x, 1.8x or 2.0x, stretched out on the camera monitor. This lets you decide the composition you want, and better visualize the impact of the final project.

Time Lapse Video with 4K 60p/50p

The S1H supports interval capture to create time lapse video in the camera body itself and is also capable of 4K 60p/50p, with smooth exposure transitions across the whole video sequence that eliminate abrupt brightness changes. Still photos can also be shot with LIKE709 to save time making color corrections later, and also shot with V-Log for greater workflow flexibility.

SS/ISO, Angle/ISO, SS/dB Display

The shooting information to be displayed can be changed from shutter speed to shutter angle instead, or from ISO to Gain. Panel contents and layout have been designed by carefully considering how professional photographers, filmmakers, and video creators instinctively work from years of experience.

Luminance Level Adiustment

Select the luminance range from 3 settings to match video editing and playback, and control both super whites and super blacks. When recording in 8-bit, set the range to 16-235 (video levels 0 to 100% on IRE scale) or preserve the super whites with 16-255 (video levels 0 to 109% on IRE scale).

select between 0-1023, 64-940 or 64-1023.

- When the recording format is set to AVCHD, the options are 16-235 and 16-255.

Waveform Monitor Display / Vector Scope

Use these features to easily check the brightness, luminance, hue and saturation (color component and chrominance) while you are shooting. The built-in Waveform Monitor (WFM) quantifies and displays the signals being recorded as visual wave data. This is especially useful for determining correct exposure in situations where relying on the eye alone is not possible, or when needing to comply with a precise broadcast specification. Vector Scope allows you to view and measure waveforms as vectors and check the color phase and saturation on the recording screen. You can instantly judge if you have the right colors or not, and adjust the white balance accordingly. Vector Scope is also useful when you want to match the saturation of multiple pieces of footage.

Waveform Monitor

Various Assist Function

The assist functions on the S1H provide powerful support for on-site video shooting, such as adjusting super black or super white, etc.

Luminance Spot Meter: This is useful for checking 18% gray in V-Log recording. The brightness can be displayed numerically.

Zebra Pattern: Image areas brighter than the benchmark value are indicated with stripes. You can also set the benchmark value and range width so that the stripes are only shown within the brightness range you specify. Brightness areas can be set individually with ZEBRA1 and ZEBRA2, and displayed simultaneously.

Video Frame Marker: A frame delineating your selected aspect ratio is displayed on the camera screen. This means that, while recording, you can see the same angle of view that will be achieved when the image is cropped in post-processing.

Segmented File Recording: Longer video takes can be recorded as a series of 1-minute data segments, saved as a single group. Dividing the recording up using this option safeguards against losing data, for example, if the battery were to be accidentally disconnected.

Luminance Spot Meter

Zebra Pattern

The third option, 0-255, covers both, also known as Data Levels.

These selections make it easy to match luminance levels in projects that combine both photos and video. For 10-bit recording you can

- When the recording format is set to MOV or MP4, options are 0-255, 16-235 and 16-255.
- When Photo Style is set to 'Hybrid Log Gamma', the setting is fixed at 64-940.
- When Photo Style is set to 'V-Log', the setting is fixed at 0-255 in 8-bit or at 0-1023 in 10-bit.

SUPERB RELIABILITY

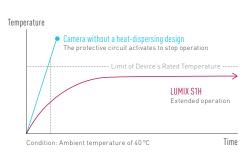

Non-stop Recording Supported by Heat Dispersing Fan

The S1H has unlimited video recording capability for all recording modes within the recommended operating temperatures, (-10°C to 40°C). To dissipate the heat generated by recording non-stop, a highly-effective and independently operating fan is now included within the body — an industry first.* The filmmaker can now concentrate on capturing every minute of the scene without the worry that recording may stop suddenly. The fan is designed for minimal vibration and low noise, operating in four modes to suit the type of shoot and shooting environment and, as with the S1H body overall, is dust- and splash-resistant.**

- * For a full-frame digital interchangeable lens system camera, as of August 27th, 2019.

 ** Dust and splash resistance does not guarantee that damage will not occur if this camera is subjected to direct contact with dust and water.

Dust / Splash / Freeze Resistant*

The magnesium alloy full die-cast frame is highly durable, while sealing helps protect every seam, dial, and button. The overall system is dust- and splash-resistant.* designed furthermore to operate at temperatures as low as -10°C.

* Dust and splash resistance does not guarantee that damage will not occur if this camera is subjected to direct contact

Double Memory Card Slot

The double memory card slot is compatible with SD Memory Cards (UHS-II / V90). Allocation Record mode allows you to specify the card slot to be used for recording different image formats. The extra card slot is also convenient for recording long videos or as a backup. Relay Recording mode relays recording to the other card slot after the first card runs out of free space during recording. Backup Recording mode* records the same data to the two cards.

* Cannot be used with AVCHD format.

USB Power Supply / Power Charging

This feature allows you to supply power to the camera while charging the battery.* The S1H has been designed with safety considerations and with regard to battery life, charging time and method. The 7.4-V 3,050 mAh high-capacity battery can be quickly charged via USB PD (USB Power Delivery) using the bundled USB 3.1 Type-C** cable. A fully charged battery lasts for about 2 hours, depending on the demands of the shoot. A USB 3.1 Type-C** adaptor is included that is compatible with the USB PD standard. It also realizes high-speed data transfer.

* Battery must be installed in camera and retain some charge for feature to work.

** USB Type-C (TM) and USB-C (TM) are trademarks of USB Implementers Forum.

Durable Shutter & Fast Flash Synchro

The high-precision shutter is designed with increased rigidity and is durable to around 400,000 cycles. It also boasts an external flash sync speed of 1/320 seconds maximum.*

PERFECT OPERABILITY & AGILITY

New Tilting 3.2-inch Free-angle Rear Monitor

This rear-mounted monitor is a touch-sensitive LCD with a superbly bright 2.33-million-dot high resolution that is still clearly visible in sunny outdoor conditions. The combination of a tilting and swivel mechanism makes unusual compositions and creative angle shots easy to frame. This also avoids the monitor becoming entangled in any connected HDMI or USB cables.

Status LCD

The 1.8-inch high-resolution Status LCD is designed for low power consumption yet high visibility outdoors. The large sub-liquid crystal display offers 303 x 230 dots resolution and instant access to information on the most relevant settings, stills or video, with a black/white switchable background. Backlighting allows you to monitor settings in the dark and even view key data when power is off thanks to the LCD's low-power 'Memory in Pixel'.

5.76-million-dot Resolution Real View Finder

This Real View Finder boasts 5.76-million-dot resolution, the highest level among DSLMs. Clarity and sharpness is so vivid that you may feel you are directly viewing the subject with your own eye. This greatly aids concentration. With a lens designed for minimum distortion from center to the corners and high magnification of 0.78x, the Real View Finder supports both perfect framing and high-precision focusing. The high-speed, high-precision OLED (Organic Light-Emitting Diode) for the LVF achieves a smooth display at 60 fps/120 fps (switchable). A high-speed response with minimum time lag of approximately 0.005 sec, as well as 10,000:1 high contrast, allow exceptional visibility. In addition, the 0.78x magnification ratio can be switched to 0.7x or 0.74x according to the shooting situation.

Convenient Controls, Intuitively Positioned

Fn Buttons: Most of the hard buttons can be assigned to other modes from various options so that you can customize the camera as you wish. Different functions can be set for both recording and for playback.

Sub REC Button: The Sub REC button on the lower camera front, almost opposite the top-located Main Rec button, is positioned for easy left-hand access when your other hand is busy handling a shoulder rig, or gimbal, and can't reach the Main Rec button.

Preview Mode Button: Depress the Preview Mode button to make last moment fine adjustments to the bokeh effect or brightness just before you shoot.

Lock Lever: By flipping the operation lock lever, you can prevent unintentional operation of specific controls, including the cursor (menu/set/control dial), joystick, touch screen and dials (front and rear), etc.

Joystick: The joystick moves freely in eight directions, allowing you to intuitively select the focus area with just your thumb. You can concentrate on your subject more easily and quickly get the shot you want.

Button Illumination: The buttons are illuminated to enable accurate operation in the dark.

EXPANDABILITY

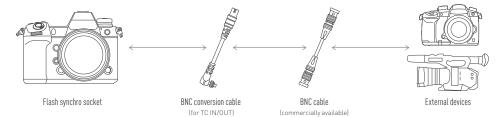

HDMI Type A & Cable Holder

The S1H includes a versatile and durable HDMI Type A terminal. This comes with a bundled HDMI cable holder which prevents any disconnection mishaps during busy shoots. Conveniently, the camera's rear monitor is a flip-type so the cable and the holder never get in the way of monitor operations.

Time Code IN/OUT

The S1H is fitted with a TC IN/OUT terminal. By setting up TC synchronization – through the flash synchro socket and bundled BNC conversion cable with optional BNC cable – it is easy to carry out non-linear timeline editing of footage shot with multiple cameras. Indeed, TC can be synchronized amongst an external master, S1Hs and other external devices.

Versatile Sound Setting Functions and Φ3.5mm MIC Jack

Mute Sound Input: This new feature allows the sound input to be muted.

Sound Rec Gain Level: When set to LOW, the sound input can be suppressed for recording in environments where the volume is especially loud, (-12 dB).

Sound Rec Level Adjustment: The input level is adjustable across 32 levels. (-18 dB to +12 dB or mute).

Sound Rec Level Limiter: The S1H automatically adjusts sound input levels, and minimizes any crackling distortion at higher volumes. In addition, when using built-in microphone or external stereo microphone, the Dynamic Range Enhancer, an advanced signal processing algorithm, achieves both low distortion and high sound quality. You can now record far greater presence and reverberation for a more real audio experience. They can be mainly achieved by two processing, one for expanding the audio dynamic range* and the other for dividing the frequency band which suppresses the signal only in the necessary frequency band and leaves the other bands unchanged.

* Approximately twice that of the previous DC-S1 model.

3.5 mm MIC LINE Input: For greater flexibility on video shoots this input makes it possible to record sounds from an external audio device. They are allowed to input MIC or LINE levels by selecting from the mic socket options.

Special Mic: You can set the sound pickup range of the Stereo Shotqun Microphone DMW-MS2. (sold separately)

XLR Mic Adaptor

This accessory allows you to connect an XLR microphone and achieve high-quality stereo sound including high-res sound recording in 96kHz/24 bit. In addition to recording lip-synched vocals, this accessory lets you control volume, gain, low cut, automatic level, and other audio functions useful in professional videography. This accessory also supports the use of plug-in power.

01 LINE/MIC/+48V switch 05 CH 1/2 switch 02 Gain switch 06 ALC switch

03 LOW CUT switch 07 XLR terminal (INPUT 2)
04 AUDIO LEVEL dial 08 XLR terminal (INPUT 1)

Wi-Fi / Bluetooth

Faster 5GHz* and conventional 2.4GHz Wi-Fi® are both supported. Having both bands ensures you always have a stable connection, even in an unstable network environment caused by radio or similar interference. Bluetooth® 4.2 (Bluetooth Low Energy) is supported so you can easily pair with a smartphone or tablet – and with energy saving enabled too. When operating remotely using the installed Panasonic Image App, you stay connected even when on standby to launch your device and always with minimal battery consumption.

LUMIX Sync

With Panasonic's dedicated LUMIX Sync app (Android / iOS), you can remotely control the REC button of the S1H and access a wide range of settings from your smartphone or tablet. The software also enables transfer of photos to a smartphone or laptop by just pressing the Q button on the camera rear. Connection by Bluetooth or Wif-Fi is easy. The Wi-Fi 5GHz (IEEE802.11ac) transfers your data at high-speed.* You can even use LUMIX Sync to copy settings from one camera to another,** which is useful when managing multiple cameras in a shoot.

LUMIX Tether

The LUMIX S Series allows tethered shooting via USB with "LUMIX Tether" PC software. It enables camera control and shooting while checking the image on a large PC screen. Naturally, it supports both video and 6K PHOTO / 4K PHOTO. This greatly assists professional workflows in commercial photoshoots at studios.

^{* 5}GHz Wi-Fi® is not available in some countries.

^{*} Direct connection is 2.4 GHz. An access point is needed to connect to smartphone with 5GHz.

SUPERIOR IMAGE QUALITY EVEN FOR STILL IMAGES

14-bit RAW Photos for Rich Grading

Color depth when recording RAW files corresponds to super-detailed 14-bit. This equates to capturing about 4 times the tonal information possible with 12-bit, [16,384 gradations compared to 4,096). As well as taking beautiful stills with a rich dynamic range of delicate tones and colors, you can prevent gradation jump (tone jump) and overexposures that can occur when correcting an image.

High Resolution Mode

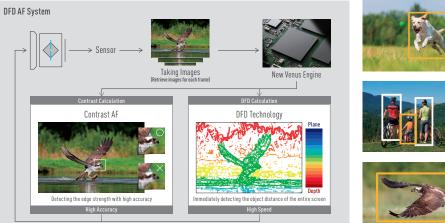

This mode enables ultra-high precision photo shooting. Eight consecutive images are automatically shot while shifting the sensor using the Body I.S. mechanism. These are then synthesized into a 96-megapixel equivalent RAW image. This mode is ideal for taking natural landscapes or works of fine art with delicate details. However, by switching the sub mode, it can also be used in situations where moving subjects are part of the scene.

Fast and Accurate AF at 0.08sec* & Built-in AI Technology

Advanced LUMIX technology provides unified control of the sensor, engine, and lens to deliver high-speed, high-precision focus at every angle. Super-fast sensor-lens communication at a maximum 480 fps and DFD (Depth From Defocus) technology helps achieve high-precision autofocus of approximately 0.08 seconds.* It also incorporates Advanced AI Technology that detects specific subjects – humans and fast-moving animals, including birds, wild dogs and felines. The S1H keeps tracking these subjects even when they turn their back to the camera.

* 11EV, at wide-end with S-R24105 (CIPA) in LVF120 fps setting.

9fps (AFS) / 6fps AFC Burst Shooting

The S1H boasts high speed burst shooting at 9 fps (AFS) / 6 fps (AFC). Together with the camera's high AF tracking performance, you can capture target subjects with almost absolute certainty.

6K PHOTO* / 4K PHOTO

Shoot an extended burst, then choose and extract the specific frames you wish to keep. Using 6K PHOTO* mode at 30 fps you can capture perfect moments at stunningly high resolutions to approx. 18 megapixels.** The ultra-high-speed 4K PHOTO mode at 60 fps freezes even faster motion, a feat utterly impossible in conventional cameras.*** In 6K PHOTO /4K PHOTO, you can choose from three exclusive modes depending on the subject and the predictability of its motion, etc. These are 6K Burst/4K Burst, 6K Burst (Start/Stop)/4K Burst (Start/Stop) and 6K Pre-burst/4K Pre-burst. Select the most suitable of these options, or the regular consecutive shooting mode in full resolution, accordingly.

- * 6K PHOTO is a high speed burst shooting function that cuts a still image out from 4:3 or 3:2 video footage with approx.18-megapixel (approx. 6000 x 3000 equivalent effective pixel count).
- ** Maximum recording time of 10 minutes in 6K PHOTO.
- *** Maximum recording time of 15 minutes in 4K PHOTO.

HLG Photo*

HLG Photo mode* supports a new style of photographic enjoyment on the screen of HLG-compliant devices — one in which the rendering of bright light is especially impressive. HSP files,** which compress a high degree of brightness, are displayed as images with breathtaking reproduction of dynamic range and extremely fine gradations of light and dark.

Conventional HLG Photo

* "HLG [Hybrid Log Gamma]" is an international standard (ITU-R BT.2100) HDR format.
** "HSP" is an HDR picture format using HLG format video technology.

Highlight Weighted Light Metering Mode

The Highlight Weighted Light Metering mode meters light with a priority on highlighted parts to prevent it from washing out.

I.S. Status Scope

The user can consciously remove the cause of shake by checking a pointer that indicates the camera's shaking condition.

S SERIES LENSES DESIGNED FOR ALL CREATORS **MOUNT**

LUMIX S PRO Certified by LEICA 50mm F1.4

The core of the LUMIX S Series of lenses with large aperture

The LUMIX S PRO 50mm F1.4 is a large-aperture fixed focal length lens with all the core elements of the LUMIX S Series. With its versatile 50mm focal length, the wide F1.4 aperture achieves high resolution across the entire image while the lens construction delivers supreme optical performance surpassing even stringent LEICA standards. Delightfully smooth defocus gradation from the focus peak to neighboring image areas achieves beautiful bokeh effects, while suppressed focus breathing assures a rock-solid frame when rack-focusing a video scene. Fast too, the double focus system's combined linear and stepping motor achieves sensor drive speeds up to 480 fps. With a refined design and superb operability this lens is built for high mobility – splash/dust-resistant* and able to withstand harsh conditions down to -10°C.

Product Number	S-X50
Lens Construction	13 elements in 11 group
Aperture Value	F1.4-F16
Closest Focusing Distance	0.44m / 1.44ft
Maximum Magnification	Approx. 0.15x
Filter Size	φ77mm
Max. Diameter	φ90mm / 3.54inch
Overall Length	Approx. 130mm / 5.12in
Weight	Approx. 955g / 33.69gz

LUMIX S PRO Certified by LEICA

24-70mm F2.8

F2.8 aperture and outstanding expression throughout the zoom range and a beautiful bokeh effect

The LUMIX S PRO 24-70mm F2.8 is a large-aperture standard zoom lens delivering highly lifelike images and striking depth. It produces high resolution and high contrast across the entire focal range for landscapes, snapshots, portraits, and more. Indeed, optical performance exceeds even LEICA's professional standards and the lens construction effectively suppresses any chromatic aberration. Adoption of a focus clutch mechanism enables instant AF and MF switching to allow fine adjustments – simply slide the focus ring forward or backward. Soft and beautiful bokeh effects are achieved by smooth defocus gradation throughout the image, while suppressed focus breathing ensures smoother operation when shooting video. The AF sensor speed is fast too, at 480 fps. thanks to a double focus system.

SPLASHIFUST/ FRIEZE RESISTANT	
ASPH	ED UHR

Product Number	S-E2470				
Lens Construction	18 elements in 16 groups				
Aperture Value	F2.8-F22				
Closest Focusing Distance	0.37m / 1.21ft				
Maximum Magnification	Approx. 0.25x				
Filter Size	φ82mm				
Max. Diameter	φ90.9mm / 3.58inch				
Overall Length	Approx. 140mm / 5.51inc				
Weight	Арргох. 935g / 32.98оz				

LUMIX S

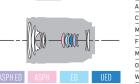

24-105mm F4 MACRO O.I.S.

Covering the wide-angle to medium telephoto range with macro shot capability

The LUMIX S 24-105mm F4 MACRO 0.I.S. is a standard zoom covering wide-angle to medium-telephoto with high performance throughout. In addition, it has a 0.5x macro capability to 0.3m focusing distance (min.). The lens works effectively with Panasonic's 5-axis Dual I.S.2 technology, a stabilization system being used for the first time with a full-frame mirrorless camera system. The Optical Image Stabilizer (O.I.S.) in the lens effectively compensates against camera-shake so you can shoot in low light, or without a tripod, even in telephoto. The high-precision linear motor achieves sensor drive speeds up to 480 fps for super-fast AF, while suppressed focus breathing will be especially appreciated by video creators.

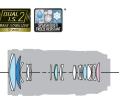

Product Number	S-R24105				
Lens Construction	16 elements in 13 groups				
Aperture Value	F4.0-F22				
Closest Focusing Distance	0.30m / 0.98ft				
Maximum Magnification	Approx. 0.5x				
Filter Size	φ77mm				
Max. Diameter	Φ84mm / 3.31inch				
Overall Length	Approx. 118mm / 4.65inch				
Weight	Approx. 680g / 23.99oz				

LUMIX S PRO Certified by LEICA 70-200mm F4 0.I.S.

A telephoto zoom lens with high resolution with stunning clarity across the entire zoom range

This LUMIX S PRO 70-200mm F4 O.I.S. telephoto zoom lens provides high-resolution, high-contrast images across the entire zoom range, from portraits to sports. It is compatible with Panasonic's 5-axis Dual I.S.2 stabilization system, now being used with a full-frame mirrorless camera system for the first time. The lens features an Optical Image Stabilizer (0.I.S.) to compensate against camera-shake. This means you can shoot in low light or without a tripod, even at 200mm focal length. Designed for optimum lens alignment, bokeh effects are beautiful with minimal vignetting. The high-precision linear motor achieves sensor drive speeds up to 480 fps and suppressed focus breathing assures stable focus-racking for videos compared to lenses only designed for still photography.

Product Number	S-R70200				
Lens Construction	23 elements in 17 groups				
Aperture Value F4.0-F22					
Closest Focusing Distance	0.92m / 3.02ft				
Maximum Magnification	Approx. 0.25x				
Filter Size	φ77mm				
Max. Diameter	φ84.4mm / 3.32inch				
Overall Length	Approx. 179mm / 7.05incl				
Weight	Approx. 985g / 34.74oz

A NEW GENERATION OF VISUAL STORYTELLERS imes ime

Nick Dabas

Nick Dabas is a director of photography based in New York City. Nick's passion for still image photography brought him to filmmaking where the creative process and different techniques of cinematic production piqued his interest. Nick's polished style, and clean visuals have allowed him to make a living in fashion, advertising and music video production. Nick's success has allowed him to establish Paper Bag Media LLC and blessed him with opportunities to make a living doing something he loves.

Carissa Dorson

Carissa Dorson is a cinematographer originally from Silver Spring, Maryland, USA. She learned her craft at Florida State University's College of Motion Picture Arts, and now resides in Los Angeles. She began her career shooting videos for CollegeHumor and Funny or Die, and has since expanded to features, short films, commercials, and music videos. As a cinematographer, her work has appeared at festivals such as Tribeca and Cinequest, and on networks such as Adult Swim and Showtime.

Peter Hamblin

Raised in Durban, South Africa producer/director Peter Hamblin has travelled world-wide and lived in LA, London and Cape Town. He began his career in advertising but was soon drawn to long form film-making. So, in 2009 he started Hamblin Imagery, a UK production company. Peter's career highlights to date include his award-winning sports-action short film "Wright side of Wrong". More recently he wrote, directed and produced "Let's Be Frank" an Emmy award-winning surf movie that brings a fresh style to the genre and exemplifies innovative film-making at its best. Now Peter is working on a short fiction film called "In Hope Of Nothing" about the challenges of film-making.

Alicia Robbins

LA-based director of photography Alicia Robbins received her MFA in Cinematography in 2003. She has shot for TV shows including episodes of Shonda Rhimes' "For the People" (Season 2) and "Grey's Anatomy". In film, she has recently received an Emerging Cinematographer Award for her short "Internet Gangsters" and performed past work on the awardwinning romcom, "The Wedding Invitation", "Creed II", "Tag", The Post" and others. She also has credits on two features due for release this year, "Babysplitters" (a Best Narrative winner) and "Forever Not Maybe". In addition to cinematography work, Alicia has been the lead DP at Driving Plates, a company making background footage.

Jacob Schwarz

Jacob Schwarz is an American-based film director and cinematographer. As a visual storyteller, he always "strives to be comfortable with being uncomfortable". He has never been afraid to experiment with new technologies and techniques that help tell stories able to inspire the human spirit. Jacob is fluent in Russian and lived in Siberia for several years. Over the past 5 years he has spent most of his time traveling around the world directing and shooting commercial content.

David C. Smith

David C. Smith is a cinematographer, cinema technologist, CEO and creator of DrivingPlates.com LLC, the world leader in 360 motion environments for driving scenes used in television and films. Recent projects include "Bohemian Rhapsody", "The Post", "The Irishman", "Narcos", "This is Us", and hundreds more. Throughout his career, David has always been a forwardlooking technologist and inventor. In service of a creative vision, he has continually innovated the techniques and tools for bringing a story to the screen. With an eye toward the needs of the next generation of content, Smith is pursuing multiple endeavors that promise to impact narrative production for decades to come.

Jacob James

Travel and cultural documentary photographer Jacob James, an ambassador for Panasonic UK, has a passion for immersing himself in new cultures and experiences. His work, he explains, revolves around capturing the human side of life for people across the globe, "Whether the nuances in different cultures that make us all unique, or the simple, instinctual emotions that deep down we all have in common." Aiding Jacob in his work – through which he aims to inspire people "to see the world as a much smaller and more exciting place" – is Panasonic's LUMIX camera range. "I've been amazed at the flexibility and enjoyment I've rediscovered in using LUMIX camera systems," he says.

LUMIX AMBASSADOR

LUMIX

Panasonic launches LUMIX PRO program, a hub for its LUMIX Professional Services that is designed to satisfy the needs of creative professional and to ensure that they can continue to work, through a range of service and repair benefits, and consistent global support.

	Fan		Auto1/Auto2/Normal/Slow				

WIRELESS	Wi-Fi		2.4GHz (STA/AP) (IEEE802.11b/g/n) 5GHz (STA) (IEEE 802.11a/n/ac) *5GHz Wi-Fi is not available in some countries.
	Bluetooth		Bluetooth® v4.2 (Bluetooth Low Energy (BLE))
DUST AND SPLASH RESISTANT*			Yes. *Dust and Splash Resistant does not guarantee that damage will not occur if this camera is subjected to direct contact with dust and water.
POWER	Battery		Li-ion Battery Pack (7.4V, 3050mAh, 23Wh) (bundled) USB power supply, USB power charging
	Battery life (CIPA standard)		Approx. 400 images (rear monitor), 380 images (LVF), 1,150 images (Power Save LVF mode*) with S-R24105 "Under the test conditions specified by Panasonic based on CIPA standard. When the time to get in the sleep mode is set to 1 sec.
	Battery grip		DMW-BGS1 (sold separately)
DIMENSIONS / WEIGHT	Dimensions (W x H x D)		Approx. 151.0 x 114.2 x 110.4 mm / 5.94 x 4.50 x 4.35 inch (excluding protrusions)
	Weight		Approx. 1,164g / 2.57 lb (SD Memory Card x 1, Battery, Body) Approx. 1,052g / 2.32 lb (Body only)
OPERATING ENVIRONMENT	Operating temperature****		-10°C to 40°C (14°F to 104°F)
	Operating humidity		10%RH to 80%RH
STANDARD ACCESSORIES	Software	Recording	LUMIX Tether This software is used to control a Panasonic digital camera from a PC. It allows you to change various settings of the camera, perform remote recording, and save remotely recorded images to the PC. Check the site below to download and install the software. http://pansonic.jp/supor/jolobal/cs/soft/download/g_lumixtether.html (For Windows / Mac)
		Playback / Editing	The software to edit and playback images on computer is not bundled with this camera. To do this, PHOTUNISTUDIO 10.1PE is available for download at Panasonic website using computer connected to the Internet. https://panasonic.jp/support/global/cs/soft/download/d_pfs1001pe.html[For Windows] The software to process RAW file on computer is not bundled with this camera. To do this, SILKYPIX Developer Studio is available for download at Ichikawa Soft Laboratory's website using computer connected to the Internet. http://www.isl.cojp/SILKYPIX/Jenglish/jp/[For Windows / Mac)
	Standard accessories		Body Cap, Hot Shoe Cover, Eye Cup, Flash Synchro Socket Cap, Cover for the Battery Grip Connector, Shoulder Strap, Battery Pack, Battery Charger, AC Adaptor, AC Mains Lead, USB Connection Cable (I-C), USB Connection Cable (I-C), BNC Converter Cable, Cable Holder * The DC-S1H Operating Instructions for advanced features is available for downloaded at Panasonic LUMIX Customer Support Site using PC, smartphone or tablet connected to the Internet.
